Paisley Mercantile Co.

The People's Popular Store

For the New Year

1918 cannot produce happiness, but so far as Canada is concerned there will be no real poverty. Europe could not supply enough food in normal times, and while this terrible war continues it is simply impossible to do so, and Canada must do more to make up the absolute necessaries in food and munitions. The result of the enormous success of the victory bonds will supply the money. Merchants, in order to have a proper selection of goods necessary for the wants of home demands, must use every effort to have the proper goods when needed. This will be no easy task, and will require very much more capital than ever before. We therefore must ask all accounts settled by cash or notes before the 5th of January, 1918, especially so as our old books are filled up and no room in safe for new ones. It is therefore imperative to have every account settled by cash or note before above date. Please attend to this.

Wishing you the compliments of the season.

The undersigned desire to thank their neighbors and friends for the sympathy and condolence extended to them in their recent bereavement. Mr and Mrs D. Woods and Family.

CARD OF THANKS

The undersigned desire to thank their friends for the many kind expressions of sympathy extended to them in their recent bereavement.

Mrs Jas. Hyde and Family

—Mr Jas Ellis is home from Toronto for a week.

—Rev. and Mrs Crighton have been visiting in Toronto.

—Mr Wm Bruce was over from Kincardine for a few days.

—Mr and Mrs J A Logie are visiting at Guelph and Milton.

—Dr. Black, Miss Zeta and Leslie were up visiting Paisley friends.

—Mr Norman Shephard, of Brantford, was in town for a few days.

—Miss Rose Woodcock of Palmerston, is a visitor at W Sutherland's.

—Miss Ina Allen was home from Mount Forest for the New Year holiday.

—Horse buyers from Toronto will be here next Tuesday. See adv on last page.

—Miss Kate McArthur, of Port Elgin, was visiting her friend, Miss Jean Fullerton.

—Mr Lawrence Hopper, of Victoria Harbor, is visiting his mother, Mrs J O Hopper.

—Mr Jas. Jack, of Humbolt, Sask., is making a winter visit to his parents, Mr Alex Jack.

—Miss Ethel Kennedy, of the Orillia public school staff, spent the vacation at her home here.

—The coldest since 1871, say the weather authorities. Cold enough, anyway, says everybody.

—Mr and Mrs Geo Archer and children, of Galt spent Christmas with their sister, Mrs. D. Parliament.

—Misses Maggie and Phemie Cameron went to Toronto last week and intend remaining in the city.

—Mr H Walpole, of Elderslie, was down visiting friends at Galt and other points over Christmas.

—Miss Alice Rankin, left on Wednesday for Eldorado, Ont., where she has engaged to teach for the term.

—In Form I school report published last week the first name should have been Hazel Bird instead of Hazel Burns.

—Mr and Mrs Albert E Wynne, of Wetaskawin, Alta., are visiting at the home of his father, Mr Ed Wynne, Greenock.

—The W C T U will meet to make final arrangements for the silver thimble and Trinket Fund on Friday, Jan 4th, at 3 p m, in Putnam's Hall.

—Mr and Mrs John Ryan and children have returned to their home in Walkerton after visiting the latter's parents, Mr and Mrs Thos Collins. Mrs Collins is suffering from a badly sprained wrist, which she sustained by falling on the ice.

"Birth of a Nation," Town Hall, Jan. 14th

D. W. Griffith's massive spectacle, "The Birth of a Nation," the same as produced in Massey Hall, Toronto, will be given in the Town Hall, Paisley, on Jan 14th. Keep the date in mind, and watch for full announcements.

Died Leading His Men

A soldier friend of the late Corp Emmerson Pearce sends particulars as to the death of the latter. He says: "One of the boys of his (Emmerson's) section is with me now. He saw Emmerson hit and bandaged him up. He suffered very little and died a few hours afterwards. We were unable on account of the mud and water to get him and a lot of other boys out. It may be some consolation to know that when Emmerson was hit he was leading his men in the first wave. They had passed our objective and were about 300 in advance of it. He is sorely missed by all of us. He was a favorite with his men and a great loss to all."

Hockey Match

Chesley vs Paisley

The first hockey game of the season will be played on Friday evening at 8 o'clock sharp, at the skating rink, Paisley, against our old rival, Chesley. Be sure to line up and encourage the boys in good clean sport.

Skating after the game.

Christmas! Christmas!

WE ask you to call and see our numerous articles suitable for Christmas presents, such as Kodaks, which make the finest gift, also Films and Supplies, Vanaphones and Records, Air Pillows for your soldier friends, Chamois Vests, Chocolate Candies in packages, Perfumes, Toilet Waters and Creams, Postal Albums, Snapshot Albums, Handbags, Purses, Safety Razors, Strops, Pipes and Tobacco Pouches, Fancy Toilet Cases with Comb, Brush and Mirror in white ivory or ebony, Comb and Brush Sets in fancy boxes, also in white ivory trays, Manicures in individual pieces, also Combs, Brushes and Mirrors in single pieces, Postal Cards and Photo Frames in celluloid and metal.

I.

"The sentence of the court is that Private Albert Kane be dishonorably dismissed from the service of the government."

Colonel Scott snapped out the words. Private Albert Kane raised his head and looked at the officers for the first time. Drunkard, wastrel, outcast, he had expected a minimum of two years' imprisonment. And that was all his sentence—to be dismissed from the regiment.

"You're lucky, Kane. Wish I was in your shoes," said one of his companions, as he gathered his things together. "Going East, I suppose?"

"Yes," answered Kane nonchalantly, and walked toward the entrance of the camp.

Kane was free. He had enlisted six months before, after a year of dissipation, in the vain hope of forgetting the past. Once, so long ago that the memory of that time was like a dream to him, he had been a decent man. He had had a good position in a western city, and he had loved Dorothy Davis, whom he knew to be the one woman in the world whom he must love forever. At last he had been fit a position to ask her to become his wife. And she had broken the news to him that she was engaged to be married. It was to Colonel Scott, a man considerably her senior, and Kane had gathered that if he had asked her sooner . . . however, there was no use speculating about that.

Kane gave up his position, and he hardly remembered anything of the year that followed. Suffice it that, at the end of it, he found himself penniless outside an army camp in Texas. He had the sudden thought of redeeming himself. Here, at least, there would be a life of action. Kane enlisted.

He found the monotony of army life in the little border post intolerable. He found that Colonel Scott was his commanding officer. He found that every week he saw Dorothy. He fled from the sight of her, and fortunately for him she did not recognize him in his soldier's uniform. Once he was sent on a message to her home, and he left the message with the servant and fled. He ate his heart out. He became known as the worst soldier in the regiment. He was continually punished. At last he committed a

In a Moment He Was Away.

graver offense against discipline than drunkenness and negligence, and was tried by courtmartial and dishonorably discharged.

In his relief from his fate he resolved to go East and try to make a man of himself. But as he stepped, with his bundle upon his arm, across the enclosure, he saw Dorothy coming toward him.

In vain he turned his eyes away. She saw him; she knew him. He saw the look of recognition in her eyes. She stepped. Kane hurried past her, not daring to look back. He gained the entrance to the barracks. But he did not go toward the railroad station, as he had planned. Instead, he turned southward toward the border. He walked jauntily past the customhouse, over the bridge, and flung himself upon the ground. He was in Mexico, and he never meant to return.

II.

Albert Kane looked up into the sky and searched the distant hills.

The summer sun was declining, and as the mescal went out of him he realized his abasement.

For fifteen months he had lived in the squalid Mexican village twelve miles beyond the border. At first looked on with suspicion, he had become completely identified with the villagers. He sprawled in the adobe hut, an unclean thing, like the creeping lizards about him.

Few men have sunk to such depths as Kane had reached. Now, deep in his heart, an elusive memory stirred. It was a memory of America, which had once been dear to him, of a civilized land where human faces looked into his instead of the brutish peasants' eyes.

What was it he was remembering?

He knew now. Somebody had kicked him. It was the rebel leader Santos, riding by with a hundred troopers. And what was it had been said?

"The Gringo is always drunk. He is harmless. Do not kill him."

Santos had kicked him contemptuously and ridden on his way. But Kane remembered now. He remembered the whispered colloquy. Nobody knew that he understood much Spanish, for he seldom spoke to anyone. But Kane had gathered that the troop was to raid the American camp at sunup.

Slowly the realization of this crept into his mind. He heard again the laughter of the Mexican leader, his boast of what he would do to the Gringos, his talk of the American women . . . then slowly, like a flower, Dorothy's face unfolded before his eyes against the fading West.

Kane staggered to his feet and looked about him. Tethered to a near-by hut was a fine stallion, the property of Santos, which he had left there till his return on the morrow, not wishing to risk it in the impending fight, if fight there was to be. Nobody was guarding it.

Kane crept toward it. He saw the saddle and bridle at the door of a near-by hut. In a moment he had placed the saddle on the animal's back and fastened the girth.

He fitted the bridle, hearing shouts as the Mexicans saw him and divined his purpose. Then ran toward him, Kane cut the halter and leaped on the stallion's back. In a moment he was away, galloping along the road that led toward the border. Behind him he still heard the cries of the stupefied Mexicans.

III.

Once out of sight of the village he moved slowly, for before him, miles away, outlined against the horizon, he saw the cavalry of Santos marching. The day died and the stars came out. Kane rode along the deserted road.

It was midnight when he saw far off the winding Rio. Looking down, he saw the camp of the raiders at the foot of the hill. A high bank on either side of him, rising into the mountains, cut off all possibility of a detour. He must ride through the camp.

He gave his horse a rest; then, mounting, he continued, very cautiously, until, topping the last hill, he saw the pickets under him. Then he put his horse to the gallop.

Faster and faster he drove the stallion down the hill. He heard the shouts of the guard, he caught a vision of men, risen from sleep, staring at him; and then he was running the gantlet between two lines of Mexicans. He heard their excited shouts. Bullets whizzed past him. He felt as it were the sting of a bean through the forearm, through the shoulder. His right hand, pierced, dropped nervelessly from the reins. He felt the blood stream down him.

Then he had passed them, and as his snorting horse gathered itself together beneath him he heard the troop, with wild yells, take up the pursuit. The river glistened before him. The current ran fast and strong. Only a moment he hesitated; and, as he did so, he felt another sting under the arm. Then he drove the stallion into the river.

The bullets whipped the water about him. Kane felt his senses leaving him, and an awful faintness. He felt the icy water wrap him round like a shroud. Behind him his pursuers had halted. No ordinary horse could swim from the south to the north bank of the Rio in flood time.

The current was sweeping him away. But before him he saw, white against the night, the tents of his own people. With a last effort Kane spurred the flagging beast beneath the water. The stallion screamed and suddenly began to tread upon the river bottom.

Splashing and plunging, it gained the American side and rushed up the bank. Behind him the Mexicans were still firing, but now the bullets went wild. Kane was in no danger. If only he could pull himself together and reach his goal!

He reined in the stallion with his last reserve strength. He walked it slowly through the entrance to the camp. Men were already alert, aroused by the shots, and falling in. Kane heard the colonel's voice. He saw a woman standing at his side. He stopped the horse in front of the commanding officer.

"Santos is leading a party to attack the camp, sir," he faltered. "I came to—warn you—"

And Kane fell from his horse into the arms of the colonel's orderly.

They carried him into the colonel's house. Kane opened his eyes after a long interval, to see faces looking into his. He saw the doctor shake his head. A sense of supreme joy thrilled him. It was good to die—it was good that this should be ended—and be ended thus.

And among the faces he saw that of the colonel's wife. Her tears fell over him. Kane tried to speak, but there was no need of speech. In that last interchange of looks all was explained, and the reconciliation effected. He had saved others—what did it matter if he could not save himself?

And, with his eyes still holding Dorothy's look, he fell asleep.

Purity of air is necessary for the sick. This is often lost sight of by patients and those to whose care they are intrusted. During the convalescence of patients from acute diseases in cold weather, we find in homes and hospitals where there are the greatest luxuries that those in attendance on the sick often neglect maintaining the regulation temperature. The patient does not get his fresh air unless it happens to be summer. Physicians, internes and nurses, who have to be up and down at all times of the day and night, are often thoughtless of those whom they serve and often fail to dress themselves sufficiently for protection against the cold air that the patient in bed should receive if those in charge are to get the best results. They should measure the temperature of the room by a thermometer and not by their own feelings. This is an important fact to be remembered by both patient and caretakers.

ANCIENT HEBRON.

Most Venerable of Earth's Cities and Rich in Historic Interest.

Hebron, recently captured by the British forces in Palestine, is a very ancient city, figuring, in fact, as one of the oldest in the history of Canaan. Its modern Mohammedan name is El Khalil, or Khalil Allah, "Friend of God," said to have been so named from its association with Abraham, for the Moslems regard it as one of four sacred cities, the others being Mecca, Medina and Jerusalem. It lies only twenty-one miles south-west of Jerusalem.

The city of Hebron is referred to in the Old Testament in Numbers xiii, 22; Genesis xxiii., 2; Joshua xiv., 15. As a sanctuary it was the most famous of the south, and the three patriarchs—Abraham, Isaac and Jacob—are reported as have sojourned at Hebron (Genesis xiii., 18; xxxv., 27; xxxvii., 14.) A legend has it that they were all buried there, with Rebecca and Sarah, while even to-day an old oak is pointed out at Mamre, near by, as that of Abraham.

The spies sent out to visit the Promised Land ventured to Hebron, and Joshua was said to have destroyed the city before giving it as a heritage to Caleb, and made it a city of refuge. Then the place figures prominently in the history of David, for it was here that he was anointed King, first over Judah, and then over the whole of Israel. (II. Samuel ii., 1-4; v., 1-3.) Absalom also made his attempt to capture the Throne from Hebron, but soon after that time it disappears from marked prominence in Bible story, in the Apocrypha it is mentioned, however, as being the place that Judas Maccabeus took from the Edomites.

Control of Insect Pests in Canada.

The annual report of the Dominion Entomologist for the year ending March 31st, 1917, has just been issued by the Department of Agriculture, Ottawa, and in its twenty-four pages a brief record is given of the activities of the officers of the Entomological Branch. The necessity of protecting all our crops from insect pests with a view to increasing crop production is more urgent than ever at this present time. The establishment of regional entomological stations, of which there are now ten in different provinces, has greatly enlarged the scope of the work and the usefulness of the officers concerned. Concise statements are given of the progress of the following lines of work: investigations on insects affecting grain and field crops, garden and greenhouse, fruit crops, forest and shade trees, stored grain and other products, insects affecting domestic and other animals, the household and public health; the introduction and colonization of parasitic insects and studies of natural control; field work against the brown-tail moth in the Maritime Provinces; and the inspection of imported nursery stock. A brief statement of the work undertaken with a view to conservation of wild life, particularly birds, is also given.

The publication does not contain any recommendations respecting the control of insect pests, such information is published in the bulletins and circulars of the Entomological Branch. It comprises a brief account of the year's work and will be of interest to all who desire to learn what progress is being made in this line of scientific research as applied to agriculture. Copies may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa. All enquiries respecting insect pests should be addressed to the Dominion Entomologist, Department of Agriculture, Ottawa; such requests and enquiries may be mailed free of postage.

The Difference.

"Oh, I must live!" one said, and then
Left Freedom's call unheeded.
Who told him that 'mong living men
His little life was needed?

"Freedom must live!" another said,
As o'er the ridge he bounded;
On its red slopes they found him dead,
By his brave men surrounded.

One spared himself; his soul became
Dead as a tree, dry-rotten;
One fell—but all a country's fame
Is by such deaths begotten.

—Alexander Louis Fraser.

The Press in Canada.

There are 1,381 publications of all kinds now being issued in Canada, including 138 dailies, 4 tri-weeklies, 40 semi-weeklies, 921 weeklies, 222 monthlies, 1 bi-monthly, and 16 quarterlies.

THE LOOK OF HATE.

Little Girl—Mummy, Bobby keeps on looking at me in German!

THE MESSAGE OF THE COWS

UNIQUE METHOD EMPLOYED IN CONVEYING SIGNALS.

Many Clever Expedients Used by Spies to Impart Information to Retreating Huns.

Prosaic activities of small farmers must take place, in northern France, in the shadow of the great guns. According the French artillery officers did not think it at all remarkable when a farmer with two red cows and one white one drove them down the road every day to the pasture, while the German and French shells shrieked overhead. But after the three cows, strung out in single file, had gone by the German artillery flamed forth in renewed activity.

It seemed imbued with a startling prescience regarding columns of troops, files of supply trains and locations of new guns. A French officer became interested in that procession of cows. It never seemed the same on two successive occasions. Sometimes the white cow would lead. Sometimes the white one was between the two others. Sometimes the farmer would whip one or the other of the creatures ahead of the line. Frequently the formation altered several times in the half-mile journey.

Every change in formation seemed utterly needless to the purpose of driving three cows to pasture. The officer apprehended the man on the way back. "You will not see the sun so high in the heavens to-morrow," he remarked casually. "You have not done well—for France!" The peasant's face paled. He tried to pretend astonishment, but his fear and confusion were too obvious. He told his story to the drumhead court that convened to listen. The Germans, in falling back, had arranged a "three cow" method of signalling. The three animals were capable of half a dozen different formations that spelled a half dozen different truths concerning troop movements and artillery accuracy. He was paid well by the Huns and coached for a couple of days in the tactics to be pursued before they fell back.

The French officer was right. The peasant saw only one more sunrise. And for him there was no sunset.

"Shirt Signals."

Another clever expedient for signalling was that employed by the "woman of the shirts." She seemed always washing them. Up on a little knoll where her little house stood they flapped and danced on the clothesline in the fresh morning sunlight. Back of and beyond that knoll the guns loomed sullenly, their smoke plumes lifting lazily like blossoms of white against the green hills. The shirts flapped red and blue and white and red again—some very close together, some widely spaced. After a few days they arrested that woman. Terror-stricken, she babbled her confession of the "shirt signals." She had sold her country for silver and followed the instructions of the retreating Huns.

Sheep have been used to signal. Chimneys smoked on alternate mornings; stopped suddenly and smoked again. Peasants who would sell their country for gain have stood against stone walls. Signalling is an interesting thing—Pizarro raised his hand for the famous massacre of the Incas—and history is replete with incidents where things were indeed "not what they seemed."

Stranger, weirder signalling than that done by spies in the present war, however, has never previously been achieved.

Calls You As Coffee Boils.

A gas stove which arises at dawn, boils the coffee and wakes you up when it is ready has been invented by Gennaro Rosa of Brooklyn, N.Y. The gas burner has a pilot light to which is attached a clock mechanism. A dial over the clockworks serves to tell the time. A smaller dial is used to set the alarm, igniting and extinguishing devices. When set the burner under the coffee pot will automatically ignite at a predetermined hour and boil the coffee for four or five minutes. The flame will then lower of its own accord to slow boiling for another five minutes, after which it will shut itself off entirely. The coffee is now ready for you and an alarm is sounded.

About the House

DOMESTIC SCIENCE AT HOME

Twenty-Third Lesson—Canning Vegetables.

It is absolutely necessary that we include vegetables in our daily diet. The purchasing of cheap or low-grade canned goods for home consumption is poor economy. Aside from the danger of sickness, an inferior article makes it impossible to have good results when cooking.

Vegetables, particularly the succulent ones, are reasonable priced during the warm weather, and owing to their well-known perishable qualities they do not keep for any length of time in their natural state.

An assortment of home-canned vegetables will prove a most welcome addition to the pantry during the winter season, besides saving many times their original cost.

Bacteria cells cover all vegetables, and unless they are completely sterilized this bacteria will cause fermenting action to take place in the jar, and then the contents will be a total loss.

To Can Asparagus

Select perfectly fresh and young asparagus. Wash it carefully to remove the sand. Peel the stalks carefully and trim away all the hard and pithy portions. Let it lay in cold water until all the asparagus is prepared. Then tie it in convenient bundles for easy handling while blanching and cold dipping.

Blanching—Have a large pot of water boiling. Place the asparagus in this water when it starts boiling and boil for ten minutes. Remove and cold dip by dropping into a pan of very cold water.

Pack into the jars, the tip end down, as closely as possible. Put a silver knife in the jar to prevent cracking while filling with boiling water. Remove the knife and put the rubber and lid in position. Partially tighten and then process in hot-water bath for two hours after the boiling has started. Remove and tighten the lid securely as possible then invert to cool. When cold, store the jars in a cool dry place.

Points to remember for successful results:

The asparagus must be young and fresh.

Wash carefully to remove any sand. Peel and remove the pithy parts.

Blanch and cold dip.

Place a silver knife in the jar when pouring in the boiling water.

Be positive that the jars, rubbers and lids are sterilized and in good condition before using.

To successfully can vegetables, and in fact all food products, these foods must be completely sterilized. All accessories, such as jars, lids and rubber, must also come under this rule.

Vegetable Structure

The cellulose structure of vegetables is tough and fibrous in character, and because of this the vegetables require a long time—from three to five hours—to be completely sterilized. Many successful canners use the old sectioned time method, that is, to heat it to the boiling point and cook for one hour, then seal. Repeat this process for three successive days. This is a troublesome method which requires considerable time for handling and cooking. Newer and more modern methods have eliminated all this.

The Cold-Pack Method

This method is now in general use in all the large canneries, and is much preferred because it gives a beautiful appearance to the vegetables. It can be successfully accomplished with the same results in less time than by other methods.

In using this method, the vegetables are blanched, cold dipped and then packed in sterilized jars, the rubbers adjusted and the lids partially tightened and then processed.

Cold Dip

Cold dipping of blanched vegetables is necessary to make them firm enough to handle after being partially cooked and also to set the coloring matter so that it will not easily dissolve during the rest of the process.

Be positive that the water is boiling rapidly after the jars have been placed in the water bath before counting the time for the process.

Remember that no food will spoil that is absolutely sterilized, that bacteria, spores and germs are exceedingly hard to kill and that only long and careful cooking will accomplish this.

HOW SHALL I USE THE LEFT-OVER TURKEY?

Turkey Eminee.—One cupful of small pieces of turkey, one onion, one green pepper, one-half cupful of gravy. Mince the onion and pepper fine, then parboil and add to the minced turkey. Moisten with gravy and heat until very hot. Serve on toast.

Turkey Terrapin.—One cupful of cold turkey, cut in one-inch blocks, two tablespoonfuls of flour, one cupful of milk. Season with one teaspoonful of salt, one-half teaspoonful of Worcestershire sauce. Blend the flour and milk and then cook for five minutes. Add the cold turkey meat. Shake or toss until very hot. Add the yolk of egg and a dash of nutmeg. Serve.

The old question is here answered in a few palatable receipes.

Turkey Fritters.—One cupful of flour, one-half teaspoonful of salt, two teaspoonfuls of baking powder, one cupful of milk, one egg. Mix the dry ingredients together and milk and beaten egg. Mix to a smooth batter and then fold in one cupful of finely chopped cold turkey, one-half teaspoonful of pepper. Mix well, then fry in hot fat and serve with Chili sauce.

Turkey Club Sandwiches.—Use two slices of toast cut in triangles. Cover the toast with a leaf of lettuce, then lay on two thin slices of turkey, then one thin slice of ham or bacon and then another leaf of lettuce. Cover with a second slice of toast. Garnish with olive, pickle and then serve with one tablespoonful of mayonnaise on leaf of lettuce.

To Use the Filling.—Cut the cold boiled potatoes in thin slices, use about two cupfuls; put in a frying pan in which four tablespoonfuls of shortening has been made very hot. Turn the potatoes in and add one and one-half to two cupfuls of turkey filling. Heat thoroughly and add one cupful of gravy or stock; cook until moisture evaporates and a brown crust forms. Mold into shape by pushing to the side of pan. Turn out on a hot platter in an omelet shape and then serve.

Turkey Broth.—Crack the bones and then cover with cold water. Cook slowly for one and one-half hours. Strain and cook until reduced to one-half. Blend two tablespoonfuls of corn-starch with five cupfuls of the prepared broth, then bring to a boil. Add one teaspoonful of finely chopped parsley and then serve. If there is not a sufficient amount of broth add milk. Try this; it is delicious.

COTTONSEED FROM U. S.

Republic Will Supply Canada With Necessaries for Home Consumption.

The United States Food Administration has completed arrangements with the Food Controller of Canada whereby cottonseed oil and its products may move into Canada for local Canadian consumption. There will be no re-export of these products.

As Canada raises sufficient hogs for its own uses, export licenses for hogs will not be granted for an indefinite period. The policy of the Food Administration is to see that Canada is supplied with certain necessaries, from the United States, required for feeding their own people; but no more.

Regular licenses will be required on all shipments as heretofore, but no licenses will be issued without the approval of the Food Controller of Canada.

The average depth of the English Channel is 110 feet.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Grasses have an important place in crop rotation. In choosing the variety of tame grass to be sown, attention should be paid to the moisture requirements of the grass and its adaptation to the particular soil in which it is to be planted.

Timothy, Kentucky blue grass, meadow fescue, redtop, brome, orchard, Bermuda and tall oat grass have a general adaptation to farm crops. Usually these grasses should be sown in combination with one or more of the legumes, such as alfalfa or clover, as this improves the condition of the soil and adds a great deal of nitrogen.

Combinations of grass that have been grown successfully in some parts are 8 lbs. of timothy and 2 lbs. of mammoth or alsike clover; 12 lbs. of orchard grass and 8 lbs. of red clover; 10 lbs. of brome grass and 8 lbs. of red clover; 5 lbs. of brome grass, 5 lbs. of orchard grass, and 6 lbs. of red clover to the acre.

A desirable mixture for some localities is 6 lbs. of redtop, 6 lbs. of meadow fescue, and 6 lbs. of orchard grass. For others a good combination is 10 lbs. of brome grass and 10 lbs. of alfalfa. None of the tame grasses have succeeded in some parts, except when planted in very rich creek bottoms.

The usual amounts of seed per acre when sown alone are 12 lbs. of timothy, 24 lbs. of Kentucky blue grass, 20 lbs. of orchard grass, 12 to 15 lbs. of meadow fescue, 14 lbs. of redtop, 20 lbs. of brome grass, 25 lbs. of tall oat grass, 10 lbs. of red clover, 10 lbs. of mammoth clover, 6 lbs. of alsike, 12 to 15 lbs. of alfalfa. When two or more varieties are sown together it is more satisfactory to sow at a slightly increased rate.

B.C.:—What effect on the soil has the application of hydrated lime and unbleached wood ashes? Effect of mixture of the two with stable manure? For what crop are they best suited?

Answer: — The application of hydrated lime or unbleached wood ashes to the soil, if the soil is clayey in nature, tends to gather together the tiny particles of clay soil into a coarser crumb, and to materially benefit the mechanical condition of the soil. When hydrated lime or unbleached ashes is mixed with stable manure, it tends to liberate the ammonia or nitrogen of the manure and to revert the available phosphoric acid. Never mix ashes and manure or lime and manure for this reason. Lime is highly desirable for all crops of the legume nature, such as peas, beans, clover, alfalfa and the like, not so much because it is a plantfood as because it brings the soil into condition where the bacteria that live on the roots of the legumes thrives at their best. Ashes are especially valuable on soils where root crops are to be grown, since the amount of potash which they contain—if the application is fairly liberal—will materially help the laying down of starch within the roots of sugar beets, turnips or potatoes. At the same time, the addition of ashes, since it carries a considerable amount of lime, tends to bring the reaction of the soil into such form that it is a good habitation for the propagation of potato scab. If potatoes have been treated with formalin, however, so as to kill the scab and spores that may be attached to them, very little injury from scab results from the use of a medium amount of wood ashes on the soil.

Farmer:—Can you tell me how to exterminate wild oats and curled dock and wormseed mustard?

Answer:—All three weeds you mention can be exterminated by bringing the piece of land infected under cultivation and keeping it worked for a cultivated crop such as corn, potatoes and the like for two or three years, being careful of course to cultivate the crop sufficiently often to kill the growing weed plants. Broadleaf mustard can be killed out by spraying with iron sulphate. For every acre to be sprayed, mix up 100 pounds of sulphate of iron with 40 gallons of water. When the material is dissolved it should be applied in a finely divided form much like a mist. Spraying machinery for spraying potatoes gives a very satisfactory distribution for this material.

W.S.:—1. Can you tell me a remedy for wire worms? They destroyed some oats last summer. 2. Is there any way I can kill sow thistle in cultivated fields?

Answer:—1. Good crop rotation is about the only known remedy for the extermination of wire worms. 2. In order to eradicate sow thistle, cut down the high stalks with a scythe or mower before the thistles come into flower. Crop rotation and careful summer fallowing seems to be about the only way to get rid of this pest.

Poultry

The problem of economical production, with feed at the present prices, is a question that has been worrying producers during the past few months. The question of what to feed is one that requires more careful consideration than ever before. Feed is high, therefore the flock should be culled closely and nothing but the most vigorous birds retained. They should not only be fed heavily, but should be fed such feeds as will give results. For this purpose it is necessary to supply cereal, animal, vegetable and mineral feeds.

Cereal or grain feeds should form the principal part of the ration and for best results a certain proportion should be ground. The question is what are the best and most economical feeds to use. During ordinary times, a mixture of corn, wheat and oats is popular, but under present conditions milling wheat should be conserved for human food and only the lower grades used for stock feed. Lower grade wheat, oats and corn, buckwheat and barley these are all feeds that may be used to advantage. The extent to which each is used will depend on prices.

Cut ground feed, buckwheat screenings may also be used to advantage, also mixtures containing bran, cornmeal, ground oats or other similar grains.

Vegetable or green feed is absolutely necessary to keep the flock in condition. For this purpose, oats is one of the very best. Clover supplies succulence, but does not do well. Mangels, turnips, cabbage, small potatoes or other vegetable products may all be used to advantage.

Animal feed is a form of food that poultry keepers frequently overlook. It is not possible to produce eggs profitably on a ration. Sour milk is available on farms where it is used will give better results. It supplies the necessary protein to balance the ration. Where sour milk is not available, beef scrap, green cut bone or meat meal may be supplied to take the place of the grubs and insects which the birds get on range.

Mineral feed. Lime for the egg shells and mineral salts for the growth of bone must be supplied. Small quantities may be obtained from such feeds as clovers, but it is necessary to feed oyster shells or something similar to supply lime in sufficient quantities for a heavy egg production.

A sample ration is the following: Morning: A light feed of mixed grains, scattered in a deep litter. Noon, green feed, mangels, vegetable parings or sprouted oats. Night. Full feed of scratch grains.

The scratch grains should be a mixture such as lower grade wheat, oats and corn,—barley, oats and corn,—barley, oats and buckwheat,—or whatever grains are cheapest at the time. So far this season, oats have been the cheapest grain food, so it is advisable to use them to as great an extent as possible.

The present indications are that corn will be greatly reduced in price, when this happens it should be used extensively, as, supplemented with a high protein feed such as sour milk or beef scrap, it is one of the most valuable of feeds.

Besides the foregoing, a hopper of dry mash, such as ground buckwheat screenings three parts, blood flour or beef scrap one part, is kept constantly before the flock, also hoppers of oyster shell and beef scrap. If sour milk is available the beef scrap may be omitted or green cut bone may be supplied in place of either. A good time to supply this is at the noon feed when a mash made from the kitchen scraps in which is mixed the green cut bone, at the rate of about one half ounce per bird and dried off with the meal mixture, may be fed.

Because feed is high in price, don't stint the flock. It takes a certain amount of feed merely for maintenance. It is only the feed over and above this amount that can be used for production, therefore feed and water liberally.

Conservation Defined.

Conservation means the greatest good of the greatest number and for the longest time. It requires the right thing to be done at the right time in the right manner by the right person and brings the right results. It must be regarded from a national viewpoint. The individual through ignorance, does not usually conserve natural resources, hence needs education to discover many new ways of conserving all natural resources, including the human, to greater degree than now.

Profitable Windbreak.

By T. S. Hurd.

A windbreak is desirable wherever an orchard is exposed to strong winds. Pine trees and Chinese arbor vitas planted years ago now constitute the best windbreaks. Objections are often made to the red cedar on account of the fungus one stage of which spreads to apple trees. The damage from this source is probably overestimated.

The real objections to evergreens is that they are slow in growth, averaging 1½ feet a year. They afford, however, the maximum resistance to wind all the time. The roots of evergreens do not spread widely, and the orchard trees can be planted within a short distance of the windbreak.

If a person does not like pines he should plant hard wood trees, such as walnuts, pecans, or oaks. In thirty-five to forty years these trees will make a good windbreak. It is really a case of planting for your grandchildren. With hard woods the lumber investment always pays.

Cottonwoods, hedge, and mulberry trees are much in favor. They are rapid growers, and consequently the orchard trees must be planted several rods away. The rate of growth more than compensates the man who must protect his orchard in a short time for their greed in the use of the soil. The growth of cotton woods will pay rent.

Windbreaks protect trees from both summer and winter evaporation, and from cold. Snow lies more evenly in the protected orchard and melts less rapidly. The blossoms are protected from severe winds and the number of windfalls is lessened. Trees will grow more erect and in better form.

Windbreaks are, however, not without their drawbacks. Sometimes frost is more severe next to the windbreak, where the air does not circulate as freely. Injuries from insects and fungous diseases are more apt to occur near a windbreak, but these can be averted by spraying.

Pasturing Wheat.

People are warned against pasturing wheat that has made little growth, or any wheat on ground that is wet and soft. If a person is short of feed and the wheat has made a good growth, it may be pastured.

Under no circumstances should late-sown wheat be pastured, and wheat should never be pastured too close or too late in the spring. Take all stock off the fields when spring opens up. Conditions should suggest just how much pasturing should be done.

Contrary to the opinion of some persons, pasturing does not kill the Hessian fly. Other methods must be used in the eradication of the pest.

THE FARM BERRY PATCH

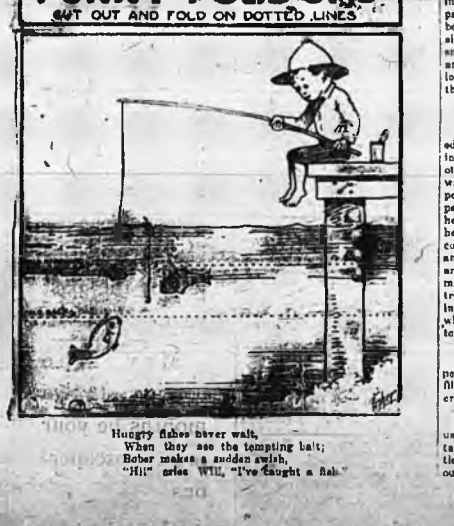
By T. J. Mathews.

Many times, when reading in the papers that there were relatively a large number of farms that had no berry patches on them, I have been rather skeptical as to the truth of this statement. Since having had an opportunity, however, to be on a number of farms, I find that the statement is all too true. It is very much the exception rather than the rule to find a farm that has growing on it enough raspberry, blackberry and strawberry plants together with currants and gooseberries to furnish the family with a supply of each one that will last from one year until the next. Of course, this statement would need to be modified somewhat for many families do not like gooseberries and for this reason the garden of such a family would not need to contain this particular kind of fruit.

There are none of the bush fruits that require an especially strong soil; neither do strawberries. Thus it will be seen that the average farm contains a number of spots that are suitable for the planting of these small fruits. Unquestionably strawberries should be planted so that they may be cultivated for at least the first few years. The rows should be at least three feet apart and many gardeners consider four feet to be better, because it gives more room for cultivation and harvesting of the berries.

Growing of Bush Fruits

It is customary to plant most varieties of raspberries four feet apart each way. The smaller sorts may be put at less distance apart while the very large varieties will need to be put even farther apart than this. Raspberries may be placed almost anywhere in the garden and they should be cultivated two or three times every year. The pruning of raspberries is also an annual job and consists in cutting out the canes which have already borne fruit and in topping back those which are to bear fruit next year.



Blackberries are planted from five to seven feet apart and cultivated the first year or two. After this the plants are allowed to grow any way they choose and further cultivation is out of the question, due to the fact that the bushes usually have so many thorns.

Currants and gooseberries are two small fruits that should be grown more extensively on our farms. One of the great redeeming qualities of these two fruits is that they are not particular as to the time of harvesting. If it is not convenient to harvest them when they first appear to be ripe, they will not deteriorate appreciably by remaining upon the bushes two or three weeks longer. For this reason picking the gooseberries or currants is a job that can be made to fill in the time between more urgent tasks. Added to this fact, currants and gooseberries are usually very saleable, and if there are any more produced than the family cares for the excess can be marketed to good advantage. Of course, the gooseberry is open to some objection since many of the brambles are so thorny but there are several varieties that are nearly free from these "instruments of torture" and when planning out the fruit garden the smooth gooseberries should be planted.

How To Plant

It is exceedingly irksome to observe some people planting their brambles. Many believe that they should dig a hole a foot deep, fill it with manure and then put the bush into this hole. Some even go so far as to carry water to the plants. Whether to plant in the spring or in the fall is a matter that cannot always be definitely decided. I like the fall planting because it allows the plant to get firmly established before winter. The soil about the roots is thoroughly compacted by the heaving and thawing and the plant is ready to bear fruit the next season. It should be remembered that most of these brambles should be planted not more than three inches deep and it is a good scheme to do the planting after a rain. Where the plant is to be placed, stick a spade down into the earth and bend it forward, put the plant into the hole thus made and compact the soil thoroughly by pushing the earth that was moved by the spade back about the plant. This compacting of the soil about the roots of the newly set plant is one of the most important features in transplanting. After the plants have been set out, thorough cultivation now and then keeps down the weeds and keeps a crust from forming; both these are of considerable benefit to the plants.

None of the brambles are very particular as to soil requirements; neither do they require careful cultivation after they have become established. They return a large amount of food for the area upon which they grow and for these reasons steps should be taken immediately to enable every farm family to store in its larder a sufficient supply of these small fruits to allow the members of the family all they desire throughout the year.

Hungry fishes never wait,
When they see the tempting bait;
Bober makes a sudden swish,
"Hit" cries Will, "I've caught a fish."

GOOD HEALTH QUESTION BOX

By John S. Huber, M.A., M.D.

Dr. Huber will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John S. Huber, care of Wilson Publishing Co., 73 West Adelaide St., Toronto.

Health that snuffs the morning air.—Grainger.

THE STAGES OF WHOOPING COUGH.

After the incubation comes the pronounced disease, in three stages: two weeks of catarrh, two weeks of spasm (the paroxysmal stage), two weeks—or more—of convalescence. It is in the spasmodic stage that pertussis is most catching. The catarrhal stage simulates an ordinary cold. There is a cough like that of bronchitis; but it does not respond to the medication appropriate to that disease, becomes indeed more persistent day by day, not however taking on the paroxysmal character until toward the end of the catarrhal stage. Now comes the spasmodic stage, characterized by the peculiar violent cough, a series of rapidly succeeding expiratory explosions, followed by a deep inspiration through partly closed vocal cords, causing that the whoop or the kink. There is by way of premonition a tickling or a sense of irritation around Adam's apple, producing presently an uncontrollable desire to cough. As the laryngeal spasm occurs there is a sometimes appalling (especially in adults) sense of impending suffocation, "as if one's last second had come." All this is now repeated perhaps several times, until finally a plug of mucus is expelled, with perhaps vomiting. This terminates the paroxysm for the time being. There are like to be from a dozen to eighty or a hundred such spasms in the twenty-four hours. During the paroxysm the child's head and face become red and dusky, the eyelids are congested, and there may be ruptured blood vessels in the "whites of the eyes." The eyes water and appear to bulge from their sockets. The nose "runs." The whole body is in a state of spasm and becomes covered with sweat. The pulse is very rapid. With the final whoop all the muscles are relaxed; and the child remains quiet, in a state of complete exhaustion.

QUESTIONS AND ANSWERS.

Is Operation Best?

I am 26, weigh 101 pounds, 5 feet 3 inches tall and the mother of three children. I am very nervous, have numb feelings in hands and mostly in the left leg. I have chronic appendicitis. One doctor advised me to have the appendix removed; another to wait until it got worse. My stomach and bowels bother me also. I have been taking a tonic for three months but have gained only three pounds. My people are all stout and my children stout and hearty.

Answer—You are 20 pounds under weight. I should not, of course, judge only by your letter. But on general principles operation would be best. Then you would no doubt be restored to good health all around.

Pronounces Indistinctly.

My little girl of seven years is unable to pronounce distinctly any words with the letter "s". She sticks her tongue through her teeth when talking. Also she invariably breathes through her mouth and grinds her teeth when asleep. Might this be just catarrh?

Answer—Such difficulty might come on after diphtheria or other exhausting disease, after mumps or inflammation of the tongue. Perhaps there are enlarged tonsils. There may be catarrh (snuffles) a. you suggest. Should any of these causes obtain, their removal would no doubt be followed by normal speech. Have the matter attended to soon, so that no speech defect habit may develop.

Sulphur My Cure-All.

While the subject is fresh in mind, after another season's experience in using sulphur as a cure-all, I want to urge our readers to be prepared to give this remedy a trial next spring, for I feel that were the benefits of sulphur better known much loss would be prevented, says a successful farm woman. Flowers of sulphur is an excellent insecticide for small operations. It is perfectly harmless, and has valuable germicidal qualities.

I have saved fine fruit trees from the ravages of ground mice and root-injuring insects by sprinkling flowers of sulphur around the ground at the roots of the trees. I put a little sulphur in the hill when I set cabbage plants, and the cutworms never molest them. I also mix sulphur with lime and sprinkle the growing cabbage to keep off the green worms.

A teaspoonful of sulphur mixed with the soil in flower pots will kill the worms that prey upon the roots of the flowers.

I also sprinkle it on the rosebushes while the dew is on, to prevent mildew.

When I set hens I put a spoonful of sulphur under the nest material, and no mites will come near the sitting hens. I also sprinkle it freely over the henhouse floor, mixed with salt, and no mites ever bother.

Sulphur mixed with lard and applied to fresh cuts or old wounds, I find will keep off flies and heal sores on all kinds of animals.

Potatoes Minus Dirt.

Say, potato raisers, have you but often wished that there were a few holes in the bottom of the pails which you use when picking your potatoes, to let the dirt sift through? Here is my scheme, which I think works fine for this purpose:

I first cut out the bottom of the pail, then get some one-inch mesh wire netting—a round piece six inches larger in diameter than the bottom of the pail. Place netting across the pail bottom and bend the edges up the sides. Next get a hoop that will fit snug over the netting, rivet it on tight, and the pail is ready for use. All loose dirt can easily be shaken out, thus saving time when emptying.

Low Wheels Save High Lifts.

A wagon of this kind can be obtained either by buying low wheels and using them on the running gear of the other wagon, or by purchasing the low wagon complete. The latter way is perhaps better, as the axles and other parts are stronger to withstand the heavier loading for tractor power. The height of the wheels is an important consideration in this type of wagon, and on the claim that they pull heavier and have no particular advantage many farmers do not favor the extremely low wheels. Twenty-eight-inch front and thirty-two-inch rear wheels seem to be the most satisfactory for general farm use.

Most fruits contain from 75 to 95 per cent. water and a balance of woody fibre of cellulose, fruit sugar and minerals.

Ontario's wood-working industries use 64 different kinds of wood. Ontario is a great producer of railway ties; more than 5,900,000 were taken out of the forests last year.

Horse Sense

Someone left the oat-bin door open, the horses were loose; and we all know the rest. The thing to do if the accident has been detected an hour or so after the grain has been eaten is to get a veterinarian as soon as possible and pump as much out of the stomach by the aid of a stomach tube as possible. Then administer a purgative and antiferments. If sometimes happens that the expert help is not available. If such is the case, then the matured horses should receive from one and one-half to two quarts of raw linseed oil and two ounces of turpentine. Many neglect a horse that has overeaten until the symptoms of colic appear and then call a veterinary who may have difficulty in saving the horse.

The same precautions should be taken when a cow has accidently eaten a part of a sack of oats, wheat or corn. From one to three pounds of Epsum salts given to a cow immediately after such a large feed may have the cow's life and also prevent her being foundered. The thing to remember is to do something for the cow immediately after the accident has been discovered.

The Dairy

Forty Cows on Forty Acres.

This is the experience of a farmer who maintains forty head of dairy cattle on forty acres of land. "Forty cows on forty acres" is his slogan, and it has led him to much more than average success as a dairyman. Of the forty head of Jerseys, seven are grades and the others are pure-bred animals.

For several years without a break this man has had one of the highest scores at the local condensing plant where he disposed of the milk. His best cow has a record of 21.53 pounds of butter in seven days. This dairyman kills no calves and sells none for veal. He seems to have no trouble in disposing of them for breeding purposes at prices ranging from $60 to $80 a head.

How does he do it? By raising alfalfa to help maintain both the herd and the soil fertility. Alfalfa is used largely in feeding the cows. It meets the requirements of a good roughage, being rich in crude protein and lime. The calves are raised entirely on alfalfa hay and skim-milk.

Cutting Ice With Tractor.

Gasoline finds new fields of use every day, and one of the latest is that of cutting ice on the big lakes where the ice industry is an important one. A new invention is that of a powerful motor-driven tractor that creeps along the ice, sawing out cakes at the rate of about 30,000 a day. It does the work of sixteen men and eight horses, and can be driven with equal success in either direction. Thus it is a time saver in that it does not have to be turned around when the length of the "cut" is reached.

The motor of this new machine drives the gears and chains by which the tractor moves along, and it also is connected directly with the saw that does the cutting.

The Paisley Advocate

PAISLEY, JAN. 2nd, 1918

The Municipal Nominations

FEW REAL ELECTION CONTESTS

Acclamations General

PAISLEY

FOR REEVE

J—H Steele—nominated by Albert Pearce and D Sparrow.

FOR COUNCILLORS

Albert Pearce—by D Forrester and D Sparrow.

J A Logie—by J H Steele and Thos Muir.

D Sparrow—by Albert Pearce and D Forrester.

Peter McKinnon—by Alex Fraser and Alex Jack.

H B Putnam—by P Carter and Alex Jack.

Dr Houston—by Alex Fraser and Alex Jack.

John Smart—by H B Putnam and D Sparrow.

FOR SCHOOL TRUSTEES

Hugh McKerracher—by D Forrester and Alex Fraser.

Joshua Bell—by H B Putnam and Albert Pearce.

J Shoemaker—by H B Putnam and Thos Muir.

Rev M Neilson—by Alex Jack and Alex Fraser.

Jas McBride—by Alex Jack and D Forrester.

Another nomination will be necessary, as only two councillors and two trustees have qualified for office. Those elected by acclamation are: Reeve—J H Steele, Councillors—A E Pearce and J A Logie, Trustees—Joshua Bell and Rev M Neilson.

The small group of village electors who are sufficiently interested in municipal affairs to attend the public meeting on nomination night were easily accommodated in the council chamber. Mr S Ballachey was appointed chairman.

Reeve Steele gave a review of the year's work. He stated that the roadways and drainage had been in bad condition, and considerable work was done on them. At county council he and Reeve Phelan of Greenock had secured a grant of $200 for North St., which was supplemented by grants from Greenock, Bruce, Saugeen and Paisley, and by the work done with this $600, that section of road had been put in first-class shape.

Following the resignation of the night-watchman in the fall another had not since been engaged. He mention of this record had shown that the service was not what it should have been. This, with the increased cost of fuel for the waterworks, were given as the chief reasons for not getting another man on the beat. The Reeve said he would be satisfied to have a watchman again if citizens should petition for one, but the cost of his employment should be borne by those who received the benefit.

The break in the waterworks engine cost in the neighborhood of $125, including pay of a night watchman while the water pressure was off.

The Hydro-Electric Commission had been communicated with in regard to power for our lighting. The reply was that power could not be furnished at present under $60 per horsepower, but that the Sangeen is to be developed after the war, when we would get power much cheaper.

Trees on the street had been trimmed up at a cost of about $75, and 30 or 40 cords of wood had been made out of the trimmings, which would be worth $125 or so. This shows a fair return for the work.

In connection with the waterworks plant Reeve Steele thinks it worth while considering a plan for furnishing heat to the town hall and to owners of other buildings adjacent with steam from the boiler.

In speaking of County Council Reeve Steele attested to the truth of a statement made by ex-reeve Ballachey in a previous year, that the proceedings need watching. He finds there is considerable manipulation and railroading of business. At the December session he had succeeded in having the matter of road inspector's expenses held over to January, instead of deciding upon it without consideration. An item of about $150 had been secured for Paisley on the good roads account, which will be available for expenditure on our streets in 1918.

Councillor Pearce alluded to the charity account, the greater part of which was paid out for attendance upon Mrs Devine and sending the old lady to hospital and home of refuge. The cemetery fence had been repaired, but grass and weeds had not been kept down very well on account of scarcity of labor. The speaker had given time and consideration to having work on streets done to best advantage.

Councillor D Sparrow was chairman of the streets committee, who had done the best they could during the year. There was no new work of any account, and only $175 had been spent on gravelling. Mr Sparrow said he owed a great deal to the people for the support he had received. He would have served again with pleasure, but he is retiring on account of going out of the municipality.

In regard to rewiring the town hall in compliance with orders from the Hydro-Electric Commission, Reeve Steele said the council had decided to buy the supplies required and have the work done by the day. There is need for compelling a better lighting service, and this year he feels that half-power lights on the streets should receive only half pay.

Mr Alex Jack wanted to know of the Reeve if the council would take into consideration the relaxing of regulations as to keeping pigs within the corporation. A number of citizens might raise pigs and add to the pork production if permitted to do so.

Skating rink owners throughout the province have been notified that admission to rinks for the purpose of skating will not be subject to the war tax. The likelihood is that skating is regarded as a healthy and essential form of exercise for town and city folk.

BRUCE TOWNSHIP

Old board by acclamation except deputy-reeve. Reeve—J Johnson. Councillors—M McNeill, Jas McKenzie, Geo Baker, B Annes.

Another nomination will be held to elect a deputy-reeve.

By an ADVOCATE correspondent

A large turnout of ratepayers at the nomination at Underwood on Monday shows that a good deal of interest is still being taken in municipal affairs. Mr J G McKay, tp clerk, occupied the chair in a most good style.

Reeve Johnson was first called and gave an interesting address on township and county matters. He stated that any public work that could be done without in both county and township this year was laid aside to keep down expenses. In dealing with the tax question he said the rates were high and bound to be higher. The real cause of the high rates at the present time is the paying off of the debentures on the house of refuge, which fall due in the near future. A grant of $40,000 was made to the different patriotic funds without a dissenting voice. County officials were making strong demands for a raise in salary, but their pleadings at the council board were in vain and they had to be content with their present salaries. The ladies of the different Red Cross Societies were given $860 to buy yarn and clothing for the soldiers. They are compelled to make a report of all expenditures before fresh supplies are allowed them. In this way none of the money is turned into a wrong source. Some townships do more than others in this line of work. The county has pledged itself to give dollar for dollar with the townships for Red Cross purposes, dating from Dec 1st, 1917. The good roads system came in for a good deal of discussion. The Reeve stated that the system had been adopted by 32 of the 37 counties in the province. There will be no permanent work done in this connection till after the war.

Deputy-reeve Peter Dobson attended the Good Roads Association in Toronto, and while there never heard a man complain about the cost or maintenance of the good roads system. He laid great stress on making a right beginning, as it saved a whole lot of money afterwards in repairing. Good drainage was one of the main features in getting a good foundation for a road. Mr Dobson cited one case in which $2,000 was expended on a stretch of road but owing to the engineer in charge draining the centre of the road instead of the sides it cost in two years $6,500 more to make a complete and permanent job. He said the Tp this year had built in all seven bridges.

Councillors G Raker, Murdoch McNeil and Jas McKenzie also gave their accounts of the work of the year.

The new men nominated were Archie McLean, Geo Brown, and Alex Mewhinney for reeve; McLean Young, Wm Gilchrist, Silas Hardy, J Cumming, M Avis and J Nelson for councillors.

According to the financial statement the outlay for roads and bridges in the Tp for 1917 was $8,855. Of this the county has to pay back to the Tp $3,100 for work on the 10-called county roads in the tp. School levies amounted to $11,285. Gravelling cost $427. For war purposes $2,531 was spent. The county rate was $6,720, municipal equivalent $4,455. Pow war tax $2,016. Stationery and printing cost the Tp $299. For sheep killed by dogs $79 50 was paid out. Charity called for $61, wire fence bonuses $137, law costs $6, Board of Health $102, salaries and allowances $1015.

ELDERSLIE

Whole council by acclamation: Reeve—Jas Lewis. Council—C Fraser, W J Allen, John Oswald and Arthur Clements. Others nominated were: For Reeve—Jas McCaig, S K Ewart, W J Fortune. For Council—Jas Knubion, Arch McCannell, V Tanner, Jas Thomson, J S Campbell.

GREENOCK

Reeve—D Phelan, M McNab, H Clark, D Pinkerton. Council—Jas Campbell, T Sawyer, Thos Symon, Geo Gilchrist, R J Nelson, Sam Hawthorne.

BRANT

Reeve—A Weir, D Willoughby. Deputy-reeve—W A Rowand (acel). Council (acel)—Jas Johnston, R Pindley, and D W Gregg, jr.

ARRAN

For Reeve—Arch Crowe, And Morrow, Jos Johnstone. Council—C A Thomas, Fred Scarrow, Fred George, Sam Miller, Arch Rowand, W Davis, D McKinnon, Francis King.

For Reeve—J E Grant, W Whitworth. Council—S A Thomas, T Dolphin, J Hamilton, S J Walkes, W Peaton.

A NEW YEAR'S GIFT

Every home in Canada should treat itself to The Family Herald and Weekly Star of Montreal for 1918. It will bring pleasure and happiness to every member of the family for every week of the year. The price is only $1.20, and if your subscription is received at once you will receive a copy of their great War Map, size 22.5 feet x 3 1-4 feet, in four colors and surrounded with a border of facsimile badges representing nearly every battalion that left Canada. This the largest prize ever offered the people of Canada and we know can well afford to do without it.

The Family Herald and Weekly Star has no equal on this continent as a great family and farm paper.

DIED

McCAFFERY—At Fort Elgin on Jan. 1st, Angus McCaffery, of Paisley, aged 79 years, 4 months and 28 days.

The Late George Grant

There crossed the bar on Dec 22nd 1917, one who was a familiar figure in our town, the late Mr Geo Grant, who succumbed to heart failure after a short illness. He was born at Trinity, Newfoundland, of English parents, in the year 1847, his father being an undertaker and dealer in furniture, the subject of this sketch was early associated with the business in which he spent so many years in our town. When a young man he came to Meaford, from there to Toronto, and afterwards to Aurora where he was married to Miss M A Hunter. To them were born two daughters, Mrs Mackey of Thornbury, and Miss Nellie of New York. After a few years of happy married life his wife died. He then removed to Markdale and in 1881 was married to Miss M A Burch, who survives him. He came to Paisley in 1886, and engaged in the business of undertaking and furniture under the name of the well-known firm of Scott & Grant, and after twenty-seven years he retired from business and up to the time of his death resided here. He was a man of sterling qualities, genial disposition, a kind and considerate husband and father. He will be much missed in the community, and more in the home circle, as he was a man who dearly loved his home and family. The funeral was largely attended and was conducted by his pastor Rev G C Little of Knox church, who paid the highest tribute to him as a good citizen, a man upright in all his dealings with his fellow man and a consistent Christian. The floral offerings from the family, the C O F and the friends were beautiful. He was a member of Aurora I O O F, and a member of Paisley C O F, which organization attended the funeral in a body. He was a member of the village council for one or two years, and was on the managing committee of Knox church at one time. Besides his sorrowing widow and two daughters he leaves to mourn one brother, Charles Grant of Thornbury. He was a Liberal in politics and a life-long reader of the Globe.

The Late James Hyde

For over 41 years the late James Hyde lived in Paisley and vicinity. He was born in Lincolnshire, England, and at the age of 12 years came to Canada with his parents. The family were in Hamilton for a few years, and then came to the 4th of Bruce. In 1890 Mr Hyde moved with his wife and young family to the Bright farm at Paisley, and in 1901 he bought out the south end bakery in town, carrying on that business until 1912, when he went to Toronto. A very robust and active man, Mr Hyde never knew what sickness was until symptoms of Bright's disease developed, following injuries he sustained by being struck by an automobile. For the past year he was unable to follow any occupation, and stayed at the home of his daughter, Mrs G B Irwin, in Paisley, where his death occurred on Dec 25th. The deceased was a most cheerful, sociable and likable gentleman, well liked by his fellow citizens, and general regret is expressed at his demise. He was elected to the town council for a couple of terms. Mr Hyde was married 42 years ago to Elizabeth Kirk, who survives him with their family of two sons and four daughters—William, of Bloss road south; Pte Kirk Hyde, serving in France; Mrs Robt Irving and Mrs Thos White, in Toronto; Mrs G B Irwin, Paisley; and Teresa, with her mother in Toronto—all of whom were here for the funeral on Thursday afternoon, except the absent soldier son. The funeral service at the house was conducted by Rev C W Cosens of Walkerton, in the absence of Rev Mr Crighton. The deceased having been a member of Saugeen Court, C O F, the service at the graveside was taken charge of by the brethern of that order. Interment was made in Stark Vale cemetery. Surviving brothers and sisters of deceased are: Richard Hyde, of Dundas; John, of 4th Bruce; George, of Roosevelt, Sask; Mrs Auckland, of Lowville, Ont; Mrs Wrightson, of McKay, B C.

WHILE AT WAR

Women Suffer at Home

Toronto, Ont.—"I consider Doctor Pierce's Favorite Prescription the very best of woman's tonics. I suffered a severe nervous breakdown. I could not sleep, was weak and tired all the time. I took the 'Prescription' and just a few bottles completely built me up and relieved me of my nervous condition. It is a good medicine and I am glad to recommend it.—MRS. ALFRED SHEPPARD, 259 Seaton St.

Niagara Falls, Ont.—"I can safely say that 'Favorite Prescription' did me a lot of good. I at one time developed woman's trouble; my nerves were completely shattered, and I became weak. I had severe backache and pains in my side, extending down into my limbs. I doctored, but did not get relieved of my ailment and was down and out when I began taking Dr. Pierce's Favorite Prescription, and it so completely cured me and restored me to health and strength that I was able to do all my own work and others besides. I do recommend 'Favorite Prescription' to weak and ailing women; they cannot get a better medicine."—MRS. JOHN LOCKHART, 26 Terrace Ave.

Favorite Prescription is an invigorating, restorative tonic, a soothing and strengthening nervine and a positive remedy for the chronic weaknesses peculiar to women.

This old prescription of Dr. Pierce's is extracted from roots and herbs by means of pure glycerine and is a temperance remedy of 50 years' good standing. Send 10c for trial pkg. of tablets to Dr. V. M. Pierce, Invalids' Hotel, Buffalo, N. Y., or Bridgeburg, Ont.

PLANNING AHEAD

Practical farmers know more than most classes of workers the necessity for planning well ahead. Success in the fields no less than in the field may depend on taking "the long view." Canadian farmers, therefore, more than anyone else, may profit by weighing earnestly the words of an English economist that, even if war were to cease to-morrow, normal crop conditions could not be restored in the world for from three to six years. The stored-up supplies of food have been heavily drawn upon and in some cases have been actually exhausted. This means, as no one better than the farmer can comprehend, that there will be an acute demand, as compared with pre-war years, for food grain crops and food animals. Should warfare be suspended, of which there is no sign at present, the demobilization would take months and in the reconstruction period of re-[illegible]king of farms in Belgium, France, [illegible] and Great Britain must inevit[illegible] done from this side of the [illegible]

[illegible] the "long view" can the [illegible] farmer prepare for this. He will see that there [illegible] business and good patri-[illegible] advice of the Food Con-[illegible] of the Department of Ag-[illegible] produce more pork; he [illegible] can to add to the [illegible] fertilizers, so ne-[illegible] intensive systems of [illegible] lands, and to [illegible] replenishment of the [illegible] France and Italy, [illegible] Europe may be [illegible] recently har-[illegible] the ave-[illegible] to car-[illegible] is [illegible] minu-[illegible] ex-[illegible] of [illegible] to [illegible] red

PARLIAMENT HAS WORK TO DO

It is suggested in an Ottawa despatch that the coming session of Canada's new Parliament is "likely to be a short and comparatively uneventful one so far as legislation is concerned." If this forecast is accurate Canada is going to be badly disappointed. The electors gave the newly-formed War Union Government an emphatic mandate to proceed with certain definite policies and reforms to which it had pledged itself. And they expect action.

The coming Parliamentary session should be one of the most important and eventful in the history of the Dominion. The Speech from the Throne is expected to forecast a vigorous, progressive and radical program of war-time legislation along the lines promised in the Prime Minister's initial manifesto shortly after the union was consummated. The country will look first for some definite announcement demonstrating that the Administration has already taken the promised steps "to co-operate with the governments of the United Kingdom and other Dominions in all matters relating to the war," and an assurance that this co-operation is comprehensive and calculated to produce much greater effectiveness and unity of endeavor in the supreme common purpose of war-winning.

Imperial co-operation must be supported by national efficiency. The Civil Service Commission is now preparing a report with a view to extending to the outside service the reforms effected in the inside service under the existing Act. This portends a general abolition of patronage and the making of all public appointments solely upon considerations of qualification and merit. The report must be the basis for immediate action. The spoils system was wholly bad in peace. It is execrable and intolerable in war.

Nothing should interfere with the pledged granting of general women's suffrage. The anomolies and discrimination of the partial franchise granted by a party Administration last session should be righted by the prompt carrying out of the just and generous assurance at once given by the Union Government. Women have earned the privileges of citizenship by service.

Adequate taxation of war profits, the increase of taxation upon large incomes, preparation for post-bellum immigration and colonization, inducements for settlement on the land and the development of agricultural resources, are all projects which should be taken in hand without delay. "Effective measures" dealing with the cost of living problem have been promised. These assuredly cannot wait any more than can the question of increased agricultural production and the promotion and development of the shipbuilding industry.

The Government has promised "co-operative management of the various railway systems so as to secure economy in operation, to avoid unnecessary construction, and to secure the widest and most effective use of existing railway facilities." This definite pledge, made subsequent to the formation of the Railway War Board headed by Sir George Bury, must mean something wider and more effective in the handling of war transportation problems than has yet been attempted. The action of President Wilson in taking over for war-time Government operation all railways of the United States causes Canadians, confronted with the same necessities for transportation, co-ordination and economy, and with not nearly so great a proportionate disturbance of vested rights, to look for some like action on the part of their Administration.

These are some of the problems which confront the Government and Parliament and they are problems which demand prompt, fearless and progressive handling. The Globe cannot believe that men fresh from the polls, with a direct and unequivocal mandate from their fellow-countrymen, will, in this period, which calls for leadership and action, be content to "mark time" and deem their duty done with the adoption of the necessary but inadequate routine of legislation.—Globe.

—Men who have been placed in the first draft under Military Service Act are subject to penalties for absenting themselves from duty. The heaviest punishment is five years in jail.

—Conscription is again defeated in Australia, by a vote of 792,000 for, and 967,000 against. The soldiers' vote, which has not yet been counted, may reduce but will not overcome the adverse majority.

—The United States Government has decided to take control of the railways in the republic, some 750 in number. A railway war board, at the head of which is Director General McAdoo, is to have charge of the operation of the whole gigantic national system. Under the plan formulated competition will be elimated, the earnings will be pooled, and all roads be paid for services rendered.

—Germany's persuasive powers are likely to be very much strained in efforts to induce the Allies to accept peace without victory. The latest offers of the Teutons are rejected as n. g.

—The Dominion Fuel Commissioner suggests the appointment of an official in every town and city to look after the interests of those who have been refused coal by dealers. With our local dealer distributing his supply in small lots to those in need, the services of such a special officer should not be required in Paisley. There is only one complaint we have heard in connection with the distribution here. It is said that some farmers have been hauling home sleigh loads of coal when they had from 25 to 50 cords of good dry wood standing on their premises. To the townsman this looks very like greed and profiteering on the part of the farmer. Conservation of the fuel supply does not mean buying coal at a fairly reasonable price and selling wood at $5 per cord of 18 inch length.

—An Ottawa despatch says that in dealing with the food question in Canada the Government proposes to decrease consumption and increase production. Within a few weeks hotels and restaurants, it is expected, will be placed on a war basis, by a strict supervision of meals and the restriction as to the variety and quantity of food to be purchased by private individuals. Sugar, tea, coffee, and similar commodities will be carefully supervised so that hoarding and undue consumption may be prevented. Where there is a world's deficit of any necessary commodity or where ocean transportation is necessary to bring it to Canada the Government will act to conserve the supply without undue interference with the requirements of the people. Where luxuries require essential food products in their production a radical policy may be expected. Candies and similar luxuries will be restricted in production, but in this instance, as with other commodities, a reduction in production will not necessarily be followed by an unfair increase in cost to the consumer.

—The enormous financial responsibilities devolving upon this Dominion through the war are made plain in an announcement by Hon F B Carvell, Minister of Public Works, at a reception tendered him at St. John, N. B., last week. He stated that in the next fiscal year $500,000,000 must be raised by Canada for war purposes in addition to the $150,000,000 or $175,000,000 necessary to carry on the ordinary business of the country. Mr Carvell said Great Britain was persistently calling for munitions and foodstuffs and Canada must answer the call. But she must do her own financing, for not a dollar could be borrowed in Great Britain or the United States. The question, said the Minister, all resolved itself into this: "The Union Government's duty was to see that the resources of the country were conserved, that the people save money, and thereby have it to invest in Government bonds for the carrying on of the war. If the peoples' savings and profits were not to be available Canada could not carry on as she had done in the past. That was the real reason for the formation of the Union Government, and there must be Government along business lines." Speaking of the prohibition order-in-council, Mr Carvell said his hearers need not be surprised about once a week to learn of something just as drastic being done.

Why Three Year Men Can't Return

A despatch from London, Eng., on Friday said: "Sir Walter Davidson, the retiring Governor of Newfoundland, newly returned from visiting France, explained to a meeting in London yesterday how he failed to do as he promised and secure a furlough for three year service men. This equally explains why it has been found impossible to grant our own war veterans leave. "I went to France determined if possible that men who had been out three years should have some home furlough," he said. "When I talked to the military authorities no one could have been nicer, but they would not give a furlough for the excellent and convincing reason that man power is the essence of the game. At this moment we cannot afford to lose this splendid band of veterans of three years' service, whose homes are in far away Dominions. It is the hardest case possible that these men who offered themselves first of all should be now denied the privilege of going back to their homes for a short time. Under the present conditions of warfare, however, it is essential that these thousands of men should remain at their posts."

Letters from the Soldiers

Means Much to the Fifth Division

Sergt Bernard Brown of the 160th at Witley Camp, son of Mr and Mrs T Brown, of this village, in writing home under date of Dec 7th said: I was up to our polling booth yesterday to vote. I hope all at home will vote for the Government, as it means life or death to the division, and we want to go as a division. I must wish you all a merry Christmas and a prosperous New Year. I hope, that by the time the next one comes we will be all together again, but I guess I must stick it out like the rest. We are doing quite a business selling war bonds for the Victory War Loan. At present this battalion holds the record in the division. We have sold about $30,000 worth and they laughed at our paymaster when he said he would get $20,000. Speaking of the food situation, the writer says: "People over here cannot keep pigs, as they are unable to procure feed for them."

CORP. WM. A. ANSTEAD

Son of Mr and Mrs W C Anstead, Paisley, who died in France, from an attack of pneumonia, following an operation for appendicitis. His wife (nee Miss Agnew of 10th Sullivan) received the following letter from 36 Casualty Clearing Station, dated Nov 15th:

Dear Friend:

I am writing you from the casualty clearing station where your husband died on the 9th of November. By this time you will have heard of it, no doubt. My heart goes out to you in sympathy. I saw him first on the 6th or 7th of November. He had been in the hospital a week then and complained of not having slept. He had nicely recovered from appendicitis, having been operated on on Oct. 30th, and was doing nicely. He wasn't able to sleep, however, and complications set in. He died of fever and pneumonia. He asked me to write you the day he died and I am at last getting the opportunity to do so. I am a Canadian myself. I know Chesley. My uncle, Ezra Woelfle, lives at Scone, so I am very glad to have seen your husband and glad to be able to write to you now. Your husband told me that you both belonged to the Presbyterian Church. I pray God that now in your bereavement He may be very dear to you. Let Him take your load of worry and care and carry it for you. He will do it and He will be your comfort and ease your heart of pain. You will always have the memory of a true and loving husband, who was true to King and Country. May you live to be worthy of the soldier husband who has so nobly died.

Sincerely,
HUGH D. TAYLOR.

P.S.—His last message was one of love to you. He said, "Tell her the worst is over—not to fear.

A FEARFUL SCOURGE

There is a movement on foot among the medical men and those deeply interested in Canadian life and health to have venereal disease placed among those infectious diseases which must be reported to public health authorities and treated under their supervision until thoroughly cured. It has become recognized that this class of illness is not only one of the worst scourges of the country, but possibly the worst of all, more disastrous and widespread than tuberculosis. The movement to have it brought under control is gaining ground daily, and it is believed that if the facts are brought to the attention of the public there will be a popular demand for laws to deal with it and to protect the nation.

Those foremost in urging the reform recognize the necessity of some degree of secrecy, and strongly advocate that the names and addresses of patients under treatment be not registered or made known to anyone but the attending physician. Their aim is not to bring shame to those affected, but to insure that all precautions will be taken against them spreading infection, even unintentionally.

Interesting, but startling and shocking statistics are given in a pamphlet issued by the Canadian Commission of Conservation, and everyone interested in public health (and who is not?) would be well advised to obtain a copy from Ottawa. The pamphlet is educative to a degree, and is calculated to show the vital necessity of immediately grappling with the enemy which is destroying the health and happiness of many thousands of persons yearly, even among the small population of this country.

Among the statistics presented are some from New York Department of Health. These show that in 1914 of the 6,000,000 people in New York, 25 per cent., or 1,500,000 had venereal disease of some kind. These figures are enough in themselves to prove the terrible nature of the plague, especially when it is noted that such diseases as locomotor ataxia, general paralysis of the insane, diseases of arteries, aneurisms and many extremely serious female afflictions follow in its wake.

It must not be imagined that New York is an outstanding example, for Toronto is little, if any, better. Of all cases entering the public wards of the General Hospital in Ontario's capital in a year, 12 per cent. were afflicted with one kind of venereal disease alone, and how many suffer from other varieties is not recorded.

The people of Canada must be awakened to the fearful danger which confronts them, and must be educated to cope with it. Too long have the eyes been kept shut against such a menace. Realization of its dread possibilities will create a demand for its elimination, and the law will be invoked to help in the battle.—London Advertiser.

THE CONSCRIPTION OF WEALTH

From The Christian Guardian

The plea is made that along with the conscription of manhood there should go conscription of wealth, and it is urged that in all justice the first should not take place without some guarantee of the second. So far as this plea is simply a subterfuge to delay or avoid conscription of manhood we have no sympathy with it, but so far as it is based upon justice and equity it demands consideration.

But what does it mean? To some it is a very indefinite thing, which may mean little or nothing; but to others it has a very clear and distinct meaning. It means, in the first place, the conscription of war profits. Men argue that while these war years may be profitable to them, yet we must consider that they are only helping to wipe out the deficits of preceding years. But this argument cannot be accepted as valid. It does not seem right or just, nor patriotic, that these terrible war years should be used to turn an unprofitable business into a profitable one, and we have a right to urge that excess war profits be taken over entirely for the country's needs.

To us it is a sad and lamentable fact to note the increase during these years of pleasure, automobiles and such things. Surely this is not the way to win the war, or to prepare for the stern days which lie ahead. The man who in these days increases luxurious living and rolls up a large bank account belongs to a type of citizen of whom patriotism is ashamed. Better for the lad who left a $3,000 position to fight at $1.10 a day and who now sleeps his long last sleep on Vimy Ridge or he who wrote home the other day that his chum at home had had an increase in salary which should have been his own; but he added, "After all, I would sooner be here in France than in his place."

When we face these facts we find it hard to agree with Col. Thomas Cantley, president of the Canadian Manufacturers' Association, when he told the members of that organization in Winnipeg that the manufacturer who had made money in munitions had "earned it." To us it seems that to-day no true patriot in Canada can righteously "earn" more than a decent living. All else belongs to our country in its hour of need.

And conscription of wealth means even more than this. We cannot get away from the fact that if the country has a right to bid its sons give up their business under their dearest home ties, and face mutilation, disablement and death upon the battlefield, it has an infinitely greater right to take from any man 25 per cent., or 50 per cent., or even 100 per cent. of his accumulated wealth. So far we have touched only excess war profits, we have not even touched income, and, above all, we have not touched capital; but there is no escaping from the reasoning that the country which claims the right to order its sons to the battlefield has a very much greater right, if need be, to take over a portion of the wealth of its citizens. This means much. It means the right to take over part, or all, of the capital of our banks, our railways, and our great manufacturing corporations, as well as the capital of our wealthy individual citizens. Such a thing has never been done, but the logic is inescapable, and capital is surely a much less sacred thing than life.

This is what conscription of wealth means. Are we prepared for it? There is a general impression abroad that while our poor men freely give themselves or their sons, our rich men would never consent to surrendering their property. We cannot agree with this view. We believe that patriotism runs through all ranks alike, and we believe that if to-morrow the Canadian government found it necessary to conscript the wealth of our people with few exceptions we should find men willing to surrender houses and lands, stocks and bonds, and all the treasures which constitute our wealth, and to surrender them just as freely and gladly as our brave boys have surrendered their noble young lives.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

FIRST DRAFT CALLED

The first draft of Class A. under the Military Service Act will be required to report at various divisional headquarters on Thursday, January 3. All preparations have been made to receive, equip and train the men of the new drafts and about 20,000 is the number expected to be ready by the date set. Twelve battalion depots with accommodation for 3,000 men each and with headquarters corresponding with the headquarters of the twelve military divisions and districts have been established. The officers in charge of the mobilization and training will so far as possible be men who have seen active service.

It is stated that all uniforms and equipment necessary to fit out the new draft immediately are ready and that no time will be lost getting down to intensive training at once.

The new men who are destined to provide reinforcements for the battalions overseas will be gathered territorially and will be disposed overseas according to the territorial arrangements at present in force. That is, men who have been drafted in the Toronto, Kingston, Winnipeg or other divisions will go to reinforce regiments whose natal division was Toronto, Kingston, or Winnipeg, as the case may be. No official figures are as yet available as to the number of men secured in the various districts under the first draft. The proportional numbers vary considerably in various districts. In some a great many appeals lodged by the Military Representatives of the tribunals are still pending. In others many appeals lodged by the men themselves for exemption are still to be heard. Out of the 400,000 men estimated to come under the first class, about half have been found to be medically fit for service. Of these it is estimated that at least half will receive exemption for various causes. The drafts will be called without much consideration for the numbers already sent under the voluntary system for particular districts. The reason for this is that it is not expected that the first class will supply much more than the 100,000 required. This being so, the district which has still the most unmarried men available will provide the most for the draft.

The Harem a Prison.

The western boast that every man's house is his castle is as nothing to the sanctity of the eastern harem. No officer of the law may enter a harem, and therefore there is no safeguard for the life and liberty of its inhabitants. One day they may be slaves, the next princesses and the next strangled or poisoned. An ill disposed man could carry off an enemy to his harem and kill him and none would be the wiser.

His Vocation.

Hicks—It is a shame the way Buster is bringing up that boy of his. The lad doesn't know how to read or write, and there is no indication of his ever being sent to school.

Wicks—Buster knows what he is doing, you can depend upon it. Probably he intends when that boy reaches manhood he will have all the business he can attend to as criminal court juror.—Boston Transcript.

Why He Hurried.

"Young man," said the old gentleman, "my daughter is too young to marry. A girl of her age cannot be sure of her own mind in a matter of such importance."

"I fully realize that," replied the young man, who had just secured the fair one's consent. "That's why I can't want to wait."—Chicago Post.

Silence is the safest response for all the contradiction that arises from impertinence, vulgarity or envy.

The vineyards of Italy cover nearly [illegible] acres.

A Chicago woman says that 60 per cent of the men would rather contribute to the purchase of a new carpet for the church than to wear it out afterward. The other 40 per cent merely wear out the carpet and refuse to contribute to the new one.

Highbrow discussions of children at play are easily reducible to a very short sentence, "Let 'em play."

It is fortunate that Sir Thomas Lipton derives more pleasure from building boats than from racing them.

Kaiser Wilhelm has bought a newspaper for $2,500,000. What is German for "now is the time to subscribe?"

Berlin's ambition to surpass Paris as a center of gayety is nipped in the bud by the kaiser's edict against the tango.

The AUTOMOBILE

Using The Car in Winter.

Again the cold weather bugaboo is with us. Many motorists are laying up their cars. Others are battling the enemy. I am in the latter crowd, says an expert. I have studied the problems offered by winter. From this study I offer those who brave the cold suggestions to make the fight easier.

First—Protect your radiator and circulation system.

Second—Take care of your battery.

Third—Install some kind of good priming device.

Fourth—Watch your oil and greases; lighten them.

Fifth—Be particular in the care of your tires.

Sixth—Heat your garage.

Seventh—Buy some of the well tried warming devices for personal comfort.

The most important thing to do is to see that your radiator has a non-freeze mixture. The best for weather which is not colder than five below zero is fifteen per cent. of alcohol, fifteen per cent. of glycerine and seventy per cent. of water. If it gets much colder increase the glycerine and alcohol five per cent. each. You should renew this now and then, for alcohol will evaporate and you must allow for that. By keeping this mixture at the proper stage you will save many times its cost in avoiding repairs on your radiator.

In addition to the mixture in your radiator I would say the use of a radiator cover is quite essential. In the colder climates I also would suggest the use of a hood cover as well. These covers hold heat within the engine when you stop for a short time and make starting easier. If you do not care to purchase a hood cover you should use a robe over the hood. I have seen a number of robes with fasteners attached, so that they may be held in position.

If you do not want to go to this expense you will find starting on a cold morning easier by priming your car and heating the intake manifold with a rag soaked in hot water. If you have electricity in your garage you might install a small heater under your hood and leave it on at night. When your motor starts let it lie idle for two to five minutes to heat up thoroughly and get the oil flowing properly. Do not race the engine.

Keep Battery Charged

It is important to keep your battery fully charged. Use your starter as little as possible, and drive as much as possible in daylight to charge it further. Chemical action is slow in cold weather. More current is required in turning over your engine. You burn your lights longer and generally call on your battery for much more service. Hence it is quite essential that it be kept fully charged. By all means test it at least once a week to see its needs. Then supply those needs.

Winter driving requires thinner oils and greases. Figure out just what oil is best for your particular car in winter and stick to that as long as results are good. Too thin oils are as dangerous as too heavy oils. Consult your service man on this point. This applies not only to the engine but to the clutch and transmission.

If you have heat connected with your garage see that it is turned on these cold nights. If you have no heat you should arrange for it. It will save lots of work, worry and trouble and keep your car in running condition. In the rain or snow a windshield cleaner is essential. Many good ones are on the market at moderate prices. They make it possible to drive with comfort and care. You will need to use your chains frequently. Look them over and see that all broken links are repaired.

For comfort a number of devices may be obtained at your dealers. I would surely suggest a heater to attach to your battery or exhaust. Then there are electrical attachments to fasten on the steering wheel, to warm the fingers. The feet and the hands suffer most from winter driving. Protect them.

Winter weather is a terror to tires. Give extra care to your tires. See that all cuts are promptly filled and keep out sand, dirt and water, as the fabric is more easily eaten up now than in summer.

Winter Air.

Everybody realizes the fact that fresh air is necessary to maintain good health, and almost everyone knows that it is just as needful in the winter as in the summer time. It is a recognized fact that the fresh air we get during the cold season is more invigorating than that which we get in the summer. But the fear of the discomfort caused by the cold is such that we do not consistently and persistently carry out our good resolutions to get fresh air night and day at any cost. Canada is full of self-styled "fresh air fiends" who open their bedroom windows a stingy half inch on ordinarily cold nights, and close them entirely when the thermometer comes within ten degrees of zero.

Why do we not keep up a never-relaxing endeavor to get all we can of this cold, clean, delicious air at the time we need it most? Deep breathing practiced during the walk home at night after a long hard day spent in the factory, behind the counter, or in the office chair, will do more to dispel weariness than hanging on to a strap and breathing the vitiated air of the street cars. Housewives may do a great deal of their work with the windows open, babies may sleep and children may play out-of-doors during the greater part of the day, and everybody can get six, seven, eight or nine hours of fresh air every night by sleeping with bedroom windows open. With proper bed-clothing the coldest-blooded person may sleep with comfort in absolutely unheated rooms with windows open, and in time they will grow less cold-blooded.

Bed and personal clothing suitable for winter months are necessarily rather expensive for many purses, but make an effort to get the best, and, if need be, do without the fine raiment. Any woman who would put willow plumes and imported gown before pink cheeks, sparkling eyes, and a total absence of headaches, does not deserve good health.

Heat Value of Wood.

Two pounds of seasoned wood is approximately equal to a pound of coal in heat value. A cord of hickory, oak, beech, birch, cherry, hard maple, ash, elm or locust is equal in fuel value to a ton of coal. The same heat value exists in a cord and a half of sycamore soft maple or hemlock, or in two cords of poplar, catalpa, bass wood or white pine as in a ton of coal, according to experts on the subject.

Farmers may cut wood for themselves or for local markets through the winter, thus using spare time for themselves and their hired men. Wood that is now wasting away might thus displace much high priced coal.

Woodlots can be cleared of waste wood at a profit and be improved in addition. Some trees are old and decrepit, and others like beech and maple are spreading in growth. Useless themselves for lumber, they crowd out thrifty young trees or prevent seedlings from starting. When such weed trees are removed, young seedlings spring up naturally and soon grow into timber of value.

A Leaky Shingle Roof.

A leak in a shingle roof, caused by one or more split shingles, can best be located by getting on the under side of the roof, as discolorations will appear on shingles and sheathing where the water comes through. When the leak is located, drive a nail through the roof there so the leak may easily be found from the outside of the roof.

Now take good tin, well painted on both sides, and cut as many strips as you need into 4 x 7 inch sizes. When a split shingle is found, pry up the butt and slip a strip of the tin under the shingle the full seven inches. This gives an inch lap on the shingles that were given six inches exposure. Then slip another strip of tin over the split shingle and under the next course above, and the repair is completed. This is quite simple, but entirely effective.

STIMULATING CROPS.

Device Used by British Government to Promote Growth.

Details of how the British government is working on a large scale to stimulate the growing of crops by electricity have just been received by America. The English department of agriculture has taken over a large area near Hereford, where installations have been set up for the use of ionized agricultural experts under Professor W. H. Blackman of the Imperial College of Science and Technology.

In the Hereford experiment high tension alternating current is being used. The method adopted is to stretch over the field to be treated a number of thin wires on poles, something like low telegraph wires, but high enough for loaded wagons to pass underneath. The wires are supported by high-tension insulators on posts in long parallel spans thirty feet apart.

"The charge fizzes off from the wires," says an account given in the Electrical Experimenter, "with a sound which is sometimes audible, and with a glow which is visible in the dark. Anyone walking about below the wires can sometimes feel the effect on the back of the head, as a cobweb on the face. The electricity does not act as a fertilizer but as a substitute for sunlight. The current is only used in the early morning and in cloudy weather."

The initial cost of the apparatus for twenty-four acres is about $1,500, and the annual maintenance is about $300.

The engineers believe that the ionization of atmosphere is but of secondary importance and that the main effect is noticeable in the nitrification of the soil essential to the well-being of plant life.

VALUE OF A VACUUM.

The Essential of Many Important and Valuable Inventions.

What is the value of nothing? Who will buy it? Nobody, surely.

Yet, something less than nothing may be worth a lot of money. There may be a fortune in it.

A vacuum, from your point of view or mine, is less than nothing. But it is the essential of many important inventions, in which millions of dollars are invested.

These inventions cover a great variety of industrials, such as the preserving of foods, tanning, bleaching, hardening stone and making woods imperishable.

Lumber is "seasoned" offhand by exhausting the air from it and then forcing hot, dry air through it, to carry off the moisture it contains.

Wood is artificially colored by using a vacuum to withdraw its fluid juices, which are then replaced with solutions containing pigments. In this way ordinary pine may be beautifully stained and made to serve as a substitute for rare and costly woods.

Evaporated eggs, dried by a vacuum process, are sufficiently familiar. The materials from which fruit syrups for the soda fountain are derived undergo extraction in vacuo, to avoid the spoiling of their flavor by high temperature. Coffee extract is obtained in the same way.

Vacuum processes are largely employed in the salting and pickling of meats, the latter being shut up in chambers from which the air is withdrawn, in order that brine may be forced into them under pressure.

Enemies On All Sides.

When Germany threw down the gauntlet of war to Russia on August 1st, 1914, she little dreamt that within three years she would have four-fifths of the entire world arrayed against her. Before that historic month of August had come to its last day she and her allies had no fewer than seven nations, with an aggregate population of over 800 millions—nearly half the people of the earth—for enemies.

The following year—1915—added Italy and plucky little San Marino to their number; 1916 brought Portugal and Rumania to our side; and this year six more countries, ranging from China and the United States to Cuba and Panama, are leagued in war against her.

To-day the position is this. Germany and her three allies, with a population of 156 millions, are waging war against seventeen nations, with an aggregate population of 1,314 millions.

When washing white woodwork put a little turpentine into the water and it will be a great help.

HOW THE EAR FOILS THE FOE

ALLIES NOW LOCATE BIG GUNS BY SOUND.

Listening Posts of Reversed Megaphones Surround Paris to Detect Enemy Aircraft.

Special duties quicken our senses to undreamed-of efficiency. Safe-crackers develop uncanny deftness of touch, their constant practice enabling them to discover an unknown combination by the mere spinning of a safe's knob.

This war has taught men to use their ears far more delicately and skilfully than civilians can imagine. Necessity is the mother of talent and the French engineers, with the Gallic quickness of education, have made themselves remarkably proficient of ear.

Dr. G. K. Burgess of the United States bureau of standards, recently returned from an extensive study of the scientific progress of France in the war, reports that the Gallic army has secretly brought the science of acoustics to a wonderful pitch of perfection, being able at the present day to detect the position of distant enemy batteries by the sound of the shells whistling or bursting over the poilu's trenches.

Ear as Medium of Detection.

Camouflage has made the spotting of artillery an exceedingly difficult thing and the eye as a medium of detection has rapidly given place to the ear. Observers from captive balloons and airplanes are not so successful as formerly in placing groups of guns, and the reliance upon the trained ear of the man who waits in the trench is rapidly becoming the thing of the hour.

Experts in the matter of acoustics crouch in the first line ditches, listening carefully to the enemy's batteries. They can locate the distance by the "boom" of the discharge, the pitch of the shell's whine as it shoots overhead; they can tell the size of the gun by the sound of the shell's bursting and they can detect the angle from which the projectile has come by the noise of its flight. Their ears can recognize the collibre by applying intricate rules of flight to the noise above them. A small shell hurled from near by will scream in a certain voice, a slightly larger shell fired from ten kilometers further back, will sing a different song, but only different to the expert. A large shell fired from a mammoth gun still farther in the distance will have a coarser, lower note.

Dr. Burgess' description contained in a recent issue of the Scientific Monthly says that France has several systems of applying this auditory skill and has achieved marked success in the work.

Paris Protected by Megaphones.

He cites further the nation's adeptness in listening for sappers and miners. By means of wires thrust deep into the earth before the trenches listeners are able to tell just where mining operations are going on and may meet the enemy's subterranean activities with a counter mine.

Around Paris the use of reversed megaphones is made to catch noise of approaching German airplanes. The fact that Paris has been able to protect itself from the invaders from the sky has been due to the celerity with which the listening guards have caught the hum of propellors and have spread the alarm to the waiting airmen on guard.

The megaphones catch the sounds and carry them into a sensitive sound chamber, where they are magnified and made clear and intelligible to the ears that wait.

Some remarkable methods for listening to submarine activities are in use, but official censorship prevents their description.

The ear of the airman, while deafened to all noises outside his own machine, thanks to the terrific humming of his motor, is becoming sharpened and bettered by his reliance upon it for equilibrium while flying in the clouds or at night.

When the stars and the earth disappear to an aviator he must rely entirely upon his ears to keep him right side up and to give him his sense of direction. If he has faulty ears he is likely to find himself flying head down or slanting perilously in the wrong direction. The centre of the body's equilibrium is maintained by the fluids in the inner ear, and when these are not functioning correctly the necessary sense of balance is missing.

DIRT AS FOOD SUBSTITUTE.

Layers of Edible Earth in Germany and Bohemia.

In their frantic search for new food substitutes Germans have made the discovery that so-called edible earth exists in many parts of Germany, and learned professors have lost no time in making it known that the eating of earth is by no means confined to certain savage tribes of New Guiana and South America. It was a highly esteemed delicacy, they say, during the Thirty Years War, and also in the "clean years" between 1719 and 1733.

Layers of edible earth, it is stated, have been located on the moors of Luneberg, near Koenigsberg, in the valley of the lower Vistula and in the Grand Duchy of Hesse, while the Austrians, it is announced, have their own deposits of edible earth near Eger and Franzensbad, in Bohemia.

How To Buy Food.

The following general principles should govern the outlay of the family food budget: 1. Spend from one fourth to one third of your food money for bread, cereals, macaroni and rice. 2. Buy at least from a third to half a quart of milk a day for each member of the family. 3. Spend as much for vegetables and fruit together as you do for milk. If you use half a quart of milk for each member of the family, that may not always be possible, but spend at least as much for vegetables and fruit as a third of a quart of milk a day costs. 4. Spend no more for meat and eggs than for vegetables and fruit. The quantity of meat and eggs can be decreased with less harm than the quantity of any of the other foods mentioned. The amount spent for meat may decrease as the amount spent for milk increases.

How One Farmer Kept His Boy On The Farm.

A drainage inspector in a Canadian province once visited a certain farmer and found him not only in possession of a good house, with modern sanitary equipment, but he and his family were enjoying the occupation of the best rooms in the house. On being asked why he did not live in the kitchen like his neighbors, and why he looked so much after the comforts of his home, he replied that he wanted to keep his boy on the farm, and that he could not expect to do so if he did not provide him with home comforts equal to those enjoyed by people of equal means and rank of life in the city. There is more sound philosophy in the method of that farmer than is found between the covers of many text books on rural depopulation.

BRITISH PRISONERS STARVED.

Men in German Camp Had Only Food Sent From England.

According to released Englishmen who have arrived from the camp for British civilians at Ruhleben, Germany, no food had been provided for them by the Germans in the last three months. They were entirely dependent on the parcels sent out from Great Britain.

Most of the prisoners at Ruhleben are suffering from stomach troubles owing to the fact that they have principally had to live on canned food. As a result of the monotonous character of the life there all inmates are mentally abnormal, say those who have been released.

To Stop the Flapping.

The flapping of the window shade when the sash is raised and the shade lowered is a serious annoyance to nervous people, who are generally light sleepers. If the shade is raised the light may waken one too early, yet ventilation is absolutely necessary to health.

The way to prevent the flapping is very simple. Screw two little brass cup hooks, one on each side of the window frame, opposite each other about a foot from the sill. At night tie a broad tape across the open window from one hook to the other, as sailors say, "taut." Screw a third hook in the molding below the sill, exactly in the centre.

Pull down the shade over the tape and tie the cord to the lower hook. The shade will be help firmly in place and a peaceful night's sleep is assured.

THE MIRROR

The Mirror.

When Sister Lil came back from the gate, where she had been saying goodbye to a reluctantly departing caller, she found Little Sister waiting for her, shining-eyed and expectant. Little Sister's eyes were observant as well as shining. She had noticed the big box that the caller had left behind, and Sister Lil was always generous. But the adoration in Little Sister's eyes would have been just as great had there been no box, for Sister Lil was to her the most beautiful and adorable being in all her small world.

"Oh!" Little Sister cried, "Was he another one?"

Sister Lil laughed and rumpled Little Sister's curls.

"You absurd puss!"

Little Sister drew a long, wistful breath, and her brown eyes grew more adoring than ever. "O sister, do you suppose I can be like you when I grow up?"

"You'll be lots nicer," Sister Lil declared. "Do you want some candies for a party? You may have some for Eva, too. Here, you can have the cover to hold them."

She poured the bonbons into the cover and then ran singing into the house. Little Sister, holding her treasure carefully, started for Eva's, but met Eva herself at the gate, and the two went back to the shade of the big maple. It happened that the big maple was under Sister L.'s window, and the clear, childish voices reached her easily where she sat putting a fresh bow on a party gown.

"Isn't Sister Lil lovely? She always lets me have some of her candy. She gets such a lot of candy brought her!"

"Lovely!" Eva agreed. "I think she's ever so pretty! Is she going to college? My sister is."

"Oh, no!" Little Sister replied. "No, indeed! she hasn't time. It takes time to buy things and make party gowns and all, and if you don't you don't get taken out, and people won't come to see you.' I'm going to be just like Sister Lil when I grow up. I don't expect to study or anything except just have boys come to see me. It's lots the most fun. And then by and by I'll get married and have a grand wedding."

"But what will you do after that?" Eva persisted.

"Oh, you don't have to think about that!" Little Sister said confidently. "Sister Lil never does. It isn't important at all. I know; because if it was Sister Lil would say something about it, and she never talks about anything except beaus and dress and dances, and things like that."

Up in her room Sister Lil's work had slipped from her fingers. Was that what she seemed like to other people—and to little sisters?

BIG AIR RAID DUGOUT.

England Uses Railway Tunnel Accommodating 20,000 Persons.

The biggest air raid dugout in England has just been opened to the public for use during air raids. It will accommodate 20,000 persons. The dugout is really an unfinished railway tunnel, 100 feet underground, on which work was discontinued at the beginning of the war.

It is electric lighted and seats have been provided for 2,000 persons.

Carrot Soup.

Heat one cup of milk, or milk and white stock, add three-fourths of a cup of finely chopped carrots, one tablespoonful of butter, one-fourth of a teaspoonful of salt and one-eighth of a teaspoonful of pepper. Cook in a double boiler.

Bees are very interesting. Those who have not read "The Bee," by Maurice Maeterlinck, should obtain a copy from the nearest library. It will not only be found interesting, but the seeming intelligence of these wonderful insects will be a revelation.

Indian pudding is made with five cups scalded milk, one-third cup Indian meal, half cup molasses, one teaspoon salt and one teaspoon ginger.

Officer—What do the army regulations make the first requisite in order that a man be buried with military honors? Private Casey—He must be dead, sor.

The Doings of the Duffs.

AT THE SIGN OF THE RED TRIANGLE

THE BENEFICENT WORK OF THE Y. M. C. A.

Relatives of Wounded, Summoned to France, Are Honored Guests of the Association.

The Red Triangle is the sign of comfort and good fellowship. It means warmth and a welcome, companionship and light. It is a constant ray of brightness in this most terrible of wars.

It is the sign of the Y.M.C.A.

What England and France and all the Allied countries would be to-day without the Y.M.C.A. I cannot imagine, says a correspondent.

"Somewhere in France" they are dotted by the hundred. The Red Triangle gleams everywhere. And there is one work they are doing that has gleamed publicity but has been invaluable—I speak of the reception of the relatives of the wounded, who are summoned to France to the bedside of their men, and who are the Y.M.C.A.'s honored guests.

Nothing can mitigate the first sharp sorrow of loss, and too often the relatives are "not in time" to bid a last farewell. But everything that can be done is done—on a system wise and kindly.

Hope of Resurrection.

I have in mind one old French house which I visited when I was in France. It is a hostel for those relatives who, anxious of heart, have been summoned peremptorily across the Channel to the bedside of wounded and dying men. There they are made welcome, no matter how long their stay may be. And if their man dies, they are not left alone in their trouble. The girl who follows her brother or father or sweetheart to the grave has with her a companion, a woman worker of the Red Triangle, who stays beside her to the end.

I remember a scene like that. It was in summertime, and the countryside was gloriously green. Birds were carolling in the tall trees and the air was heavy with the scent of flowers.

He came with his flag over him, to the solemn sound of the last post. The promise of resurrection was read across his grave. All around was khaki, standing sharply at attention. The picture will always be vignetted on my mind.

"Dust to dust, ashes to ashes, in sure and certain hope of the resurrection to eternal life!"

We walked back when the service was over to the Y.M.C.A. That walk is a place of pilgrimage, where thousands of men and women will come after the war to pay tribute to the last resting place of their dead. "Somewhere in France," with brilliant-colored flowers over them. A joyous little garden nods over each man's grave.

We returned to the welcome of the Red Triangle.

Care of Anxious Parents.

Out in the queer, old-fashioned courtyard a father was pacing up and down alone. He was a kindly, friendly man from the far north of Scotland, fond of a "crack" (chat) with his neighbors. But to-night no one dared speak to him. He was fighting the shadow alone.

It was only yesterday that he had a great story to tell. His boy was "doin' fine." They had had to amputate his leg, but he was putting up a real stiff fight. Who would give fresh life blood to turn the balance?

It was a snub-nosed, freckled lad from far Lochaber who responded. He was a big, strong soldier—and he laughed at the sacrifice. It was nothing. He was proud and glad.

All day it seemed as though the fight was won. The sacrifice had turned the tide. But when night fell . . . the change.

Now it was the father who must fight alone. What should he write to the boy's mother and sister home in Scotland? None of us dared speak to him as he paced slowly up and down the old French courtyard.

There was an American mother, too, who had crossed two seas to see her boy, her only son. Her whole life was bound up in him. Her whole conversation was of his early days, his goodness, his fine working capabilities, his kindness to her.

For two long weeks she had been under a haunting fear which she would not name, Spartan that she was.

After the visit to the hospital she came back smiling.

Yes, he had recognized her. He looked very white and thin, but he was now just the same bright boy as ever. The shot had touched the and there was little pain. She that he would never walk again. getting on fine, mother," he said, smiling up at her. "I'll soon to bend my legs."

be an armchair for you beside the fire and a for you, and she'd rather than to sit and evening," had come

that old who on a with ller girl.

He is the youngest member of the Y.M.C.A., that baby, a real "camp baby" of the war.

His father had been badly wounded, and they wired for his pretty wife to come at once. Little hope was held out for his recovery.

The young wife answered the call immediately. She was at the bedside of her husband "Somewhere in France" at the crisis, and knew that he would live.

Three days later her baby was born.

Convalescent soldiers made the cradle, and nurses padded and lined it. For blankets and bedding there were khaki mufflers, donated by the men. The "camp infant" had a happy life.

When at last the baby was dressed for its cross-Channel trip and the margarine box packed with baby clothes, there was a silence in the old French house, and a void.

* * * *

Many and varied were the letters received, and from all parts of the world. One day the post brought a dozen tiny envelopes with letters written on miniature note paper and in lead pencil. The handwritings were wobbly and uncertain and gaps were filled up with crosses and kisses. They were messages from tiny tots in Sunday schools away in far-off Canada!

For all over the world the call of the Red Triangle comes—and even children are anxious to "do their bit."

STUDY AND EXERCISE

Overstudy and lack of exercise make thin bloodless children. Study does not usually hurt a child at school unless the studies encroach on time that should be spent in out-of-doors exercise. But lack of exercise and overstudy is a combination that brings on St. Vitus dance. If your boy or girl at school is thin and pale, listless and inattentive, has a fickle appetite, is unable to stand still or sit still, you must remember that health is much more important than education, and more time should be given to exercise and recreation.

See to it at once that the child does not overstudy, gets plenty of out-of-door exercise, sleeps ten out of every twenty-four hours, and takes a safe, reliable tonic like Dr. Williams Pink Pills until the color returns to the cheeks and lips and the appetite becomes normal. For growing children who become pale and thin Dr. Williams Pink Pills are not only safe but in most cases are the very best tonic that can be taken. These pills build up the blood, strengthen the nerves and assist nature in keeping pace with rapid growth.

You can get Dr. Williams Pink Pills through any dealer in medicine, or by mail postpaid at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

COULD CROSS ATLANTIC.

Giant Biplane Flew Faultlessly From London to Constantinople.

The great Handley-Page biplane which in July flew in eight stages from England to Constantinople and bombed the Goeben carried five men, and although she bore as well their baggage and bedding, spare parts and oil, bombs and machine guns, and spare propellers, she carried them easily. It could, says an expert, have crossed the Atlantic in 20 hours.

The great Rolls-Royce engines never faltered. They brought the airmen to Saloniki, and thence to a base "somewhere nearer Turkey." Then the great adventure began. The baggage and bedding and spare parts were left behind. The pilot and a passenger (Squadron-Commander K. S. Savory and Flight-Lieut. H. McClelland) sat in front, and the engineer (Engineer-Lieut. T. Rawlings) was free to walk his narrow cabin and watch above and below from the machine-gun platforms.

They flew 250 miles in about three hours, and then beneath the spreading wings saw the lights of Constantinople and all the vessels, including the Goeben, a blaze of light. Down they came and loosed a salvo of bombs at the battle-cruiser. They circled and dropped another salvo, and then made along the Bosphorus, where they sought out the German headquarters ship and bombed her. Amid a hail of Turkish shells they found the Turkish War Office. According to a Turkish communique at the time, this was "not destroyed," "but," said one of our airmen, "the bombs weighed 112 lb., and we were there for half an hour.

A London Daily Mail representative was told by an aeroplane builder that a British aeroplane, carrying a pilot, six passengers, and 700 lb. of luggage, has flown from London to Paris in two hours, and that we have machines to carry 3,000lb. of bombs (nearly a ton and a half).

"Then why do we not bomb Berlin?"

"That is quite possible," said the constructor, "but it is not my department—but something big may happen soon."

Scrap Metal on the Farm.

Farmers may not realize that they are unpatriotic if they are not selling their worn-out machinery and implements. Large quantities of iron and steel are needed for guns, shells, bridges, and other war purposes. There are many farms on which a good deal of junk is to be found. Higher prices are being paid for scrap metal than formerly, but, in order to save unnecessary expense in getting it to the foundries, neighboring farmers might co-operate and make one hauling do instead of several.

Christmas 1917.

Little Jesus, far away,
Can You hear me—what I say?

Guns are thund'ring, cannons roar,
Even at Your stable door.

Seas of blood flow o'er the land;
Mountains totter as they stand.

Fields are thick with ruined things—
Men and thrones and broken kings.

Little Jesus, can You rest
There upon Your Mother's breast?

In the heavens shines Your star—
All the world is red with war.

* * * *

Little Jesus, come again
To the broken hearts of men.

In Your stable far away
Can You hear me—what I say?

How to ask I do not know;
Only, Jesus, heed our woe!

Take this world of shattered men,
Shape and make it right again.

—Cecile Joyce Keenan.

FAMINE OR FOOD?

Starvation, Always a Corollary of War, Threatens Fighting Countries.

Famine has always been a corollary of war. Even minor conflicts have invariably brought about more or less serious want in the nations engaged. At the present time, world famine is within measurable distance. The tremendous waste, coupled with a great decline in the production of foodstuffs is rapidly depleting available supplies, and if the war continues for a prolonged period, nothing short of superhuman efforts can prevent the nations participating in it from going hungry.

Millions of the men in Britain, France and Italy are in the fighting line, and, obviously, cannot be food producers. In normal times, these countries were dependent on other countries for much of their supplies of foodstuffs, but now they are more than ever so. To outline the situation concretely: It is estimated that the production of wheat in the United Kingdom, Belgium, France and Italy this year will fall short by 500,000,000 bushels of the pre-war average. It should be remembered that in the three years before the war these countries imported together about 750,000,000 bushels annually; also that war conditions make any marked increase in production within the next few years difficult, if not impossible. This deficiency in wheat has its parallel in meats and dairy products and only the most careful management will save the herds of those countries from serious, if not ruinous, depletion.

Such a situation can be mastered by two methods only. First, by conserving existing resources; Second, by increasing production. Both these remedies are receiving attention in the countries at war, but the shortage of land, labor and fertilizers presents almost insurmountable obstacles to any great increase in production in Europe. Further, the shortage of ocean going freighters and the great distance of Australia from the market largely eliminates the Commonwealth as a source of supply.

Canada and the United States must, therefore, in large measure, meet this difficulty. In 1916, slightly more than 39,000,000 acres in Canada were in field crops. In 1916 the area had decreased by nearly 4,000,000 acres. Whether or not this decline is due to shortage of labor, it is a serious falling off in time of war. If men are not available, the labor problem can be met by a much larger use of women on the farms, as well as by the use of larger and more efficient farm machinery. In Britain, many thousands of women have left the cities to work on the land; better machinery has been procured, in some cases by the Government, by whom it is leased to the farmers at reasonable rates. In this way Britain has greatly increased her production of foodstuffs, in spite of the tremendous drain that the war has made on the man-power of the country. Canada can, and doubtless will, follow the lead of the motherland.

MURINE Granulated Eyelids, Sore Eyes, Eyes Inflamed by Exposure to Sun, Dust, Wind or Sand, Relieved by Murine. Try It in Your Eyes and in Baby's Eyes. No Smarting, Just Eye Comfort. Murine Eye Remedy At Your Druggist's, or by Mail 60 Cents per Bottle. Murine Eye Remedy Co., Chicago. Ask Murine Eye Remedy Co., Chicago.

Safety First Hints.

Some safety hints for the wise, which are intended to guard against serious accidents and a possible loss of life, are being sent out broadcast by the electric light companies. From them may be selected the following: Do not cover an electric globe with paper or cloth. It may start a fire. Do not hang an ordinary lamp cord over a nail or metal work. Do not leave a cord connected when you are through with it. Do not touch any wire that is down on the ground, whether it is an electric, telephone or guy wire. In an emergency, remove a wire with an instrument equipped with a wooden handle, keeping the full length of the handle between yourself and the wire.

When you have a little of this and a little of that kind of fruit make a steamed fruit pudding.

Minard's Liniment Cures Colds, &c.

Join the Home Defence movement for the conservation of food. Help to prevent waste by demanding the whole wheat grain in breakfast foods and bread stuffs. Substitute whole wheat for meat, eggs and potatoes. The whole wheat grain is the most perfect food given to man. In **Shredded Wheat Biscuit** you have the whole wheat grain made digestible by steam-cooking, shredding and baking. Every particle of the whole wheat grain is used including the outer bran coat which is so useful in keeping the bowels healthy and active. For any meal with milk, and fresh fruits.

Made in Canada.

STORMS AND TREES.

Hickory is Most Unyielding and Suffers Greatest Damage.

It is always interesting to watch the effect of storms anywhere, but in the woods these effects are most varied and remarkable.

It frequently happens that a tornado or hurricane will follow a certain course and level only the trees in this line, often leaping from place to place. In such cases all trees in its swath suffer or are blown down; but where there is a general very high wind and all trees are hit with about the same force it may be noted that the best rooted ones and most of the strongest wood survive.

Wind resistance of the whole trees has also something to do with the bending character of the trunk and branches, for where these give before the force of the storm they permit the wind to slide off. The hickory, above all, will not yield, and consequently receives the hardest strain against its entire top, whether full leaved or bare. It may be commonly noticed that in a mixed woodland, where a hard wind has driven, there are more hickories down than any other trees.

Feb. 15 days in the month of January I was suffering with pain of rheumatism in the foot. I tried all kinds of remedies but nothing did me any good. One person told me about MINARD'S LINIMENT, so soon as I tried it the Saturday night, the next morning I was feeling very good. I tell you this remedy is very good. I could give you a good certificate any time that you would like to have one. If any time I come to hear about any person sick of rheumatism I could tell them about this remedy.

Yours truly,
ERNEST LEVEILLE.
216 Rue Ontario East, Montreal.
Feb. 14, 1916.

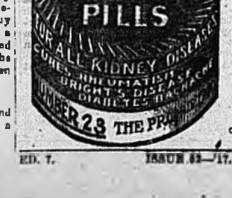
This Means You!

"Eat less wheat, meat, sugar and fats, to save for the Army and our Allies," says the Food Controller. "Eat more corn, oats and rye products, fish and poultry, fruits, vegetables and potatoes, baked, boiled and broiled foods."

This means you! To ask the Canadian people to eat less of certain foods in order that the soldiers at the front may not go short is a matter of intense seriousness.

MONEY ORDERS

Dominion Express Foreign Cheques are accepted by Field Cashiers and Paymasters in France for their full face value. There is no better way to send money to the boys in the trenches.



An Exploded Belief.

That stars are visible in the daytime from the bottom of a deep shaft or well has been generally believed since the days of Aristotle, but there is not the slightest foundation for the idea. Baron Humboldt, who spent a good deal of time in mines himself and questioned miners in various parts of the world, found no evidence in support of this belief, and it has since been thoroughly exploded, but like all other "exploded" ideas it flourishes just as vigorously as ever.

Minard's Liniment Cures Garget in Cows

Women are always being asked to make sacrifices; that is why they respond so quickly in wartime. It surely is time now to begin harping on the duty of men in the matter of personal sacrifices.

Fully one third of the land in Great Britain is owned by members of the House of Lords.

CANADA'S FOREST SERVICES.

Ontario, B.C., Quebec and New Brunswick Are Abreast of Times.

Ontario has thoroughly reorganized its forestry service and put itself on a par with other up-to-date provinces whose forest services are under expert technical direction. New Brunswick is also swinging into line. A well-qualified forester, Mr. P. Z. Caverhill, has been appointed as the head of the forest service and is now making a survey of its forest resources as a basis for laying down permanent lines of forest policy. In this work, the Commission of Conservation has been assisting the province in an advisory capacity.

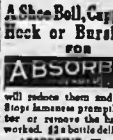
British Columbia and Quebec have long been in the forefront of the provinces that have had an efficient technically qualified forest service. Although Nova Scotia's forests have been nearly all cut over, an efficient forest service would be an investment for the province, that would pay for itself many times over in conserving and utilizing the forest resources remaining. Two-thirds of the land area is better adapted to forest growth than to any other use and should be re-forested.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

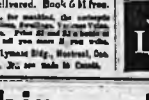
Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.



An investigation is being conducted under the direction of the Food Controller into the poultry situation. A study is being made of such questions as the cost of producing eggs and poultry and of the cost of feeding.

Minard's Liniment Cures Distemper.

A system of monthly returns from all wholesale dealers in fish has been instituted by the Food Controller and will be the basis for regular statistical market information, which is expected to be beneficial to the fish trade of the Dominion.



The Forth Bridge contains 48,000 tons of steel.

When buying your Piano insist on having an "OTTO HIGEL" PIANO ACTION

REAL ESTATES CORPORATION, LTD.
80 Front St. West, Toronto

UNDERWOOD

(Intended for last week)

Mr Albert Coleman returned to Clifford on Tuesday after spending a few days in the neighborhood.

Mr and Mrs Henry Brill and family spent Christmas in Port Elgin.

Messrs Adam Brill, Sr, and Adam Brill, Jr, spent Christmas at Mr Simon Rappel's.

Mr Ed McKenzie, of Pipestone, Man., spent Christmas with friends here.

Mr Joe Shipley arrived home from the west on Tuesday.

Messrs Walter and Geo H McKay spent Xmas in Toronto.

Menno Musselman is running the mill for Geo Roppel during his illness. Mr Roppel is recovering but slowly we are sorry to say, but we hope he will soon be around again.

Mrs Pritchard, of Toronto, is visiting her father, Mr W F Summers.

Home for Xmas: Miss Flora McKay, L D Murray, Lizzie McDonald, W G Dobson, Miss Mabel Nicol from Toronto, Rhoda Carr, from Golden, B C, Nell McGillivray from Muskoka.

Wm Johnston, and daughter of Greenock Tp, visited at Mr C R Johnston's last week.

Miss Alva Richardson, of Toronto visited at J B Richardson's over Xmas.

Mrs Simon Roppel has been ill but we are glad to say she is recovering nicely.

The Methodist Sunday school held the Xmas entertainment on Saturday night. A cantata, "Santa's Parcel Post" was enjoyed by the audience. Proceeds amounted to $33.

Jack McColl, Violet Young and Tena Cole are home from Kincardine High school for Xmas holidays.

SECOND CON ELDERSLIE

Miss Maude Dawson, of Stratford Normal, is spending the holidays at her home here.

Miss Aggie Pepper, trained nurse from New York, is visiting friends here for a couple of weeks.

Miss F Luton teacher at S S No 2 is holidaying in Toronto, and Miss M Stewart teacher at S S No 12, is spending the vacation at her home in Bluevale.

Miss Mabel Lillico, teacher at Sault Ste Marie, and Arthur Lillico, law student at Toronto, are spending a couple of weeks under the parental roof here.

Mrs John Anderson of Calgary arrived home last week on a visit to her parents, Mr and Mr John Ward

The Annual meeting of the South Eld. Telephone Co., was held on Wednesday evening last. There was a fair turnout of the members and the year's business was run over. The following officers for the coming term were elected: — Pres., Minto Jackson, Vice Pres., John H Allen; Sec Treas., Arch Dawson; Auditors — W J Allen and Rich McGill. Trustees — Wilson Patterson, Robt Elliott, Thos Snaith jr, and David Keith

Mr Alex Reid, of Niagara Falls, Ont, visited over Christmas at the home of his father-in-law, Mr A Lillico.

Mr and Mrs T Nicol of Gillies Hill entertained a few of their friends from this concession one day recently.

Sam Alexander is the new trustee elect at S S No 12.

Quite a number from this con. attended the nomination meeting on Monday.

D C Lillico fell on the ice last week and hurt his shoulder.

Blakeway Bros, are busy taking out timber from Mrs D Allen's bush

On Saturday and Sunday the mercury fell down into the cellar and got frozen. It was 20 below zero. A number here have since been put to great inconvenience by water pipes being shut up.

W J Allen, our popular councillor, is elected by acclamation for another term.

ELORA ROAD NORTH

The following letter of condolence was sent to Mis Etta Pearce by the Patriotic League of the Elora Road north:

To Miss Etta Pearce—We, as your friends feel that we should give expression in some way, of our sympathy with you in the loss you have sustained in one who was near and dear to you in the person of the late Emerson, who made the supreme sacrifice. We have reason, indeed, to be proud that a type of young man, such as he was raised in our community. While we feel sad to think he is gone yet we are confident he did his duty in doing his bit to defend all that stands for right against might and to-day he is free from all sorrow and suffering. May you be comforted to realize this and though the cloud be dark behold the silver lining.

PINKERTON

Mr and Mrs Alf Fiddis leave this week for Alliss Craig where Alf has secured a good position in the flour mills there. Mr and Mrs Fiddis were presented on Friday night with suitable gifts by the officers of the Sunday school, where Mr Fiddis was secy and by the officers of the Y P S where he was President. The best wishes go with them to their new home.

Mr Angus M Reid, of Saskatoon, is visiting his parents here, Mr and Mrs Adam Reid.

Rev and Mrs Gale and family spent New Years at their former home at Alma.

Lieut H Pinkerton spent Sunday at his home here.

Mr Joe Anstead has moved into the house vacated by Mr Alf Fiddis.

EBENEZER

Happy New Year, Mr Editor. Your valuable paper is very much appreciated in this community and in the past year we can look back with pleasure to the many valuable items of news we have read from week to week. We wish your paper success this new year.

Miss Bessie Laidlaw, of Paisley, who is home on holidays from London Normal school visited her friend here, Miss Lina Grant, for a few days

Mr and Mrs Wm Cunningham and Mrs Dean of Owen Sound spent Xmas at Mr E H Grant's.

L Corp. G H Martin was home for Xmas from London.

Miss Annie McKelvey is visiting friends in Detroit for a month

Mrs Wm McFadden and family of Port Elgin and Pte Jack Struthers of London spent Xmas at J H McFadden's.

Mr Alfred Robinson secured the contract from S B No 8 of supplying 25 cords of green wood at $5 per cord.

Mr and Mrs Wm Quigley of Port Elgin spent Xmas at Mr Robt Quigley's.

Instead of coming home for New Years Lance Corp Wilbert Martin had to go into the hospital because of a severe attack of neuralgia. We hope he will soon recover.

The skating rink is going again at full capacity. Manager Eph Grant has an exceptional fine sheet of ice this season. A very large crowd was skating on Saturday night. Although the weather was away down below zero some good sports came the distance of ten miles.

A Hockey League has been organized with R Grant as President, and Earle Hankton as Sec-Treas. The League consists of three teams, the leaders of each being three married men, namely — Chas Thomas, Dalght Potts, and Earle Grant. With such capable captains and so many good players available there will be strong competition for the top rung of the ladder.

Mr C A Thomas, who has been in the Arran council the past year is out for re election. C A has proved himself to be a first class councillor and has made a host of friends throughout the township by his good service in 1917.

CANTIRE

Jack Frost is king.

Miss Tena Oswald spent a few days visiting Mr and Mrs D A McIntyre's.

Mr and Mrs John A McIntyre, of Tara, were Christmas visitors at Mr Angus Bell's.

Mr Henry Winch spent a week visiting friends in Port Elgin.

Mr and Mrs Jas C Milne, of 7th con Eld, were visitors at Donald Reid's on Thursday last.

A number of the young folks of this neighborhood took in the hop at the home of John Cumming, 12th Bruce, on Wednesday evening last.

Mr John Taylor and son Ruthven, of Owen Sound, were visitors at the home of Mr Angus Taylor on Friday last.

Mrs W A Blue and son Robert are spending two weeks' holidays with friends at Big Bay, Keppel Tp.

Mr Wm Blackburn spent Yuletide at the home of his sister, Mrs Chas Wandrow, of Mt Clemens.

Mr John McIntyre, of Regina, is visiting with friends here at present. John is a welcome visitor to Cantire.

Mrs Jas Hay, of Victoria, daughter of Mr Robt Stoddart, is paying a visit to the old home.

A number of the parents in this section gathered at the school on closing day. The children rendered a program which was much enjoyed by the visitors.

At the annual school meeting Mr Alex Gowanlock was re-elected sec'y-treas.

Mr Alex Gowanlock was delegate from Cantire Club to the annual meeting of the U P O held in Toronto last week. Mr Gowanlock gave a splendid report to the members of the Club on Wednesday evening last. Co operation is bound to solve many of the difficulties now confronting the farmers in the marketing of their products.

Mr Jos Stoddart is laid up with an attack of lumbago and pleurisy.

Mr and Mrs Garland, of Pinkerton, were visitors at Mr D A McIntyre's last week.

GLAMIS

The memorial service of the late Pte. Thomas Woods was held in St. Paul's church on Sunday morning. A male choir led the singing. Messrs Jack McKeeman and Duncan McLennan sang a very appropriate duett.

Special services will be held in the Baptist church during the next two weeks beginning Jan 6th. The services will be conducted by the Rev. Mr Elliot of St. Thomas

Mrs Arthur Pinkerton of Rocanville, Sask., is visiting her parents Mr and Mrs Jas. McLennan.

Miss Margaret Campbell of Harriston is spending New Year's at her home.

Mr John Carr, of Sask., is visiting his friends around here.

Miss Mary A McKinnon, who spent some time in Flint, Michigan, returned on Christmas.

McLean Young and sister Miss Young Sundayed with friends in Glamis.

Mr and Mrs Will Hendry and family of the Boundary, spent New Year at W J McKeeman's.

Mr Jas. McLennan and Miss Flossie left on Monday to spend a few days in Detroit.

The annual Sunday school entertainment of the Baptist church was held on Friday last. There was a splendid turn out considering the weather. A good programme was given.

Children Cry
FOR FLETCHER'S
CASTORIA

ELORA ROAD NORTH

Mr Angus McPhee, who had a successful auction sale a few weeks ago, has rented his farm to Mr Watson McKinnon and intends to make his home in Sarnia.

Mr S Winch spent a few days in Toronto.

Mr John Rae spent the week end in Port Elgin.

The Christmas entertainment at No 7 and 8 school was a very pleasant event.

Frances McDougall, who contracted diphtheria, has recovered and the family are released from quarantine

WALKERTON

The thirsty ones who have been consoling themselves that after the war the booze trade would go merrily on again and that all the old refreshment plants would be turning out the suds as of yore, will not find much consolation in the fact that the machinery in the Walkerton Brewery is being scrapped and sold to a local foundry for old iron. As the brewery was one of Walkerton's earliest industries and at one time was the biggest thirst quencher in Bruce, its going by the board marks the close of the wet era. To those who liked nothing better than Walkerton beer, the scrapping of the brewery machinery will mean, "Me and my true love will never meet again," or words to that effect.

Two gents from the Pinkerton settlement who sampled the contents of a bottle of booze handed to them by a side partner in the rig on their way to Walkerton recently, and which side partner got drunk and gave the thing away, resulting in them being soaked $100 and costs each by a local police court for violating the sacred clauses of the Prohibition Act, had their fines reduced this week to $15 and costs each or $25 apiece by an appeal entered by Mr. David Robertson, K.C., to the License Commission at Toronto, and which represented them as a pair who had innocently transgressed a feature of the booze code not too generally known. In other words they had walked on the green without noticing the sign "keep off the grass," and the hearts of the Commission were touched at the sadness of the thing. When the final returns came in, it was a case of "Mercy drops around us are falling" for the mulct pair, as the removal of the greater portion of their fine had a decided tendency to fill the heavy end of their sorrow. For the man who passed the booze, however, it wasn't just the "end of a perfect day," as he was required to come across with the $300 and costs as imposed by the court for his part in the performance.

While jurors get $2.50 a day and mileage attending courts at Walkerton, the amount allowed to witnesses is only $1.50 per day and mileage. As the hotels here charge from $2.00 to $2.50 per day for board, the witness, besides losing his time, is actually out of pocket every day he is in attendance at the court. The fact that the assizes and the sessions frequently last nearly a week, the hardship on witnesses, who have often to remain until the end, is visibly apparent. In many cases these witnesses are poor and scarcely able to stand the financial strain, yet if they fail to be on hand when called it's an arrest and jail term for them. Just why a witness should get $1.00 a day less than his next door neighbor who may be a juror, when he has to trail just as far as the latter and lose just as much time, is something that will bother anybody to explain. At the court the witness is also often subjected to the rawest and most gruelling bombardment at the hands of opposing lawyers, who in order to win their cases frequently try to beat and ridicule the witnesses and hold them up as public jokes, and make their sworn statements appear of less value than the rankest fiction of a tinker's oath. The juror, on the other hand, is treated with a decorum and tenderness by the bar almost bordering on servility, he being one of the "gentlemen of the jury," to whom the lawyer pleads and humbly appeals. Better paid and better used, the juror has it "on" his brother every way. With witnesses not being paid enough to meet their fair expenses, is it any wonder that the Bruce County police are unanimous in declaring that the securing of witnesses for cases in the hardest proposition they have against Constables who get working on a case that everybody seems to know about, frequently find all hands strangely dumb when scouting around for witnesses. The reason is easily apparent. Ordinary self-respect would make any man shun the badgering that too frequently is worked on the witness box, while ordinary horse-sense will tell the witness that he will be out of pocket in coming to town at $1.50 a day. If the cause of justice is to prosper rightly in Bruce, judges and magistrates will have to, in many instances, protect their witnesses more, while the county council will have to attend to their part of the combination and see that the witness gets at least as much pay as a juror.

That there are too many government officials here quartered on the public is an admitted fact, and the Union Government, from which we hope and expect great things, could not get a better cutlash-raiser for this section than by using the carving knife and eliminating some needless offices in this cow country. For instance, the passing of the Prohibition law, and the closing of the liquor shop and all the breweries but one in this inspectorate, have left very little work for the Inland Revenue Officer, Mr. C. W. Cryderman, to do, yet his salary, which was increased this year, goes on, and the people, who are being urged to save for the war, see a horrible example of needless expense in keeping this office extant here. The work is such that it could be easily done from headquarters at Owen Sound, and Mr. Cryderman might be shunted to some more needed job. At all events it seems the height of extravagance to keep a high salaried government official to look after one brewery. Another item of nearly $4,000 revenue per year might be saved by the Union Government forgetting to appoint a successor to Judge Klein when he drops out next April, as we believe it is his intention to do. Litigation has fallen off to such an extent that one judge could easily handle all the work and still have a soft thing in Bruce, and the Union Government, which is pledged to whittle down the public expenses, should have a beautiful chance right here in April. The old system of patronage, which was adopted by both political parties in the past, has caused a terrible overlapping and much needless expense to the country, and now the Union Government has pledged itself to abolish the system, we are hoping great things from it.—Herald and Times.

THE CHIEF CHARM OF LOVELY WOMAN

Soft, Clear, Smooth Skin Comes With The Use Of "FRUIT-A-TIVES".

MORAH WATSON
96 Drayton Ave., Toronto.

Nov. 10th, 1915.

A beautiful complexion is the handsome woman's chief glory and the envy of her less fortunate rivals. Yet a soft, clear skin—glowing with health—is only *the natural result of pure Blood.*

"I was troubled for a considerable time with a very *unpleasant, disfiguring Rash*, which covered my face and for which I used applications and remedies without relief. After using "Fruit-a-tives" for one week, the rash is completely gone. I am deeply thankful for the relief and in the future, I will not be without "Fruit-a-tives".

MORAH WATSON.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

The Canadian Farmer's Real Friend

YOUR letters will be answered, you will get the exact information you need, you will get the advice and assistance you desire free, provided by experts to whom we pay real money for the answer we accept you, if you become a subscriber to FARMER'S MAGAZINE. This magazine is for—

The Men on the Farm

Helps them plan, and tell them how to construct barns, stables, sheep barns, hen houses, silos and dwellings.

Tells all about septic tanks, hydraulic rams, water-supply and lighting systems, power farming.

Gives advice and information about feeding and breeding and the health of animals; about the business side of farming, co-operative methods, investments and insurance.

The Women on the Farm

Helps them in their home planning and making.

In their kitchen problems.

In matters pertaining to children—their health, rearing and schooling.

Deals with styles, dress patterns and other feminine interests.

Gives help in gardening and flower culture.

Gives news of women's work.

For all it provides, stories, special articles on timely subjects by practical men and experimenters; and the latest and most accurate information on every matter of concern to farmers.

FARMER'S MAGAZINE

has three times as many regular departments as are ordinarily found in farm papers, and is about the most satisfying paper you can get at the price. Subscription $1.00 per year.

EVERY issue of FARMER'S MAGAZINE is worth a dollar bill, because it is downright helpful in practical ways. The free advice and information it supplies on request, by private letter—may be worth many dollars. Have the FARMER'S MAGAZINE in your home as you would a hammer or a saw—an ever ready and indispensable help. Have it for friendship.

The price is One Dollar per year. Did we send it to you, and remit for it when we send you the bill. Address the publishers:—

The People's Popular Store

Great Price-Cutting Sale for two weeks

PREPARATORY to our annual stock-taking we will cut the prices of all heavy winter goods in order to make room for spring and summer goods which have been on order for months past. You will find our goods are 1916 qualities and prices with 1918 styles. Next winter you will get about the same styles but shoddy qualities. It will be one of the best investments you have ever made to come early and often and stock up for a year or two ahead. Space will permit to mention only a few of the many bargains during the next two weeks:

Overcoats

Men's Heavy Beaver Coats, Persian Lamb Collar, good sizes, regular price $40 for $30. Men's Heavy Double-breasted Ulsters, regular price $18 go for $13 85. We have another line, same style, regular price $15 50 for $11 63, and another, regular price $10 for $7 50. We have also a good range of Youths' and Boys' Overcoats at similar reductions.

Caps

Men's Heavy Tweed Winter Caps, regular price $1 50 for $1 20. We have another line, regular price $1 25 for $1; another, regular price 90c for 72c; and another, regular price 60c for 48c; also a couple of lines of Boys' and Youths' Caps to sell at 50c and 60c. Also a few Men's Fur Caps to clear at half price.

Men's and Boys' Heavy Rubbers

Men's Heavy Rubbers, 12-inch tan leather top, regular price $6 75 for $5 40; Men's Heavy Rubbers, 9-inch to,, regular price $5 50 for $4 40; Men's Heavy Rubbers, 7-inch top, regular price $3 for $2 40; also another line, regular price $2 80 for $2 25. Boys' Heavy Rubbers, leather top, regular $2 75 for $2 20; Boys' Heavy Rubbers, leather top, regular price $2 50 for $2; another line, regular price $1 75 for $1 40.

Horse Blankets

Good heavy Horse Blankets with straps, regular price $3 25 for $2 60; strap in front, regular $1 75 for $1 40.

Women's Winter Coats

Women's Coats, new style, regular price $20 for $15. reg $17 50 for $13, reg $15 for $11 25, reg $10 for $7 50.

Women's Sweaters—Two only, Women's Brush Wool Sweaters, late delivery from mills, reg price $12 50 for $9 35. We have also a good assortment of Wool Sweaters in Men's, Women's and Children's at about one half what they would cost at the mills now.

Furs—One only, Alaska Sable Set, worth not less than $75 to produce now. It can be yours for $48 75. A beautiful Black Fox Stole and Muff to match, extra value now at $75, yours for $56 25. Black Wolf Sets, reg price $22 50 for $16 25. One only, Australian Red Fox Set, very latest in colored furs, reg $27 for $20 25. We have another Fox Set, reg price $16 50 for $10 85; also separate Neck Ruffs $3 49 up, Muffs to match.

See our Corduroy Velveteen, very suitable for children's suits, reg 75c for 43c.

Call and get some of our American Coal Oil, sold all over for 30c a gallon. Our price, 4 gallons for $1.

All goods sold at cut prices must be spot cash or produce at time of sale. Goods sold on advancing market should be cash even at regular prices. All accounts up to the end of last year must be settled by cash or note before the 15th of this month. Please note this extension of time, as we cannot turn our old books out of safe. Come early and often, and you will save money. Come in the forenoon, as clerks will have more time to show goods, but come anyway.

MARRIED

SCHMIDT—BROWN—At Underwood, on Dec 26th, by Rev A McNab, Mr Chas. Schmidt, 6th Bruce, to Evelyn, daughter of Mr Robt. Brown, 8th Bruce.

—Read Davison's adv.

—Mrs G. L. Carter has returned from visiting her sister in Hamilton.

—Mrs Clarke and daughter, Miss Coral, of Brampton, were visiting here for a few days.

—Mr Angus Ross was down from Calgary on a few days' visit to his old home on 10th Bruce.

—Mrs Wilson of Toronto and Mr Percy Bell from Moosejaw, are visiting their parents, Mr and Mrs D. Bell.

—Mr Arthur Webb and sister Miss Birtie, of Glamis, were week-end visitors at Mr John McBeath's, 4th Elderslie.

—Mr Neil Robertson, formerly of Bruce Tp., is here from Minnedosa, Man., on a visit to his old friends and acquaintances.

—The Women's Patriotic League wish to acknowledge and thank the local Orange lodge for a donation of $5 for Red Cross purposes.

—Three lads of the town were fined last week for indulging in pranks such as cutting off lights at the town hall while a dance was being held.

—Mr R I Nesbitt, of Glamis, was taken suddenly ill with appendicitis on Monday, and was operated upon at his home. His condition is very critical.

—Mr John Ewing, of Manneville, Alta., is visiting his old friends of schoolboy days after ten years' absence. He is at the home of his uncle, Mr Alex Ewing, Elora Road north.

—The steady and hard winter weather is causing a shortage of running water. The streams are almost down to midsummer level, and power pressure at the dams is very low so that we have dim lights and sometimes no lights by the electric service.

Women's Patriotic League

The W. P. L. will meet in Putnam's hall on Friday afternoon at 3 o'clock. A full attendance is requested.

Nominations on Monday

To fill the vacant seats in council and school board, the village clerk has called for nominations to be held on Monday next.

Wrist Fractured

Mrs J W Brown, of Elora Road north, fell and fractured her wrist when she stepped on an icy spot on a floor last Saturday.

Fell from Load of Hay

Mr Frank Neelands was badly hurt and his head and severely shaken up by falling from a load of hay he was driving a few days ago.

Hydro at Tara

The Hydro was turned on in Tara on night, and the street lights are working in perfect order. Everyone is delighted with the light and Tara is now one of the best lighted towns in the province.—Tara Leader.

Where the Grass is Green

Mr Sam Lindsay, of Vancouver, B. C. in remitting his subscription, tells The Advocate that the grass is lovely and green there, people are cutting their lawns and some of the banks are budding out. Mr Lindsay is on the police force of Vancouver

Died at Port Elgin

Mr Angus McCaffrey, who had been a resident of Paisley for ten or twelve years died on New Year's Day at the home of his daughter, Mrs H Montgomery of Port Elgin, where he had gone on Dec 14th. The deceased was in his 80th year. He was born in Islay, Scotland, came to Canada with his parents, who settled in Grey Co. Before coming to Paisley he had been farming for many years near Keady. Mrs McCaffrey died three years ago. A family of four sons and four daughters survive. The remains were brought to Paisley on Thursday for burial in Stark Vale cemetery. Rev M Neilson conducted the funeral services.

Red Cross Shipment

Contents of bales for Nov and Dec shipped by Paisley W. P. L.: 165 pre socks, 47 flannel shirts, 26 suits pyjamas, 6 doz. pillow covers, 6 doz trench towels, 4½ doz huckaback towels, 61 turkish towels, 18 doz cheesecloth handkerchiefs, 18 personal property bags, 21 stretcher caps, 3 trench caps, 1 Balaclava cap, 5½ doz wash clothes, 1 mattlet. Donated by Lockerby W. P. L. 24 flannel shirts, 30 prs socks, 20 turkish towels, 11 suits pyjamas, 21 stretcher caps, 4 wash cloths. Donations from Knox Church Patriotic Society: 3 suits pyjamas, 18 personal property bags, 13½ doz turkish towels, 4 doz face cloths. Donated by Mrs Birchill 8 yds sheeting.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

P. B. MORE, Druggist

Municipal Elections

ARRAN

Reeve—Jos. Johnston 256, Arch. Crowe 215, Asst. Morrow 59. Councillors—W. Scarrow 300, C. A. Thomas 250, Fred George 250, P. H. King 189, Sam Miller 180, D. C. McKinnon 135, W. Davis—

It was a close run between the two leading contestants for reeve. Who the fourth councillor will be is not yet certain, as King and Miller are tied. At Arkwright there was a tie and the vote not wrongly marked for reeve, and the council vote was not counted. This may decide the point, but if the ballot is wanted for both there must be a casting vote will be given by Clerk Potts.

GREENOCK

Reeve Dennis Phelan was re elected, defeating his opponent, Mr M McNeb, by about 60 votes. All the old councillors were also elected—G W Gilchrist, Thos Sawyer, Jas Campbell and Thos Symon.

BRANT—Reeve, Willoughby, maj 23.

KINCARDINE TP—Reeve, Scott.

TARA—Reeve, Jos E Grant, maj. 12.

CHESLEY—Mayor, M A Halliday (acc'd); Reeve, W H Brown (acc'd).

WALKERTON—Mayor, A B Johnston (acm); Reeve, J Douglas; Councillors—W George, O Latner, F Lippert, H Truan, H Pietsch, F Vogan.

Elderslie Farm Brings $95 per Acre

Wm Pruder has sold the Anderson farm of 150 acres on 2nd con. Elderslie, near Chesley, to Walter Brown for $14,250 which is at the rate of $95 per acre. This is the highest-priced land ever sold in Elderslie, and possibly in Bruce County. It sounds like prices paid for farming lands near the large cities. The original owner of this farm was John Anderson. He sold it to his son Donald who disposed of it to Jos. Jackson. The next owners were Geo Elliot and Wm Pruder. Each time the property changed hands it was sold at a higher price. There are splendid buildings on this farm which is in a high state of cultivation.—Enterprise.

COMING

"The Birth of a Nation," D W Griffith's massive spectacle, coming to the Town Hall, Paisley, on Monday Jan 14th is the largest and most important production of a decade, yet not a word is spoken throughout the performance of nearly three hours. Music supplies the absence of speech, mechanical effects and realism whilst the wizard of the screen, David W Griffith, unfolds in 12,000 feet of film the thrilling romance of the War between the States and the Reconstruction of the Southland. Some idea of its magnitude may be had from the facts that 18,000 actors and 3,000 horses took part and that the staging of this great "outdoor" drama cost half a million dollars. Several of the actors are of Southern lineage. Henry Walthall, who plays the heroic role of the little Confederate colonel, is a member of the well-known Walthall family of Alabama. Miriam Cooper, who appears as Margaret Cameron, is a direct descendant of Charles Carroll, the Maryland signer of the Declaration of Independence. Mr Griffith is the son of a Brigadier General in the Confederate Army. For every character, however small, Mr Griffith has found just the personality needed. After that his masterly direction made each one give a perfect characterization of the widely varying roles. The result was not acting to life itself. Such realism is never seen in the old fashioned stage. The limitations of the theatre were swept away for Nature was Mr Griffith's stage. Panorama after panorama is revealed to the astonished eyes of the spectator. The most impressive imagination could hardly picture to itself such scenes of splendor.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

Agricultural Society Meeting

THE annual meeting of Paisley Agricultural Society will be held in the council chamber on Thursday, Jan 10th, at 7.30 o'clock p m. A full attendance of members is requested.

T. HUGHARDSON, Pres. | W. E. BARNETT, Sec'y.

Same Here

Wiarton Echo: A very practical argument in favor of church union was evident last Sunday morning. Jack Frost presented the argument, and as he was backed by a general scarcity of fuel, which is as high priced as millionaires can afford, the argument looked convincing. It was a bitterly cold morning, and in some of the churches there were only a very few present. "The two and three were gathered together" One church would have probably held all the worshippers last Sunday morning. And it took a lot of wood to heat all the churches. Wood is a high price, very high, so taking the whole situation into account, it looks as if church union would be a very practical affair, anyway. Perhaps a fuel controller will step in and force the issue.

Correction

We are informed that in our item of Dec 26th regarding the death of Mr Lachlan McPhail cattle the facts were incorrectly stated. We are now told that it is not a fact that one of the seven cattle for which Mr McPhail makes c... dead before any salts was administe... it, that what was purchased was administered to seven of the eight cattle it's were sick and the salts for the eighth a final was borrowed from a neighb... The seven to which the purchased salts was administered were dead the next morning, and the eighth to which it's borrowed salts was given was apparently all right the next day. We understand that the contents of the stomach of one of the seven animals are being analyzed, and it is expected that the result of that analysis will show whether the purchased salts had anything to do with causing the death of the seven animals or not.

Paisley 8, Chesley 7

This little town has a hockey team that has made a very auspicious opening for this season's matches. On Friday evening they beat out their old rivals from Chesley in a very strenuous contest. The home players extended themselves in the first half, having a score of 6 to 2 at the end of the period. Then the visitors pulled up at a lively gait until they also had seven tallies to their credit. This left a chance for an exciting finish, and it came, the honors scoring the last goal on a strong bit of combination. Our boys are putting up a splendid team game, and if they can keep up the pace for the winter should have a very creditable record to show. The team as played on Friday: Goal D Cottrell; point, Alan Shoemaker; cover point, H Collins; centre, A Stanley; left wing, D Howes; right wing, Dave McGregor. These boys are all under 20 years of age, and all picked up the game on home ice, so are a strictly local team. They play a return game in Chesley on Thursday.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

NEVER BURN HUMUS-MAKING MATERIAL

Too many of us are quite thoughtless about the use of fires on the farm. Fires, on the average farm, do far more harm than good.

Everyone who burns stuff in the field or woodlot does it because he believes he is destroying either weed seeds or useless rubbish. This attitude is all right, provided we revise our definition of rubbish and get a clearer notion of the methods by which weed seeds are distributed.

It is quite rare to find any amounts of weed seeds, especially of the more obnxious weeds, still in the seed heads and up from the ground sufficiently to be burned by the usual spring fire.

In fact, one of the chief reasons why certain weeds have been dubbed "noxious" is because they have developed, during many generations, the ability to survive the various adverse conditions and rough treatments to which the farmer has subjected them.

Usually the amount of vegetable matter destroyed when stubble or other growth is burned over in the spring to kill weed seeds would do far greater service if plowed under to help the corn or other crop to outgrow the weeds.

Do Not Rob The Land

I have known of many cases where stubble ground which was to be put into oats or some cultivated crop was burned over for the sole purpose of making plowing appear easier. The man who robs land in that way, even if the land is his own, ought to be indicted for robbery and prosecuted to the full extent of the law! Such wilful destruction of the most vital element in the maintenance of soil fertility and tilth is certainly criminal, not only against the present but against future generations. It is this disregard for the preservation and turning under of humus making materials which has done more than anything else to cause the abandonment of so many farms in older sections of the country—this is what causes the land to "run down," "run out" and become worthless for agricultural purposes until the humus is restored.

It is very fortunate that public sentiment is being educated and undergoing marked changes in this matter. Most everyone who was raised in the grain growing section of our country can well remember when it was the regular custom to burn nearly all of the stubble land, large stacks of straw, and thousands upon thousands of acres of cornstalks. Now most of us see that such wholesale destruction was sheer wastefulness.

But we have not yet learned to convert the rubbish which accumulates about the place into crops. Most of us simply burn it. Rubbish may be defined as any sort of material, generally considered unsightly, useless and worthless, which is lying around the premises. It may range from scrap iron and brickbats to dead grass and leaf mold. It goes without saying that rubbish consisting of inorganic stuff like stones, iron, etc., could be most efficiently used in concrete work; but the organic material, with the exception of pine knots and some other things that rot very slowly, will quickly decompose to suitable condition for plowing under.

Value of Compose Heap

There should be a compost heap on every well managed farm. Several tons of organic rubbish should be placed on the pile every year. It is really a rick or long pile, the new material not being thrown onto the old rotten compost but should be made into a long pile. Whenever some especially well rotted, rich material is wanted for hot-bed, garden, etc., the little compost is ready.

Thousands of dollars worth of organic matter which should go into the compost heap are burned every year in Ontario. Any manufacturer who would be so wasteful of a by-product would deserve to fail.

Other thousands are cut by the burning of the vegetable mold, leaves, and twigs which are present in newly cleared land. Fire, because of its terrible power to destroy organic matter, has been used from the earliest times in clearing land. Undoubtedly fire is doing much more good than harm when one uses it to burn large log heaps, or big brush piles, but great care should be taken to burn these at a time when it is damp enough to prevent the fire from spreading and burning the leaves, twigs and leaf mold over the entire clearing. By allowing the fire to cover the entire clearing one may destroy as much plant food in the form of organic matter as he can replace by rotating crops for the next eight or ten years.

No fire should be started on the farm unless its purpose is quite definite and useful. By exercising the proper care along the lines outlined above Ontario farmers may, instead of wantonly destroying it, turn millions of dollars worth of humus-making materials into gold that will clink in their pocket and aid in swelling the profits of the farm.

Poultry

Every year at the beginning of winter many poultry keepers are disappointed and puzzled by the failure of apparently well grown pullets to lay according to expectation. They can not understand why early pullets that seemed to be developing nicely and show the usual signs of being near laying should remain at that stage for weeks and sometimes for months.

Where the conditions are as described, the most common cause of deferred laying in an insufficient ration.

Underfeeding in the early fall occurs oftenest through the failure of the poultry keeper to increase the food given to pullets on range as much as is necessary to make up for diminution in the supplies secured by foraging.

Underfeeding after the pullets are put into winter quarters is usually due to excess of care to prevent them from becoming too fat to lay.

In either case the remedy is to feed the birds all that they will eat of a substantial ration, furnishing in proper variety the food elements required, taking care at the same time to provide for as much exercise as will keep them in good condition under heavy feeding.

While pullets remain on range the only changes in diet usually necessary as cool weather comes on are to increase the quantities of food given, especially corn and corn products, and if green food on the range is running short to supply what is required to make up the shortage.

It is desirable to have pullets in their winter quarters about a month before they are expected to begin laying. Moving them at that stage does not retard laying, while if they are moved shortly before or after beginning to lay the change may set them back several weeks.

Pullets that will not begin laying before winter sets in may be left in the coops which they occupied while growing as long as the weather permits them to range.

When the pullets are in winter quarters and are dependent upon the feeder for all green food and animal food as well as for grain, one of the following rations will supply the variety required. The proportions indicated are parts by weight.

Ration No. 1.

Dry mash	Scratch feed.
2 parts bran.	2 parts cracked corn.
3 parts middlings.	
4 parts cornmeal.	1 part wheat, oats, or barley, or mixture of the three.
1 part beef scrap or fish meal.	
Green feed.	
As available, in constant supply.	

Ration No. 2.

Dry mash	Scratch feed.
6 parts mixed feed (bran and middlings)	Cracked corn. Wheat feed.
4 parts cornmeal	Cabbage in constant supply.
1 part beef scrap or fish meal.	

Ration No. 3.

Dry mash	Scratch feed.
4 parts cornmeal.	Wheat.
2 parts bran	Green feed.
1 part beef scrap or fish meal.	Sprouted oats, cabbages, or mangel beets.

Ration No. 4.

Dry mash	Scratch feed.
6 parts cornmeal	Heavy oats.
3 parts bran	Green feed.
1 part beef scrap or fish meal.	Sprouted oats.

Ration No. 5.

Dry mash.	Scratch feed.
2 parts cornmeal	2 parts cracked corn.
1 part beef scrap.	1 part oats.

In deciding upon a ration a poultry keeper should be governed largely by the availability and cost of foodstuffs in his locality. The common grains do not differ extremely in composition and food value.

Uses for Salt.

Sprinkle a little salt in the skillet before placing the fish in it to fry and it will not stick to the pan.

Make a little salt bag and rub the griddle with it; pancakes will not stick and there will be no smoke or oder.

Cakes may be prevented from burning by sprinkling a little salt in the bottom of the oven.

When grease or milk has been spilled on a hot stove the odor arising from this may be removed by sprinkling with salt.

Egg stains on silver can be removed by rubbing with a little salt and a damp cloth.

Sheep Notes

Early Spring Lamb.

Early spring lamb, as I understand it, is an animal finished in January and February, says an exapt. It must be young and tender and toothsome. I breed early lambs from the meat grades. I prefer Shropshire and Hampshire ewes of good conformation and a Southdown ram. This cross has always produced a lamb of quality for me that commands a top price.

Raising early lambs is a profitable business on any Ontario farm. The lambs are finished and marketed early and the ewes are sheared during April. At that season the fleece is in first-class condition and will command a good price in the wool market. The wool helps to pay for the cost of feed. And the manure is a rich fertilizer that is worth all the straw and roughage used to make it.

I consider it costs me about two cents a day to feed a sheep, because I raise all the rations and roughage on the farm. Under my system of raising sheep, I buy the ewes at the stockyard in July, and the same animals are conditioned for market and sold the following March or April.

Indications point to high prices for early lambs this coming spring, and ewe sheep will cost considerably more than in 1916 and 1917, but I believe the price of hothouse lambs will sell in proportion to the cost of production.

My method of handling sheep should appeal to the busy farmer who has limited pasture land and little waste ground. It gives an incentive to raise sheep because the system has many features that must appeal to the business farmer. The net profit is great on the capital invested, and the work of caring for the sheep comes after the outside labor is over and the sheep are sold before the next year's work begins. The price of lamb and mutton is high, and will remain above the old figures for a long time, I am sure. The public is getting to prefer lamb to mutton, and it is up to us farmers to encourage their appetite and supply the demand.

The Dairy

"It has been clearly demonstrated that the good dairy cow is a more economical producer than any other farm animal," says Prof. E. S. Archibald, Dominion Animal Husbandman. "Not only does she actually yield more product from a given amount of feed, but she does that at the least cost and the greatest profit."

"Notwithstanding these facts, the production of milk and fat from the average cow is exceedingly low, being approximately 3,800 pounds of milk and 130 pounds of fat per annum, which in value is less than the total cost of production. Nevertheless, it has been clearly demonstrated that by better feeding and management this average may be easily increased from 30 to 80 % with an increased cost of feed and labor of only 10 to 20 per cent.; the margin would be largely profit. Such an increase is not only a financial necessity but the patriotic duty of every dairy farmer."

Do not allow dirt to accumulate in the manger or under the water-box. It soon becomes foul and causes the animal to lose its appetite.

Delicious Dishes of Pop Corn

This year because of the scarcity of sugar we must use less for our Christmas candies. Every pound of maple sugar; honey or molasses that we use instead of white sugar means more for food for the British and French children. If we can, in addition, spread the candy we make over the surface of pop corn kernels, an even greater saving of sugar will result.

Pop corn, salted, buttered, or mixed with molasses, is a wholesome and unexpensive confection. Pop corn cake may be molded in the form of soldiers, cannon, dolls and other shapes. Fancy boxes or net bags filled with prepared corn will delight the little folk. Combinations of dried fruits and nuts may take the place of candy in filling Christmas boxes.

The following are excellent recipes:

Pop-Corn Balls

Mix 2½ cups molasses and ½ cup brown sugar, 1 tablespoon butter and 1 tablespoon vinegar and boil until it hardens when dropped into cold water. Have ready 5 quarts of pop corn, free from any imperfectly popped grain. Pour this mixture over the corn; mix well. Dip the hands into cold water and press the corn into balls.

Chocolate Pop-Corn Fudge

Cook together a pint of sugar, half a pint of milk, 2 squares of bitter chocolate, 1 tablespoon butter, and a saltspoon of salt, until the soft ball stage is reached. Then remove from fire; add a teaspoon of vanilla extract with 1½ cups of coarsely chopped pop corn. Stir until the mixture is creamy but still soft; pour into greased pan, and when it hardens sufficiently, mark into squares.

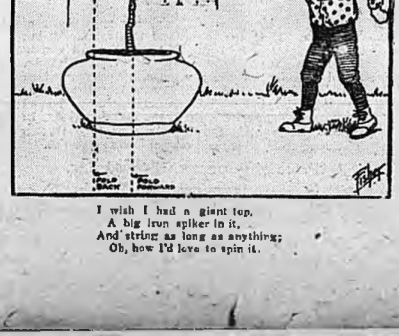
Maple Pop-Corn Squares

Boil together 2 lbs. brown sugar or maple sugar, 1 pint new milk, and ¼ teaspoon cream of tartar. When the syrup makes a soft ball in cold water, add 2 tablespoons butter; stir it gently and remove from the stove; add a teaspoon vanilla; set the pan in a vessel of cold water and beat until it begins to cool. Then pour into greased, straight-sided pans, and strew thick with pop corn, while still soft cut into squares—but cut again in the same lines when cold. Wrap the pieces in waxed paper.

Pop Corn Cake

One quart popped corn, 1 cup sugar, ¼ cup corn syrup, ¼ cup water, 2 tablespoons molasses, 1 tablespoon butter, 1 teaspoon salt. Pick over the popped corn, discarding all hard kernels, and finely chop the corn, or put through meat grinder, using a coarse knife. Put sugar, corn syrup and water in saucepan, stir until it boils, and cook to 270 degrees F., or until easily cracks when tried in cold water; add molasses and butter, and cook to 290 degrees F., or until it is very hard when tried in cold water. Add corn, stir until well mixed, return to fire a moment to loosen it, then pour on buttered slab or tray and roll with rolling-pin as thin as possible. Cut in squares or break in small pieces. Molasses may be omitted.

Maple Corn Balls



Three quarts popped corn, 1 cup maple syrup, ¼ cup sugar, 1 tablespoon butter, ½ teaspoon salt. Pop corn and pick over, discarding kernels that do not pop, and put in large kettle. Melt butter in saucepan and add syrup and sugar. Bring to the boiling point, and let boil until mixture will become brittle when tried in cold water. Pour mixture gradually while stirring constantly, over corn which has been sprinkled with salt. Shape into balls, using as little pressure as possible.

Pop Corn Fruit Cookies

Mix 1 cup each of fine-ground pop corn, sugar, and fine-cut figs or other dried fruit with ½ cup each of shortening and milk and a beaten egg. Gradually add 1 cup each of white flour and cornmeal, into which 1 teaspoon salt, 1½ teaspoons nutmeg and 4 teaspoons baking powder have been sifted. Roll 1-3 inch thick; cut out and bake in a moderate oven.

Fruit Nut Caramels

1 cup figs, 1 cup dates, 2 cups walnuts. Wash and stone the dates, wash figs and remove stems, and put with the nuts through food chopper. Mix together thoroughly and press firmly ¾ inch thick into a small buttered pan. Cut in squares, or shape in small balls and roll in icing sugar.

GOOD HEALTH QUESTION BOX

By John H. Huber, M.A., M.D.

Dr. Huber will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John H. Huber, care of Wilson Publishing Co., 73 West Adelaide St., Toronto.

Consumption—Death's direct door to most hard students, divines, philosophers, physicians, deep lovers, zealots in religion.—Old Saying.

FROM THE SECOND TO THE THIRD YEAR.

Three square meals and a little extra for baby, as follows:

Breakfast: 7 to 8 o'clock. Oatmeal, hominy, cracked wheat (each cooked 4 hours the day before they are used), served with milk and sugar or butter and sugar. A soft boiled egg, hashed chicken. Stale bread and butter. Bran biscuit and butter. A drink of milk.

At 10 a.m. the juice of one orange may be given.

Dinner: 12 o'clock. Strained soups and broths, rare beefsteak, rare roast beef, poultry, fish. Baked potato, peas string beans, squash, mashed cauliflower, mashed peas, strained stewed tomatoes stewed carrots, spinach, asparagus tips. Bread and butter. For dessert: Plain rice or plain bread pudding, stewed prunes, baked or stewed apple, junket, custard or cornstarch.

Supper: 5.30 to 6 o'clock. Farina, cream of wheat, wheatona (each cooked two hours) from 1 to 3 tablespoonsful, served with milk and sugar or butter and sugar or butter and salt. A drink of milk. Stale bread and butter. Twice a week custard, cornstarch or junket may be given. Occasionally malted milk or weak cocoa.

With three meals a child has a better appetite, much better digestion and thrives far better in consequence, than those children whose stomachs are constantly working overtime. Yet some especially delicate children can not do without a luncheon at 3 or 3.30; then a glass of milk and a biscuit or a cup of broth are right. Or a child may at this time relish instead a scraped raw apple or a pear; this is particularly judicious for constipated children. Children recovering from serious illness, will require, according to the doctor's directions, more frequent feeding.

QUESTIONS AND ANSWERS.

M. W. S.

If you will send me a stamped and self-directed envelope I will mail you the information you desire.

Rest in Tuberculosis.

What do you mean by rest in tuberculosis?

Answer—Such a sufferer must rest. There is otherwise no hope for his emaciated body, an organism on the verge of bankruptcy. Here is, of course, a factor difficult of management especially among the poor (who furnish the majority of consumption cases), many of whom feel that they must somehow work in order to maintain themselves and their own. And yet there has to be rest, especially when there is fever; and at least until the sufferer has recuperated from the prime predisposition to this disease. For the consumption germ fattens on devitalized tissues.

The rest has got to be absolute if the bodily temperature reaches 100 degrees by the clinical thermometer; and the bed inexorably when the fever has gone above this? The rest should if possible, be outdoors—at least with open windows. When the air is cold warm headgear is to be worn; or the woollen "helmet" which comes down over the collar bone. And the footwear must be at least as ample and as comfortable as the head gear. The body must be abundantly clothed; there are sleeping bags made for such patients. The idea of sleep is involved in that of rest. Nowhere else should nature's soft nurs be so sedulously wooed. Insomnia is most exhausting in such a disease as this, when it is so necessary to conserve and build up the strength. Nor has any restorative ever been invented to compare with sleep. Insomnia, with fatigue and over exertion, have predisposed many to tuberculosis. We strive to induce sleep without medication if possible; may among other ways, be induced by drinking of hot milk after the patient has been tucked away for the night.

How To Wrap Xmas Boxes.

Christmas packages are getting more attention this year than they did last. Since gifts are to be more practical and not of the decorative type the outside of the package must be decorative. For the last two or three years people have used for wrapping tissue paper of various colors, generally white; have tied a package with red, green or holly ribbon, and have thought they had solved the problem. This year givers must consider the individuality of every person to whom a gift is sent.

Again paper is scarce and every scrap to be found about the home should be utilized. Almost every household has stored away in the attic or storeroom rolls or parts of rolls of wall paper. These pieces can be used for wrapping the Christmas package, to good advantage.

For the small flat package containing some soft fabric, yellow could be used tied with black ribbon, or if necessary one could purchase Taffia in various ers for a small amount, much less than the cost of ribbon, and when tying the bow a small bunch of flowers, perhaps the best ones of a spray which has been used on a hat, could be slipped in the knot. The paper may be a little hard to handle. If it is cut in shaped pieces use paste to keep it in place.

A pretty bag for a young woman would look well wrapped in paper of a Dresden design tied with light blue or green ribbon. For a man a plain brown paper tied with red or green raffia is very sensible, since a man has no use for ruffles or furbelows of any description. Bright green or yellow beads are fastened on the ends of the raffia. Most men like red and blue, and it would be a good idea to add a touch of color to the strings where it harmonizes with the wrapping. With green or red sealing wax the package is complete for the male friend or relative.

Sealing wax can be made decorative in many ways. Green or red would be the best for Christmas, and if one has nothing else to seal it with use one of the new coins, or a thimble, but much better would be a monogram. Pendent bows beaded are especially suitable for children.

For the package for little folk the shape should be disguised and it should be wrapped securely. Oftentimes their little eyes light upon things which mothers think are safely hidden, and if the package is not safely wrapped the surprise is spoiled for Christmas morning. Little folk are very wise and cup often tell by the shape of a package what it contains. Covered with soft green or gray tissue paper and tied with bright green or red ribbon or raffia, with two little bells tied to the bow, an especially attractive package may be arranged for the children.

Often small Santa Clauses tied on the boxes for little folk make a pleasing impression, even through the children are curious to get to the inside. With a round package wrap the crepe paper about it loosely, bring the paper to the top to form a rosette and tie with ribbon and with a spray of flowers or holly in the centre.

Horse Sense

Good Action in Draft Horses.

Size and power are of little value if the draft horse has not enough action to handle his big weight in an efficient manner.

The action of the draft horse should be bold, clean, and somewhat stylish. The feet should be carried forward and back in a straight line without paddling, winging, or other irregularities of gait. It is necessary that the feet move straight and smooth in order to get the best and greatest stride with the least energy.

Knee action in a draft horse is not important. A long stride which covers considerable ground is much more important than high knee action. Ability to cover ground is what is wanted in the draft horse.

The walk is the important gait. It should be true and snappy and have a good length of stride. The action of all four legs should be strong, and the movements of the knees and hocks free, without indication of dragging or stiffness.

Although the walk is more important from a working standpoint, it is necessary to note an animal's action in trotting because defects in action are more perceptible when trotting than when walking.

In trotting there should be a clean folding of the knee and hock, the feet being carried in a straight line. The hocks should work close together, for if they are carried too far apart it causes an unsightly bandy-legged appearance.

In many cases careful shoeing will improve the gait of the draft horse and tend to eliminate undesirable features.

Hogs

Every pen should be supplied with a box of air-slaked lime and wood-ashes, sulphur, charcoal and salt. The pigs seem to know when to take such correctives and naturally crave them.

A good way to begin in the hog business is to buy one or two sows that have already been mated to a good sire. You get results that way sooner, although it may cost a bit more than to buy pigs and grow them up to breeding age.

Now is the time to get ready for early spring litters. Make the farrowing pens sure if new ones are needed—spring and the last day before farrowing is not the time. Then some cold makeshift may have to be used, and a lot of pigs will be lost.

What Impertinence!

The Scotch express had just reached the junction.

"All here for Edinburgh?" inquired the guard.

All replied in the affirmative except one old woman, who kept silence. After the train had started, however, she remarked, with a smile:

"I was just goin' to Glasgo metel, but I wasna goin' to tell you inquesitive mon!"

In These War Times you want real food that contains the greatest amount of body-building material at lowest cost. The whole wheat grain is all food. **Shredded Wheat Biscuit** is the whole wheat in a digestible form. Two or three of these little loaves of baked whole wheat with milk and a little fruit make a nourishing, strengthening meal.

Made in Canada.

From Erin's Green Isle

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irishmen.

Sir Edward Carson has been on a visit to the western front, and was the guest of Sir Douglas Haig.

Mary McNamara was fined forty shillings at the Limerick Petty Sessions for having light weights in her shop.

The Cootehill Urban Council have decided to allow more light for public use this winter, and are relaying gas mains.

At a meeting of the citizens of Castlerea, it was decided to take steps at once to have the town lighted by electricity.

A large number of laborers have left the South of Ireland for England, where they have engaged for inland transport.

The death took place recently at Mayville, of Edward Egan, principal of the firm of John Egan and Son, of Waterford.

A tractor demonstration was given by a young lady from Dublin on the premises of The O'Connor Don, Clonalis, Castlerea.

The plot-holders of Toomovara have presented D. O'Shea, secretary of the Allotment Committee, with an address and a cheque.

Mrs. Walsh was awarded £200 at the Dungarvan Sessions against the Lux Navigation Company, for the loss of her husband.

The Derry Board of Guardians reported at their last meeting that there were twenty-one cases of scarlatina in the workhouse.

Two lodging-house keepers were fined £2 each at Armagh Petty Sessions for not supplying their lodgers with registration cards.

It is stated that German is the only language taught in a number of public schools in Oklahoma.

ORIGIN OF OLEOMARGARINE.

Butter Substitute First Invented at Order of Napoleon III.

It is interesting to note that war, which has been the deciding factor in inducing the Canadian authorities to allow the manufacture and sale of oleomargarine in this country, should have also been largely instrumental in establishing it firmly as an article of diet in Paris, and in general throughout France. The facts are these:

Emperor Napoleon III. was anxious to furnish the working classes of France with a substance which would serve the purpose of butter, have much the same properties of butter, yet be more cheaply produced. He therefore offered a prize for the discovery of such a substance. Chemists at once started experimenting, and at length a chemist working on the Imperial Farm at Vincennes produced a substance which so far met the requirements that he was awarded the coveted prize.

The inventor followed mechanically what he believed was the physiological process which took place when underfed cows produced the butterfat in their milk from the fat stored in their own bodies. He first reduced beef fat to small particles and placed it under heavy pressure, and then applied heat to it, of low temperature. This separated the stearin from the olein, through crystalization, the result being a fat free from taste and odor, and which melted readily in the mouth. Experiments proved that it was as nutritious as butter, and was capable of being kept for a longer period without becoming rancid.

Shortly after this discovery, in 1870, the Franco-Prussian war broke out, and ultimately Paris was besieged. Butter was soon at a premium, and later the supply ceased altogether. In its place large quantities of the new substance, "oleomargarine" were manufactured, and it gained such a strong hold on the public that Paris alone consumes immense quantities every year. It required the great war to result in the introduction of this food into Canada.

SERIOUS ILL NESS AVOIDED

Many a serious illness has been avoided by the prompt use of Dr. Williams' Pink Pills. These pills actually enrich and purify the blood, and in this way build up the system, tone and strengthen the nerves and invigorate the vital organs.

Serious diseases generally come from some simple disorder that has been neglected. Therefore any thinning of the blood should be looked upon as a warning sign, and more serious illness should be avoided by the use of Dr. Williams' Pink Pills. In the case of young girls and women the blood is peculiarly liable to get out of order—to become thin and watery—and to lead to a general breakdown in health. This can be avoided by the occasional use of Dr. Williams' Pink Pills, which are suitable for the most delicate constitution. These pills will give you a new appetite, improve your digestion, tone and strengthen weakened nerves, banish depression and lack of energy, clear the complexion of pimples and blotches, cure pain in the back and general weakness, cause the disappearance of headaches, dizziness and heart fluttering. Give these pills a fair trial and you will soon note a wonderful change in your condition. Your spirits will brighten, good health and strength will return, and you will feel like a new person. You can confirm these statements by enquiring among your friends almost anywhere, as thousands and thousands of hopeless sufferers have been restored to new health and energy by using Dr. Williams' Pink Pills.

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

FIRE AFFECTS ANIMALS.

Some Go Mad With Fear While Others Remain Cool in Danger.

Most animals are afraid of fire, and will fly from it in terror. To others there is a fascination about a flame, and they will walk into it, even though tortured by the heat.

A horse in a burning stable goes mad with fear, but a dog is as cool in a fire as at any time. He keeps his nose down to the floor, where the air is purest, and sets himself calmly to finding his way out. Cats in fire cry piteously. They hide their faces from the light and crouch in corners. When their rescuer lifts them they are as a rule quite docile and subdued, never biting or scratching.

Birds seem to be hypnotized by fire, and keep perfectly still; even the loquacious parrot in a fire has nothing to say. Cows, like dogs, do not show panic. They are easy to lead forth and often find their way out themselves.

Six Minute Pudding

Here's a new one—a most delicious desert that can be made in a hurry.

To one and one-half cups of milk add one cup of

Grape-Nuts

and one level tablespoonful of sugar, boil six minutes, cool and serve with milk or cream. Add raisins if desired.

Get a package of Grape-Nuts from your grocer and try this pleasing recipe.

Pencils in Japan.

An unthought of result of the war has been the creation of a lead pencil industry in Japan. In 1911 Japan imported 65,000,000 pencils, most of which came from America and Germany. But with the opening of the European conflict German sources of supply were cut off and native manufacturers, who had been producing only in comparatively small quantities, seized their opportunity and made the most of it. In 1914 Japan exported over 9,000,000 lead pencils and in 1916 the number had increased to 162,000,000. There is strong indication that many of the markets won by the orientals will be held by them after the war, for they have the advantage of very cheap labor. Most of the lead which they use is imported from India and the United States.

Princess Eudoxia, of Bulgaria, is said to be the real ruler in that country.

The British Empire produces one-third of the world's coal, one-ninth of its copper, one-eighth of its iron, one-fifth of its lead, one-ninth of its silver, and one-half of its gold.

For the Chilly Days

Black-and-white checked worsted is used for this stunning street dress, McCall Pattern No. 8100, Ladies' Dress. Pattern in 6 sizes; 34 to 44 bust. Price, 20 cents.

Note the many smart features of this simple dress; the box-pleated tunic, surplice waist, long tight sleeves and the wide loose belt. McCall Pattern No. 8070, Ladies' Dress. In 5 sizes, 34 to 42 bust. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

Activities of Women.

Forty thousand women are working in the mines of Germany.

Several Holyoke College girls are working as drivers of milk wagons.

Kimura Komaka was the first woman to make suffrage speeches in Japan.

LEMON JUICE IS FRECKLE REMOVER

Girls! Make this cheap beauty lotion to clear and whiten your skin.

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless.

We can't expect our neighbors to say pleasant things about us if we are all the time growling about them. Every living thing likes to have the fur stroked the right way—even editors like it.

Minard's Liniment Cures Garget in Cows

The Elderly Safety-Pin.

The safety-pin and the hook and eye are generally supposed to be modern inventions. The former, in fact, has been credited to Queen Victoria. She may have improved upon it, but certainly she is not entitled to the distinction of having invented it. Numerous specimens of the useful contrivance have been found in the ruins of Crete. Some of them are in the museum of the University of Pennsylvania, and the museum has also a hook and eye from the same place. Both the safety-pins and the hook and eye now in the museum were made at least 900 years before Christ. Some are made of bronze, but amber or some other material was often used on the more elaborate pins. Some were even made of finely wrought gold.

Minard's Liniment Cures Diphtheria.

YES! LIFT A CORN OFF WITHOUT PAIN

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like magic every time.

The Egyptian goose is a small brightly colored goose kept for ornamental purposes and rarely seen in this country. It resembles the wild goose in shape and weighs two pounds less in each class.

Minard's Liniment Cures Distemper.

Put Found a Way.

A Scotchman and an Irishman once set out together on a holiday, and Sandy intrusted all of his money to his friend with the strict injunction not to give him more than a stated sum for expenses each day.

After a few days Sandy pleaded for an increase, but in vain. Afterwards he confessed to Pat that, on the latter's refusal to comply with his wish, he got out of bed every night when the Irishman was asleep and searched for the cash, but could never succeed in finding it. "Where did you keep it?" he asked.

"Well," said Pat, "I let you go to bed first every night, and every night when you weren't looking I put my purse into one of your pockets. I was always first up in the morning, and took it out again."

MURINE Granulated Eyelids, Sore Eyes, Eyes Inflamed by Sun, Dust and Wind quickly relieved by Murine. Try it in your Eyes and in Baby's Eyes. No Smarting, Just Eye Comfort. Murine Eye Remedy at Your Druggist's, or by mail for 60c. per bottle. Write for free Eye Book. Murine Eye Remedy Co., Chicago.

FOR YOUR EYES

Curiosity Aids Red Cross.

A farmer in a village in southeast England raised $1,000 for the Red Cross through the agency of a Zeppelin bomb which fell in one of his fields. Thousands of people came from nearby towns to see the crater, which is described as "big enough to put a house in." The farmer charged each visitor a small admission fee and turned the proceeds over to the local Red Cross.

Tomato and Cheese.—Take equal quantities of bread crumbs and tomatoes. Melt a little dripping in a saucepan and pour over the bread crumbs. Put a layer of cooked tomatoes in a baker, sprinkle over with bread crumbs, then with a layer of grated cheese. Then repeat and put enough bread crumbs to cover the cheese. Add a little salt and cayenne pepper. Put in the oven and heat until the cheese is melted.

MONEY ORDERS

Dominion Express Foreign Cheques are accepted by Field Cashiers and Paymasters in France for their full face value. There is no better way to send money to the boys in the trenches.

Cornmeal Bread.—2 cups lukewarm water, 1 yeast cake, ½ tablespoon salt, ½ cup molasses, 1 cup rye flour, 1 cup corn meal, 3 cups white flour. Dissolve yeast cake in water, add remaining ingredients, and mix thoroughly. Let rise to double its bulk, knead and shape into loaves; let rise again to double in bulk and bake.

ISSUE No. 50—'17.

ICE FOR THE TROPICS.

Practically Unknown in Tropical America Until Recent Years.

Ice which a few years ago was practically unknown to the people of tropical America, is now a necessity. Panama started the ball a-rolling by building ice-plants.

Until recently there were no ice plants in the Puerto Plata consular district, which comprises the northern half of the Dominican Republic. Now every town of 2,500 inhabitants or more has its ice plant.

Santiago de los Caballeros, with 35,000 inhabitants, the largest town in this region, has a ten ton plant which sells ice at $1 per hundred pounds at the factory and twenty-five cents additional delivered. The other towns, which range in population from 2,500 to 7,500, have ice plants of from one to three tons capacity. The prices of ice at these plants vary from $2 to $4 per hundred pounds and about 10 per cent. additional if delivered.

The principal consumers of ice are the cafes, clubs and hotels, but there is beginning to be a small demand for ice from private families. In view of the high price of ice and the growing prosperity of the country, it is suggested that it might be possible to introduce some of the largest clubs, cafes and hotels to install their own plants and refrigerators.

A Cure for Bad Breath

"Bad breath is a sign of decayed teeth, foul stomach or unclean bowel." If your teeth are good, look to your digestive organs at once. Get Seigel's Curative Syrup at druggists. 15 to 30 drops after meals, clean up your food passage and stop the bad breath odor. 50c. and $1.00 Bottles. Do not buy substitutes. Get the genuine.

The Jordan Valley

is Benchmarks Grapes is a beautiful, fertile district that you ought to investigate. Many have started there are paying them, because their have been very fruitful fields there. Your investment will pay big returns from the natural increase in the value of the land alone, to say nothing of the big profits from new orchards of the finest kind, farms and

CUTICURA HEALS ECZEMA ON BABY

Spread Covering Body. Awful Disfigurement. Itched and Burned. Had to Scratch.

"My baby was troubled with eczema which began on her face and spread all over her body. It was in a rash and was very sore and inflamed, causing awful disfigurement. The rash itched and burned making her scratch terribly and she was cross.

"Then I used Cuticura Soap and Ointment. Baby was healed with six cakes of Cuticura Soap and three boxes of Cuticura Ointment." (Signed) Mrs. Henry Richard, Murray Harbor, P. E. I., April 2, 1917.

You may rely on Cuticura to care for your skin, scalp, hair and hands.

The Paisley Advocate

PAISLEY, JAN. 9 [illegible]

—Liberal M.P.P.'s and prospective candidates held a conference in Toronto on Thursday last, when Mr Wm Proudfoot, K.C. member for Centre Huron, was chosen as temporary leader of the party in Ontario. He will be the leader during the coming session of the Legislature, and a provincial convention will be called during the session to choose a permanent leader.

—The fuel shortage is becoming very serious in many towns of Ontario, and unless relieved will be the cause of a great deal of needless suffering in homes, also cause the shutting down of factories, closing of schools, churches and other public institutions. Coal is unobtainable except in limited quantities, the natural gas supply is failing at places where it had been plentiful, and wood is at being cut as extensively as in previous years because of the scarcity of help and of the scarcity of timber. In Bruce County this is a time when the farmers can do their bit by making special efforts to meet the need for fuel.

—Tanlac, a patent medicine at present greatly advertised in Canada as a new panacea for the cure of all ailments of the stomach, kidneys and liver, catarrhal affections, rheumatism, nervous disorders and the like, has been analyzed and found to contain 16.4 per cent of alcohol. Now that prohibition is the law regarding alcoholic drinks, will the authorities permit the sale of this patent medicine substitute for the genuine thirst quenchers. The Journal American Medical Association pronounces Tanlac a piece of unmitigated quackery. It is claimed that seventy million bottles were sold in two years. It sells at a dollar a bottle, and one third goes to the retail dealer.

—Canadian Government officials in London are of the opinion that Canada, after the war, will get all the immigrants she can handle. "Old England to many people is not what it used to be in the early years, prior to the war," one said. "People who never ventured from her shores or had any desire to do so are now keen for Canadians and Canada. This is largely accounted for by the fact that our boys are as a whole pretty fair chaps and great advertisers, but I must say that the Englishman who has been to Canada and stuck it out is our best advertiser."

—Is municipal government going into decline in this country, or is it merely lack of interest because the elections are held at a time when everybody is very busy with other things? Whatever is the reason, there is a very general complaint that municipal matters are being more and more neglected just at the time when all citizens should be particularly interested. The selection of the men who are to fill the various offices for the ensuing year is a serious and bounden duty of the people, but it apparently is not considered so for the year 1918, as in many other places besides Paisley there were not enough men found willing to make up the council or school board, or not enough nominated. Only a handful of citizens were out at nomination hour, and these were obliged to do considerable repeating to put on a slate of candidates at all. Time and again it has been set at agitation to have the date of elections changed to either a month before or a month after the holiday season, but no attention has been paid to it, so it must by the board it would receive a trial of the change to prove whether any improvement would ensue. We are inclined to think that the real trouble is not so much as to the time of the elections, as to the fact that the people do not consider the selection of men to be the matter of importance that it once was. We have the greatest civic freedom and privileges that are enjoyed by any country on the face of the earth but we are not now appreciating these at their full value and allowing them to fall into disuse.

—The people of Germany have been kept in suppression very effectually throughout the war, so far as civil affairs are concerned, and it has been a wonder to the rest of the world that this could be done. Ever since the opening of hostilities it has been expected that the submission to military rule would some how be broken, but so far as the people of other lands can see, the German public is still loyal to his rulers and willing to keep on fighting. At no time in the past have the mutterings as to internal unrest in Germany turned out to be true, and that great nation continued to wage war with unabated determination and strength. Now, however, there does seem to be evidence that an outbreak is liable to occur, also evidence that the strongest measures are being used to smother any uprising. The heaven of democracy that was so badly rallied over in Russia may be working in Germany. At any rate Socialists are more active than at any time since the war began, and there seems to be more hope of the civil population of the Hun empire breaking upon having a say as to whether militarism shall continue to dominate. A socialist conspiracy may rend the war.

JOHN CAMPBELL McINTYRE

Another old pioneer of Bruce County passed away on Thursday, Jan 4, in the person of John Campbell McIntyre of Glamis. He was born in Tiree, Scotland, 97 years ago and as a boy removed with the family to Canada where they settled in the Township of Mariposa. His father was Neil McIntyre, who like himself lived to the ripe old age of 97, and his mother Margaret Campbell. He married Sarah McEachern who was also born in Tiree and with his bride settled in the town of Manilla. From there they removed to Bruce County to the farm at Lorne, Kincardine Tp. Here all the hardships of pioneer life were courageously faced, as the farm was densely wooded, and their sterling Scotch qualities were brought into play in overcoming the obstacles encountered. After a period of years on the farm they removed to Tiverton where Mr McIntyre followed the carpenter contracting business, and finally to Glamis where he engaged in the saw-milling industry. Later his sons carried on this business, while he went into the undertaking and furniture trade in the same village. It is fifteen years since he retired from active work but up to the last he enjoyed excellent health. He was interested in all public affairs and faithfully used his franchise up to within a year of his death. In politics he was a Liberal and in religion a Baptist. Hospitality, generosity, courtesy, industry and piety were some of his outstanding qualities. He had a keen sense of justice which rendered him intolerant of all meanness and hypocrisy and was himself incapable of dishonesty or sham. He is survived by his widow who journeyed with him 66 years, and eight of their eleven children:—Neil and John in Edmonton, Lacombe, Mrs R F Harrison, and Mrs (Rev) McKinnon, of Calgary; Rev Donald of Toronto; and Mary and Sarah at their home in Glamis. The only surviving member of his own family is his sister Ann (Mrs A M Wood) of Woodward, Oklahoma. The funeral took place Monday, Jan 7th, from the Baptist church, Glamis, of which he was a cheries member, and interment was made in Tiverton cemetery. The service was conducted by Rev W S Backborough of Port Elgin, a former pastor, Rev O C Elliot (Evangelist) Rev Mr Reith (Presbyterian) and Rev Mr McClung (Methodist).

When The War Will End

Absolute knowledge I have none,
But my aunt's washerwoman's sister's son
Heard a policeman on his beat
Say to a laborer on the street
That he had a letter just last week
Written in the finest Greek
From a Chinese coolie in Timbuctoo,
Who said the negroes in Cuba knew
Of a colored man in a Texas town,
Who got it straight from a circus clown,
That a man in Klondike heard the news
From a gang of South American Jews
About somebody in Borneo,
Who heard a man who claimed to know
Of a swell society female fake,
Whose mother-in-law will undertake
To prove that her seventh husband's
sister's niece
Had stated in a printed piece,
That she has a son who has a friend
That knows when the war is going to end.

—Anon.

Get The Best! It Pays

ELLIOTT Business College

Yonge and Charles Sts., Toronto

Canada's Popular School of Business Training! Satisfaction secured all who come here! All graduates and scores of our undergraduates in the past year have secured good business positions and still the demand is far beyond our supply. Our catalogue gives full particulars. Write for one. Students may commence a course at any time.

W. J. ELLIOTT, Prin.

Notice to Creditors

In the matter of the estate of Christopher Metcalf, late of the Township of Greenock, in the County of Bruce, farmer, deceased.

NOTICE is hereby given pursuant to section 56 of chapter 121, R.S.O. 1914, and amending acts, that all creditors and others having claims or demands against the estate of the said Christopher Metcalf, who died on or about the 8th day of December, 1917, are required to send by post prepaid or to deliver to the undersigned solicitor for the administrator of the estate of the said deceased, on or before the 1st day of February, 1918, their names and addresses and full particulars of their claims, duly verified, and the nature of the securities, if any, held by them.

AND FURTHER TAKE NOTICE that after the said 1st day of February, 1918, the said administrator will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have received notice, and that he will not be liable for the said assets or any part thereof to any person or persons of whose claims he will not have received notice.

DAVID METCALF, R R No 1, Paisley, Administrator.
D. FORRESTER,
Solicitor for said Administrator.

Dated at Paisley this 8th day of January, 1918

SELF DEFENSE

DEFEAT BACKACHE AND KIDNEY TROUBLE WITH ANURIC.

Many people in Canada have suffered from rheumatism and kidney trouble and have found Anuric to be the most successful remedy to overcome these painful and dangerous ailments.

The lucky people are those who have heeded Nature's warning signal in time to correct their trouble with that new discovery of Dr. Pierce's called "Anuric." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as diabetes or stone in the bladder.

To overcome these distressing conditions you should take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal take Dr. Pierce's Anuric Tablets (double strength). You will, in a short time, find that you are one of the firm indorsers of Anuric, as are many of your neighbors.

Send Dr. V. M. Pierce, Buffalo, N. Y., or Bridgeburg, Ont., 10c for trial pkg.

St. Catharines, Ont.—For several years I suffered with gravel and with uric acid, causing rheumatic pains. Nothing ever helped me until I commenced to take 'Anuric,' and the first thing I noticed was that the gravel had disappeared and has never made a reappearance. My general health has improved and I have a better nerve condition and my eyesight seems better, too. I used to have such dizzy spells at times I thought I would faint, but these no longer trouble me. My only regret is that I did not know of Anuric before."—MRS. H. MARJORAM, 124 Albert St.

Notice to Creditors

In the matter of the estate of Alexander McGillivray, late of the Township of Bruce, in the County of Bruce, retired farmer, deceased.

NOTICE is hereby given pursuant to section 56 of chapter 121, R.S.O. 1914, and amending acts, that all creditors and others having claims or demands against the estate of the said Alexander McGillivray, who died on or about the 8th day of December, 1917, are required to send by post prepaid, or to deliver to the undersigned solicitor for the executors of the estate of the said deceased, on or before the 8th day of January, 1918, their names and addresses and full particulars of their claims, duly verified, and the nature of the securities, if any, held by them.

And further take notice that after the 8th day of January, 1918, the said executors will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which they shall then have received notice, and they will not be liable for the said assets or any part thereof to any person or persons of whose claims they will not then have received notice.

AMERICAN PLAN

JOHN J. HERNAN, Manager

Love and Riches

By Frances Elizabeth Lanyon.

(Copyright, by W. G. Chapman.)

"This way, Burton."

Verne Burton flushed at the peremptory and ungivil call. He had never liked the arrogant office manager, less than ever just now, as that conceited individual hailed him as though he were an office boy.

It was prudance and policy, however, to submit to the insolent exactions of the lordly boss of the office. Burton reached the desk of his superior to be greeted with a cold censuring look.

"Somebody to see you in the outer office," snapped out the manager. "Be brief. We can't indulge these calls taking up the time of our employees."

Burton fancied the implication did not apply in his case. He had been under the domination of this slave driver for a year, held down to a mere pittance of a salary, partly, he decided, because the manager did not like him. Burton could not remember having had a visitor in business hours since he had come with the house. He wondered who the present one could be.

The manager sat scowling, ready to give Burton a genuine dressing down when he reappeared, for Burton had been gone nearly a half an hour. The two was primed for a tirade before the whole office. Burton anticipated him.

"I am sorry to give such short notice," he spoke, "but important business has come up that calls me at once from the city and I shall have to resign my position."

"Business—resign?" mumbled the manager.

"Yes, sir. I have fallen heir to a fortune of fifty thousand dollars."

The manager was stupefied. Then his false nature came to the front with a specious mask.

"Heir-fortune. Ah!" he smirked, extending his hand, "allow me to congratulate you."

"I must be at the office of the lawyer who just called upon me in half an hour," explained Burton.

"Certainly. So sorry to lose your valuable services," fawned the politic knave. "By the way, I will phone my chauffeur and you can use the machine."

"Thanks, no," replied Burton. "The lawyer's office is only a square distant," and ten minutes later as he got clear of the office he took a long deep breath, like a captive at last released from the field prison place.

Burton was in a dream all the rest of that day. A strange thing had transpired. A lawyer had indeed informed him that he was heir to a large fortune. The legator was Phineas Dodd. Burton had never seen him, but knew that his mother was a cousin of a man of that name. The lawyer stated that the pretentious home of Mr. Dodd at Wildemere was ready to receive him as its master, with a generous bank account and stocks and bonds and some other property holdings.

"The nearest of kin to your mother's cousin is a Mrs. Eunice Blake and her daughter, Eugenia," explained the lawyer. "The latter is a self-willed, independent piece of femininity, handsome as a picture, but too proud to put up with the occasional irritability of her uncle. He discovered them, favored you and there you are."

Burton decided to go down and look over his property. He was provided with a letter of introduction to the keeper and a check book. Burton had never been in Wildemere before. He did not make his identity known to anybody and after locating the direction of the Dodd mansion through inquiry, started on a leisurely walk in its direction.

"I have strayed from the right road," he soliloquized, as he found himself finally out of sight of various landmarks described to him. "Ah, there is someone."

It was a young girl of about eighteen, simply but charmingly dressed, coming his way carrying a basket filled with wild flowers. The freshness and glory of the woods seemed reflected in her face. She halted as Burton lifted his hat courteously and explained what he was looking for.

"We Can't Indulge These Calls Taking Up the Time of Our Employes."

She offered to put him on the right road and they walked on together. He asked her several questions about the town, the neighborhood, the Dodd place. She answered him promptly and intelligently. He led the conversation to the heir of the estate.

She did not know him, she informed Burton. He referred to the possible disappointment of the nearest of kin to old Phineas Dodd. Did she know her?

Oh, yes. Burton had heard that Miss Eugenia Blake had a very independent spirit. Quite so—and that she was handsome? His companion avoided his glance and said nothing. By this time they had come in sight of the mansion and the girl went her way, but the memory of her charming ingenuousness remained with Burton.

He was met at the Dodd mansion by the keeper, an elfish, weazen-faced old man, who showed him over the house and attended to his needs during the ensuing two days. Twice, rambling over the surrounding country, Burton came across the young lady he had met the day of his arrival. They became quite friendly and he made up his mind that when he came to settle permanently in the old home he would know more of her.

Then came a vast surprise the afternoon that Burton had arranged to return to the city. The keeper came to him, a crafty expression on his face.

"I've got something to sell to you before you leave here," he observed. "Indeed?"

"Yes, I want a thousand dollars for it. A week ago I discovered something in the desk of my old employer that the lawyer had overlooked. I am sure you will realize its value when I tell you that it is the latest will of Mr. Dodd, and leaves the property to Miss Blake, as he originally intended."

For a moment Burton was stunned. Then his true nature came out. The crafty harrainer produced the document in question, with the threat that he would go with it to Miss Blake if the bribe was not paid.

Calmly Burton wrote out a check for the amount demanded. He returned to the city, sought out the lawyer, recited the whole transaction, gave up the new will and—his brief dream of wealth was over!

Burton did not go back to his old work. He secured employment with a new firm. About all he allowed to remain in his mind concerning his temporary and inglorious career as an heir, was a memory of the sweet face of the girl he had met at Wildemere.

One day the lawyer sent for him.

"Mr. Burton," he said bluntly, "Miss Blake has refused to inherit under the new will you discovered unless you receive one-half of the estate."

"Nonsense!" spoke Burton definitely. "I haven't the vestige of a claim to a penny of it."

"She thinks differently. I told you once what a headstrong, independent young lady she was. She is in the adjoining room and wishes to see you. Let me remark incidentally," and there was a gentle glow in the eyes of the advocate, "that your noble action in regard to the will has won her profoundest admiration."

Burton stood rooted with amazement as he recognized in the heiress the nameless young lady of his dreams.

"I cannot consent to accept that to which I have no legal or moral right," he said, when they finally became engaged in general conversation.

"Then I can destroy the will," was the positive rejoinder. "Mr. Burton, you are a man among a million and you must share this fortune with me."

And then her eyes fell, for his, full of ardor, were gazing longingly into her own, and in their depths she read the love she knew she could return.

DOMESTIC SCIENCE AT HOME

Twenty-First Lesson—Milk and Its Derivatives.

Milk may be called a perfect food, containing as it does the five necessary food elements required by the body to maintain life. It is the first food for infants; it forms also a perfect food for small children, the protein being in the form of casein, which is readily digested. The adult requires additional food, owing to the activities. Milk will not supply all the needed elements. The carbohydrates are in the form of milk sugar and fat; the fat is suspended in the milk in the form of tiny globules, thus giving to the milk its clear, white color. The proportions of fat in the milk vary from 2.8 to 8 per cent. This variation is due to age, condition and feeding of the cows.

Cream.

When milk taken directly from the cow is placed in suitable containers and permitted to stand for a period of time, the fat globules, which are lighter than the water of the milk, will rise to the top and form a coating over the entire surface of the milk. This is called cream. Cream is a wholesome, palatable form of fat. Modern methods now use a machine for separating cream by gravity from the milk; this eliminates the period of time for standing to permit cream to rise to the top of the vessel. The derivations or by-products of milk are butter and cheese.

Butter.

Cream is permitted to stand a certain length of time to develop an acid ferment. The object of this is to give the butter a desirable flavor and aroma, or this ferment may be added to the cream in the form of lactic acid.

The cream is then churned, the butter-milk drained off and the butter worked with pure, cold water. Salt is added to the butter to preserve and improve the flavor. Butter contains about 83 per cent. fat and is a valuable food for energy.

Sweet butter is made from fresh cream and is usually sold unsalted. It will not keep any length of time, usually turning cheesy.

Cheese.

Cheese is made from milk by special process of fermenting milk with a lactic acid ferment and then coagulated with rennet. This cheese when used fresh is called cream and cottage cheese.

Many other varieties are made by special processes which, together with the location, curing and manner of storing, give many varieties. Cheese is a valuable food, containing a large amount of protein in the form of casein. It is a concentrated food, and when properly combined with other foods furnishes an economica nutritive diet.

The by-product of butter is buttermilk, which is greatly esteemed in Europe. Many of the foreign race contend that the use of buttermilk prolongs life by neutralizing the bacteria of the intestines. Buttermilk is also strained, the curd salted and beaten with a wooden spoon, then worked into a smooth mass. This is called buttermilk cheese and was greatly esteemed by our grandmothers.

To Make Butter at Home.

Collect left-over portions of cream in a clean bowl; permit it to stand for three or four days to turn. Now place one cupful of this cream in a one-quart Mason fruit jar. Add one cupful of warm water, testing the cream and water with a thermometer. It should be sixty-five degrees Fahrenheit. Place rubber lid on jar. Shake continuously for a few moments, and you will feel the contents of the jar become lumpy.

Drain off the buttermilk and place the butter in a bowl of clear, cold water. Add one-fourth teaspoonful of salt and work, changing the water until it shows no trace of milk. Form the butter in pats and place in refrigerator to cool. Care must be taken not to scald the cream by using water that is too hot. A few drops of carrot juice may be added to give the butter a color. Grate a small carrot and place in cheese cloth and wring to obtain the juice. This butter may be given to small children or to invalids.

Let the buttermilk stand a few hours and drain off the water that has risen to the top. Then place a piece of cheese cloth in strainer, turn in the buttermilk and let drain two hours. Now place the curd in a bowl and add:

One-fourth teaspoonful of salt. Work well with wooden spoon to a smooth mass.

One-half green or red pepper, chopped very fine.

Mold into balls, and place a piece of nut on the top and serve on lettuce.

Sour milk may be used in place of buttermilk.

USING THE CHEAPER CUTS OF MEAT.

Cheap cuts of meat—that is to say, the tougher or less choice cuts—can be made acceptable to fastidious palates by thorough and careful cooking. Here are suggestions that lend variety to the ways in which beef, ham and chicken may be served at the one meal a day to which we have patriotically reduced our meat-eating.

Broiled Flank Steak.

1 flank steak, salt, pepper, 1 teaspoonful butter. Buy a flank steak the size required for your family needs. Ask the butcher to score it on each side or, if you do this yourself, use a sharp knife and score diagonally across the meat, in lines one inch apart; turn meat and score in opposite direction, making small diamonds. Score both sides. The scoring cuts across the tough fibres and makes the meat tender like sirloin. Heat a frying pan red hot, drop in the steak, turn quickly back and forth to sear the whole surface and then reduce the heat and cook more slowly. Turn steak frequently to cook evenly. A flank steak will cook in ten to twelve minutes. Season with salt and pepper, remove to a hot platter, spread with butter and serve.

Round Steak in Casserole

1 round steak cut 1½ inches thick, 1 cupful flour, 1½ teaspoonfuls salt, pepper, 1 tablespoonful butter. Pound the flour, a little at a time, into both sides of the steak, using a meat hammer for the purpose or a potato masher or even a large heavy spoon. Heat a frying pan and brown the meat on both sides, then put into a baking pan. Rinse the frying pan with boiling water so as to save all the browned meat juice and pour this water over the steak, using enough to come up halfway. Add seasoning and cover. Bake until tender. This is a very economical dish and there is no waste.

Curried Brisket with Rice Border

2 Pounds brisket, 2 cupfuls onions cut fine 2 teaspoonfuls salt, 2 tablespoonfuls flour 2 teaspoonfuls curry powder, 1 tablespoonful chopped celery. Wipe the meat and cut into narrow strips. Sear both sides in a hot frying pan, then put the meat into a large stew kettle and cover with boiling water. Brown the onions in the pan where the meat was seared, add them to the meat. Season and simmer three hours or until tender. Mix flour and curry powder with a little cold water, add to the meat, add also the celery cut fine. Boil ten to fifteen minutes. When the celery is tender, turn all on a platter, surround with a border of rice and serve.

Baked Meat Hash.

Medium white sauce, hot mashed potato, left overs of meat. Put meat through a food chopper, first removing all gristle and bone. Season highly with salt and pepper. Butter an earthenware baking dish. Add enough medium white sauce to the ground meat to moisten and bind it together. Turn into the baking dish, spread over in a layer, the hot well-seasoned, mashed potato. Bake in a hot oven until brown.

Jellied Ham

2 tablespoonfuls butter, 2 tablespoonfuls flour, ¼ teaspoonful salt, 1 cupful chicken stock, 4 tablespoonfuls cream, 1 teaspoonful granulated gelatine ¼ cupful cold water, 1½ cupfuls cold boiled ham. Make a white sauce of the butter, flour and stock. Add the salt and pepper. Soften the gelatine in the cold water and add to the white sauce, add the cream and the finely chopped ham. Turn into a shallow pan, pack solid and let chill.

Troops Defy Tropic Heat.

Recent experiments by the British government in India with ultra-violet rays, says the Electrical Experimenter, are interesting not only to army men but to scientists. In the experiments an under-officer of the English army was completely clothed in garments which had been previously treated to withstand the ultra-violet rays. It was found that he was able to stay in the sun of midsummer for hours without feeling disturbance or inconvenience in any way. Upon this and other experiments the English government has adopted this method for the protection of its Indian troops against the ravages of tropical sunlight.

The quality of mercy is not strain'd;
It droppeth as the gentle rain from heaven
Upon the place beneath: it is twice blest;
It blesseth him that gives and him that takes;
'Tis mightiest in the mightiest.
—Shakespeare.

Old Tea Looks All Right

Old tea and fresh tea, poor tea and good tea, all look alike. No wonder a woman often gets a bulk tea she doesn't like.

Red Rose Tea is the sealed package is always fresh, always good, always worth the price on the label.

Kept Good by the Sealed Package

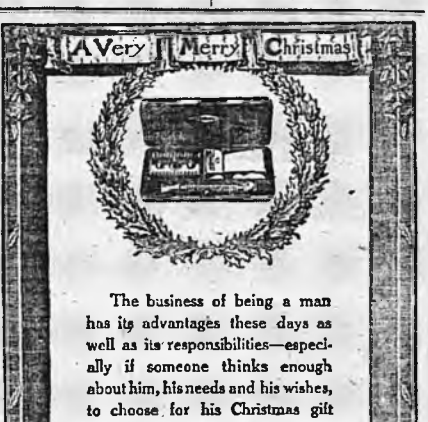
MUSIC IN THE HOME



Music A Profession For The Blind.

In the animal kingdom it is observed that no creatures are favorites, but a certain compensation balances every gift, and every defect. That is a truth expounded in his Essay on Compensation in which Emerson puts it down for a fact that for everything one has missed he has gained something else. When Nature deprives a person of the sense of sight, it is an immeasurable loss, yet that same Nature, once thought cruel, now beneficent, makes up the deficiency by an extraordinary endowment along some other line.

So often it is that finest of compensations, the talent for music. There is no doubt that music is one of the most suitable professions for the blind. In a Government report recently issued in Britain on the welfare of the blind it is stated that there are almost 1000-047 to be exact—persons in the United Kingdom thus afflicted who are following the professions of music, making of musical instruments, piano tuning, etc. There are at least one hundred blind organists in Britain, many of whom are their masters as well. It is expected that these numbers will be materially increased owing to the fact that a greater amount of attention is now being given to music in the institutions for the blind.

The aforesaid report shows from an investigation among several hundred persons that 86 per cent. of the men and 81 per cent. of the women are known to have been successful in their musical occupations. This report suggests the desirability for a blind person to combine the position of organist, or music teacher, or professional singer as the case may be with that of pianoforte tuning, so that in the event of a falling off in his professional work he can resort to the more practical occupation, or the other way around, as circumstances dictate.

Fertilizing the soil increases farm labor efficiency and adds greatly to the farmer's net income. The extra yield, less than the cost of the fertilizer, is largely pure profit.

The business of being a man has its advantages these days as well as its responsibilities—especially if someone thinks enough about him, his needs and his wishes, to choose for his Christmas gift

The Gillette Safety Razor

Most men are practical. The welcome gift is the useful gift—the Gillette—that fits right into a man's intimate personal life, makes things easier for him, and proves its quality by the way it shaves.

At any good Hardware, Drug or Jewelry Store you can pick out a Gillette Set that will be sure to give him lasting pleasure. If you have any trouble getting what you want, write us and we will see that you are supplied.

Toronto THOS. ALLEN Publisher

How The Woodchuck Chucked Wood.

One morning old Mr. Woodchuck stepped out early to take a look at the sky.

"It's burrowing weather," he said to his wife when he came in and sat down at the breakfast table.

"I'm glad I've finished the quilts and the children's underclothes," return-Mrs. Woodchuck, as she gave Milly another dish of porridge. "Use your spoon, Willy. And, Lilly, don't gig-gle into your plate like that."

"Is the vegetable cellar full?" asked old Mr. Woodchuck, passing his cup for more coffee.

"There's some space left by the wood bin," said his wife.

"I'll have another load of roots put in to-day," said old Mr. Wood-chuck. "To-morrow we'll have a storm. I feel it in my whiskers."

"After breakfast, Willy," said Mrs. Woodchuck, "you must bring in the wood."

"Hasn't he done that yet?" asked his father.

"School wasn't out till the other day!" mumbled Willy Woodchuck.

"A week ago," said old Mr. Wood-chuck sternly. "You must get in that wood to-day."

"Yes, sir," said Willy Woodchuck.

After breakfast Willy Woodchuck went out to the woodpile. Such a big woodpile! But of course if you leave a week's work to be done in a day, that is not the fault of the wood-pile.

Willy Woodchuck took up two or three chunks and chucked them through the cellar window. One of the chunks hurt his paw. Perhaps he had a splinter!

He sat down on a stump to look at his paw. He took his knife out of his pocket.

"What are you doing?" asked Sammy Skunk.

Now, Willy Woodchuck's mother had told him never to play with Sammy Skunk, because Sammy Skunk's manners are bad. Willy Woodchuck remembered at once.

"Nothing," he said.

"That's a fine knife," said Sammy Skunk.

Willy Woodchuck opened his paw so Sammy Skunk could see.

"My! cried Sammy Skunk. "Ain't it a hum-dinger!"

Sammy Skunk's words, you see, were no more elegant than his manners.

"I bet you could cut a whistle with that," said Sammy Skunk.

A whistle would be fine to play with during the winter. Willy Woodchuck forgot Sammy Skunk's bad manners.

"Can you cut one?" he asked.

"Sure," said Sammy Skunk. "Give me the knife."

But as soon as the knife was in his paw, Sammy Skunk laughed and ran away.

"Here, that's my knife!" cried Willy Woodchuck, running after him.

"Do you want to fight?" Sammy Skunk asked threateningly, as he stopped.

Willy Woodchuck decided that it would not be pleasant to fight Sammy Skunk. So he went back to the wood-pile again.

He took up two or three chunks and chucked them through the cellar win-dow. Then he stumbled over a forked stick. It was a perfect fork for a sling shot. And he had a piece of rubber right in his pocket!

He sat down on the stump to fasten the rubber to the forked twig.

"What are you doing?" asked Franky Ferret.

Now, Willy Woodchuck's mother had told him never to play with Franky Ferret, because Franky Fer-ret's temper is bad. Willy Wood-chuck remembered at once.

"Nothing," he said.

"That's a fine sling shot you're mak-ing," said Franky Ferret.

Willy Woodchuck opened his paw so Franky Ferret could see.

"My!" said Franky Ferret. "Ain't it a whing-whanger!"

Franky Ferret's words, you see, were no better than his temper.

"You could hit most anything with that," said Franky Ferret. "Let's go hunting."

It would be fun to try the new sling shot! Willy Woodchuck forgot Franky Ferret's bad temper.

"Come on," said Franky Ferret, and away they went.

"Oh, look!" Franky Ferret whisper-ed. "There's Roly-Poly Rabbit. Hit him!"

"Oh, no!" said Willy Woodchuck. "I do not want to hit Roly-Poly Rab-bit!"

"He'll get away," said Franky Fer-ret. "Quick!" And he snatched the sling shot.

"Run, Roly-Poly!" cried Willy Wood-chuck shrilly.

Roly-Poly Rabbit did not wait to learn why. He just scuttled as hard as he could into his hole.

"What did you do that for?" Franky Ferret asked threateningly.

And he bit Willy Woodchuck hard, and put the sling shot into his pocket, and ran away.

Willy Woodchuck felt so hurt that he cried all the way back to the wood-pile. It was a long way, and by the time he had chucked two or three more chunks through the cellar window Milly and Lilly came out to find him.

"Here's your luncheon," they told him. "Mother's too busy to get din-ner."

Milly and Lilly went back into the house, and Willy Woodchuck sat down to eat his luncheon. It was a fine big turnip-and-beet sandwich. My, but it looked good! But just as Willy Woodchuck was biting the first bite—

"What are you doing?" asked Charley Crow.

Now, Willy Woodchuck's mother had told him never to play with Charley Crow, because Charley Crow's conduct is bad. Willy Woodchuck remembered at once.

"Nothing," he said.

"That's a fine sandwich you're eat-ing," said Charley Crow.

Willy Woodchuck opened his paw so Charley Crow could see.

"My eyes!" said Charley Crow. "Ain't it a jim-hummer!"

Charley Crow's words, you see, were no more refined than his conduct.

"I bet you could do anything, with a lunch like that," said Charley Crow. "You could even fly."

Flying had always seemed wonder-ful to Willy Woodchuck. He forgot Charley Crow's bad conduct.

"It is hard?" he asked.

"I should say not!" Charley Crow came down from the branch where he was sitting. "Why, I learned just as easy! All you do is to stand on this stump—put down the sandwich and shut your eyes. Ready?"

"Yes," said Willy Woodchuck breathlessly.

"That's all," said Charley Crow, laughing.

And away he flew, and took the sandwich with him.

Willy Woodchuck sat on the stump, thinking about his knife and his sling shot and his sandwich. Most of all he thought about the sandwich. And he thought what bad boys Sammy Skunk and Franky Ferret and Charley Crow were—

"Willy Woodchuck!" said his father sternly.

Willy Woodchuck thought then about another bad boy. He fell to chucking wood in earnest. If only he had not played with Sammy Skunk and Franky Ferret and Charley Crow! He chucked and he chucked. The woodpile was very big; but that was not the fault of the woodpile.

The day passed, and the dark came down. Willy Woodchuck kept right on chucking wood. It would never do to let the winter catch him. He chucked and he chucked. It was such a big woodpile! But at last, long after dark, the last piece went through the window and his work was done.

And that is how Willy Woodchuck learned a very useful lesson.

FROST STOPS THE INSECTS.

They Experience Suspended Animation in Cold Weather.

With the coming of the frosts the insects are silenced, and as long as the temperature holds below 50 de-grees Fahrenheit they are rendered also inactive. Above that the hardier beetles and grasshoppers, along with a few spiders, are moving about, and when the sunshine warms the air more and more certain moths and but-terflies and two-winged flies, includ-ing the gnats, are on the wing.

Some species of insects feel the effects of cold far less than others, and this does not seem to be influenced by sturdy bodies, hairy coverings or the situations in which they are found. The gnats are among the most fra-gile species, but they and the slim-bodied water striders are found active later in the autumn and earlier in the spring than any other creatures, ex-cepting perhaps the mourning-cloak butterfly and the wasps, all of these creatures responding to the sunshine on the warmer, thawing days of win-ter. The black ground beetles also are quickly reanimated by slightly warmer airs.

This proves the fact that most in-sects are not normally killed by cold, but merely experience suspended ani-mation, and are ready to resume their activity after any length of time.

Cutting a Lake Ship in Two.

At the yards of the American Ship-building Company at Cleveland, Ohio, lake carriers are being cut in two to permit their passage through the short locks of the Welland Canal on the way to the Atlantic for ocean ser-vice. The ships are placed in dry dock and cut in two sections with acetylene gas torches. The sections are boarded and caulked, after which the dock is flooded and the sections pulled apart. They are then towed through the Welland Canal and the locks of the St. Lawrence River to Montreal, where they are rejoined temporarily. The ship is then taken to an Atlantic port shipyard, where it is refitted and made seaworthy for ocean service.

Broilers shrink about half a pound in weight when dressed.

GENEROUS FEES.

How a Native Chief Expressed His Gratitude to a Missionary.

Old-time dentistry was primitive, painful and peculiar. Some of the methods of our ancestors provoke a ready smile in this modern era, a safe century or so removed from the possibil-ity of experiencing them; they are even consolatory, by contrast, for the necessity of a less degree of pres-ent endurance. Quite as amusing as ancient methods among our civilized forbears are the occasional results when modern methods are applied among uncivilized or alien people to-day.

It was Lord Cromer that first told the story of how the Khedive of Egypt tested laughing gas on two of his followers before he would intrust himself to a European dentist, and how he expressed his thankfulness when the aching tooth had been ex-tracted by giving the dentist five thou-sand dollars.

A few equally generous, considering the donor's resources, but distinctly more embarrassing to the recipient, was once offered a missionary who had come to the relief of a native chief who was suffering agonies from per-sistent toothache. The missionary was neither doctor nor dentist, but a few instruments, including a power-ful forceps, were included in his out-fit. He did not promise that the oper-ation would be painless, for he had no suitable anaesthetic, but he believed it would be successful even if several previous attempts by native means had broken off the tooth close to the gum. The chief had courage, but he was tired of being tortured for noth-ing, and he insisted on seeing the strange instrument used on some one else first. Two or three slaves were summoned, but the missionary stoutly refused to remove any of their strong, white and perfectly sound teeth to please their master.

The chief was puzzled and angered by the refusal, and things began to look threatening indeed, when the missionary's wife stepped into the breach. She had a hollow tooth, which could have been filled had they been in a civilized country, but which she was willing to part with since they were not. In the presence of an inter-ested assembly, comprising the en-tire village, with the chief in a seat of honor in the front row, her husband extracted it. Then, with a desperate grip and an appalling wrench—he ex-tracted that of the chief, who emitted a hair-raising yell, but who was so grateful that he insisted on bettering the gift that he had promised—al-though the amateur dentist claimed no fee—and presented the missionary with two brand-new, smiling black wives!

It was with the utmost difficulty that the missionary, with the tactful but resolute assistance of Mrs. Mission-ary, succeeded in declining the ladies without offense and maintaining his preference for a goat.

LIQUID FIRE.

Most Famous of Ancient Warriors Used "Greek Fire."

Much mystery still attends specu-lation about the exact nature of the famous "Greek fire" that wrought such panic among the enemies of the most famous of ancient warriors. It is narrated that it travelled over the ground "with the urge and direction of the wind, consuming everything be-fore it. Trees and grass and enemy legions withered and shrivelled before it." According to one chronicler who had a lapse of several centuries to render him immune from authoritative contradiction, "even the rocks of the hills melted in its flame."

In all likelihood the rocks of the hills did nothing of the kind. Science has not yet invented anything that will so literally emulate the action of molten lava from an active volcano. But the Greek fire was a wonderful thing, chemically, no doubt, and in its own day a very formidable device in-deed.

It has been whispered about from time to time that a new invention has made war "intolerably awful." Paci-fists used to argue quite seriously that modern ingenuity had already made war impossible; that all elaborate pre-parations were really—to borrow a term then unheard of—"camouflage" to maintain commercial prestige, and that war would be self-destructive through its very violence. But the Germans have utilized everything known to them and the allies have been forced to follow their example. Yet war goes on.

Silver Redemption.

Ten years ago as a medium of ex-change and a standard of values gold seemed to have utterly eclipsed its pale competitor. To-day silver is re-gaining much of its old prestige. It has risen in value relatively higher than gold. Bullion silver is worth more than the face value of silver coins. At the beginning of the war American silver dollars were worth 58 cents in gold. To-day they are worth just a fraction over 100 cents, or their true face value. Silver coinage is on the increase everywhere, and in India and Russia, where the face value is less than the bullion value, the coins are being remelted by their owners and sold back to the mints as coinage bars.

Hearts of Oak.

The Germans are reported to use acorns for bread. Perhaps in the hope of developing hearts of oak.

DEEDS OF GLORY ON BATTLEFIELDS

THE UNCONQUERABLE SPIRIT OF BRITONS.

Self is Forgotten and Cause and Com-rades Take First Place in Gallant Hearts.

No proof is needed of the valor of the Belgians, the French and the Brit-ish. It would be idle to speak of it, because for three years they have shown the height of human courage in most damnable and deadly places. The self-sacrifice and heroic deeds of an-cient days which have come down to us as legends lack significance when compared with daily deeds performed in this war, says Captain David Fal-ton, M.C., late of the British and Aus-tralian armies.

I have heard of nothing finer than the heroic defence of the Belgians at Liege. Although totally unprepared, they resisted for ten days a great, dis-ciplined force forty times their num-ber; or the impossible landing at Gal-lipoli made by the Anzacs; or the de-fence at Verdun by the French; or the Canadian charge through poison gases at Ypres; or the brilliant British at-tack on the Somme.

If the love of a man who gave his life for a friend could not be surpass-ed, how could the spirit of a man be described who died for a perfect stranger? The war has brought thou-sands of such deeds to the front, and it is an every minute action when one man will attempt to save the life of his comrade, knowing that in the at-tempt there is a possible chance of losing his own life.

His Life For Another.

During the early part of the Somme attack we were ordered to take three lines of trenches and consolidate them against the usual counter-attack. We gained our objectives after attacking under an avalanche of shell fire, gas and burning oil. The impetuous ones ran beyond the third line of Boche trenches and were cut off. One of my men who had gone ahead was badly wounded and was lying crippled at the feet of the enemy wire.

No matter how seriously a man is wounded he will never be heard to moan. That is the spirit of the troops to-day. The man in question must have been frightfully hurt for we in our trenches could hear him softly moaning in great agony. Two of my men tried to get him out of the wire and bring him back into our new posi-tion. But they lost their lives in the attempt. The third man who went out crawled along on his stomach and eventually reached the wounded man. It was no good of him standing and lifting the wounded man, because the drum fire of the Hun machine guns was sweeping No Man's Land. So he just lay on his back and hooked his feet under the armpits of his wounded comrade, and inch by inch brought him back into our wire. I ordered some men to bring him in and in applying first aid I found that the wounded man had half his face blown away and his right arm and right leg had been smashed to a pulp. The rescuer was so badly wounded he did not live to enjoy the reward I recommended him for.

A Marvellous Record.

On one occasion we were advancing with our own barrage when one of my comrades single handed attacked a machine gun emplacement after sev-eral men had been killed in attempt-ing to take it. He bayoneted one of the machine gun crew and brought in another, together with the captured gun. Although wounded, he then led a bombing party to the assault of a de-fended house and killed a sniper who was harassing us. His objective was a machine gun post, which had been located in an isolated building. On leading his men forward he encounter-ed unexpectedly a machine gun post which was holding up the advance of another company. He immediately at-tacked, capturing the machine gun and killing several of the crew. He then continued his attack on his ori-ginal objective, captured the post, kill-ed several of the enemy and put the remainder to flight. He died of the wounds he received during the attack.

Coolness and Daring.

A private who acted as scout work-ed his way toward the enemy lines with the greatest gallantry and de-termination in spite of the continuous fire of hostile snipers at close range. These snipers he stalked and killed. Later his patrol was held up and he again disposed of the snipers. During the subsequent withdrawal of the pat-rol he volunteered to cover the retire-ment, and this he succeeded in accom-plishing. Throughout the enterprise he was under heavy machine gun and rifle fire, and his splendid example of coolness and daring was beyond all praise. After safely regaining our lines this very gallant soldier was killed by a shell.

Another private from one of my companies rushed forward under heavy fire and, reaching a German gun emplacement, threw a Mills gren-ade into it, killing two of the enemy and wounding a third. Subsequently entering the dugout, he found two light machine guns which he carried back with him. He undoubtedly saved many of his comrades and enabled the consolidation of our position to pro-ceed unhindered by machine gun fire. In an attack a few days later on his own initiative he worked his way from shell hole to shell hole to our own barrage, rushed a machine gun and although under heavy fire captured it together with an officer and two men. This bold action was of great assist-ance to the company on the right and undoubtedly saved many lives. At any rate, it enabled the whole line to ad-vance and gain the objective.

Saved by a Canadian.

I have a Canadian to thank for my life. I have told before of the incident that put me out of any further active part in the war. After three days in a water filled shell hole, with my arm smashed, my jaw broken and my whole body a wreck, I started in pitch dark to drag myself across No Man's Land to my home trench. In the end I lost my way. Suddenly I heard a Canadian sentry challenging. I called, "An English officer wounded!" I had stumbled onto a Canadian post, and one of those boys came through the wire after me. When we were almost safe a Very light went up and a Boche sniper got him through the shoulder. I still have part of my arm, but he has none of his.

The Kaiser when the war began thought little of the British army and gave orders to his generals to sweep General French's "contemptible little army" into the sea. How easy it was said, but how difficult a task he found it!

A GRENADE-THROWING SCHOOL.

Class in Bomb Sending Conducted Be-hind the French Front.

A realistic picture of a class in bomb-throwing that, French officers conducted behind the front is drawn in Mr. Ralph Pulitzer's book, Over the Front in an Aeroplane. In the open recess in a trench, says the au-thor, stood a noncommissioned officer of engineers. He was the instructor. At the order of the captain he placed an innocent-looking satchel on the edge of the trench at his right elbow, plunged a hand into it, and briskly plucked out, one after another, eight different varieties of bombs. Picking them up, one at a time, he gave a terse lecture on the construction of each and the method of using it.

When the sergeant of engineers had completed his little lecture, all of the soldiers and officers withdrew to the end of the field, some two hundred yards behind the trench, and there lay down on their stomachs. I got into the trench with the engineer, placing myself to his left in front of the en-trance to the bombproof shelter, and the demonstration in the gentle art of grenade-throwing began. He took bomb number one, stuck the pin at the end of the cord firmly into the hole, swung his arm back and threw the missile a few yards into the field in the direction away from the sol-diers.

Having seen the departure of the bomb, I ungracefully tumbled into the bombproof, with the engineer a close second. There was an appreciable pause, and then came an explosion, the violence of which really astonish-ed me. I distinctly felt the ground shake.

After giving the fragments that had been hurled our way plenty of time to come down on the roof, we stepped out into the trench again. The engineer picked up another bomb, hammered the nail home with one sharp rap against the edge of the trench and sent the grenade hurtling through the air. The mechanism of the first bomb had not been put into operation until the bomb started on its flight, but the fuse of the second started burning the instant he'd ham-mered the nail in, and was burning while he was whirling his arm pre-paratory to letting it fly. As it had thus got a running start on us, we had barely time to get under cover before the explosion took place.

Next came bomb number three. The demonstrator adjusted a black band round his left thumb, took the bomb in his right hand and gave it a scratch. He evidently had some doubts whether the first scratch had lighted the fuse, because after glance-ing at it he proceeded to give it a second hearty scratch before throwing it.

I need hardly say that I had already "made home base" in the bombproof and was entirely satisfied to watch from there his second effort, which, however, was crowned with complete success.

CANADA'S FALL WHEAT AREA.

Estimate of 711,112 Acres, or 4% Less Than for 1917 Crop.

The area in Canada estimated to be sown to fall wheat for the season of 1918 is 711,112 acres, or 4 per cent. less than the area sown in 1916 for the crop of 1917. In Ontario the dry condition of the soil made it difficult to saw fall wheat, and the area is esti-mated to be about 4 per cent. less than last year. In Alberta there is shown to be a slight increase, or 61,384 acres, as compared with 60,776 acres. There are also small areas sown to fall wheat in Manitoba, 4,429 acres, Saskatchewan 11,883, and British Co-lumbia 3,476 acres. The condition on October 31 for all Canada was 80 per cent., as compared with 76 per cent. last year.

Of the total land intended for next year's crops, 53 per cent. is estimated to have been ploughed by October 31, the percentage proportions in the west being 40 per cent. for Manitoba, com-pared with 47 per cent. last year; 57 per cent. for Saskatchewan as against 28 per cent., and 38 per cent. for Al-berta as against 21 per cent. a year ago.

THE CONQUEST OF THE AIR

WORLD ALREADY CHARTED FOR AIR SERVICE.

Experts Believe That International Mail Routes Will Be Established Inside of Ten Years.

The world is already charted for air service. The aero clubs of France, Italy, England and America have worked out international routes, Lon-don to Halifax, London to New York, London to Paris, London to all the great cities of the world are main lines of the international map.

Lord Montagu has devised a mail route between England and India. As ordinarily travelled the distance is 6,000 miles, but he eliminates 2,000 miles by an airline over Russia, Ger-many and Austria. He estimates that the flight could be accomplished in 25 hours—35 hours from London to Bom-bay!

Another route he calls the Red Route, because for the entire distance the British mailplanes would fly over territory under the British flag, a distance of 5,230 miles to be accom-plished in from 75 to 80 hours. Mail would be dropped at Basra, Alexan-dria, Malta, and Gibraltar. Captive balloons, illumined at night, would be the route markers and landing stations would be arranged at convent-ient intervals.

New Era is Sight.

The most conservative experts ap-pear to believe that national and in-ternational mail routes will be com-plete'y established within ten years. There are more radical thinkers who assert that the experience and lessons of war aviation will bring this bless-ing to civilization within five years.

After postal service, which will be the first great development of the air-plane for commercial uses, it is gen-erally agreed will come fast passen-ger service and regular service for express and freight.

The crossing of the Atlantic by air may be, indeed, a matter of weeks and months rather than years. Major Per-fetti, head of the Italian army fliers now in this country, believes that the giant Caproni triplane can accomplish the feat easily, and has indicated his intention of attempting it.

Henry Woodhouse and many other students of aviation maintain that when the distance between continents is cut down to one day's travel, when the world sends and receives its mail by airplane, and when mankind real-izes dominion over the air there will be a new sociologic era; that nations will be brought into much closer rela-tionship than ever before; that there will be greater understanding and cordiality between peoples and that there will be far more tolerance for differences of aims and habits. As the airplane has been, perhaps, the most valuable agency for war, it may become, these men think, the most enduring influence for world peace.

A SOUTH SEA MARRIAGE.

Sailor Describes Recent Royal Cere-mony in the Friendly Isles.

C. H. Hanson, first assistant engin-eer, and member of the crew of the motor schooner S. I. Allard, now, of Honolulu, witnessed the marriage of Princess Charlotte Tobou and Prince William Tungi at Nukunlofa, Friendly Islands, on September 7th.

The Government band played all the ceremonial music, and other musi-cal organizations assisted it through-out the day, he says. The wedding dress worn by the Princess was made in Sydney, Australia, and fashioned after the latest styles. The wedding cake, which was eight feet high and 5 said to have cost more than $500, was baked in Auckland, New Zealand. About twenty-five white people at-tended the reception, others present being chiefs, officials and natives from the surrounding islands.

At the wedding breakfast the table extended from inside the palace, where the royal party was seated, out through one of the doors for 250 feet. The guests were seated on either side. Tapa—a material made from the beaten bark of the mulberry tree—covered the length of the table. Friday was the big day for all the islanders who happened to be in the neighborhood of Nukunlofa. Several thousand gathered in the palace grounds and the adjoining square in the early morning.

The king personally superintended the work of distributing hundreds of roast pigs among his subjects, many of the large parties having smaller ones lead to them in a decorative way. It was a holiday for all.

GRESHAM

Mr J S Craig, of St Paul's, Minn., paid a flying visit to our burg on New Year's day. Mr Craig is one of the Gresham boys who, like a number of other boys from here, have made a mark in life. He is now manager for the Barites Oil Co., in St Paul, and has 125 minor offices to look after, consequently could not call upon his many old friends and school mates here, who would have been more than pleased to have seen him. It is over 25 years since he and his young wife (nee Miss Eliza Ross) left Gresham where he was born, and few were more popular and better liked than they. Their many friends will be pleased to learn of their welfare.

The congregation of Centre Bruce church were very sorry to learn that their esteemed pastor, Mr McNab, had tendered his resignation as pastor of Underwood and Centre Bruce, to take effect in the spring.

Our teacher, Miss Hanna, spent the holidays at her home in Guelph.

The Christmas tree here was a splendid success. Miss Currie and Mrs McDougall had charge of the programme.

Miss Flossie McLennan of Glamis visited her friend Miss I Young during the holidays.

Mr L Roppel and the Misses Leggat of Underwood visited friends here lately.

Mr Jos Shipley and sister Miss Bella are home on holidays.

Mr Fred Annes is down from Emo on a visit to his parents, Mr and Mrs J Annes, 10th con.

Mr Jas Rose and daughters spent Christmas holidays with friends at Priceville.

Miss F McDonald is holidaying in Toronto.

Mrs Bowie and children and Miss Mabel Irwin of Pense, Sask., are visiting their parents here.

Mrs Alex Wood spent part of the holidays with her sister, Mrs Jas R Aitchison of Clifford.

We are pleased to learn that Mrs John McKinnon, of the 6th con., who was ill, is improving nicely.

Mrs M Sturgeon, of Bervie, is visiting her parents, Mr and Mrs McKinnon, 6th con.

WALKERTON

Vincent Pettieplace, aged 21, was arrested by Chief Ferguson at his house in Riversdale on Wednesday evening last on a warrant from the Military authorities at London, charging him with being absent from the militia without leave. Pettieplace is stated to have signed up for military service a short time ago at Harriston but coming later before the Walkerton Tribunal, secured his exemption with scores of others. Returning home he apparently thought he was clear, but the Military authorities seem to think otherwise and instructed Chief Ferguson to effect his arrest. On being apprehended Pettieplace was brought to Walkerton and arraigned before Magistrate Robt. Richardson on Wednesday night, when he was remanded to jail to await the arrival of a military escort who will take him to London for trial.

Mr William Munro, eldest son of Mr and Mrs John Munro of near Pinkerton, and who was married about four years ago to Miss Margaret Cameron, only daughter of Mr Alex Cameron of Greenock, and who for many years resided with her aunt, Mrs Wm Fairservice in Walkerton, died on Monday last at Jonesburg, Missouri, where he was managing an ideal cattle ranch for his uncle, Mr Garland. The deceased, who was 37 years of age, was born and raised in Greenock and was highly esteemed in the township. He leaves a wife and two children. His parents left on Tuesday to attend the funeral which takes place in St. Louis this Thursday. The deceased is also survived by one brother and three sisters.

The attempt of the Town Council to put a $10.00 tax on outsiders cutting up meat here, and thus hinder the public from getting cheap meat on the Walkerton meat market, has proved an inglorious fizzle, thanks to the Ontario Statutes which prevented the Town Council from legislating the people's rights away in this way. According to the statutes anything that is the growth, product or manufacture of the Pro. of Ontario may be sold anywhere within the Province without a license, and as the beef which outsiders bring in is produced on the neighboring farms the Council is unable to prevent its being cut up and sold without a license in town. The poor man, who has been in the habit of getting a piece of cheap meat on the market in the winter, will be glad to know that the market cannot be thus closed against him.—Herald and Times.

TURNERS

Frost is'king

Mr Harry Hyde of Monifieth returned home.

Mr Will Dier of Treherne, Man., is visiting his mother Mrs H. Dier.

Mrs R. Pollock took a trip to Sault St Marie to visit her brother and sister.

Mrs Geo. Muir of Lansing, Michigan is visiting at Muir Bros. 2nd Sangeen.

Mr Jas. Christie is spending a few days with his sister Mrs J. Hill at Preston.

THE STORE OF QUALITY

BUSINESS CHANGE

THE world is changing. The map of Europe has changed. It has taken a lot of change to manipulate this change, The banks give you change, sometimes charge you exchange. And we find we are in need of some loose change to give the other fellow some change. Therefore, after Jan 15th all accounts not then paid will be charged and collected with interest. We have decided to cut down our credit limits, and will after this date render our accounts every three months. If not then paid interest will be added.

The Canadian Farmer's Real Friend

YOUR letters will be answered, you will get the exact information you need, you will get the advice and assistance you desire free, provided by experts to whom we pay real money for the answer we send you, if you become a subscriber to FARMER'S MAGAZINE. This magazine is for—

The Men on the Farm

Helps them plan, and tells them how to construct barns, stables, school barns, hen houses, silos and dwellings.

Tells all about septic tanks, hydraulic rams, water-supply and lighting systems, power-farming.

Gives advice and information about feeding and breeding and the health of animals; about the business side of farming, co-operative methods, investments and insurance.

The Women on the Farm

Helps them in their home planning and making.

In their kitchen problems.

In matters pertaining to children—their health, rearing and school.

Deals with styles dress patterns and other feminine interests.

Gives help in gardening and flower culture.

Gives news of women's work.

For all it provides, stories, special articles on timely subjects by experts not amateurs or experimenters; and the latest and most accurate information on every matter of concern to farmers.

FARMER'S MAGAZINE

has three times as many regular departments as are ordinarily found in farm papers, and is about the most satisfying paper you can get at 25c per year. Subscription $1.00 per year.

EVERY issue of FARMER'S MAGAZINE is worth a dollar bill, because it is downright helpful in practical ways. The free advice and information it supplies on request—by private letter—may be worth many dollars. Have the FARMER'S MAGAZINE in your home so you will find a helper or a new—an ever-ready and indispensable help. Have it for its friendship.

The price is One Dollar per year. Did we send it to you, and remit for it when we send you the bill. Address the publishers:—

HIS HEART BADLY AFFECTED

"Fruit-a-tives" Soon Relieved This Dangerous Condition

623 Gerrard St. East, Toronto.

"For two years, I was a victim of Acute Indigestion and Gas In The Stomach. It afterwards *attacked my Heart* and I had pains all over my body, so that I could hardly move around. I tried all kinds of Medicine but none of them did me any good. At last, I decided to try "Fruit-a-tives". I bought the first box last June, and now I am well, *after using only three boxes.* I recommend "Fruit-a-tives" to anyone suffering from Indigestion".

FRED J. CAVEEN.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

WHY NOT USE PEAT?

Mr E B Hasnel, chief of the division of fuels and fuel testing in the Canadian Department of Mines, recently read a paper before the Canadian Club, in Montreal, urging the need of utilizing Canada's vast fuel resources contained in the great peat deposits of Ontario and Quebec. Mr Hasnel referred to the fact, which his department demonstrated some years ago, that good fuel could be made very profitably by the "wet process," which utilizes sun and wind to dry the peat. In these times of great coal scarcity it does seem strange that the Province of Ontario, for instance, should be content to face a fuel famine, while right at our doors lie immense deposits of available and valuable fuel, which, if utilized, would make us, to a very large extent at least, independent of the Pennsylvania mines. It may be that this peat fuel would not be as pleasant as coal, but in time of great scarcity it would surely be a most welcome boon to our people. Why should not our Provincial Government, which has had the courage to secure great provincial water powers for the people, turn its attention also to the development of the peat industry? At present our peat bogs are valueless, and yet for generations other countries have used peat as fuel, and the Dominion Government's experiments at Alfred, on the Canadian Pacific Railway, showed, apparently, that good fuel could be produced from peat at a cost equivalent to $3.50 a ton for hard coal. Between $3.50 and $9.50 there is a considerable margin, and it would seem to be worth while for the province to try its hand at developing our peat beds.

Men Are Responding

Official reports received by the military service council from all parts of the Dominion indicate that men called up in the first draft are readily responding to the call. The reports include the military districts of Montreal and Quebec, and nowhere, it is stated, has there been any serious hitch in the arrangements. It is understood that further drafts of men in class one will be called up as their cases are disposed of by the tribunals and as military requirements necessitate. The man in any case will be notified by registered mail when and where he is to report for active service.

—Owing to frozen water pipes the large range in the kitchen of the Royal Hotel, Kincardine, was blown up and about $500 damage done. The kitchen was badly wrecked, and the range completely destroyed. No one was in the kitchen at the time.

Women Like to Read——

The Toronto Daily Star

The reason is clear. It contains more real features of direct interest to women than does any other daily paper in the country.

There is a style diary which illustrates and describes gowns worn at smart functions.

Its fashion notes are written by experts.

It gives full particulars of all Woman's Club activities.

Its Social Service is right up to date.

It has a complete short story every day, and such other features as Bed-Time Stories for the Kiddies, Dot Puzzles, and good cartoons, and the latest news of bargains in the stores.

In fact, it covers every phase of the world's news that particularly interests women.

In addition to this, The Toronto "Daily Star" gives the most comprehensive war and general news service obtainable through any paper in Canada.

Subscribe for it, and after you have been reading it for a week we venture to say that you wouldn't be without it at any price.

Subscribe for it To-day

The price is **$3.00 per Year in Advance.** You may send this to the publisher or your local paper, to your postmaster, or direct to

CARPENTER AND CONTRACTOR

ESTIMATES furnished for the erection of any class of building. Large or small contracts undertaken.

Address Chesley or Cargill P.O

—Mrs Sarah Hughes, 1304 6th St. E., Owen Sound, received a Christmas surprise last week when she was preparing a fine specimen of a goose for the oven. Securely lodged in the bird's digestive apparatus was found a beautiful baby's gold beauty pin. It had evidently been picked up in the bird's search for food-stuffs. Mrs Hughes had figured that when she bought her goose at a down-town shop the day before, she was paying a good price, but as the pins are selling in the local jewellery shops at $1.60 she has concluded that she didn't strike such a bad bargain after all.—Owen Sound Sun.

The People's Popular Store

Great Price-Cutting Sale for two weeks

PREPARATORY to our annual stock-taking we will cut the prices of all heavy winter goods in order to make room for spring and summer goods which have been on order for months past. You will find our goods are 1918 qualities and prices with 1918 styles. Next winter you will get about the same styles but shoddy qualities. It will be one of the best investments you have ever made to come early and often and stock up for a year or two ahead. Space will permit to mention only a few of the many bargains during the next two weeks:

Overcoats

Men's Heavy Beaver Coats, Persian Lamb Collar, good sizes, regular price $40 for $30. Men's Bigger Double-breasted Ulsters, regular price $18 50 for $13 85. We have another line, same style, regular price $15 50 for $11 65, and another, regular price $10 for $7 50. We have also a good range of Youths' and Boys' Overcoats at similar reductions.

Caps

Men's Heavy Tweed Winter Caps, regular price $1 50 for $1 20. We have another line, regular price $1 25 for $1; another, regular price 50c for 75c; and another, regular price 60c for 45c; also a couple of lines of Boys' and Youths' Caps to sell at 50c and 60c. Also a few Men's Fur Caps to clear at half price.

Men's and Boys' Heavy Rubbers

Men's Heavy Rubbers, 12-inch tan leather top, regular price $6 75 for $5 40; Men's Heavy Rubbers, 9-inch top, regular price $5 50 for $4 40; Men's Heavy Rubbers, 7-inch top, regular price $3 for $2 40; also another line, regular price $2 80 for $2 25. Boys' Heavy Rubbers, leather top, regular price $2 75 for $2 20; Boys' Heavy Rubbers, leather top, regular price $2 50 for $2; another line, regular price $1 75 for $1 40.

Horse Blankets

Good heavy Horse Blankets with straps, regular price $3 25 for $2 60; strap in front, regular $1 75 for $1 40.

Women's Winter Coats

Women's Coats, new style, regular price $20 for $15, reg $17 50 for $13, reg $15 for $11 25, reg $10 for $7 50.

Women's Sweaters.—Two only, Women's Brushed Wool Sweaters, late delivery from mills, reg price $12 50 for $9 35. We have also a good assortment of Wool Sweaters in Men's, Women's and Children's at about one half what they would cost at the mills now.

Furs.—One only, Alaska Sable Set, worth not less than $75 to produce now. It can be yours for $42 75. A beautiful Black Fox Stole and Muff to match, extra value now at $75, yours for $56 25. Black Wolf Sets, reg price $22 50 for $16 25. One only, Australian Red Fox Set, very latest in colored furs, reg $37 for $20 25. We have another Fox Set, reg price $12 50 for $10 85; also separate Neck Ruffs $2 45 up, Muffs to match.

See our Corduroy Velveteen, very suitable for children's suits, reg 75c for 45c.

Call and get some of our American Coal Oil, sold all over for 30c a gallon. Our price, 4 gallons for $1.

All goods sold at cut prices must be spot cash or produce at time of sale. Goods sold on advancing market should be cash even at regular prices. All accounts up to the end of last year must be settled by cash or note before the 15th of this month. Please note this extension of time, as we cannot turn our old books out of safe. Come early and often, find you will save money. Come in the forenoon, as clerks will have more time to show goods, but come anyway.

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5% per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D FORRESTER, Barrister.

Fatal Attack of Appendicitis

Mr R. J. Nesbitt, of Glamis, who was operated upon on Monday night of last week, following an attack of acute appendicitis, died on Saturday. His illness came on suddenly, and the operation by Dr. Hall of Walkerton and Dr. Gage of Paisley disclosed the fact that the appendix had burst. The poisonous matter affected the whole system and the only hope of recovery was based upon the strength of the patient's constitution. The late Mr Nesbitt was a resident of Glamis for about ten years. He carried on business as a tinsmith and hardware merchant, and had won the respect of the people of the community. He is survived by his wife and four young children, who have the sympathy of all in their loss of a kind husband and father. The funeral take place Wednesday.

Women's Patriotic League

At the last meeting of the W. P. L. it was decided to make a thorough canvass of the village for monthly subscriptions for 1918. This plan proved very satisfactory during the past year, and averaged about $50 per month. The money thus collected was used for the purchasing of yarn, shirting, and other Red Cross supplies. This work that each and every individual should be interested in knowing that every effort on our part is thoroughly appreciated by the soldiers overseas. Sometime this month you will be called upon by the canvassers. If you are not at home when they call please leave your contribution with the Sec. Treas., Mrs D. McArthur, and save a second call. The need being greater and prices higher we ask each one to do their full share and thus help to relieve those who are our protectors in time of trouble. Those who were interested in preparing the Christmas parcels for our boys overseas will be pleased to learn that many of the boys have written to thank the W. P. L. for the much appreciated boxes, also with the ladies to extend their thanks to the men for their generous gift of tobacco which was enclosed in the same parcel.

—Miss Birdie Watson is home from Detroit for a month.

—Scofield Russel is up from Toronto visiting with his grandfather, Mr H. Reed.

—Agricultural Society meeting on Saturday afternoon, Jan. 19th, at 2 30 o'clock.

—Mr D. A. Lyon got in another car of hard coal before the storm arrived. With 90 orders to fill from a 37½ ton shipment, the coal dealer has his troubles.

—Miss Lola Willets of Clifford and Miss Cassie Willets of Dundee, are visitors at Mr F Purdy's. Miss Muriel Purdy of Vancouver, was also there for a few days.

—Our former townsman, Mr H. Crowe, has been elected a councillor in Port Elgin. Mr Crowe was a very useful member of Paisley Council, and no doubt our sister town will find him a good municipal worker.

—Mr and Mrs W D Reany, of Marquette, Mich, are visiting Mr and Mrs J W Reany. They are accompanied by Mr and Mrs H Johnson, also of Marquette. Mr Reany comes back to the old home every few years, and many old friends are glad to see him His father, though 92 years of age, enjoys good health, and takes deep interest in all municipal affairs.—Times.

Council and School Board Completed

At the second nomination held on Monday the electors completed the job of constituting our council and school board for 1918. Messrs R J Skinner, D Forrester and J J Jacques were nominated as councillors, the latter declining to act, while Mr F C Ryan was the only nominee for trustee.

9-6 in Favor of Chesley et al

Our hockey team went to Chesley on Thursday through very heavy roads to give the local team of that town a return match. They found that Chesley had brought in strong re-inforcements from Tara and Owen Sound. Nevertheless our boys put up an admirable game, but were outclassed in weight and toughness. Score as above.

Young Aviator Killed

Mr Alex Galbraith received a message on Sunday informing him that his nephew, Lieut Geo Smith, had been killed. The deceased enlisted with the flying corps last spring, and trained at Camp Borden and at Deerosto In November he went overseas to England, where it is presumed he met with an accident in training. He was the only son of Mr and Mrs A W Parrish, formerly of this town, but now of Caledonia, and was eighteen years of age. The bereaved parents will have the sympathy of their many old friends here in their great loss.

Perished in the Storm

The body of Leonard Schell, of Port Elgin, was found on the railroad track a short distance from the station on Wednesday morning. The deceased had been missing since Saturday. He was cutting wood on the lakeshore, between Port Elgin and Southampton, staying in a cabin but generally coming home on Saturday night. When he did not arrive at the end of the week, a search was made. His cabin was found locked up, and it was feared that he had become lost in the storm. He was an aged man of about 75 or 80 years.

The Late John Sloan

After an illness extending over nine months Mr John Sloan of 9th con. Elderslie, passed away. His death was caused by dropsy. Deceased was born on May 3rd, 1840, in the County of Down, Ireland, and came to Canada with his parents in 1845, who settled first in King Township, York County. Mr Sloan came to Elderslie 60 years ago and had been a resident of that township ever since. For the last 17 years he lived with his niece, Mrs John Fenwick, on the old Sloan homestead. He was a Presbyterian, and in politics was a staunch Liberal. His only brother, Hugh Sloan of 6th con E'ld, is 84 years old.—Enterprise.

From Dakota

DEAR SIR AND BRO.—I still belong to the I.O.O F., but don't attend quite as regularly as I used to in Paisley. Well, I must put you on the back for the way in which you answered Mr Thuer. We are enjoying the best of health. We had a light crop last year, and it makes feed a little scarce. Hay and oats, although most of people will have enough of feed. Prices are good for everything we have to sell. There is more money in circulation than there was last year. We get the ADVOCATE every week. Although away from Paisley for about sixteen years, we still look with interest for the old home paper. Wishing you and all old Paisley friends a prosperous New Year,

J. S. Cumming.
Langdon, N. D.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

BRUCE TP.

A nomination for the position of Deputy-Reeve of Bruce Tp was held at Underwood on Friday last, when Mr P Dobson was re-elected by acclamation. This leaves the old council all re-elected Reeve, Jas Johnson; Deputy-reeve, P Dobson; Councillors—Geo Baker, Jas McKenzie, Murd McNeill.

This Week's Advocate

As our supply of paper for this issue has not arrived, the inside pages do not contain the usual fresh reading. We hope to have our regular form for next week.

Returned Soldier Came for His Bride

Mr Geo Sturgeon, ex-soldier, came up from Toronto on Thursday at noon and left on the south train a couple of hours later accompanied by a young lady formerly known here as Miss Margaret Lenney, but who took on the name of Mrs Sturgeon following a little ceremony which was held at the Church of Ascension Rectory, with Rev Mr Diehl officiating. The bridegroom has nobly done his bit for king and country. In fighting against the Huns he became a subject for the hospital, having sustained also wounds that rendered him unfit for further soldiering. After being discharged he secured a job in a Toronto munition works, but in the spring he intends going on the Northern Ontario farm which he is receiving as a bounty for his services. He enlisted from Sudbury or North Bay. The bride's friends here wish her and her husband all happiness and prosperity.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

W. H. BAKER, Paisley

Agricultural Society Meeting

THE annual meeting of Paisley Agricultural Society will be held in the council chamber on Saturday, Jan 19th, at 2.30 o'clock p.m. A full attendance of members is requested.

T. RICHARDSON, Pres; W. H. BARNETT, Sec'y.

Died at Winnipeg

On Jan. 1st Miss Rebecca Robinson passed away at the home of her sister, Mrs Thomas Houston, 458 Victoria St., Winnipeg. The only surviving member of the family is another sister, Mrs. Geo. W. Reed, 401 Home St., Winnipeg. Miss Robinson was the second daughter of the late Jonathan and Mary Robinson. She was born near Merrickville, Lanark County. During her early womanhood the family moved to the 13th concession Greenock. Afterwards they moved to Paisley, where they lived for several years, but for more than ten years preceding her death Miss Robinson had made her home in Winnipeg with Mrs Houston. After last Christmas several months' duration but with Christian patience she bore her weakness and distress. Thus has passed away another who had some part in the earlier life of the people of the county of Bruce.

A Fierce Storm Blocks the Railway

The week end storm that struck this country did not miss this neck of the woods. A lot of loose snow had fallen earlier, and when the terrific north-west gale blew up there was a great movement of the fluffy stuff, reinforced by that which came down fresh with the storm, and the roads were impassible by Saturday morning That day was one of the worst gales in business circles that the town has experienced for many a moon, and when the electric lights failed to come on in the evening the place went dead asleep. Most of the merchants just closed up, and there were no customers out for anything. The noon train reached here after 5 p m, and was completely stalled in a drift out near the 12th of Bruce crossing, where it stood until Tuesday night, when a snow plow came through. Farmers in the vicinity supplied provisions for the crew and passengers on Sunday morning, and later the marooned ones took up lodging and board at farm houses or walked back to town. No services on Sunday schools were held in any of the churches on Sunday. In fact, hardly anyone came from beside the home fires until Monday morning, by which time old Borens had thrown the wind wheel into low gear. Snow shovels were brought into requisitions and soon the accumulations were thrown up into high embankments. Perhaps the most comfortable place in town on Monday forenoon was the schoolhouse, where there is fortunately a good supply of coal, and fires had been kept going over the storm period. The attendance of pupils was very slim, however. The "Birth of a Nation" pictures advertised for Monday night, were, of course, cancelled. It was a real old-time winter storm, a Sougenor of more than standard violence, the most complete tie up that railways in Ontario have ever experienced.

THE EARL'S SECRET

Or, a Martyr to Circumstances.

CHAPTER XXIII.—(Cont'd).

"My dear Mr. Fairfax, do not let us continue this branch of our subject, then," said the earl, with a smile that was intended to be cordial, but was more like a stray sunbeam on an October morning. "I will confess that I merely put the question to test you, not that I doubted your honor, but—well, well, you are young, she is young, and I am obliged to guard both of you. But, there, if you still feel confident that you can make her happy, and that you can take her for herself alone, my dear Fairfax, I give her to you, and with her my most hearty blessing."

As Bertie returned to his rooms, his man entered with a letter.

Bertie glanced at the envelope and tore it open.

It was stamped with the Lackland crest.

It contained a short note, which Bertie had no sooner read than he turned as pale as the paper and staggered back into his chair like a man mortally wounded.

Before we glance over his shoulder and ascertain the contents of the letter which had so affected him let us turn to Mr. Howard Murpoint and Mr. William Smythe as they stand on the doorstep of Lackland House.

When the servant opened the door Mr. Murpoint inquired for Lord Lackland, and was soon, accompanied by his friend, Mr. William Smythe, ushered into the earl's presence.

When they entered the room Howard Murpoint introduced Mr. Smythe to the earl and then proceeded to business.

He said that Mr. Smythe had been anxious to see the earl, as one of the directors of a certain mining company, to ask a few questions.

The earl admitted that he was on the board of directors and answered the questions, or rather the captain answered them for him.

Then Mr. Smythe announced his intention of becoming a director, and incidentally mentioned that he would, if there was any occasion for it, purchase the mine.

This made the earl stare, as the captain had intended that it should; and when Mr. Smythe rose to take his leave, Lackland's adieu was a great deal more cordial than his greeting.

When the rich Mr. Smythe had gone the captain eyed his dupe warily.

"A fine young fellow," he said.

"Very," said the earl. "A good business man, I have no doubt."

"Immensely rich," said the captain—"immensely. I wonder if the countess would oblige me by sending him a card for her next ball? I should take it as a personal favor."

"I am sure the countess would only be too delighted," he said. "But are you sure that Mr. Smythe would care to come?"

"I am certain that he would," said the captain. "Indeed, he was speaking of it only this morning. Poor fellow, he has become infatuated with the beauty of Lady Beisdale!"

The earl was almost guilty of a start.

"Indeed!" he said. "I am sure we are very much flattered by Mr. Smythe's preference. It is a pity we did not know him. Unfortunately there is no chance of his wishes being fulfilled. I have this morning promised the hand of Ethel to Mr. Fairfax."

"To Mr. Fairfax!" echoed the captain, with as much polite astonishment and disgust in his voice as if the earl had said "His Satanic Majesty."

"To Mr. Fairfax!"

"Yes," said the earl. "Mr. Fairfax called here this morning, just before you came, and pressed his suit so earnestly that I yielded and gave my consent—a very reluctant consent, I must confess."

"Write a letter to him recalling your consent."

"Impossible," said the earl.

"Why so?" inquired Mr. Murpoint.

"My word has been given and if I were to break it I should be cut by every man in London. I dared not show my face in a single club."

"It is very unfortunate," said the captain, coolly, "more unfortunate than you can imagine, for I have not told you all."

"All?" inquire the earl. "What else is there to tell?"

"Mr. Smythe is a determined man," said the captain, quietly, "and he assured me this morning that if he did not get your consent to his suit he should go to extremities."

"Extremities! what do you mean?"

"Simply this: that he will buy up the mortgages and the numerous bills which you have given, and come down on you like a hawk. He is a most determined young man. He will sell Lackland Hall and everything you possess, as sure as you stand there."

"He cannot," said the earl, with a smile. "I can make arrangements with my creditors. I can purchase the bills, raise the money, pay off the debts."

"I am afraid not," said the captain. "Because, you see, the bills are all in my hands."

"Your hands?" exclaimed Lord Lackland.

"Yes, mine," answered the captain, softly, and with the sweetest smile. "It is very unfortunate! I promised this worthy young man that I would use my influence with your lordship to gain your consent. I gave my word of honor, and if I were to break it I should not be able to enter a single club."

As he used the earl's own words, and smiled his soft-deadly smile, the earl sank into a chair and gasped for breath.

"Are you a man or a fiend?" he breathed.

"I am simply a man of business," said Mr. Murpoint, "and a man of my word."

"What am I to do? I am in your power!"

"Write a letter to this Mr. Fairfax and tell him that you cannot consent, that you rescind he promise you gave this morning."

The captain stood over him, quite the master of the situation and dictated.

"Dear Sir: I regret that circumstances have occurred which compel me, on consideration, to recall the consent which I reluctantly gave you this morning. I must beg of you to believe that I am obliged by the force of circumstances to rescind that promise, and that I am strengthened in my resolution to refuse you the hand of my daughter by the countess, who is strongly opposed to any engagement taking place between you. If you have already seen Lady Boisdale, and acquainted her with your hopes and wishes, I must beg that you will, by writing, inform her that all engagements between you must cease, and that you are compelled in honor to refrain from prosecuting your suit. With regret I have arrived at this decision, and sign myself most sincerely your well-wisher, Lackland.

"P.S.—It would be as well, perhaps, if you could make arrangements to leave London for a time. If it should be inconvenient to you to do so, I will remove Lady Boisdale to one of my places in the country."

This letter was written and signed by the earl.

It was carried by a servant to the Temple, and it was read by our friend, Bertie, as we have seen.

Its effect upon him was beyond all description.

CHAPTER XXIV.

Leicester had not much to complain of on the score of treatment from the captain and crew of the smuggler.

He went about his work silently, and with a certain dignity which repelled any advances on the part of his companions.

A year and some months passed wearily enough for Leicester, who hoped day by day for opportunity of escape.

In spite of all efforts to keep the vessel from going eastward the schooner gradually but surely drifted towards a line of reefs, and the strain was so great on the rudder that the Yankee issued an order for bracing it.

Of course Stumpy and Leicester were told off, and without a moment's hesitation they seized the necessary ropes and commenced the perilous task.

Leicester expected every moment that he and his comrade in danger would be blown or buffeted overboard, and so kept a keen lookout for Stumpy and grasped a spar, upon which he knelt, with the determination of an already drowning man.

The result showed that his fears were well grounded.

Suddenly he missed from his side the small but courageous form of his comrade.

Stumpy had succumbed to the latest billow.

With a shout of "A man overboard!" he hung over the side and peered into the heaving deep.

Grasping the spar in both hands Leicester rose to his full height, and, amid a roar of warning and excitement from the crew, leaped into the sea.

The drowning man was very nearly finished by Leicester's well meant efforts at rescue, for the spar just missed his head by a foot.

As it was, however, he seized it with a convulsive grasp, and the two men were once more together.

For a few moments the ship was lost to them.

They were pitched up and down, backward and forward, the rain cutting their faces, and the cold numbing their hands.

Then it was that Leicester hit upon a means of securing them to the spar.

The rope which had been fastened to his waist still hung there, and he managed, by dint of sheer force, to drag it up, and drop it over the spar once or twice, at each turn passing it round the armpit of Stumpy or himself.

By this means they were completely entangled, and so in a rough fashion lashed to the long piece of wood in which all their hopes of life rested.

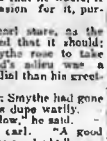
Dawn broke at last, and the storm subsided; but long before then they were half unconscious and wholly numbed.

When Leicester came to he found himself lying on his back, and the weather-beaten face of Stumpy over him.

He smiled, and the man grunted back in reply; but for quite an hour no words were spoken.

At the end of that time, when they had almost recovered from the exhaustion, Leicester struggled to his feet and approached Stumpy, who was sitting, hugging his knees, at a little distance on the bench.

"Come," he said. "We are safe, thank Heaven! Cheer up! We must move on."



(To be continued).

THE roof of your barn is the first part to feel the effects of wear and weather. Make your roof weather-proof and you add many years of better service to your whole barn. Pedlar's "Oshawa" Shingles not only offer the safest protection against weather, wind, fire and lightning, but the way they lock together, slant on all four sides, makes them practically indestructible. Impossible for wind, rain and dampness to get beneath shingles and start to rot and decay your roof. For a permanent barn roof, Pedlarize here. Write for "The Right Roof" booklet W W

Useful Hints and General Information for the Busy Housewife

Carrots Are Health Producing.

Few people realize the value of carrots as a food. Following are a few recipes for their use:

Saute—Pare and cut into dice a cupful of carrots; boil in stock till tender, but not to pieces. Tablespoon of butter and when hot add the carrots, season with salt and pepper, brown slightly and serve.

Soup—Put into soup kettle five pounds of knuckle of veal, a gallon of cold water, a head of celery (or half a teaspoonful of celery salt), two and a half pounds of chopped carrots, a pinch of cayenne pepper, a tablespoonful of salt. Cover closely, simmer three hours—remove knuckle and serve.

With Milk—Scrape, slice, put in double boiler, cover with milk, season with butter, pepper and salt, cook all day, or until milk has thickened.

Lemon Juice—Lemon juice and the yolks of eggs are recommended for fried carrots, to add taste and color.

Steamed—Steam whole and wipe. Slice or mash; butter, pepper and salt to taste. So prepared they retain their full flavor.

Cold—Slice and place in steepan with one ounce of butter, two onions minced, a little chopped parsley. Simmer slowly thirty minutes, then thicken the gravy with whole meal, add some lemon juice and serve.

Coquettes.—Boil carrots in two waters until tender, mash smooth, add one beaten egg, one tablespoon melted butter, pepper and salt to taste, and set paste aside until cool. Mold into croquettes with hand, roll in fine crumbs, dip in egg mixed with water, roll again in crumbs, and set aside for one-half hour. Fry good brown in deep fat.

Marmalade—Wash and boil until tender five pounds of carrots. Scrape and chop fine. To each pound of pulp add one pound granulated sugar and boil. Remove from fire. Add the grated rind of one lemon, the juice of two, and one teaspoon almond extract. Boil fifteen minutes longer and seal.

Browned Carrots—Scrape four or five good sized carrots and cut into three-inch lengths. Cut each slice into strips. Drop into boiling water and simmer until tender. Put a tablespoonful of butter in the frying-pan and when very hot add the drained carrots. Dredge lightly with salt and pepper and fry until lightly colored.

Pudding—Take one cup of sugar one cup of suet, one cup of grated carrot (raw), one cup of grated potatoes (raw), one cup of currants, one cup of raisins, one egg, pinch of salt, one teaspoonful of soda, two cups of flour, one teaspoon of cinnamon, a little nutmeg. Tie in a cloth and boil for two to three hours.

Helps For The Housewife.

You can almost keep the members of a family well by having proper food for them.

A wood box beside the kitchen range is a great step saver. It should be set on casters.

Throw away all old fruit jar rubbers; they are apt to cause fruit to spoil when used a second time.

Sliced pineapple is much more delicious if sliced and sugared about 12 hours before serving.

All house plants should be sprayed with water once a week. If this rule is followed they will not become infested with insects.

Never warm the baby's milk until immediately before the child takes it.

It should be a matter of common knowledge, since flour is always within convenient reach, that wheat flour is the best extinguisher to throw over a fire caused by the spilling and igniting of kerosene.

Bigger War-Crops Are an Investment Worth While

Put into your hungry soil a few dollars' worth of proper fertilizer and take out many extra dollars in profits from larger crops. Farmers all over Canada are making extra profits in these days of splendid market prices by enriching their lands with

Harab-Davies FERTILIZERS

They are food for both the seed and the soil. We want you to let our experts give you their advice in the proper selection of fertilizers for your own particular soils. From our reports of tests and results given by our 25 different kinds of fertilizers used in various soils all over Canada, we are able to help you select the right fertilizer that will get bigger crops for you.

There is a Harab-Davies fertilizer for every kind of soil. Our Fertilizer Booklet and Bulletins give directions that will enable you to get excellent results. Write for them now.

Ontario Fertilizers, Limited, West Toronto.

Making Two Blades Grow Where Only One Grew Before.

PROGRESSIVE farmers to-day recognize the fact that they cannot continually grow their heads growing on the plant foods in the soil—and that by intelligently putting back what they take out of the soil they can make it produce more than the world's best farmers of a few years ago. The judicious use of the proper fertilizer on your land will increase your profits from it 50 per cent.

GUNNS SHUR-GAIN FERTILIZERS

are particularly recommended for use on Canadian soil. Properly and consistently applied they are not an experiment, but an investment which will yield substantially increasing returns in larger crops. For 19 years' experience and reputation back them up.

MOTHER SEIGEL'S SYRUP

The proof of Mother Seigel's Syrup is in the taking. That is why former sufferers, whose vitality was being sapped by Indigestion, say it is *just excellent* for stomach, liver and bowel troubles. Thanks to Mother Seigel's Syrup, they are now strong and well.

IS EXCELLENT FOR

If you are afflicted by Indigestion or other disorders of the stomach, liver and bowels take Mother Seigel's Syrup regularly for a few days; long enough to give it a fair chance to make its beneficial influence felt. Then note the improvement in your appetite, your strength, your general condition.

HEADACHES, BILIOUSNESS CONSTIPATION INDIGESTION.

Their cobalite of Syrup contains three times as much as the 50c size.

Redpath SUGAR

2 and 5 lb Cartons—10, 20, 50 and 100 lb. Bags.

"Redpath" stands for sugar quality that is the result of modern equipment and methods, backed by 60 years experience and a determination to produce nothing unworthy of the name "REDPATH".

"Let Redpath Sweeten it."

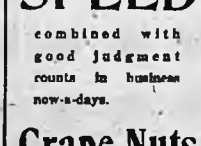
Made in one grade only—the highest!

"Going up on High?" Better try the low gear first. The human engine must have the right kind of fuel-food. Power to do things comes from food that is rich in muscle-building material, that is easily digested. **Shredded Wheat** is a high-power food, the kind that fits a man or woman for the day's work—just enough muscle-making material, just enough heat-making material to keep the body in top-notch condition. Shredded Wheat is ready-cooked, ready-to-eat. Two Biscuits with milk make a nourishing meal at a cost of a few cents. Made in Canada.

GOING TO LAW WITH THE DEAD.

How a Shrewd Chinaman Got Even With a Bad Neighbor.

A cemetery is the one sacred spot in China. To desecrate such a place is the worst of crimes. Some years since there lived in a village on the plain of the Yellow River a man called Tu. His little farm furnished him with a comfortable living, but nothing more. Like all farmers in that part of China, there was no fence to separate his fields from those of his neighbors. One of these neighbors was a rascal, who, knowing Mr. Tu to be of mild disposition, resolved to impose upon him by ploughing a few furrows of Mr. Tu's land and thus incorporating it with his own. This act did not pass unobserved, but Mr. Tu was cautious as well as mild. He knew that litigation came high, and was uncertain. "Better," he said to himself, "to endure the wrong than to suffer loss of both land and money."



The next year the neighbor repeated the experiment, and ploughed up a few more furrows. Again Mr. Tu consulted with himself, and determined, as previously, that law was too expensive a luxury for him.

The neighbor, encouraged by this complaisance, continued to add to his own acres at the other's expense. At length he became so bold as to incorporate in this way the family cemetery, where were buried Mr. Tu's ancestors.

Then Mr. Tu saw the chance for which he had been waiting. By ploughing up this cemetery the neighbor had committed sacrilege. The only difficulty was that the punishment was so severe that it might not be possible, unless he was careful, to get his neighbor punished at all. For the law was that, if the magistrate should take notice of the suit, he would have to send up a report to his superiors at the capital of the province and request that proper punishment be inflicted upon himself, seeing that so heinous a crime had been committed in the district for which he was responsible.

Accordingly, Mr. Tu brought the matter before the magistrate in a way that did not involve that official. He brought accusation against his father, who was dead, for having moved his grave off his son's land to that of the encroaching neighbor instead of abiding in the cemetery where he properly belonged.

The Chinese love humor and greatly admire shrewdness. When, therefore, the magistrate read this amazing document, he smiled with genuine appreciation of Mr. Tu's cleverness, called up the offending neighbor, made him restore all the land he had appropriated and punished him with due severity for his robbery.

VICTORY WILL COME PROMPTLY.

Entente Allies Each Day Nearer Realization of Their Object.

General Castelnau, chief of the French military delegation at the conference of the Entente allies at Petrograd, is quoted in a despatch to the Temps of Paris from the Russian capital as saying:

"One has only to compare the military situation of the allies in the month of January, 1916, with that of January, 1917, and he will be compelled to admit that the conditions for the forthcoming Spring campaign are much more favorable than they were last year.

"I can say that each day we are coming nearer to the realization of our objects. The brave Russian army, which has assumed a formidable task, the gallant Italian troops, and, finally, the Anglo-French forces, which are increasing in number, constitute the best guarantees of our final victory, which hereafter will come promptly. In the meantime the military power of the allies remains unshakable. The Germans have procured success only on secondary fronts.

"With regard to the principal fronts, on which decisive action will occur, our enemies have shown themselves powerless to obtain any serious results."

LITTLE WORRIES IN THE HOME

These Bring the Wrinkles and Pallid Faces That Make Women Look Prematurely Old.

Almost every woman at the head of a home meets daily many little worries in her household affairs. The care of her little ones, the work about the house all contribute to these worries. Most of them may be too small to notice an hour afterwards, but they constitute a constant strain that affects the blood and the nerves and make women look prematurely old. The effect of these little worries may be noticed in sick or nervous headaches, fickle appetite, tiredness after slight exertion, and the coming of wrinkles which every woman dreads. To those thus afflicted Dr. Williams' Pink Pills offer a speedy cure; a restoration of color to the cheeks, brightness to the eye, a hearty appetite and a sense of freedom from weariness. Among the many thousands of Canadian women who have found new health and strength through these pills is Mrs. G. Strasser, Acton West, Ont., who says:—"I am the mother of three children and after each birth I became terribly run down. I had weak, thin blood, always felt tired, and unable to do my household work. After the birth of my third child I seemed to be worse, and was very badly run down. I found the greatest benefit from the Pills and soon gained my old time strength. Indeed after taking them I felt as well as in my girlhood, and could take pleasure in my work. I also used Baby's Own Tablets for my little ones and have found them a splendid medicine for childhood ailments."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or you can procure them by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

TORTURE OF PRISONERS.

Terrible Cruelty Inflicted on Captives by Germans.

Hideous in the extreme, and only equal in awfulness to the frightful horrors of the Inquisition of the dark ages, is the story told in a semi-official communique of the tortures inflicted upon French and English prisoners in German prison camps, says a Paris correspondent.

Examples are given, as follows:

In reprisal camps of occupied districts of Russia this treatment has been applied with terrible refinements of cruelty. Thus, a mattress was at times placed between the stake and the head of the sufferer to render his position more exhausting. Sometimes the victim was tied bareheaded at midday with his face toward the sun, and with the points of barbed wire arranged so that they penetrated his chin.

At Landshut seventeen Frenchmen were enclosed in a cage four metres long by three metres wide, exposed to all weathers. As a result, several of them went mad.

Punishment of the pit. The victim was forced into a hole in the earth, of an average length of one metre and eighty centimetres deep. The floor was strewn with sharp stones and the walls covered with barbed wire.

In Courland the lashing was administered on the loins of prisoners. At Stargard on Sunday mornings the wives of officers and other persons were invited to witness the bastinado.

The population of the British Empire exceeds one-quarter of the population of the world.

A teacher asked her class of children what a skeleton was. One little fellow, Benny, seven, said:—"I know; it's bones with the people rubbed off."

She Does Her Bit In Patriotic Work

And Tells of Benefit Received From Dodd's Kidney Pills.

Mrs. H. A. Standish Strong, Hearty and Enthusiastic at Sixty-two, Advises Others to Use Dodd's Kidney Pills.

Ayers Cliff, Stanstead Co., Que., Feb'y 19th (Special.)—One of the most enthusiastic patriotic workers in this district is Mrs. H. A. Standish. Though sixty-two years of age her splendid health enables her to keep busy for three hearty men and still have time and strength to devote to the welfare of the boys in the trenches. And Mrs. Standish will tell you she owes that abundant health to Dodd's Kidney Pills.

"I must say that Dodd's Kidney Pills are very good for sick kidneys," Mrs. Standish states. "I have recommended them many times for rheumatism as they helped me very much for that disease. You can say for me that Dodd's Kidney Pills are beneficial for everyone who is troubled with bad kidneys."

The kidneys are the keystone of woman's health. Keep the kidneys right and the rest will be right. Dodd's Kidney Pills keep the kidneys right.

Advance Spring Styles

Some of the Spring hats combine straw and fine felt, or straw and satin, others are entirely of straw trimmed with flowers or ribbon, and a great many are of crepe. An almost brimless, rather high-crowned little hat was fashioned entirely of narrow ribbon interlaced, giving the impression of straw, at a distance. It was of narrow blue ribbon with a tiny red border on either side. The trimming was a bunch of red cherries placed on the left side of the crown. Another hat with a small up-turned brim was of white silk covered entirely with machine stitching worked in a close allover design. Machine stitching is also very popular just now as a de-

Box Coat of Green Jersey Cloth with White Pleated Shirt

coration for suits and dresses, therefore it is not surprising to find it on hats.

Some New Suits

Very snappy are the new suits with their hip-length coats. The box coat in the sketch is one of the new models. The pleated pockets and cuffs tell at once that this is a 1917 design, for box coats have never before had such frivolous pockets. Coats of bright colors such as green, rose, marigold, citron or purple accompany white skirts which are either plain, or else spotted or striped with the color of the coat. Some of the skirts are made from hardened material with the border at the lower edge and the top laid in pleats. In some of these, the designs are embroidered instead of printed. The designs are generally large dots or squares worked in two or three striking colors or in a solid color with black or a contrasting shade used to outline the motif.

Jersey, and Still More Jersey

Jersey keeps at the height of popularity and is now combined with other materials. A suit of chin-colored wool jersey was made with a white pique collar. The collar was, of course, detachable so that it could be removed and laundered with ease. In another instance, wool jersey was combined with gabardine very pleasingly. The suit was of purple jersey, and tan gaberdine fashioned the large collar and revers that went the length of the coat. The cuffs and pocket-laps were also of the tan gabardine.

These patterns may be obtained from your local McCall dealer or from The McCall Company, 70 Bond St. Toronto. Department W.

BABY'S OWN TABLETS OF GREAT HELP

Mrs. Wm. Arilett, Ancaster, Ont., writes:—"I have used Baby's Own Tablets for three years for my little girl and baby boy. I have found them of the greatest help during the teething period and always keep them in the house." The Tablets aid teething babies because they regulate the stomach and bowels, thus preventing constipation, diarrhoea and convulsions. They promote healthful sleep and keep baby well and happy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Using Waste Places.

The Parks Committee of the London County Council reports that it has not been necessary to exercise the compulsory powers in regard to land for cultivation, the owners cheerfully giving up their land. Lord Derby's deer park at Knowsley has been ploughed up and more than one hundred acres are to be converted into wheat land. Motor tractors which cut from three to six furrows at a time were employed. Forty acres of the racecourse at Northampton, which has been used as a recreation ground since the abolition of racing, will be ploughed up.

TO STOP BAD COUGH

SOOTH DRY, IRRITATED THROAT WITH PARMINT SYRUP, SAYS THIS OLD FASHIONED COUGH MEDICINE IS THE BEST.

We are told that the old time remedies are the best and certainly none is more healthful yet better medicine than those old ones is now to-day. This being so, undoubtedly the following old fashioned recipe which is quick acting will be welcomed by many as there seems to be a regular epidemic of coughs at the present time. Secure from your druggist 1 ounce Parmint (double strength), take this home and add to it a quarter pint of hot water and 3 ounces of granulated sugar, stir until dissolved. Take a tablespoonful four times a day. No more than a swallow while laughing with a cough. Clogged nostrils should open, air passages of your head should clear and your breathing become easy. Parmint syrup is pleasant to take, easy to prepare and costs little. Every person who has a stubborn cough, hard cold or catarrh in any form should give this perscription a trial.

Your druggist can supply you or a bottle will be sent on receipt of price by Parmint Laboratories, 21 St. Antoine St., Montreal, Canada.

How?

"Truly, am I the first girl you ever kissed?"

"You are, my darling, and it makes me happy to hear you say I am the first man who ever kissed you."

"If I am the first how does it happen you do it so expertly?"

"And if I am the first how do you know whether I do it expertly or not?"

Manoonville, June 27, '13.

As all druggists, 25c. 50c. and $1.00.

Sloan's Liniment
KILLS PAIN

Awful Thought.

Favorite foods that mother used to make were the topic of conversation at the boarding-house table. After numerous interchanges came a lull. Then a callow youth whom bashfulness usually kept silent broke it with this bombshell:

"D-d-d-did any of you ever eat sauerkraut with whipped cream on it?"

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye free ask Druggists or Murine Eye Remedy Co., Chicago

Encouraging.

He was one of those young men who never seem to know when to go home. She had tried yawning, but even that failed to get rid of him.

Presently a clock outside in the hall began to strike in low, deep tones the midnight hour.

"Oh, I say, Miss Goldilocks," said the late-stayer brightly, "is that an eight-day clock?"

Miss Goldilocks smiled coldly at him.

"Well," she said, stifling another yawn, "why don't you stay a little longer and find out?"

THE NATION'S FUTURE
Depends Upon Healthy Babies

Properly reared children grow up to be strong, healthy citizens

Many diseases to which children are susceptible, first indicate their presence in the bowels. The careful mother should watch her child's bowel movements and use

Mrs. Winslow's Soothing Syrup

It is a corrective for diarrhoea, colic and other ailments to which children are subject especially during the teething period.

It is absolutely non-narcotic and contains neither opium, morphine nor any of their derivatives.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Soothes the fretting child during the crying period of its development and thus gives rest and relief to both child and mother.

Buy a bottle today and keep it handy

Sold by all druggists in Canada and throughout the world.

The Paisley Advocate

PAISLEY, JAN. 16th, 1918

—Woman suffrage received a British boost when the House of Lords last week decided in favor of giving votes to about six million of the fair sex. While the bill has yet to receive the third reading, and a motion to submit the question to a referendum is to be disposed of, it is not believed that this has any prospects of success even if pressed to a vote. The final passing of the act will end the long wrangle which has troubled the country for years, and was the cause of many disturbances at the British House of Commons during the past decade. The spirit in which the concession is welcomed by the women leaders presages a new era in British politics. The liquor business, which is so strongly established and seems impossible to overthrow in that great land of the free, may now be disposed of as in other countries. Miss Pankhurst said: "The vote will be used for the national good: first, for promoting social reform; second, for stimulating national defence and, third for disciplining democracy."

—The electric light service we are receiving is anything but satisfactory, and this will likely be one of the matters that our new council may have to deal with early in the year. It appears as if we must wait patiently and uncomplainingly for Hydro, meantime being satisfied that we are not left in utter darkness. At any rate, if we are to have anything better than that we are now getting between this and the time when Hydro power becomes available for us, there must be some kind of understanding arrived at between the municipality and the Electric Light Co. The old contract has long expired, and neither party has ever asked for a new one. This is not a business-like way to handle such a large item, and one that contributes greatly to our civic and home comfort. We would suggest that the council and the company endeavor to co-operate and agree upon some plan to give us an improved service on terms that may be acceptable to the public and the producer.

VILLAGE COUNCIL

Council for 1918 met on Monday evening, 14th Jan. All having taken and subscribed declaration of office, took their seats. Council being composed of James H Steele, reeve, and councillors Alonzo Pearce, John A Logie, David Forrester and Richard Skinner.

The local fire brigade requested three new lanterns. The Hospital for Sick Children, Toronto, requested financial assistance. Geo H Flood requested refund of overcharge re sanitation tax.

Forrester—Pearce—That the amount of the G T R charge for demurrage on car of coal, $3, be paid.—Carried.

Logie—Skinner—That the sum of $5 be granted to the Hospital for Sick Children.—Carried.

Pearce—Forrester—That this council procure three lanterns for the use of the fire brigade.—Carried.

Pearce—Logie—That Geo H Flood be refunded $1 overcharge on his sanitation tax.—Carried.

The following appointments were made: Wm R Teeple, to Board of Health; H H Putnam and Geo I. Carter, auditors, salary $8 each; Alex Jack, assessor, salary $50; Frank Purdy, pound-keeper.

Committees were formed as follows: Finance—Messrs Steele, Logie and Forrester; Roads and Bridges—Logie, Pearce and Skinner; Fire and Light—Pearce, Forrester and Steele; Property - Forrester, Steele and Skinner; Sanitation—Skinner, Pearce and Logie.

Forrester—Pearce—That the clerk be instructed to draft a by-law repealing By-Law 552 and fixing new rates for the town hall as per schedule now read.—Carried.

Accounts were passed as follows: The clerk, registering births, marriages and deaths, 1918, $6 40; weighmaster, $8 48; J H Maurer, $15; I Trolland, $4 85; J N Collins, $9; Hospital for Sick Children, $3; G T R System, $3.

Council agreed to meet on first Thursday of each month at 8 p m.

WHITE PLAGUE BLOTS OUT ENTIRE FAMILY

On Wednesday evening of last week the death took place of Gilbert J. Hunter, second son of the late Duncan Hunter, of Egremont. Deceased had been going to college in Toronto and a few weeks before his death came home ill to his aunt, Miss Margaret Hunter, ... street. He and his brother, Pinkie ... e death took place on December 4th, ere lying ill at the same time, with no hope of recovery. A whole family is thus blotted out by that fell malady, the White Plague—mother, father, three sons and three daughters—and the circumstances are pathetic. The young people were bright and full of life and made a brave fight for life against the tendency inherited.—Mount Forest Confederate.

A Generous Gift

These times when one hears so much about war grafting and profiteering it is refreshing to hear of cases where men give their best energies entirely without remuneration. Such an instance came to light in Walkerton this week when the treasurer of the I O D E received a cheque for $375 from Messrs A Collins, J J Schumacher and J E Rosenbottom to be devoted to soldiers' work. The cheque represented the first half of the pay received from the Government by these men for selling $150,000 worth of Victory Bonds in Walkerton. When the second cheque for $375 comes along, it will also be turned over to the I O D E, making $750 contributed in all by these three generous citizens.—Walkerton Telescope.

Women, Prepare!

Thousands of women in Canada have overcome their sufferings, and have been cured of woman's ills by Dr. Pierce's Favorite Prescription. This temperance medicine, though started nearly half a century ago, sells most widely to-day. It can now be had in tablet form as well as liquid, and every woman who suffers from backache, headache, nervousness, should take this "Prescription" of Dr. Pierce's. It is prepared from nature's roots and herbs and does not contain a particle of alcohol or any narcotic. It's not a secret prescription for its ingredients are printed on wrapper. Send 10c for trial package to Dr. V. M. Pierce, Surgical Institute, Buffalo, N. Y., or Bridgeburg, Ont.

Hamilton, Ont.—"When I reached the critical period I was a nervous wreck and suffered with hot flashes and dizzy spells. 'Favorite Prescription' relieved me of all these ailments and brought me through this trying time safely. Put women of middle age there is no tonic equal to Dr. Pierce's Favorite Prescription, and I never hesitate to recommend it to my friends."—MRS. ANNIE SOULEN, 41 Ross St. N.

Stratford, Ont.—"I was greatly benefited by taking Dr. Pierce's Favorite Prescription; it was before twins came. I had become all run-down, was nauseated, very nervous and weak, and suffered with backache. Was not able to do anything for three months, when I began taking 'Favorite Prescription.' It soon gave me relief and it was not long when I was strong and healthy. 'Favorite Prescription' was surely a great help to me and I am glad to recommend it."—MRS. L. J. MAITLE, 51 Kent Lane.

TWO SOLUTIONS FOR THE LABOR SHORTAGE

At the Experimental Union, now in progress at the Agricultural College, Guelph, the labor problem was the one thing that stuck up all through. It was as prominent and as formidable as a sore thumb. There wasn't a speaker who used up a couple of gallons of breath without referring to the matter.

There can be no question but that the farming communities of Canada are feeling the pinch, even apart from the rush season of harvest and seed time. It was interesting at the sessions to watch what suggestions—new ideas—were used by the leaders in agricultural thought to overcome or alleviate the situation. Perhaps one of the most novel ideas was that advanced by President Harry Sirett, who claimed that there should be some central body to handle the labor situation. His idea is this, in his own words:

"It may be advisable to place all industrial activity under the control of a commission, whose duty it would be to say in what industry labor may be employed. That would mean that every would-be employer of labor would have to obtain a license which would give authority to engage the number of employees, which the commissioner considered was justified by the absolute needs of the country at the present time."

That was one suggestion. Another was put forward by Dr Creelman, president of the College, and Commissioner of Agriculture. This was that a large number of Chinese, probably one hundred thousand, should be imported under bond, during the duration of the war, to fill up the temporary gaps in the labor market of the dominion. It was quite apparent that Dr. Creelman was not himself committed to the plan. It appeared as though the suggestion had been discussed in official or unofficial circles and put out here as a feeler. The chances are that it will not get much further. Canadian farmers do not want Chinese labor. Chinese labor, were the country swamped with it to-morrow, would not stay on the farms. It would be only a matter of a few weeks before it would have settled in the cities, there to come in direct competition with the white labor. Ontario, and the rest of the Dominion, would have labor troubles then compared to which those they have known heretofore would be as nothing at all. You cannot get a British Columbia man to enthuse over the Asiatic labor idea as a panacea, or even a temporary salve, for labor problems.

Mr. Sirret's idea has more in it that sounds reasonable and is less repulsive than the Asiatic importation idea. His suggestions may or may not be practical when it comes to the real application of his ideas, but there is in his plan a great field for investigation. He would, in brief, create a central board, whose duty it would be to control the labor power of the land. If a man wanted to employ one hundred men he would appear before the board and state his case. Before permission were granted to him to take the labor power of 100 men out of the available supply, he would have to satisfy the central body that the work they would have to do was of an essential character, that the articles they would manufacture were absolutely necessary to the welfare of the people—in short, that their labor power would be put into a channel that was undoubtedly of national importance. If the employer could give this satisfaction he would be licensed to draw from the labor market. If he could not show that his business was of outstanding importance, permission would, we presume, be refused, and the labor that he might now be employing would be taken from him and diverted to other necessary and essential occupations.

Mr. Sirett's idea is not entirely new, but it certainly was an opportune time, at a meeting of agriculturalists, to bring it prominently to their attention.—Guelph Mercury.

—The editor of the London John Bull, Horatio Bottomly, has been on a visit to the trenches, and returns with words of cheer. In his paper he writes;

"And now for what I have learned. We will have the truth from the trenches at last. The war is on. Germany is beaten. On every front she is weakening and weakening—and now it is only a question of the psychological moment to strike. That momentous decision rests with one man—at least I hope to God it does. If the politicians will kindly keep out of the ring Haig will very soon administer the knockout blow. "I know what I am saying. I do not profess to speak as any military expert or prophet. I say that which I have learned. I mention no names—I disclose no secrets—I abuse no confidence. From Field-marshall Commander-in-chief right down to the rawest Tommy in the trenches there is but one spirit—that of absolute optimism and confidence. And there is not a German prisoner who does not tell the same tale. 'He is fertig,' said every one with whom I talked—'It is finished.'

ELECTRIC POWER TO SAVE THE FUEL SUPPLY

Toronto Saturday Night: The solution of this country's fuel problem unquestionably lies in the proper development of our waterpowers. We import annually seventeen and one-half million tons of coal, and we mine annually some fourteen and a half million tons. With proper electrical development the necessity for a vast proportion of this coal would disappear. At present we are ahead of most countries in our hydro development, but are, nevertheless, for behind our necessities. Our provinces of large population and most important manufacturing industries have no coal of their own, and at best what coal Canada possesses is largely of inferior quality, or so far away as to make its general use out of the question. We are, therefore, greatly dependent upon the United States, which country is ever meeting with increased difficulties in supplying her own, not to speak of her neighbor's demands. In the meantime the waters of our rivers flow on unceasingly with little tribute laid upon them to make good our necessities.

The more recent steps in hydro-electrical development have shown the limit of transmission extended from one hundred miles, which means that practically the entire country has potential water powers within usable distance. As a start steps should be taken jointly by the United States and Canada to properly develop the potential water power of the St Lawrence, which is estimated at two million horse power, and proceed with the further development of the Niagara river by running a dam across that stream above Lewiston, N.Y., and Queenston, Ont. The result from such a work would be to hold back the water of the Niagara between its present steep banks, creating thereby an enormous water power, and at the same time not interfering with the natural beauties of Niagara Falls. Engineers estimate that such a work will develop quite two million horse power, half of which would be the property of Canada, as would also be the case with St. Lawrence development, provided the work was done jointly by the two countries. To think that from these two sources four millions of horse power, half of which would be ours, should be left uncontrolled and undeveloped, while we struggle to obtain sufficient coal to run our industries and heat our buildings, is absurd to the last degree.

The development of all Canadian water powers, east, west, north and south, should be either provincial or national. In no instance should they fall into the hands of the individual or corporation. Corporations have long been angling for the potential water powers of the St Lawrence, and no doubt will continue these attempts until the Canadian Government takes proper steps to see that the development is nationalized. Throughout the Canadian west are a multitude of potential water powers of importance which should receive the attention of the governments of these provinces or else have the development thoroughly nationalized by the Federal Government undertaking the work. This, without question, is the most important work before the country to-day, and if Union Government lives up to expectations it must direct its energies to this end.

—Sergt. Lambert, a divinity student who enlisted as a soldier and after being seriously wounded returned to Canada, gave an eloquent address in Owen Sound recently, in which he alluded to the question in everybody's mind, not how the boys died but how they lived. Sergt Lambert said:

"For the sake of the men, of the mothers, wives, sisters, fathers and sweethearts, I want to say that the men live better in Flanders than we do at home." One reason for this is that they are facing the great issues of life. I remembered well the long lines of men, going out in full equipment, singing cheerily. Theirs was the wonderful spirit of going on to fight and to win. They had never dreamed of being soldiers; he himself had always intended being a minister. But one could not believe in the highest principles of life and in time of need throw them to the winds. If one enjoyed freedom, he ought to be willing to fight and to die for it. "If we need anything it is the prayers of the people at home," said Sergt Lambert. It is one of the greatest assets the soldiers can have when in the trenches to be heroes in the best of emotions but in mud and in the face of machine guns and shells it is hard to be brave. But the spirit that predominates and carries the hearts of the men is the spirit of loyalty, of love and of self-sacrifice. The young men fighting in Flanders are indeed worthy of the support of the people in prayer. Sergt Lambert stated that the men overseas often pray, and told a story of a corporal, who was later killed, who commended his wife and children in Canada to the care and keeping of God. The men never forgot those they left behind. If the ones at home only know what the soldiers face and what it meant to go over the top, they would have a greater love for them than ever before. Whatever there is in warfare to inspire one to live well, the greatest thing is the spirit of the men. The people at home do not know what it is to have their comrades shot down and carried away. There is no time for distress—they only grasp their rifles tighter in a determination to carry on and win. For the sake of these he asked for support in every way. They had to have men, and the men going now would be just as good as the ones sent before. Sergt Lambert asked that the parents should not think that their boy was too good to go or that he could not face the temptations. He said that they would be worthy of the highest hopes and ambitions. Personally he knew what it was to be in the army and face the temptations incidental to army life, but he never lost the consciousness of the presence of God. The night he lay over the top with his leg blown off by a German shell, he was conscious of Jesus Christ and of the prayers of his mother at home. He said: "For the sake of the men, of the cause for which they are fighting, for Canada and for ourselves, let us get down on our knees before God. We will never win by men and material forces unless God is on our side." These are the darkest days of the war, and men and munitions are urgently needed and with them the power of God. The soldiers fighting overseas had no doubt as to the issue; they knew that they can win if the men and the munitions are forthcoming. He hoped that the nation would grasp the trench spirit of God, of self-sacrifice and of love; so that when the boys came home they would find the people in an attitude to receive them."

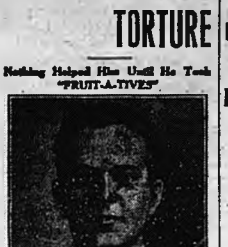
THE STATE THE GREAT VICTUALLER

When volunteers are not forthcoming in sufficient number to maintain the country's defensive forces at the required strength, those forces are recruited by compulsion. It has been so in the United Kingdom, in the United States and in Canada, all of them democratic countries. Fighting is not the only war service the state needs at the hands of citizens. It is in no less need of their services in the production and conservation that are subsidiary to the military operations it is carrying on. The fighting men have to be provided for and sustained in the field. In order that they may be kept on the best war footing it is necessary that the nation's productive activities and general economy be directed by public authority no less capably than are the military forces. There is no more reason why the output of the necessaries of war should be limited to the sum total obtainable from voluntarism than that our defensive force should be kept down to the strength attainable by voluntaryism. Resort had to be had to the selective draft in order to make good the deficiency in volunteering for defence, and it seems certain that resort must likewise be had to some measure of conscription to make good the deficiency in the output of food required for continuing the war.

In 1917 Canada's field crops were of sufficient magnitude to be worth upwards of a billion dollars at present high prices. They should, if possible, be of far greater volume this year. The motive of assured high prices ought to be strong enough to cause a very great increase in production. But ought that motive to be relied upon to fill the barns, granaries, stalls, sties, dairy stores, packers' warehouses, elevators, cold storage plants, etc., up to the desired limit? No Public authority is bound to undertake the great task of making Canada the purveyor of food supplies that it is possible to make her. If the Government takes the matter strongly in hand, as it took the matter of reinforcing our army by drafting, it can add millions of acres to the area that was under crop last year, it can add a hundred millions of bushels to the wheat output, two million head to the hog output, and vast additional supplies of other foods. But it must begin at once and get its volunteer army of food producers organized to the highest point of efficiency, bring its army of drafted producers upon the land, get its financial arrangements perfected and its transportation system in order, and then see that everybody works to the best advantage. Farm machinery, such as traction plows ought to be put into service by the Government and a great acreage of now unproductive land ought to be tilled and put under crop. No good cleared lands in our railway belt should be left untilled. No resources that can be brought into the service of food production ought to be left outside the circuit of the country's war economy.

Of course, there will be expostulations in the name of "freedom" and there will be more or less noisy assertion of the right to manage one's own private business. Private business is a thing of which the less said the better in this awful war time. We are now all supposed to be "carrying on" in the public business of overcoming the enemy. The citizen has no rights the enemy would respect. The best way to look after his private interests is to do all he can for his country. The citizen's relation to the State is not amply that of a claimant for protection. It involves also the obligation to serve his State with the utmost loyalty. The State can protect the citizens in the enjoyment of those precious civil and political rights that are now theirs if on their part the citizens cheerfully apply all their energies to whatever service the State calls them in the time of national crisis. These are times when Canada needs a strong hand on the reins of Government. The people will work as one national team if there is vigor on the box.—Mail and Empire.

—A burning chimney started a fire in Listowel that destroyed a large section of the town.



—Owen Sound ratepayers voted in favor of assisting the King Shoe Co to establish a factory there.

—All Division Court sittings scheduled for this week are postponed. The Paisley court will be held next Thursday, 24th inst.

—"Advertising is the education of the public as to what you are, where you are, and what you have to offer in the way of skill, talent and commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service."—Elbert Hubbard.

SEVEN YEARS TORTURE

Nothing Helped Him Until He Took "FRUIT-A-TIVES"

ALBERT VARNER

Buckingham, Que., May 3rd, 1915.

For seven years, I suffered terribly from *Severe Headaches and Indigestion*. I had belching gas from the stomach, bitter stuff would come up into my mouth after eating, while at times I had nausea and vomiting, and had chronic Constipation. I went to several doctors and wrote to a specialist in Boston but without benefit. I tried many remedies but nothing did me good. *Finally, a friend advised* "Fruit-a-tives". I took this grand fruit medicine and it made me well. I am grateful to "Fruit-a-tives", and to everyone who has miserable health with Constipation and Indigestion and Bad Stomach, I say take "Fruit-a-tives", and you will get well".

ALBERT VARNER.

50c. a box, 6 for $2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

NEW LEADER OF LIBERAL PARTY

Mr Wm Proudfoot, K.C. the new leader of the Opposition in the Ontario Legislature, is a Liberal of long standing in Provincial politics. In 1902 he was tendered the nomination for the Provincial Legislature, but declined to stand until 1908 when he successfully contested the riding. He has never been defeated. Since his election to the Legislature he has been one of the most prominent members of the Opposition side of the house in fighting for progressive legislation along temperance lines; in fact, he was one of the strongest supporters of the abolition of the liquor license system in Ontario.

While looked upon as one of the most progressive Liberals on the Opposition side of the Ontario Legislature, after his election, it was not until the eve of adjournment for prorogation on April 23, 1913, that he became prominent in the public eye. On that occasion, on the floor of the House, Mr Proudfoot charged Sir James Pliny Whitney, the leader of the Government, and the Hon. W. J. Hanna, Provincial Secretary, with "corrupt and improper acts," following the outcome of an investigation instituted by Mr Proudfoot before the Public Accounts Committee, arising out of the settlement of the claim of Taylor, Scott and Co., Toronto, in respect of a Central Prison contract.

Mr Proudfoot made the charge on his responsibility as a member of the House and subsequently secured the appointment of a Royal Commission to investigate the charges. The substance of Mr. Proudfoot's charge was that $500 had been accepted by Mr Hanna as a campaign contribution and that there was manipulation of certain tenders for supplies.

The Proudfoot family has taken naturally to the professions, and furnished distinguished members in law, medicine and the church. The Rev Dr Proudfoot, the founder of the First Presbyterian church in London was the grandfather of the leaders of the Opposition. He was a big, broad-shouldered Scotchman who exercised in his day much influence for good in the community. His son, the Rev Dr J J A Proudfoot, uncle of the new leader, succeeded him as pastor of the First Church and occupied it until comparatively recent years. He was one of the Professors of Knox College for many years before his death. Another uncle, Vice-Chancellor Proudfoot, was one of the best equity judges the province ever had. On the bench he looked every inch a judge. The medical profession has for two generations had representatives of the family, who have taken a leading place.

William Proudfoot, K.C., M. P. P., is a native of the county of Huron, a son of Robert Proudfoot. He received his education in Goderich and after his call to the bar formed a partnership with the late Judge Garrow. He has been the head of a legal firm in Goderich and Toronto for many years past. His legal practise and his experience in the Legislature have matured his judgment.

—The Rochester Post-Express tells this story: A citizen of Rochester just back from Minnesota tells of a prosperous German American of that state who never used to be tired of telling how he landed in Boston with nothing but a carpet bag and a dollar and seventy-five cents. Since the outbreak of the war he had, being an ignorant man, been outspoken pro-Prussian and rabid in condemnation of everything American. Finally, a committee of solemn-looking citizens visited him, put $1.75 on his table, told him that his ticket to Boston and his passage to Hamburg had been secured and to pack his carpet bag at once, for he had only a half an hour more to stay in the state. His pleading was so pitiful and his promises of better conduct so profuse, that the committee took the matter under consideration and at last by vote decided to try him a little longer, on his pledge of loyalty to the Government and the flag.

—Kincardine has appointed the town chief of police as local jail controller. The Review says: "If you have too much coal in your cellar, 'cough up.' If your supply is too low, "tell your troubles to the policeman."

THE BOYS AND GIRLS

Who have been working an extra month on the farms producing food for those at home and those overseas should be given the opportunity of improving their education during the stack winter months, at the

Northern Business College

The fees are no higher than when farm produce sold for half the price of to-day. The young people will be benefited greatly by first life from the training in business obtained in a few months of our special business course. Winter opens on Jan. 2nd.

C. A. FLEMING, Pres. Owen Sound

Ahiram Lodge, No. 206, I.O.O.F.

MEETS every Tuesday evening at 8 o'clock in the Hall Main Street, Paisley. Visiting brothers always welcome.

GEO. HEPBURN, N.G.
W. R. HARVEY, R.S.

For Sale

NEW two-storied stucco house. Bath, furnace, wood heated, well, and domestic. Will be sold at cost. Apply to T. H. OSBORN.

Farm House to Rent

GOOD brick house with seven rooms, on Elora road north. To rent by the year. About 1 acre of orchard and garden attached; stable and barn room; hard and soft water. Enquire at ADVOCATE Office.

—After December 30th persons collecting moneys for war charities only authorized in writing by the governing body of a registered war charity association, are liable to prosecution under the act. Registration is made with the Secretary of State of Canada. The accounts of all registered associations must be audited and half-yearly returns to the Department of State are required.

BORN

HYDE—In Bruce, on Jan 14th, to Mr and Mrs Frank Hyde, a daughter.

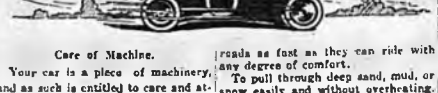
DIED

McMILLAN—In Kilsyth, on Jan 10th, Isabella McMillan, relict of the late Angus McMillan, aged 83 years.

MOORE—At Chesley, on Jan. 14th, R. J. Nesbitt, aged 44 years.

PRACTICAL FARMING

The Best Method to Exercise a Brood Mare.



The winter season brings its difficulties in the horse barn. It is no easy matter to so regulate feeding and exercise with the different horse stock as to keep all the stock in the healthiest, most vigorous condition, with the least feed and work. The in-foal brood mare probably gives more trouble on the average farm than does any of the other horses. Colts may be turned out together and allowed to remain out, on fine days, for several hours at a time, and, as a general thing, their vitality is such that they take plenty of exercise. It is rather dangerous to turn the brood mare out with them at times, because she may be cross and may kick some of them, or they may be playful and may kick her.

There are three places in which to exercise the brood mare, or at least three methods used. Some depend upon the box stall; others upon the open yard: and still others upon light work in the team. We agree that every in-foal, brood mare should, if possible, have a box stall. Narrow stalls, often insufficiently supplied with bedding, which may be the case on many farms this year, owing to the short straw crop, are none too comfortable and very often the mare paws the straw back behind and is forced to get up and down on a slippery floor. But the exercise the average brood mare will take in the box stall is not sufficient for her general welfare. She will take some in moving about the stall, but unless she gets light work, or exercise for several hours each day in the open yard, her legs are liable to stock, her digestive system to get out of order, her foetus to be low in vitality.

If the box stall is not enough, what of the open yard? Some mares will take sufficient exercise with very little attention if allowed out in a protected yard; others, however, will stand about the door of their stall moving very little, and always looking for the attendant to come and let them in. A yard for exercise should not adjoin the mare's stall if she is to take the maximum amount. A well-bedded barnyard is about the best place for the mare, and if there is a straw-stack in it so much the better. But she should not be let out with the cattle or she may get injured, and she should not be in a yard where sheep are kept or they may get injured. The farmyard as a place for exercising the brood mare has its disadvantages. She cannot be allowed to monopolize it, keeping all the other stock inside, nor is it safe to allow her to run with all the other stock.

The only method left, is light work, preferably in the team. There is generally some running to mill to do; some wood to draw from the woods; and light team work around the farm. In fact, every well-managed farm has considerable of this, even in the winter. Where the mare is used in the woods, care must be taken to keep her out of deep snow and to keep her on her feet. This latter point is important at all times. She should be sharp shod, at least in front, and if used in the team she should be shod all round. Falls mean foal losses. Keep the mare on her feet if you would have living colts. In fact, we believe that exercising in the team is so important that it would pay to regularly hitch up the one or more brood mares on the farm and drive them a few miles each day.—Farmer's Advocate.

The AUTOMOBILE

Care of Machine.

Your car is a piece of machinery, and as such is entitled to care and attention. For the moment regard it as a horse. As a horse needs care and attention regularly, so does an automobile need proper care and attention. The fair man treats his car with consideration. You would not expect a horse to go forty-eight hours without food and expect him to do good work, and you should not demand proper performance of your automobile without due attention.

Do not expect results if your motor has no oil or if you have neglected lubrication. Always remember that your automobile is a piece of machinery and that it needs care and attention.

Attention on your part guarantees long life to your car and will reduce repair bills. Do not abuse it at any time. It is a good rule to go over your machine once a day. See to it that you have plenty of gasoline, oil, and water. If you will do these things your car will reward you with faithful, consistent service.

Your car is giving good service when you can forget about it in travel. It must be free from noise. It should give the maximum mileage per gallon. It should be free from unusual "knocks" or noises in the motor. It should give the utmost comfort and ease in riding.

Requirements of Auto Owner.

A good automobile should be able to do the following things according to the head of the engineering department of one of the large motor car manufacturers:

To run steadily and pleasingly on high gear at speeds from five to fifty miles per hour over smooth roads.

To carry them over the rougher roads as fast as they can ride with any degree of comfort.

To pull through deep sand, mud, or snow easily and without overheating.

To climb any ordinary hill where there are traveled roads, on high.

To get away from a standstill about as quickly as their neighbors' cars.

To do all these things as cheaply as possible, and without skilled care and constant attention.

Gas Dangers in Garages.

There is great danger of being asphyxiated through breathing the exhaust gases from automobile engines in garages, which has caused a number of deaths recently. The danger is increased in winter when doors and windows are closed.

ANOTHER RECORD SET.

Sun Life of Canada Makes Splendid Showing.

To hold first place amongst Canadian life insurance companies in amount of insurance in force, assets, surplus and income is the distinction of the Sun Life of Canada. New business to the amount of over $42,700,000 was written during the last year, bringing the assurance in force up to a total of over $251,000,000, which amount is three times as large as that in force twelve years ago.

It is to be noted that assets now total practically $83,000,000, an increase of over $8,500,000 for the year. The net surplus over all liabilities and capital also show an increase for the year of close on $1,000,000. $7,578,000 were paid to policy holders during the twelve months period just closed. Further details of this company's business for the past year will be found elsewhere in this issue.

CANADA'S DISABLED SOLDIERS.

Military Hospital Commission's Care of Tuberculosis Patients.

For a specific and typical case take that of Corporal Jones, wounded at Ypres, suffering from shell-shock and tuberculosis, who, after three months in an English hospital, is sent home to Canada, and recommended for six months' treatment at the Laurentide Inn, Ste. Agathe, under Dr. J. R. Byers.

As a Class A patient, Corporal Jones has two weeks' complete rest in bed, with three hearty meals and three pints of milk per day. Then he becomes a Class B patient and trades his bed for a comfortable canvas chair on a verandah, where he lies all day breathing the health-giving Laurentian air.

At the end of two months he has gained 10 pounds, and partly recovered from shell-shock. After another examination, Dr. Byers prescribes fifteen minutes' exercise morning and afternoon. So now every day Corporal Jones puts on his puttees, grips his cane, and walks leisurely up and down and around the gloriously-garmented hills. Every week his exercise is prolonged by fifteen minutes, until at last he has four hours daily.

Whilst Corporal Jones lay in his chair, a Class B patient, he was taught reed-basketry. As a Class C patient, considerably hardened by exercise, he joins a workshop class for an hour each day and learns woodwork. He begins on a tin and collar rack and then evolves a lamp-stand.

Cabinet-making, art metal work, picture-frame making, illuminating, engraving and stencilling are the crafts first to be taught in this little workshop.

Telegraphy, stenography, typewriting, mechanical and industrial drawing will follow. Horticulture, chicken raising, beekeeping are pursuits that will also figure in the vocational curriculum.

At the end of six months, Corporal Jones has got a very fair grip on good health again. His weight has increased by 23 pounds, symptoms of shock have almost entirely disappeared; his lungs are healed; pleuritic pains have gone. He has had no temperature and no cough for two months. But Dr. Byers decides that another six months in the mountains will make trebly unlikely the danger of a relapse at some future date.

The richer by his full pay and allowances for six months, Corporal Jones is now discharged from the Army and re-admitted to the Inn for a further six months' treatment. At the end of that time he is given a pension, the amount being according to his disability.

By the aid of private citizens in every part of the country, Canada has created a wonderful fabric of institutions under the authority of the Military Hospitals Commission, and has elevated the care of her soldiers into a science. It must be conceded to Canada that she shows her gratitude to her warriors in a practical way, and if her face wears a military mask necessary to the times, her heart is none the less solicitous of their welfare.

STOMACH MEDICINES ARE DANGEROUS

DOCTORS NOW ADVISE MAGNESIA

Just how dangerous it is to indiscriminately dose the stomach with pills and medicines is often not realized until too late. It seems so simple to swallow a dose of some special mixture or take tablets of soda, pepsin, bismuth etc., after meals, and this bulk of life dragging is not apparent until, perhaps years afterward, when it is found that gastric ulcers have almost eaten their way through the stomach walls. Gastric and then unsatisfied. It is in the early stages when indigestion, dyspepsia, heartburn flatulence, etc., indicate excessive acidity of the stomach and fermentation of food contents that precaution should be taken. Drugs and medicines are unsuitable and often dangerous—they have little or no influence upon the harmful acid and that is why doctors are discarding them and advising sufferers from indigestion and stomach trouble to get rid of the dangerous acid and keep the food contents bland and sweet by taking a little pure bisurated magnesia instead. Bisurated Magnesia is an absolutely pure and safe which can be readily obtained from any drug store. It is absolutely harmless, is perfectly tasteless and a teaspoonful taken in a little water or cold water after meals, will usually be found quite sufficient to instantly neutralize excessive acidity of the stomach and prevent all possibility of the food fermenting.

Lime-sulphur spray gets peach leaf curl; apply in fall or winter or any time the leaves are off.

Sun Life of Canada Sets New Records

RESULTS secured during the year 1916 re-affirm the position of the Sun Life Assurance Company of Canada as the leading life assurance organization in the Dominion. Once more it leads the field among Canadian Companies in each of the following respects:

Largest New Business. Largest Business in Force. Largest Assets.
Largest Surplus Earnings. Largest Net Surplus. Largest Income.
Largest Distribution of Life Assurance Benefits.

THE YEAR'S RESULTS

The following large and uniform increases registered during the year 1916 clearly demonstrate the strength of the Company's position and the confidence and prestige it enjoys in the public mind:

	1916	1915	INCREASE
Assets as at December 31st	$82,948,996	$74,326,423	$8,622,573 (11.6%)
Cash Income	18,499,131	15,972,672	2,526,459 (15.8%)
Surplus paid or allotted to Policyholders	1,110,900	985,487	125,413 (12.7%)
Net Surplus as at December 31st	8,509,865	7,545,591	964,274 (12.8%)
Total Payments to Policyholders	7,578,016	7,129,479	448,537 (6.3%)
Assurances Issued and Paid for in Cash	42,772,286	34,873,831	7,898,445 (22.6%)
Assurances in Force	281,434,700	257,404,160	24,030,540 (9.3%)

Coincident with the above increases, the Company succeeded during the year in effecting a substantial and important reduction in the ratio of expense, a feature which favourably affects earnings on policyholders' account.

THE COMPANY'S GROWTH

YEAR	INCOME	ASSETS	LIFE ASSURANCES IN FORCE
1872	$ 45,210.73	90,461.05	1,094,350.00
1886	272,500.31	1,573,027.10	9,419,258.07
1896	1,886,258.00	6,388,144.60	38,196,890.02
1906	6,212,615.02	24,592,602.65	102,568,208.10
1916	18,499,131.62	82,948,996.06	251,434,699.94

SUN LIFE ASSURANCE COMPANY OF CANADA

1871 HEAD OFFICE MONTREAL 1917

T. B. MACAULAY, President.

FEED THE BIRDS IN WINTER.

Encourage the Children to Preserve Bird Life of the Neighborhood.

Feeding birds in winter is a delightful and inexpensive recreation, as it costs little in time, food or equipment, and children particularly enjoy the benefit from this form of applied nature study. It attracts birds all winter to flit and chirp around the dooryard and is one of the important means of preserving bird life.

An increase in the number of birds means that more of them will nest in the trees next spring and become our summer companions. They will sing their thanks and contribute to the beauty and charm of the neighborhood.

Every bird kept from starving when cold weather, ice and snow shut off its natural food supply will destroy hundreds of cutorpillars, grubs, borers, beetles and insects that would prey on flowers, vegetables, fruit, foliage or field crops. It is far better to feed birds now than to grow crops for insects to devour later.

The best foods for birds in winter are suet or other fat, pork rinds, bones with shreds of meat, cooked meats, cut up apples, birdseed, buckwheat, crackers, crumbs, cocoanut meat, cracked corn, broken dog biscuits or other bread, hempseed, millet, nut meats of all kinds, especially peanuts, whole or rolled oats, peppers, popcorn, pumpkin or squash seeds, raw or boiled rice, sunflower seeds and wheat.

Food houses can be made with solid roof and glass on three sides to permit observation and at the same time to protect the food and the birds. If mounted on a pivot and supplied with a vane, the wind will revolve it so the open side will always be sheltered.

Birds appreciate a supply of water in winter. This should be given daily in a clean dish.

Keep a pot of water in the garden at nesting season. Swallows, robins and phoebes will wall their nests with the mud gathered from a wet spot of this kind—other birds will make use of feathers, bits of wool, twine and straws.

The cat is the greatest enemy of the bird. Homeless cats should be destroyed and pet cats should be kept in the house.

Genuine.

The hard-working shopkeeper, according to London Opinion, had vainpurchase a present for her granddaughter. For the fifteenth time she picked up and critically examined a neat little purse.

"Are you quite sure that this is a genuine alligator skin?" she inquired.

"Positive, madam," quoth the dealer. "I shot the alligator myself."

"It looks rather soiled," said the lady.

"That, madam, is where it struck the ground when it fell off the tree."

How Did He Know?

Dolly: What's the matter?

Freddy: Got somepin in me eye.

Dolly: What is it?

Freddy: Dun't know; can't see it.

An automobile engine should not be operated in a small garage unless doors and windows are wide open. The air in the garage is decidedly dangerous after the engine had been running about fifteen minutes. The first effect is smarting and watering of the eyes.

The Doings of the Duffs.

Farm Crop Queries

Conducted by Professor Henry G. Bell.

The object of this department is to place at the service of our farm readers the advice of an acknowledged authority on all subjects pertaining to soils and crops.

Address all questions to Professor Henry G. Bell, in care of The Wilson Publishing Company, Limited, Toronto, and answers will appear in this column in the order in which they are received. As space is limited it is advisable where immediate reply is necessary that a stamped and addressed envelope be enclosed with the question, when the answer will be mailed direct.

Henry G. Bell.

Question—S. H. (1) How can I best get humus into a sandy soil? I have a field of about 5 acres which is unproductive. Last year it was not even good for grazing. I ploughed it last fall and have been thinking of sowing it in the spring, and turning it under the following spring. What would you suggest that I sow and get a fair crop the same year, yet improve the soil?

Answer—You would do well in the spring, as soon as the ground will work, to harrow it down to a smooth seedbed, first having given it a dressing of from two to five tons of manure to the acre; then seed it to an early variety of oats, such as O. A. C. No. 72, or Daubeney, using about 1½ bus. of seed to the acre. Seed this with about 10 lbs. of Common Red Clover and 4 lbs. of Alsike to the acre. The oats will harvest early, and the clover should get a pretty good growth by fall. As soon as it has made a satisfactory start in spring, instead of cutting it, plow it under, and you will have enriched your soil by a good addition of organic matter.

Question—(2) What is the best fertilizer to use for potatoes on sandy soil, and what quantity should be applied per acre?

Answer—Potatoes on a sandy soil should receive a fairly high-grade fertilizer. You will do well to use one carrying from 4 to 5% ammonia, 8 to 10% available phosphoric acid, and as much potash (up to 3%) as you can get this year. If you cannot buy a fertilizer with a high amount of potash, you will do well to apply wood ashes, up to ¾ ton to the acre, working it into the soil before you apply the fertilizer. If you do apply wood ashes, be sure to treat your seed potatoes with formalin in order to kill the spores of the scab which is likely to thrive where wood ashes have been applied. In applying the fertilizer, if you are putting on 500 lbs. or more to the acre, apply one-half through the fertilizer attachment of the grain drill, if you have a grain drill with fertilizer attachment, or spread it broadcast over the potato field before the last harrowing if you do not have a drill distributor. Thoroughly harrow this fertilizer into the soil and apply the rest of the fertilizer through the fertilizer dropping attachment of the potato planter. It is not advisable to apply more than 300 lbs. to the acre through the fertilizer attachment of the potato planter; hence any excess of this amount should be worked in broadcast when preparing the potato seedbed.

Hogs

Don't expect to succeed with hogs if you give them any old thing to eat.

Pigs must be fed clean wholesome food if you wish to eat fine hams and bacon of delicious flavor.

The ill-smelling pig-pen is a relic of the past in up-to-date farming communities.

Cleanliness is the watchword for success with pigs.

To expel worms from hogs the following prescription is right for a pig weighing about 100 pounds: Santulo, five grains; calomel, two grains; areca nut, two grains; sodium bicarbonate, one dram. Keep the hogs off feed for about twelve hours and give the dose in a slop of middlings. The evening of the same day give a mash of wheat bran. This will flush the bowels. Gather all worms and burn them.

Worms often are the forerunner of disease.

If hog or pig has a big appetite and thriftless condition, with dry dead hair, it is a good indication of the presence of worms.

Sheep Notes

Sheep will stand a lot of cold weather, but draughts are as dangerous to them as to other animals.

Do not crowd the flock. Exercise is very essential to the ewes and the coming lambs.

Feed regularly, and be quiet and kind to the flock. Sheep appreciate a kind, well-modulated voice.

Provide for plenty of clean fresh water in the sheep barn. Give it fresh every day.

Are yours just sheep, or the very best you can find?

When a sheep does not chew its cud or eat, you have a sick sheep on your hands. Good treatment is to take the sheep out of the flock, put it in a sunny yard or pen and give it a chance to drink what pure water it will. Don't urge it to eat, and be patient.

The man who lets his flock get a part of their living by passing through the snow shows a lack of wisdom.

Ice-cold water must be warmed up in the sheep's stomach. That costs more than it would to do it on the stove.

The Dairy

Silage furnishes a juicy food for winter, and thus helps to keep the digestive organs of cattle in good order.

On the same acreage, two cows can be kept on silage at the cost of keeping one cow on hay or other roughage.

Plan to look over the pasture fences as soon as the winter is over. No time to stop to fix them after the stock is turned out and you are busy with the plowing.

Fear, cold, any kind of discomfort, are expensive in a dairy herd. Comfort always means profit. It is up to you if your cows do not turn you a profit.

Give the heifers that are to calve in the spring very special care. They should have exercise, but not where they can be knocked around by the older cows.

They should be handled every day, and made very gentle and tractable. This handling will be found to have been time well spent when they come into milk.

Horse Sense

If a horse has a loud, dry, hoarse cough, becoming moist later on, loud and frequent respirations, dullness, ropy saliva from mouth, bowels costive and urine high colored, and stands continuously, he is showing symptoms of bronchitis.

See that he has comfortable, well-ventilated quarters, excluded from draught. Apply mustard to breast and sides. Steam nostrils, holding head over boiling water with a little carbolic acid. Give cold water with 3 or 4 drams nitrate of potassium in it. When inflammation subsides, give dram doses each of gentian, ginger, and sulphate of iron 3 times daily.

If hay is kept in front of idle horses all the time they will keep on eating it, to their own detriment, and at the waste of a lot of good feed.

It is more economical to give a small feed of grain at noon than to stuff them with hay. Give just as much hay morning and night as will be eaten up clean in a reasonable time.

Study your horses. Some require more roughage than others to keep them in condition. Some horses will never stuff themselves with hay, no matter how much is given them; others will eat everything in sight. The intelligence of the feeder must control the situation.

Bring the head-stalls into the kitchen at night if the stable is frosty, or cover the bits with smooth leather. Never put a frosty bit in a horse's mouth.

The idle work horses and the colts should spend a few hours every pleasant day in a sheltered yard. Never leave them out until they are chilled; that doesn't pay.

Be very careful with the breeding mares. Don't let them slip, and don't make them back heavy loads. A good teamster will manage to make his team back as little as possible. Backing is unnatural and very straining.

Poultry

Never feed chicks till the third day after hatching, let them have all the dry sand and water they will take. Their first real feed should be rolled oats and hard-boiled eggs chopped fine. Two tablespoonfuls are sufficient for 100 chicks.

Are pens mated up? Don't delay any longer.

Fowls, like men, tire of sameness in diet. They must have a variety in the bill of fare to do well.

Select the breed intelligently, and then care for it judiciously. The man who sticks to his breed, getting out of it all that is possible, is the man who succeeds.

Neglect does a lot of mischief in the poultry yard. The fowls need regular attention. There are many details that must be heeded, or disaster may result.

It doesn't seem possible, in this era when the pure-bred fowl has proved its worth to be double that of the mongrel, that any intelligent farmer should tolerate the latter. But, alas, there are still some Peter Tumbledowns in our rural districts!

If a hen is not comfortable, if she is not provided for according to her demands, she just simply refuses to produce eggs. She can not be fooled; she can control her egg output at will.

GENERAL BROWNSELIF,

Special Envoy from Russia to Great Britain, in the matter of important army arrangements. The lady is his daughter.

THE SUNDAY SCHOOL

INTERNATIONAL LESSON

MARCH 4.

Lesson IX. Jesus Feeds The Five Thousand—John 6. 1-21. Golden Text.—Matt. 6. 11.

Verse 1. Tiberias—An almost exclusively Gentile city, gave its name to the lake; it occurs only here and in John 21. 1. The town is mentioned in verse 23; it was named from the then ruling emperor, Tiberius.

2. Followed—Some in boats, but mostly on foot round the north end of the lake. Signs—The Evangelist's interpretative word; he could never think of them apart from what they "signified."

3. The mountain—The high ground southeast of Bethsaida Julias, toward which town (in the northeast corner of the lake) the disciples started their return journey, keeping near in shore, as we gather from Mark 6. 45, as most probably explained. The crowd had not much further to go by land from Capernaum to Bethsaida than the boat by water. Apparently Jesus landed in a quiet place and went up to rest on the hill; Mark tells us that the people had to some extent got to the eastern side first.

4. This is not a mere note of time; the Evangelist is thinking of a feast that is to supersede what the national apostasy made only a feast of the Jews, eternally connected with Passover by the event of a year later.

5. Philip—Of the neighboring town of Bethsaida (John 1. 44). (There is no real evidence for another Bethsaida on the western shore.) He might be supposed to know where a large supply of bread could be bought. But as one who had so quickly realized the greatness of his Master (John 1. 45), he might also have been expected to feel sure that Jesus could deal with the emergency. Here he failed, as he did in John 14. 8. In John 12. 22, as here, Andrew comes to his help.

7. Shillings'—Philip makes a businesslike estimate of the amount, which would give them, say, half a loaf each; if that was the allowance he had in mind—for the loaves were only the size of buns—one denarius would purchase about a dozen. A denarius was an ordinary day's wage (Matt. 20 2).

8. Andrew—A quiet inconspicuous to his forceful brother. But it was he who brought Peter to Jesus, and he was clearly, for all his quietness, a man, only named as an appendage man to be depended on.

9. Barley—Compare Rev. 6. 6, showing that barley was only one-third the price of wheat. Note how full of new details is John's story.

10. Much grass—Passover time was the one period when this was the case; it was soon burnt up by the dry weather, as we see well in India. The men—This does not mean that the women and children (Matt. 14. 21) stood. But there would only be a few of them, and the rough estimate of numbers—made, perhaps, by Philip—was made from the men only.

11. He distributed—Through the comes the keynote (verse 23). "Thanksgiving" (Eucharist) became the special name of the spiritual feast on which this story is a commentary.

11. He distributed—Through the twelve, as Mark makes clear. We picture each disciple filling from the Lord's hands the baskets he carried, and then going down between the files giving them out the loaves broken into halves. They went round again, till all had enough.

12. Broken pieces—Not fragments, but half loaves which the men had not touched.

13. Baskets—Small ones, such as Jews were accustomed to carry about, according to a Roman writer. In the other story (Mark 8. 8) seven fishermen's baskets were filled; the word is that found in Acts 9. 25, and denotes a bigger kind.

14. The Prophet—"Like unto" Moses. See Lesson Text Studies for Febuary 11, verse 25.

WOMAN GETS MILITARY MEDAL.

Army Nurse is First Woman to Receive Medal for Bravery in Field.

For the first time in history a woman has won the Military Medal, and it has been awarded to her "for bravery in the field."

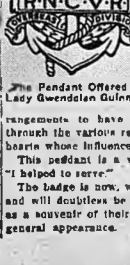
She is Staff Nurse Catherine Margaret Carruthers, of the Territorial Force Nursing Service, and the honor now awarded to her is announced officially in the London Gazette.

Sir Douglas Haig mentioned her in his despatch of November 26 last. Nurse Carruthers was bravely carrying on her work of mercy, calmly caring for the wounded in very dangerous circumstances in a "hot" region in France. She was "twentually slightly wounded by a shell which burst near the spot where she was on duty. The courageous nurse has now recovered, and has resumed her work among the wounded fighters.

Miss Carruthers, whose home is in Ireland, was trained at the Royal Infirmary, Glasgow.

She afterwards joined the Territorial Force and was posted for duty at the 4th Territorial Hospital, Glasgow, a few days after the war began. Some months later she went to France, where she has been doing valuable work in the face of danger.

Gallant Little Battle.



South Africa is ringing with the stirring glory of now 25 of General Northey's Rhodesian column in German East Africa kept at bay and dispersed 250 German and native troops. The Springboks fought from 10 in the morning until 6 o'clock at night with a loss of only five killed. A volley checked a rush by the askaris who, in a state of panic, retired with 85 casualties. The defenders had only two cartridges left, says the Exchange Telegraph Company.

Paper From Grass.

The Government of the South African Union is investigating the resources of the country in regard to papermaking material, of which large quantities are known to exist. Vast areas of native grasses are to be found in different parts of the country, and it is to these that special investigation is now being directed.

RECRUITS FOR NAVAL SERVICE

The Women of Canada Are Asked to Support Campaign for Royal Navy Volunteers.

The Pendant Offered by Lady Gwendolen Guinness

Captain the Hon. Rupert Guinness, A.D.C., C.B., C.M.G., R.N.V.R., Senior Officer of the Royal Naval Volunteer Reserve, and his wife, Lady Gwendolen Guinness, sailed a few weeks ago for England after having spoken in almost every town of any size in Canada from Sydney and Halifax on the Atlantic to Vancouver and Victoria on the Pacific.

Their aim was to organize Committees to secure recruits for the Overseas Division of the Royal Naval Canadian Volunteer Reserve, and the work which they launched and which was unreservedly helped along by the Hon. Mr. Hazen for the Canadian Government, has already had splendid results, and hundreds of good recruits have joined the Navy under the auspices of the R. N. C. V. R.

Before leaving, The Lady Gwendolen made arrangements to have a specially designed souvenir pendant distributed through the various recruiting centres to the Mothers, or Wives or Sweethearts whose influence had helped to secure recruits.

This pendant is a very pretty one of silver—gilt—and bears the motto "I helped to serve."

The badge is now, we are informed, being distributed by the Committees and will doubtless be worn by many women as a badge of honor, as well as a souvenir of their loved ones. The illustration gives some idea of its general appearance.

Your Problems

Conducted by Mrs. Helen Law.

Mothers and daughters of all ages are cordially invited to write to this department. Initials only will be published with each question and its answer as a means of identification but full name and address must be given in each letter. Write on one side of paper only. Answers will be mailed direct if stamped and addressed envelope is enclosed.

Address all correspondence for this department to Mrs. Helen Law, 75 Castle Frank Road, Toronto.

S. W.:—1. Efficiency is indeed a word to conjure with, and nowhere is it more needed than in the Canadian household at the present time. A food expert gives the following five ways in which he estimates twenty per cent. of the money expended for food is wasted. 1. Needlessly expensive material. 2. A great deal thrown away. 3. Bad preparation. 4. Failure to select rightly according to season. 5. Badly constructed ovens. Protein foods are eggs, meats, fish, beans, peas, cheese. Starchy foods are the grains—wheat, rice, rye, oats, corn, etc., and potatoes. Fats are nuts, cream, butter, lard, fat meats. Minerals are contained in carrots, lettuce, spinach, beets, parsnips. A well balanced meal consists of one protein, two starch, two mineral and one sweet. You will see therefore that beans and peas should not be served with meat. 2. The proper height of working surface for a woman of five feet three inches is 29½ inches. For every inch in a woman's height there should be a variation of half an inch in the height of table, ironing board, sink, etc. 3. Time savers are: Food choppers, bread mixers, cake mixers, washing machines, dish dryers, silver clean pans. There is also a long list of electric devices: irons, washing machines, vacuum cleaners, toasters, grills, percolators, fans, ventilators.

C. H. D.:—1. A cleaning liquid for the nails can be made as follows: One dram tartaric acid, one dram tincture of myrrh, two drams cologne water, three ounces water. Dissolve the acid in the water, mix the tincture of myrrh and cologne and add these to the acid solution. Dip an orange-wood stick in this, apply to the nails, and polish with a chamois skin. 2. When eating soup the spoon should be dipped away from oneself and the soup be taken from the side of the bowl, not the tip.

H. B.:—1. To disguise castor oil pour a small quantity of lemon juice in a tumbler, then add the castor oil, and on top of this more lemon juice. The acid taste completely disguises the oil. 2. If tapes of about 4 inches in length are sewed to the tops of stockings and each child is taught to tie his or her stockings together before putting them in the wash basket, the time and trouble taken in mating the stockings when they come from the wash may be avoided. This is done at many boarding schools and is found to be satisfactory.

A. F.—1. To set the color in gingham put the garment before washing into strong salt water. Let it stand for ten or fifteen minutes and then dry thoroughly and as quickly as possible before washing. Adding one teaspoonful Epsom salts to each gallon of water in the washing is another good way to set color. Of course, under present dye condition, some dyes will run in spite of all you can do. 2. Rice should be stirred very slowly into rapidly boiling water and the water kept at a brisk boil if the rice is to be flaky and not mushy. It should be stirred lightly with a fork, as a spoon will crush the grains. 3. A cloth should be wrapped tightly around a frozen water pipe before pouring hot water over it to thaw it out. 4. One pair of stockings will make a capital iron-holder if split and folded neatly into a square, quilted and bound round the edges. Slip a piece of asbestos cloth between the folds to keep the heat from the hand.

A NEW BRITAIN.

Lloyd George Spirit of Grim Determination Seizes Nation.

Herbert H. White, business manager of the Harvard Unit in France and England, has just returned home, after two busy months, and, in an interview in the Boston Globe, he says that the war in Europe was never more serious for all concerned in it than at the present moment. A great change has come over Great Britain the past few months, and especially since Lloyd George and the Committee of Five took charge of the war.

Mr. White says that since Lloyd George took office the people of Great Britain have been made to feel and realize the full—the terrible seriousness of the war.

Lloyd George seeks neither to hide its seriousness nor his own determination to go at it in a serious and relentless manner, and to pay the full price in blood and treasure and in such sacrifices as that relentlessness will entail.

And apparently that is what the British people want—and that is why they are submitting without a murmur to such conditions and sacrifices as were never known in the country before.

The day of "laissez faire" has passed in England—the day of grim determination and work at "full speed ahead" has come.

Fools rush in where angels fear to tread. What a lot the angels on earth owe to the fools!

"Nobody c'n say our town ain't literary," said the old cowman. "No?" asked the new arrival.

"No, 'cause we killed a poet here once, just so we could build a monument to him."

MORE DIVIDENDS FROM GARDEN CROPS

This Year, If Ever, the Opportune Time for Making Money From Vegetables.

Five acres of Ontario soil near a good market can be made to easily support a family in comfort. In potatoes alone the returns would run, under ordinary prices, at from $100 to $200 per acre. From $400 to $500 per acre can be made from cauliflower. Many people will be inclined to regard these figures as exaggerated, but they are facts, and many cases can be pointed out to substantiate our statements.

With proper soil treatment, the average garden will produce at least a half more than it now does. Several things must be borne in mind, however, to make a success with garden crops, such as onions, potatoes, cabbage, etc. The soil must be suitable, cultivation must be thorough, varieties the best for the district and the market, and good salesmanship.

The plot selected for the garden should be well drained, and must not be shaded to any extent. Drainage takes away surface water rapidly, and keeps the soil water away from the surface, thereby allowing the roots to grow deep and the air to enter the soil and aid in decomposing it. Fertility is another most important feature. The need for fertilizer is shown by low growth and pale color in the plants. Stable manure, bone meal, or good commercial fertilizer should be used to renew the elements required by the soil.

Germination.

Crops are often lost through the failure of the seeds to germinate. Don't blame your seedsman for this. It is usually because in planting the soil is left loose about the tiny seeds, and the dry atmosphere penetrates to them, shrivelling them up until all vitality is destroyed. Vegetable crops as a rule are sown in rows, and in every case, as soon as the seed is sown, it should be pressed down in the drill with the foot, then covered up level by the back of [illegible] lengthwise of the drills, and again firmed by the roller or back of a spade. For want of this simple precaution, perhaps one-quarter of all seeds sown fail to germinate. Again, for the same reason, when setting out plants of any kind, be certain that the soil is pressed close to the root. We have seen whole acres of cauliflower, cabbage and strawberry plants lost solely through neglect of this precaution.

Value of Rotation.

In order to secure maximum yields, and to keep down weeds, the systematic rotation of farm crops is an acknowledged necessity. Why not, therefore, plan the varieties of vegetables and their planting time so as to secure a continuous and abundant supply of good, fresh green things? It is just as easy as any other method of garden management, and it is much more satisfactory.

For example a crop of radishes, turnips, spinach or lettuce sown in April, will have ripened so that the ground can be cleared, dug up, and manured, and again used by the first of June, when such crops as cucumbers, peas, tomatoes, or sweet corn can be planted, and so on all through the list.

The crops should be moved around from year to year, so as to give the soil a chance to recuperate. Where a number of successive plantings are desirable, as with peas, it is an excellent plan to plant a third or fourth crop between the rows of the first crop, removing the vines of the first crop as soon as the peas have been picked.

The observance of the foregoing suggestions, along with instructions for planting, which most reliable seedsmen supply with purchases of seeds and plants, should enable any thoughtful and ambitious person to make a success of growing the common and most popular summer vege-

UNDERWOOD

The blacksmith shop has changed hands, Mr Wesley Summers having sold out to Mr Storozyste.

Following is the 1917 financial report of the Underwood Red Cross workers:

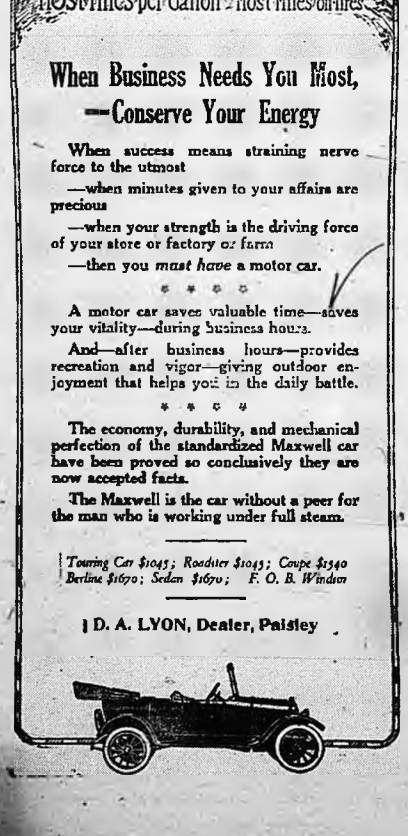
The announcement of Rev. A. MacNab, M.A., that it was his intention to resign the pastorate of Underwood and Centre Bruce is regretfully received by pratically the entire congregation. Both Mr. and Mrs MacNab have endeared themselves to the people by their loyal untiring and unselfish efforts to promote the welfare of the community. Mr MacNab was always ready to lend assistance in any work, that was for the good of the community, while Mrs MacNab, as Sabbath school teacher, choir leader, President of the W.F.M.S., and President of the Red Cross Workers, was more than busy doing good. The reason given for the resignation is that it is desired to move to some place where the family can have the privilege of obtaining higher education without leaving home.

PINKERTON

Mr and Mrs Angus Reid and children returned to Saskatoon on Friday.

Mr Jas Gale returned to Toronto University last week.

Mr Cecil Garland attended the funeral of the late Mr Simpson at Harriston on Saturday.



Mrs Adam Reid received word on Thursday that her mother Mrs McMillan of Paisley was dead and left for Paisley Thursday night.

Miss Alma Reid spent a few days in Toronto last week.

Unfair Features of the M. S. Act

Port Elgin Times: In looking over the list of exemptions made by the last appeal court in Port Elgin, one cannot help but note the injustice which is being meted out to some of our young men. Several of these young men, when they appeared before the tribunal in December, were told by the board that they could appeal from the decision, frankly stated that, according to the Military Service Act, they had no real grounds for appeal But new excuses have been taken recently as reasons for not going to war, and it seems to us that a most unfair deal has been given to these young men, who, because of their honesty to the Military Service Act have been summoned to the colors, while others engaged in no more important occupations than they, are allowed the protection of the court.

Toronto Saturday Night: A striking result of the recent sittings of the Military Service Tribunal was the discovery of the very large number of men of military age who, owing to their calling, are not subject to military service, and who at the same time are holding down jobs that could be filled by women. Many of these men are cooks, more of them are waiters, and more still are clacking boots and doing other odd jobs that should either be cut out entirely or placed in the hands of women. If these men will not go to the front, and will not of their own free will take up work which would be of real benefit to the community, such as farming or other productive occupations, they should be organized under the Military Department and assigned to proper occupations, else they should be required to leave the country. A few thousand of these civilized foreigners placed on the land and obliged under military law to do their share of cultivation under a fair but not a high rate of wage, would do much toward relieving the present serious situation as it pertains to production. These men are now consumers, but not producers in any sense of the word, and it would be far better to be relieved of them entirely than to have them in their present occupations. This is a case where the proper authorities should say, "Either get out of the country or go to war."

BRITAIN HOLDS ORKNEY ISLANDS IN PAWN

British Empire Holds Kingdom, the Property of Norway in Return for Cash Payment

It is not generally known that the Orkney Islands, though supposed to be part and parcel of the British Empire, are only held by Britain in pawn, and Norway, as it were, holds the ticket. Long ago Orkney, together with the Hebrides on the west coast of Scotland, belonged to Norway. After the battle of Large, Norway ceded the latter to Scotland for a cash payment of 4,000 marks and an annual tribute of 100 marks. This tribute, known in history as the Annual of Norway, had to be paid regularly under a penalty. In 1397, Norway, Sweden, and Denmark were united under one crown, and when Christian became king of the united realms, Scotland had neglected the annual payment for forty years, incurring a penalty of over 40,000 marks. King Christian promptly sent in his account for the whole sum, with a request for immediate payment.

Scotland Refused to Meet Debt

Scotland declined to pay, and a rupture seemed inevitable. The King of France, however, who happened to have alliances with both countries, used his influence and suggested a marriage between Prince James of Scotland, afterwards King James the Third, and Margaret, King Christian's daughter, trusting that such a union would lead to a friendly settlement. After much haggling, the marriage treaty was arranged and the princess' dowry fixed at 60,000 florins; 10,000 to be paid within the year and the Islands of Orkney to be pledged for the other 50,000.

Islands Still in Pledge

Only 2,000 florins was paid, the Shetland Islands being pledged for the remaining 8,000—and there the payments stopped. Though unable to pay, King Christian would on no account accede to the permanent cession of the Islands, and it is quite certain that he intended to redeem them as he was quite entitled to do, for so late as 1648 the plenipotentiaries of Europe declared that the islands were still redeemable. However, neither he nor any of his successors have been able to do so, and that is how Orkney and Shetland belong to Britain.

ROMANCE OF THE POTATO

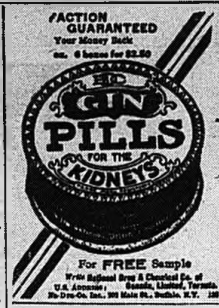
"King Spud" has had Hard Struggle for Life

The potato was first introduced into this country in the seventeenth century. The prejudice against the potato, which lingered longer among the English poor than anywhere else, seems to have originated from the fact that it was the chief food of the despised Irish peasantry. Evidence laid before a Government Committee in 1820 by an agricultural expert tend to prove that the cultivation of this crop was injurious to the country. In Scotland, about the middle of the eighteenth century, when potatoes began to be adopted as a field crop—before this they had been sold as delicacies in ounces and pounds—they aroused much indignation. It was said on all hands that the farmers were scheming to deprive the people of their proper nutriment, which could only be found in oatmeal. Thus a dead set was made against the potato. There is a touch of humour in the method employed by the famous French chemist Parmentier to overcome the prejudices of the peasantry on the Continent. He cultivated potatoes in the open fields, in places very much frequented. He guarded them carefully during the day only, and was happy when he had excited so much curiosity as to induce people to steal some of them during the night. Then he persuaded Louis XV. to wear a bunch of potato flowers at his buttonhole in the midst of the Court on a festal day. Nothing more was wanting to induce great lords to plant them.

SOME STRANGE FLOODS

100,000 Gallons of Whisky Flowing Through Streets

A few years ago, in New Orleans, many huge tanks of treacle burst, and the sticky flood swept all over the lowlying portions of the city. Hundreds of people narrowly escaped drowning, and others had to be fished out of basements, where they were half buried in the treacle. In London once a flood of beer broke loose from a brewery, and 9,000 gallons rushed headlong down the streets, drowning many people. In Glasgow, in 1906, over 100,000 gallons of whisky flowed through the streets, wrecking buildings and engulfing men and horses. The year 1863 was famous in Pennsylvania, U.S.A., for the terrible scenes caused by an oil flood. So much of this liquid burst bounds that great damage was done to the city, and between three and four hundred people were drowned in the oil.



ARE YOU ECONOMIZING?

Apply this Test and You Will Learn Something

Do you save all your string? Do you ever throw away rubber rings? Do you ask shopmen not to waste unnecessary paper on your purchases? Do you use your pencils down to the unusable stumps? Have you cut down your smoking? Have you ever made a journey on foot to save the fare? Have you ever told a shopman that he was overcharging you? Have you ever sat upon an impulse to visit the movies. Are you taking greater care of your clothes? Are you reducing your lighting bill to a minimum? Are you shaving and shampooing yourself at home?

Did you ever stop to think what it means to be a Canadian? Turn it over in your mind a few times and then never forget that you are a Canadian.

Politicians are still more plentiful than statesmen.

BOX SOCIAL

In spite of the very bad roads, the box social held on Thursday evening, Jan 10th, in the Elora road north schoolhouse under the auspices of the Elora road north Patriotic League proved to be a pleasing event. The schoolhouse was comfortably filled and the proceeds amounted to about $45.

Auctioneer R. G. Pearce very efficiently acted as chairman for an interesting programme, and also auctioned off the boxes.

The programme consisted of choruses, drills and club swinging by the school children, under the direction of Miss Jean McKerracher, teacher, and Miss Alicia Winch; selections by a male quartette composed of Messrs. H. Barltrop, J. K. Laidlaw, Neil McArthur and Wm. A. Miller; duetts by Wm. A. and Andrew Miller; solos by Mr. Neil McArthur, Misses Florence Beech and Alma M. Fraser; recitations by Mr. H. Barltrop and Master Walter McGill.

The net proceeds are to be used for sending comforts to soldiers overseas.

200 Year Old Prophecy

A reader sends to us the following translation of an article in a Danish newspaper which, at any rate shows what exceedingly able seers lived at Visnar, 200 years ago:

At the breaking down of a wall in the Monastery of the Holy Ghost at Visnar (a city on the island of Gothland in the Baltic sea) a 200 year-old prophecy of the war has been found. The prophecy, which was written in parchment by a monk in the year of 1701, is now kept in the town hall of Visnar. The manuscript reads: "Europe will some day, when the People is vexed, meet with a fearful punishment. Seven nations will turn themselves against a bird with two heads. The bird will defend itself with wings and talons. A monarch who always mounts his horse from the wrong side shall be surrounded by a wall of foes. It will be a tough struggle against east and west, and the lives of many shall be lost.

"War chariots shall roll forward without horses and fire dragons shall fly through the air and spew fire and sulphur and destroy towns. Mankind will not listen to the forboding of God, and He shall turn away from them. The war shall last three years and five months. Starvation and disease will follow.

"Bread will be controlled and distributed among the people. Men will be looking at the bottom of the sea for prey. The war will start when the corn is ripening in the fields and reach its maximum pitch when the cherry trees are blooming for the third time. Peace will be obtained about Christmas."

Children Cry
FOR FLETCHER'S
CASTORIA

—The Dundalk Herald states that in the spring of 1917 Miss Irene Medaugh, schoolgirl in J. H. Richard's store, Dundalk, while watching the crating of eggs for shipment, jokingly wrote her name and address on an egg. She was surprised the other day to receive a letter, referring to the egg, from Scotland, dated at Kellarbrae, Alloa, Nov. 13th, 1917. The circumstance leads one to wonder how that egg dodged the submarine torpedo, and also where it rested in cold storage for all those months of the summer. It is clear that Dundalk hen fruit travels some.

THE STORE OF QUALITY

BUSINESS CHANGE

THE world is changing. The map of Europe has changed. It has taken a lot of change to manipulate this change. The banks give you change, sometimes charge you exchange. And we find we are in need of some loose change to give the other fellow some change. Therefore, after Jan 15th all accounts not then paid will be charged and collected with interest. We have decided to cut down our credit limits, and will after this date render our accounts every three months. If not then paid interest will be added.

The Canadian Farmer's Real Friend

YOUR letters will be answered, you will get the exact information you need, you will get the advice and assistance you desire free, provided by experts to whom we pay real money for the answer we send you, if you become a subscriber to FARMER'S MAGAZINE. This magazine is for—

The Men on the Farm

Helps them plan, and tells them how to construct barns, stables, sheep barns, hen houses, silos and dwellings.

Tells all about septic tanks, hydraulic rams, water-supply and lighting systems, power-farming.

Gives advice and information about feeding and breeding and the health of animals; about the best new ideas of farming, co-operative methods, investments and insurance.

The Women on the Farm

Helps them in their home planning and making.

In their kitchen problems.

In matters pertaining to children—their health, rearing and school.

Deals with styles, dress patterns and other feminine interests.

Gives help in gardening and flower culture.

Gives news of women's work.

For all it provides, stories, special articles on timely subjects by experts—not amateurs or experimenters; and the latest and most accurate information on every matter of concern to farmers.

FARMER'S MAGAZINE

has three times as many regular departments as are ordinarily found in farm papers, and is about the most satisfying paper you can get at any price. Subscription $1.25 per year.

EVERY issue of FARMER'S MAGAZINE is worth a dollar bill, because it is downright helpful in practical ways. The free advice and information it supplies on request—by letter—may be worth many dollars. Have the FARMER'S MAGAZINE in your home as you would a basement or a saw—an ever ready and indispensable help. Have it for its friendship.

The price is One Dollar per year. Bid us send it to you, and remit for it when we send you the bill. Address the publishers:—

The People's Popular Store

Our Price-Cutting Sale Still Continues

PREPARING for stock-taking brings forward all winter goods, remnants, odds and ends, and although they have been marked below their maket value they are further reduced to clear.

The scarcity of labor will make it still more difficult to get goods when needed. You take no chances to lay in a stock now for next winter, and if you should be needing any of the goods required for the present cold spell, you will find that our prices in many lines have been cut in two. Look over our Furs, Ladies' Mantles, Sweater Coats, Men's and Boys' Heavy Rubbers, Overshoes and Overcoats, and you will find that prices on these lines are slaughtered. We want the room and money to take in spring and summer goods. All cut-price goods will be sold for cash or produce at time of sale. We must also have our old books out of safe before the end of January, so please settle your old accounts by cash or note before the 31st of January.

THE PAISLEY MERCANTILE CO.

THE CITY BAKERY

Always has something special. We have a

Maple Flavored Syrup

in wine quart bottles. This is an A1 syrup, and the price is right. Also

Our Bulk Teas

In Black and Green. Special lines at a special price. Try them.

Elora Road South Red Cross

The annual meeting of the Red Cross of the Elora Road South was held on Jan 2nd Reports were as follows:—Money $476.80. Shipments consisted of:—16 feather pillows, 3 quilts, 20 sheets, 22 pair pillow cases, 10 towels, 14 hospital shirts, 66 pairs pyjamas, 220 handkerchiefs, 62 flannel shirts, 93 pair socks. The following officers were elected for the ensuing year: Mrs D Hopper, President; Mrs McCurdy, Vice-President; Mrs H Cormack, Secretary; Mary Kerr, Treasurer.

An Old Resident Passed Away

By the death of Mrs Julia Mills-Allen, who passed away at her home on Sunday last at the age of 82 years, Paisley loses on of the early residents. The deceased came to Paisley with her first husband, the late Benjamin Mills, over fifty-two years ago, from Oxford Mills, Ont., and since had lived here continuously, with the exception of a short time. She was one of the most active working members of the Methodist church for many years She had no family. The funeral takes place this (Wednesday) afternoon to the Paisley cemetery.

Thresher in Trouble

Stafford Paisley, a Colrose thresher, was landed in the county goal here this week to serve a ten days' sentence for larceny. Paisley tried a stunt which he said to be among threshers, of helping himself to rails off the fences as he passed along the road, to keep steam up in the boiler. This scheme of working one's way did not appeal to some of the farmers along the road, and as a result Paisley was assessed about $30, fine and costs, by the Magistrate. Sooner than have his own wood these cold days, he decided to let the Government keep him warm and will sojourn at Castle McKechnie until after the storm.—Tabescope.

—Chesley has a Fuel Committee composed of members of the Council and Public League. They relieved the fuel situation by bringing in a shipment of good wood from Shallow Lake.

Not Cold, to Complain of!

Mr J Ross Houston, of Plenty, Sask., pens the following as an accompaniment to his remittance for THE ADVOCATE: "I note some of your correspondents complaining about the cold. I'm sorry for you people having such a cold country to live in. We are having nice clear weather here. Of course, it is frosty at night, but almost every day the thermometer gets up to 25 below zero by noon. From the middle of July to the present time there has only been 154 degrees variation in temperature, so that is nothing to complain of."

Most Distressing Death

The village of Port Elgin experienced a shock that was felt also in Paisley and other neighboring communities, when it was learned that Gordon Hepner, one of the best known young men of the lake-side town, had taken his own life, in a moment of mental aberration. The deceased had been drafted in Class A, and after spending a couple of weeks training at London Camp came home on leave last Saturday. He seemed to be quite cheerfully taking up the work. On Monday night, however, he apparently became depressed as after the other members of the household had retired he went into the basement of his home and hung himself. Although a doctor was summoned when he was discovered a very few minutes after, life was extinct. The deceased was known to many in Paisley, having been a frequent visitor here at social functions. He was a member of the I O O F order.

CARD OF THANKS

Mr M McMillan and Miss Jennie McMillan desire to thank neighbors and friends for the kindness and sympathy extended to them in their recent bereavement.

WARNING NOTE

The Family Herald and Weekly Star of Montreal are this week publishing a warning notice that their offer of a great war map is shortly to be withdrawn, and also advising subscribers to renew promptly, otherwise they may miss a copy or two, as the enormous increase in expense of publishing compels them to cancel promptly all expiring subscriptions. The Family Herald and Weekly Star at $1.25 a year, including their great war map, is wonderful value, and those who fail to take advantage of this offer now are sure to be sorry. There has been an enormous demand for that paper and map this season.

—No class of public servants are more seriously underpaid than the municipal clerks. And since the war their duties have been made more than ever exacting on account of the reports that they must make from time to time to the government. The most flagrant case of underpaying we know of is that of our County Clerk, who has been receiving the same salary as he did thirty years ago when he took the office. This, in spite of the fact that his services have given the highest satisfaction. And other capital clerks that we could mention who are expected to work at the same old figure. Municipal Councils will be doing their Clerk's salaries this month and should see to it that the Clerk gets a square deal this time.—Walkerton Telescope.

—Mrs R M Hay is visiting her daughter in Toronto.

—Miss Minnie McAllister, of Gillies Hill, is visiting friends in Walkerton.

—Mrs Kathleen Farrow, of Park Head spent a few days with her cousin Miss Katherine McNeill.

—Knox church annual meeting was held on Tuesday evening. A report will appear in next issue.

—Mr Dan Sinclair, of 10th Bruce, who has been in Minnesota for some months, arrived home a few days ago.

—Mr and Mrs W. H Moffatt announce the engagement of their daughter, Agnes A., to David P. Mooney, all of Greenock.

—Mr Geo. Reed, of Arcola, Sask., is down on a trip to Bruce County and was here last week visiting his brother, Mr H. Reed.

—A J Lowes, of Port Elgin, has sold his business and duly business to Mr Jos Cassidy Mr Lowes is returning to the home farm in Elderslie.

—Rev Mr Soules, of Southampton, will preach at preparatory communion services in Knox church on Friday afternoon and evening.

—Mrs John Campbell (nee Miss Ida Swart), of Big Valley, Sask., is visiting at the home of her mother-in-law, Mrs Campbell, Saugeen.

—Mr. Archie Cameron of Saugeen township was operated on by Dr. Houston of Paisley in the hospital at Walkerton a few days ago, for the removal of a loose cartilage in the knee joint. The operation was a success and the patient is well on the road to recovery.

Methodist Church

Subject for next Sunday morning:

"Is the suffering of the nations a judgment of God?"

—An examination for discovery was held in the Court House at Walkerton in a breach of promise action brought by Miss Lizzie Kohn of Brantford against Mr Charles Calhoun, a farmer of Elderslie, Mr W. M. Charlton, barrister of Brantford, was here Monday looking after the interests of the lady in the case, while Lawyer C. E. Stuart of Tara was present on behalf of the defense. The case is scheduled to come before a jury at the next Spring Assizes at Walkerton. —Herald and Times.

School Board

The School Board held the first meeting of the year on Wednesday evening last. Mr F. C. Ryan was elected chairman for 1918. The visiting committees are as follows: First term of four months—Messrs Ryan and Josh Relf; second term—Dr. Gage and Rev. M. Neilson; third term—Rev. L. W. Diehl and H. McKenzie.

Patriotic Carnival

The juvenile lady patrons of the north end of the village held a gala night on the Willow Creek outdoor rink on Friday evening, when they put on one great and grand patriotic skating Carnival, all on their own plans and specifications. The ice was illuminated by lanterns suspended and fastened to the bridge and other points of vantage, so that the costumes of masqueraders showed up in all their attractiveness. Prizes were offered, which although not expensive, represented something real valuable. Some articles were: A tiny sack of flour, a wee bag of coal, a coal of wood (a little stick with a card on it), a side of pork (rind), distinctive pins, a piece of Chinese money, etc. There was quite a gathering of adult spectators, who were taxed 10c each for the spectacle. The proceeds, $1.01, were handed over to the Women's Patriotic League for Red Cross purposes.

Death of Llewellyn Simons

Paisley people learn with deep regret of the death of this former boy citizen, who was the youngest son of Mr and Mrs S A St George Simons. "Sweets," the fond home name by which he was also called by his school day companions here, was one of the most popular lads of his time in Paisley, a manly, bright and companionable little fellow. After the family went to Toronto about twelve years ago Llewllyn entered the employ of the well-known wholesale house of Gordon Mc-Kay and Co., and had advanced himself to the position of head city travelling salesman, becoming one of their most valued employees. He was in his 26th year. The cause of death was an attack of pleuro-pneumonia. Mr and Mrs Simons and family will have the most sincere sympathy of their large circle of old friends in Paisley in this the second sore bereavement they have suffered. The eldest son and brother, Reggie, died about two years ago.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

The Silver Thimble and Trinket Campaign

The Ontario W.C.T.U. is endeavoring to raise a fund of $25,000 for free Tea, Cocoa, Coffee and Lemonade.

The National Y.M.C.A., whom the Ontario W.C.T.U. is aiding, will need $50,000 to cover their free drinkables.

The W.C.T.U. has already sent to France, mainly for this purpose, about $11,000—but the need grows more insistent

In addition to the free drinkables, the Ontario W.C.T.U. has become responsible for the cost of printing a weekly leaflet of cheer and spiritual help, which is being sent through the mails to all the soldiers in the forward trenches who express a desire to receive it. The appreciation of the men for this bit of comfort can be judged by the fact that in one division alone, and within one month after the issue began, 15,000 soldiers asked that their names be entered on the "Pay Book Leaflet" list—the leaflets being so named from the fact that they are designed to fit into the soldier's pay book.

To aid in raising the necessary funds the W.C.T.U. of this town will hold a

Silver Thimble and Trinket Day

— ON —

Friday & Saturday, Feb. 1st & 2nd

When they will ask every citizen to look through their possessions for broken, useless, unwanted bits of gold and silver trinkets; discarded jewelry or table silver, solid or triple-plated.

Any of the following articles will be thankfully received at Mr Putnam's office on above dates, and the proceeds of their sale used for the above purpose.

Old gold or silver thimbles
Bracelets, Brooches, Scarf Pins
Rings, Chains or links of chains
Silver Match Boxes, Watch Charms
Old Gold or Silver Watches
Gold Cuff Links, Studs
Gold or Silver Tops of Canes or Umbrellas
Broken Spoons, Forks or Toilet Articles in sterling silver or triple plate
Coins in gold or silver, which have been monogrammed or punched

All these articles will be melted down and the proceeds used to flood the forward trenches with the harmless drinks our boys so need.

Articles that would bring more money if sold, than as "scrap" will be sold.

All parcels to be closed and name of donor outside.

The Late Mrs McMillan

An old resident of Elderslie Tp passed away on Jan 10th, in the person of Mrs McMillan, relict of the late Angus McMillan, Elora road north. The deceased came to the township in the early fifties of last century, when the settlement was quite new. They lived on the 4th con. near Chesley, for a long period, but about 26 years ago moved to the west side. The deceased was a native of the Island of Colonsay, Argyleshire, Scotland, a daughter of the late Dan McMillan. The family came to this country and settled first in Mariposa Tp. Mrs McMillan was much respected by all who knew her. She was a Presbyterian in religion, and a member of the Auld Kirk. Her husband died a few years ago. She had been a helpless invalid since taking a stroke of paralysis nearly two years ago. She is survived by six daughters and three sons —Mrs Adam Reid, of Pinkerton; Mrs E J D Pitcher, of Toronto; Mrs John E Wright, of Great Deer, Sask; Mrs Dan McDougall and Mrs A J Johnston, of Sault Ste Marie, Mich; Jessie, at home; Hector, of Redmunds, S C; Daniel, of the Soo; and Malcolm, Elora road north. The funeral took place on Thursday to Stark Vale cemetery, the services being conducted by Rev M McLuss.

Hall's, Lucas at McPherson's bridge, and 8 M at Isaac Hall's, Lucas at Mudge's bridge. Not necessarily accepted. H C PEARCE, Clerk Elderslie, R R No 3, Paisley.

Lockerby Red Cross

The Lockerby Red Cross Society which was organized on June 26th have made the following soldiers comforts up to Dec. 31st: 24 flannel shirts, 40 pair socks, 10 pair of these being sent overseas privately, 20 Turkish towels, 22 stretcher cops, 11 suits pyjamas, 4 wash cloths.

Belle Mitchell, Sec'y

The Flapper Intervenes

Joyce Reynolds ran lightly up the steps leading to her married sister's trim little house and rang the bell. In answer to the shrill whir her big brother-in-law appeared, shuffling along in a pair of disreputable carpet slippers.

"Hello, Jerry!" was his greeting. 'Come along in."

"Where's Sis?" she inquired, entering and wiping her muddy shoes on the mat.

"Oh, gone gadding off somewhere," he evaded.

Joyce looked severe.

"Have you two been quarrelling again?" she demanded.

He shrugged his shoulders comically in reply, and led her into the front room, where, he announced, he was making himself comfortable.

"So it appears," Joyce remarked, as he reseated himself in a deep armchair before the fire, and stretched out two stockinged feet to the blaze. "But where is Sis really, Jim? I wanted to see her," she continued, settling herself among the blue cushions of the Chesterfield with the ease of a frequent visitor.

"Well, to tell you the truth, Jerry, I don't know where she is. But I expect she's out somewhere or other with that little sneak of a Harry, pouring all her troubles into his sympathetic ears."

"Harry Coles, you mean?"

"Yes. He nearly lives round here. Comes for Eileen to play his accompaniments while he murders all the latest songs, and all that sort of thing."

"Oh, I didn't know all this!"

"No, p'raps not; and, to tell you the truth, Jerry, I'm getting absolutely fed up with it. Why the devil can't he get a wife of his own, and not come poaching on my preserves. I hate this old sweetheart business, and would boil every one of them if I had my way; they're for ever dangling round a fellow's wife, just because the pair of them happened to make baby-love together, before reaching the years of discretion."

"It certainly is a bit thick."

"Well, something'll have to be done. I'm not going to stand round all the time watching that little scallywag monopolising my wife; while I can always stop at home by myself, eat my own meals, and all that sort of thing. I don't suppose Eileen means anything. But still——"

He jabbed at the fire viciously, and Joyce watched him with sympathetic eyes.

Now Joyce was a flapper; a very deadly young flapper, too, with a long

"We've had another frightful row," she confided. "I wish I'd never married him."

plait of satin-brown hair and a pair of dangerously blue eyes, of whose heart-disturbing powers no one was more fully aware than herself. And—not blind to the fact of her own comeliness—a scheme for bringing the two belligerents together suddenly flashed across her mind.

"I've got it, Jim," she announced suddenly. "Let's try and make her jealous."

"Make who jealous?"

"Why, Sis, of course, idiot!" was the gentle retort. "We'll start flirting, and see how she likes it. 'Twill be diamond cut diamond, see? And we'll beat her with her own weapons."

He shook his head sorrowfully.

"Utopian idea, my dear Jerry."

"Utopian fiddlesticks!" she cried scornfully.

"I do it, mark my words. Why, she used to be jealous when you were courting if I entertained you before she came down! Besides, I'm seventeen, and could reasonably be reckoned a source of danger. Hark!"—she broke off as a key was heard in the door and the rustle of a wet macintosh in the hall—"here she is. Now let's buck up, Jim, and for goodness sake take that beastly old pipe out of your mouth and look a bit attentive."

He obeyed, and, crossing over, she seated herself on the arm of his chair, and laid a decidedly too sisterly arm about his neck, for the sole benefit of Eileen Marshall, who shortly afterwards entered the room.

As the door closed behind her, Joyce sprang up with a clever simulation of dismay.

"Hello, Sis!" she exclaimed in some confusion. "I've—er—just dropped in to ask a favor."

"As usual," was the smiling rejoinder. "What is it this time?"

"Well, I'm going to Claude Edwardes' birthday party on Wednesday. She's twenty-one, and it'll be rather a swell affair, so I wondered if you'd lend me your lemon crepe-de-Chine blouse."

"Yes, if you'll promise to take great care of it and not christen it with claret, as you did the last one. Come upstairs, and I'll get it for you."

Joyce obeyed, favoring Jim with a knowing wink as they left the room, and in the privacy of the bed-room Eileen unfolded her tale of woe.

"We've had another frightful row," she confided, sitting back on her heels before the wardrobe drawer, with just a suspicion of tears in her voice. "My dear, he's a beast, and I wish I'd never married him."

"I always get on all right with him," Joyce put in unfeelingly.

"But you haven't lived with him," flashed Eileen. "Wait till you're married, and see if you'll like a man who's always sticking at home when he comes in, and never thinks of taking his wife out. That's what he does; and just because Harry comes round to relieve the monotony and takes me out occasionally, he begins to raise the roof directly."

Joyce, with the coveted blouse now safely consigned to her muff, could afford to be unsympathetic.

"It's six of one and half a dozen of the other," she pronounced sagely. "In married life there should be give and take on both sides. If you humored that big husband of yours a little more, Sis, I think you'd find him harmless enough."

"It's very easy to talk, especially when you know nothing about it," Eileen retorted acidly, annoyed to find Joyce's sympathies so plainly enlisted in the enemy's camp. "Doubtless you could manage him all right."

"Perhaps he's out of sorts," Joyce suggested, anxious to prevent the little difference developing into a quarrel. "Tell you what, old dear, I'll run him round to the pictures occasionally, just to take him away from himself. Shall I?"

"Run him where you like, so long as he's out of my way, and leaves off interfering with my few pleasures! Oh, here he comes!" she broke off, as footsteps were heard coming up the stairs.

The object of the discussion put his head in at the door.

"Where the devil's my umbrella?" he growled. "I brought it home with me."

"Oh, Harry borrowed it to-night. There's another one in the stand."

"Thank you! My old one, I suppose. I wonder if there is anything in this house that dear Harry hasn't borrowed or gone off with at some time or another?"

With this parting shot he withdrew, and Eileen turned to her sister.

"There you are!" she exclaimed tragically. "That's just what I have to put up with. Now, I'd like to know where he reckons he's going to at this time of night?"

"Lots see," suggested Joyce, and they went downstairs to discover him, with his hat and macintosh on, waiting in the hall with his own and the latter's umbrella. Joyce flashed him a smile of approval, but Eileen frowned.

"Where on earth are you going?" she demanded.

"To see Jerry home," he answered shortly. "It's pouring cats and dogs."

"But Joyce has an umbrella; and I thought you hated the rain," she added maliciously.

"Well, it's late for her to be out. Besides it's getting foggy," he returned.

"Come on, Jerry."

Joyce kissed her sister good-bye, and descending the dripping steps, went off arm-in-arm with her brother-in-law, both chuckling merrily as they went down the street at the success of their ruse.

"She looked at me as black as thunder!" laughed Joyce. "We'll do it yet, you'll see."

"I hope so," he declared. "Here we've only been married two years, and are always at loggerheads. Can't make it out."

"Well, the fact of the matter is," Joyce explained, "you're very fond of your own comfort, and have selfish ways—manlike," she observed philosophically. "On the other hand, Eileen is lively, and longs for a little amusement. Now, if you were to mend the said ways a little by taking her out now and again, and Sis wasn't to be quite so hard on you, you'd both get on famously."

"Think we should?"—dubiously.

"Yes, I do. You try it."

"I will. Meanwhile——"

"Meanwhile," she completed, "you must dance attendance upon me until Sis finds out that, after all, two can play at the same game. See?"

"That's it. Why, what a brainy little individual you are, to be sure, Jerry! But here we are, though. So long!"

According to promise, Jerry presented herself the following Thursday, and found Jim lolling disconsolately before the kitchen fire, modishly watching Eileen as she tried on a distracting little motor-bonnet, preparatory to going for a ride in Harry's side-car.

"Like to take me to the pictures, Jim?" the flapper invited.

"Don't mind if I do," he assented, and stopped short as he caught sight of Joyce frowning blackly upon him for his lack-lustre tone.

He started up with sudden eagerness, and going out into the hall, took down his coat and threw it over his arm.

"Come on, then. I don't suppose Eileen will mind."

"Not in the least," his wife superbly asserted him; but when the door had closed upon them, Eileen immediately flew into the sitting-room, and from behind the curtains watched them go off down the road, suddenly and totally new suspicion taking complete possession of her.

Then, as the "picture nights" became astonishingly frequent, Eileen found it hard to keep up her air of supreme indifference to the alarming intimacy daily ripening between her husband and the attractive little flapper. Harry began to be sadly neglected, and finally in fears she went round to her mother (who had received her instructions from Joyce beforehand), only to be met there by unsympathetic indifference.

"My dear girl," exclaimed her mother, "whatever's the use of coming to me? Sauce for the goose is sauce for the gander, you know; and you've certainly been making too much of Harry lately."

"But Jim is never once at home now, and it's all Joyce's fault. I hate her!"

"Sh, Eileen!" Her mother lifted a warning finger. "Go home and make it up with Jim, and don't be silly now. Perhaps you'll find that Joyce isn't so black as she's painted."

Her little house was dark and deserted as usual upon her return, and, lighting the gas in the kitchen, she suddenly sank down in Jim's empty wicker chair and burst into tears.

She didn't hear her husband and Joyce return from the pictures; but as they came in to supper, the flapper, with a glance through the open door at the crumpled figure in the chair, motioned Jim with a softly triumphant "Now, then!" and stole quietly from the hall homewards.

Her ruse had succeeded. Eileen had at last broken down, and it only remained now for Jim to console her, a task at which he proved himself remarkably efficient.

About the House

VALUE IN STATIONARY DEVICES

There is a great difference between a modern home kitchen and a modern hotel or institution kitchen. This difference is not so much one of size as of principle. For instance, in the home kitchen we have separate detached tables, stoves, etc., and portable smaller equipment. Very little is built in or permanent. In the institution kitchen, on the other hand, tables are more likely to be connected with the stove surface, all equipment is at the same height, connected by various means, so that work may be "routed" or done one step after the other.

Many more pieces of equipment, too, are permanently installed. The advantage here is that everything is ready when it is needed, and need not be adjusted, moved around or possibly lost. In the home kitchen of the future this ideal will have to be met—stationary, permanent installation, similiar in type, similar in finish, height of surface, etc. It is this ideal which is now so well worked out in shops and factories, in hotel kitchens, in cafeterias, etc.

Stop a moment and think what any one does in making a cake in the usual manner. How much of the work is spent in actual beating and how much in holding a wobbly bowl in place? Every act of beating, mixing, grating, molding bread, etc., which is done in a wobbly way, is increase in difficulty, and miracle strain 25 per cent. Now, why does not the housewife see the advantage of the clamped, permanently fastened fixture? Recall again, the mixer for mixing eggs or syrups used at the modern soda fountain. Is it not clamped or screwed to the shelf surface and self-operating? If a woman did it, would she not still cling to the traditional way of holding a wobbly bowl and operating a jerky beater?

Every device can now be bought in a clamped form. There is the bread mixer, which can be fastened equally well to shelf, stool or table. There is the cake mixer, which screws to the table top. There is the meat chopper—just consider how much more efficient this tool is than the bowl and hand-chopper which it supplants, merely because it is fastened instead of loose and wobbly! There are also excellent devices for beating eggs and mayonnaise also clamped. Coffee grinders may be fastened to wall or table; contrast such types with the old-time square coffee mill, which the worker held in her lap and which required a vast deal of turning on the lap until the coffee was ground.

In the kitchen there should be some sort of shelf so firm that even heavy devices may be kept permanently clamped on it. The utility motor, for instance, which takes the place of any servant in the home, should be stationary. There is need of more screws and less drawers in the average kitchen! If a device is really worth while and is used frequently enough to justify its purchase, it should be permanently installed instead of being set away on a shelf or in a drawer, where it must be hauled out every time it is needed.

The reason the portable device is inefficient is because it takes so much energy to hold it in place, aside from the actual energy needed for the task itself. Therefore, it really doubles the work instead of making it easier. With the clamped device, however, all the energy of the worker can go into the actual task of beating, grinding, or whatever it may be.

"Clamp, clamp, clamp," should be one of the housewives' slogans. It will mean more efficient kitchens and less wasted energy.

HOW TO ECONOMIZE ON FLOUR IN BREAD.

The familiar "war bread" means bread prepared by combining a minimum amount of wheat flour with other materials for bread making. Since, in the process of manufacturing patent flour, about three-fourths of the mineral salt is lost, it is evident that by milling a larger percentage of the wheat, the food value as well as the positive amount of bread-making material would be greatly increased. This added mineral matter may become a vital factor in making up the diet of children.

The manufacture of old-time graham flour, or wheat meal, which is simply the entire grain cleaned and ground, has been almost entirely abandoned, no doubt because of its perishability. Due to its bran and mineral salt content, flour of this type possesses laxative properties, which are often desirable, although the protein of the coarser flours may not be so completely absorbed. Much of the graham flour on the market at present is merely white flour to which bran has been added.

Some of the materials which may be substituted for wheat flour are: cornmeal, buckwheat flour, soy bean meal and potato flour. Cornmeal may be used in the proportion of one part cornmeal to two parts wheat flour. Buckwheat flour combines well with wheat flour in any proportion. Soy bean meal and cotton-seed meal are both useful in small amounts.

Potato flour, such as has been used abroad, is not generally available in our markets, but boiled mashed potatoes may be substituted for slightly less than half the flour. Boiled rice may also be used with flour in about the same proportion.

Equal measures of cooked bean pulp and flour are satisfactory in muffins.

Denmark on Rations.

Denmark is now looking forward to a reduction of wheat rations. Final figures for the cereal harvest show a total of about 62,000,000 bushels, which is 20,000,000 bushels less than in 1916 and about 10,000,000 less than was estimated in the summer, when the populace was put on bread rations. The authorities are already considering a further reduction in the allowed consumption.

A range will keep black longer if you wash it with soap and water before applying the blacking.

Food Shortage in France.

Shortage of wheat in France is becoming more and more alarming each week. M. Maurice Long, Minister for General Revictualling of France, indicated recently that a further reduction of 20 per cent. in the bread ration would soon become imperative. The manufacture and consumption of pastry regarded as a luxury was entirely suppressed on January 1st, except on Sunday and holidays.

Switzerland on Rations.

The food situation in Switzerland is rapidly falling to the danger line. A ration that is far below the consumption in many of the countries at war has already been ordered. Under the new regulations, the Swiss may have only a pound and a half of sugar per person per month. The bread ration has been fixed at about half a pound a day, and the butter ration at one-fifth of a pound a month.

Next time you are in town, drop in at the hardware store and get a small coal-scuttle. Take it down to the granary and keep it there for putting grain into sacks. Beats anything you ever tried.

Hotel Del Coronado

Coronado Beach, California
Near San Diego

MOTORING, TENNIS,
BAY AND SURF BATHING,
FISHING AND BOATING.

Hotel is equipped throughout with Automatic Sprinkler System.

AMERICAN PLAN

JOHN J. HERNAN, Manager

Fertilizers Pay Better Than Ever

TODAY a bushel of corn or wheat buys more fertilizer (potash excepted, of course) than at any time during the past three years. Note how much cheaper you can buy a 2-10 fertilizer now than before the war.

In terms of farm products, fertilizers cost less today than in 1914.
Fertilizers paid you *then*—they will pay you better *now*.
Fertilizers are today more profitable and more necessary to efficient production than before the war. Boost crop production, grow more per acre and increase your profits by using fertilizer.
Help both the railroads and yourself by ordering Spring Fertilizers NOW.

"Hundreds of Dollars In Actual Profit"

More than one farmer has told us—since he has got a copy of "What the Farmer Can Do With Concrete," that the advice it gave him netted him hundreds of dollars in actual profit.

Get the book—it's free—and by reading it you will see the profit there is in building improvements of CONCRETE according to its plain, simple directions. For instance, there's a page devoted to Watering Troughs—showing how to build the sanitary kind that will not rot, rust or leak. Several pages devoted to Concrete Silos. Others telling how to build concrete foundations for barns. All these are improvements a farm needs—its value will go up considerably if you use concrete in the building of them. And you'll be able to "work" your farm with less effort and on a more profitable basis if your buildings and utilities are of the modern Concrete type. This book gives all the directions you'll need.

Remember—Concrete Improvements are fire-proof, rot-proof, vermin-proof and indestructible

The book also contains interesting photographs showing what other Canadian farmers have accomplished; with working plans revealing how they did it. Perhaps you are specially interested in some of the features listed in our coupon. Put a cross opposite the ones about which you want particular information.

"What the farmer can do with concrete"

Canada Cement Company Limited 303 Herald Bldg., Montreal

Figure the Time Waste involved in avoiding the bad road. Whether driving or motoring, you can travel over a two-mile stretch of concrete quicker than over a one-mile section of old-style road.

Permanent Highways of Concrete will enable us to greatly reduce the cost of hauling farm products, all our country's business, with its constant up and accompanied by replacing the old-style, rot-filled roads with roads of concrete. You use Concrete on your farm, to reduce the cost of farm upkeep—because Concrete eliminates repairs. For the same reason, boost for concrete as a road material—it is just as effective in good road up-keep—and as far reaching economy on the Farm.

Soils and Crops

By Agronomist

This department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Preparing Garden Soil.

When we come to consider the preparation of garden soil we must take into account a number of factors of importance. The first of these is the character of the soil itself. Is it loose and easily worked? Is it a stiff limestone clay? Is it a sandy loam? Is it stony, gravelly, shaley or slaty?

Another factor is the location of the lot to be worked. If it lies low and is damp and cold it must not be worked with until it has been properly drained, although if only a portion of it is soggy that portion can stand until later on, to be then drained, as will be told later, and the warm, dryer portion worked as soon as the season admits.

All fertile soils contain soil bacteria, which are minute plants of a low order which attack the vegetable matter in the soil and decompose it by fermentation, releasing the plant food, especially nitrogen, for the use of the plants. This is known as organic release. There is also a chemical release of plant food in the soil, such as we get when we put on lime, which unlocks the plant food and makes it available for the use of the roots of the plants.

In preparing a garden soil for planting it is necessary to turn it by the spade or shovel, as this aerates it and brings the more or less sour portion of the soil to the top, where it gets light and sunshine; and the top portion which has been sweetened more or less by these factors, is turned under with a dressing of manure or other vegetable matter on which the bacteria can feed to release more plant food.

There are several ways of digging to get good results. One is to take a "width" of the shovel, as deep as it will go, across the bed and then go back and scoop out two or four inches of the subsoil and scatter it over the top of the unraked earth. Another is to trench the bed by the following process:

Beginning at the left-hand end of a bed, throw out a width of two shovels, back to the end of the bed, deep enough to catch an inch or two of the subsoil. Going to the front again, dig up the width of two shovels and throw it to the left into the trench from which the first two shovel widths came.

This should be repeated until the whole bed is dug, when you will have reversed the position of the entire soil-mass and at the same time, well aerated the soil and broken it apart as fully as it can be done with an implement used for digging. This is neither as complicated nor as laborious as it would seem, and is considered by English gardeners the perfect method.

How To Test The Soil

As the intention is to make the soil as fine as possible, not only throughout the entire mass, but on top for seedbed, it should not be dug until it is in the proper condition. This can be tested in this manner:

Take up as much of the soil as can be held in one hand. Close the hand, squeezing the soil into a ball, firmly. Release the grip, and if the soil falls apart or crumbles, it is fit to dig. If it remains in a compact ball it is too moist for good work. If dug in the latter condition, it will be in hard lumps throughout the bed, and it will be difficult to get a fine seedbed on the top. By seedbed in this connection is meant a top portion of two to three inches as fine as coarse sand, into which the seeds are planted.

If the soil be sandy, pebbly, gravelly or shaley, and is in good physical condition it will crumble off the shovel and can be thrown off with a sidewise scattering motion. However, with the limestone loams it is best to chop it as fine with the edge of the shovel as is feasible as each shovelful is dug. An old Swedish gardener claimed that the best method of digging a garden soil was to shovel one trench across the front of a bed and dig the rest toward you with a garden mattock which, in effect, was merely trenching.

If the soil is in the best of physical condition, crumbling freely from the shovel, it may be raked as fast as six feet is dug. But be sure of this. If not, better wait until there has been a rain and then do it after it gets dry enough.

Success with a garden depends very largely upon the manner in which the soil has been put into condition with the rake. Too many persons merely use the rake to chop the top fine, leaving large clods in the interior of the mass, which have been missed with the shovel. This is not good practice.

To get good results with the rake use it as though it were a mattock, chopping along the edge of the dug soil, pulling it toward you enough to get the teeth of the rake down behind that portion, and pull another lot forward after being made fine.

This involves walking on the dug soil, but if it is in proper condition this will not matter, as, after it is all chopped up, you must go over it again anyhow, to smooth and level it, and work it into beds of the required size and shape.

Large Beds are Best

The practice of working the garden with the rake into many small beds is a wasteful one. Many gardens lose one-fourth of their growing space by this practice, and it is unnecessary. It does not hurt the soil to tread upon it to plant and work it, and you will gain by working it into one large bed and laying out the plantings with the garden line. The effect is much better when the crops come up and there is no loss of space.

In the working of the soil there will be considerable thrown into the walks. This should be worked back with the rake and the edges made straight and even. It is best to raise the beds six to eight inches above the walks to insure better drainage.

As stated, a dry soil is a warm one, and for this reason we raise certain crops on rows or hills, as this insures quick drainage and rewarming by the sun. Such plants grow more quickly than if planted on the level, and we use this method for early ones, where quickest growth is necessary.

In view of this, it is well, when preparing the soil, to make the rows or hills while raking the soil. For this purpose go over the properly fined soil with the hoe, scraping the earth into a ridge six to eight inches high. To get it straight run the garden line along the top edge on each side and hoe to it.

As it is a fact that a plant set on the south side of a ridge will mature sooner than one set on top, when feasible, run the rows in a general east-and-west direction. When the ridge is finished, go over the top with the hoe and cut a slice of soil with one motion (to keep it smooth) out of the edge of the south side. On this slanting space the plant will be placed. This is done only for early vegetables grown from transplanted plants.

If potatoes are to be planted in the space to be dug, it will be as well not to go over it with the rake as closely as for the smaller garden crops. Work it into furrows with the rake, using the garden line to get them straight. For potatoes the soil should be loose—a sandy or gravelly one is best. After several workings with the hoe the potatoes will be on ridges, as the soil is worked around them, giving them good drainage and a warm soil—two things they need.

Poultry

Every progressive poultryman keeps an account with his hens. It is the only way to tell whether his plant is profitably, says a successful farmer. He knows the individual worth of each hen on the place.

I keep a cash-book, and in it I record the receipts daily, whether for poultry, eggs or manure; the expenses, whether for feed, labor, new stock, etc. Each month I sum up to find whether I have made a profit or operated the plant at a loss. When I use any poultry or eggs on my own table I credit it just the same as if I sold to some one else.

I also keep a ledger, and send out my bills regularly each month, since a part of my trade is with private families who pay monthly. In this same ledger I keep an account of goods received that were not paid for on delivery. My ledger tells me what I owe and what others owe me. Each year I not only know what my plant is worth, but the amount of business I did and the profit I derived from it.

I keep a diary of the daily happenings on the place—the weather, the visitors, the loss in stock, experiments—in fact, everything that is worth noting. This makes a valuable reference book that is worth all the trouble it takes to make it.

Trapnests are used. Every hen on the farm is known by a number stamped on a leg-band that is fastened about her leg. When the hen is caught in the trap after laying, her number is marked on the egg. At night she is credited on a record sheet which tells the breed of hens in the pen, when they were hatched, the number of the pen, the number of hens in the pen, the number laying that month, the number not laying, and the average number of eggs per hen for the month. It also gives the market price of eggs per dozen, and the total value of eggs for the month. This sheet records the individual hen, the color of her eggs, the dates on which she laid and the total for the month, besides the total to date. I can also tell the day a hen went broody, the day she was set, and the time she was engaged in brooding her chicks. The sheet shows what hens have been sold, what hens have been sick, or died, or were removed from the pen, and the cause.

This system of bookkeeping plainly tells the number of days in the year each hen has been at work, the value of her product, and what it cost to feed and take care of her. I can readily tell which hens are money-makers, and which are drones. In this way it is possible to pick out the non-productive, thus giving more room to the workers and saving feed.

Produce infertile eggs for food. These will not hatch and keep longer than fertile eggs.

WHEN MOTHER THREATENED TO WALK

By Catherine Dodge

"John, how far is it to Toronto?" Mrs. Simmons asked as she dropped an armful of wood into the box.

"About 143 miles—why do you want to know?"

"Well, I've always wanted to go there, and I've about decided to do it," John glared.... It was not customary in the Simmons family for his wife to decide things.

Her next question was quite as astonishing. "Do you know how far it is to that wood-pile and back?" This time her husband waited for her to give the answer.

"If you don't know, I'll tell you. It's a little over seventy-five feet, and from the box to the stove and back is twenty feet. If I've made three trips a day to the wood-pile, and ten trips a day to feed the stove, I've walked about 600 miles in the last twenty years for just that one thing. It won't take me so long to go to Toronto, for I have done a lot of side-stepping all along."

John Simmons considered himself quite a hand at figures, so before attacking the main issue he pulled out a pencil and did a little multiplying.

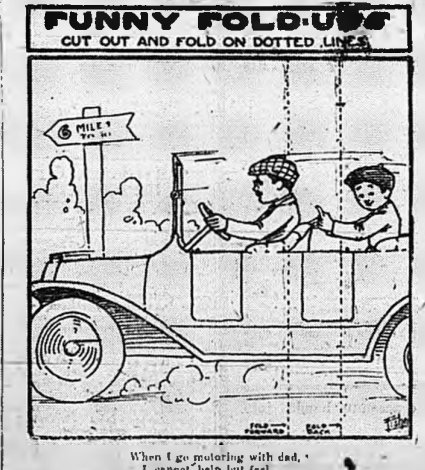
"You're right, by gum, but I don't see what Toronto's got to do with it."

"It's not so hard to see. Between you and me and the wood box I've done some right smart travelling, but the scenery wasn't so much, and there was a good deal of sameness about the places I arrived at. That's why I've decided to try a new route."

John was puzzled. "I don't know yet just what you're driving at, but if it's the wood box what do you want me to do about it?"

"Well, Jess told me how Bert had fixed theirs. He built a good tight box alongside the stove, and cut a hole through the wall so it can be filled from the outside. If we had one right here it would save walking half way around the house in the first place, and I wouldn't have to go clear across the kitchen every time I wanted a stick of wood."

John heard, but he hadn't quite recovered from the astounding discovery of a few moments since. "Six hundred miles! Well, I never thought about that before. But I reckon we can fix up that wood box somehow. Say, Jack," he turned to a sixteen-year-old boy who had been an interested listener, "what's all your carpenter work up at school good for if you can't help me rig up some sort of an inside-outside self-starter over in the corner there for your ma?"



"Sure, pa, one of those Institute ladies from the College came up to school the other day, and she told us about that and a lot of other things she said we boys might do. I wonder how many miles ma has walked for that egg-beater?" She had just gone the length of the long kitchen.

"If she had a shelf over the table, and a strip under it to hang up the things she uses all the time, it would save some of those trips she has been talking about," Jack went on. "She hasn't a place to put things on near the sink and the stove, either. I guess there's a good deal to this having things handy to where you want to use them. I'll tell you, pa, tomorrow's a holiday, and if ma'll sort of plan out the things she needs around the sink, and what she uses at the table, and those she has to have about the store, we'll just see if we can't go Bert Evan's wood box one better—and I don't know any reason why I can't keep it filled. Say, ma, any cookies in that jar?"

John Simmons was proud of his boy. "He's got a pretty good head on him, and he isn't afraid to do more than he's asked. John was thinking, while the more-than-pleased mother was silently making her plans for the little conveniences she should have had twenty years before.

Presently, John picked up his pencil again and did some more figuring. After a few busy moments he looked up at the boy who was mentally measuring off spaces. "Jack, did you know that your mother and I'd been married just twenty years come next month? The only wedding trip we took was across the county, though according to her figures she might have walked around the world several times,—so I guess it's about time she got a little lift on the steam-cars. I've been thinking we might manage to go to Toronto for a sort of celebration next month and take you along,—if your ma'd just as soon ride on the cars; I don't exactly hanker to walk, myself."

Speech was always slow with Mrs. Simmons, but her eyes glistened. They had wasted a lot of precious time and strength, to be sure, but her husband's heart had stayed in the same spot all these years, and her boy would know better how to avoid such mistakes. Oh, how hard she would try to help them to get the best that life might hold!

When I go motoring with dad,
I cannot help but feel
How I would leave the miles behind,
If I were at the wheel.

GOOD HEALTH QUESTION BOX

By John H. Huber, M.A., M.D.

Dr. Huber will answer all signed question in of general interest it will if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John H. Huber, care of Wilson Publishing Co., 73 West Adelaide St., Toronto.

Those who sow courtesy reap friendship.

Baby's Development III.

Seventh month: Astonishment shown by open mouth and eyes. Recognizes nurse after four weeks' absence. Signs. Imitates movements of head and of pursing lips. Averts hands as sign of refusal, as one should say, "Nothing doing." Places himself upright on the lap.

Eighth Month: Is astonished at new sounds and sights; at imitations of cries of animals.

Ninth Month: Stands on feet without support. Shows increasing interest in things in general or (in evolutionist parlance) gets in touch with his environment. Strikes hands with joy. Shuts eyes and turns head away at things disagreeable. Fears a dog. Turns over, like one of those bouncing toys, when held face downward. Turns head to light when asked where the light is. Questions are understood before it can speak. Its voice becomes more modulated, losing however none of its potency.

Tenth Month: Sits up without support in bath and carriage. First attempts at walking in forty-first week. Beckoning imitated. Misses parents in their absence. Will mimic a single ninepin in a set. Cannot yet repeat a syllable. But exhibits considerable talent as a momologist and imitator, as: maa, pappa, tatta, appapa, baba, tatan, pa, rrrrrrr, rrrrrraa.

Eleventh Month: Screaming is quieted by "sh." Sitting becomes its life habit. Stands without support. Stamps. Correctly repeats syllables. Begins to whisper. Enlarges its vocabulary. Can utter b, p, t, d, m, n, f, l, g, k; vowels a most used, u and o rare. i very rare.

Twelfth Month: Pushes chair. Cannot as yet raise itself or walk without help. Obeys the command, "Give the hand."

QUESTIONS AND ANSWERS.

Temper Mark.

My baby girl of 4½ months has a mark between the eyes, shaped somewhat like a V. Sometimes you can see it real plain; and then again it is quite dim. Is this a birth mark or a temper mark? Do you think she will outgrow it? It shows more when she cries or frets. Only for that she is a dandy baby. Can a baby that has had whooping cough for 3 months give it?

Answer—Such marks, if they are birth marks, are very apt to disappear in time. If temper marks and in girl babies, they are not so very sure to outgrow them. Depends on how Mamma brings 'em up. It is possible for such a baby to give whooping cough to others.

Chilblains.

As long as I can remember I have had chilblains. As early as September my feet begin to itch and this continues throughout the winter.

Answer—Mailing you the right information.

Underweight.

Please advise me what to do to make my husband gain in weight.

Answer—Very willingly. But you send me only your initials and without address. Send stamped and self-directed envelope and I will forward information by return mail.

Eczema of Ear.

I am troubled with catarrhal deafness. Also itching of both ears which are very sore from scratching and rubbing. Is there any relief for same?

Answer—Send stamped and self-directed envelope and information will at once be mailed to you.

OPPORTUNITIES

Jessica, pinning on her hat, frowned as she saw in the mirror Peggy picking up things about the room.

"I should think, Peggy, that you would want to be doing something worth while," she said, "instead of spending all your time on odds and ends."

Peggy stopped with a troubled look in her eyes. "I wish I could. I'd love to so. But, somehow, there seem to be so many odds and ends to do."

"Why always will be if you put them first," Jessica said in her clear, "sure" voice. "Don't you see, Peggy, that anybody in the world could let her time get filled up by odds and ends? One simply has to make up her mind to put the big things first, that's all; make up her mind and then stick to it."

"I know," Peggy responded. But her voice sounded as if she did not know at all.

"There's that class of Italian girls. You could do beautifully with them, Peggy, if you just would. Don't you see what a chance it is to do something really patriotic—to teach them to be real citizens? Why don't you just say you will? You'll find other things will fall into place if once you resolve that they shall."

"I'll think about it," said Peggy uncertainly.

With that Jessica had to content herself as best she could. She was very fond of Peggy, and that was why she controlled her tongue by a splendid effort. Down in the hall she hurried by Olga, the new Swedish maid. Olga's eyes were red, but Jessica was too busy to notice.

It was Peggy who, coming downstairs a quarter of an hour later, did notice.

"Why, Olga," she cried, "what's the matter? Didn't you understand that you could go out for the afternoon?"

Olga shook her head. "I tank not go. In stores dey laugh. I don't like laugh."

Peggy stood still, thinking it out. "You mean you want to buy some thing?" she asked. "And you don't like to go to the stores to ask for it?"

"I tank," Olga repeated as her fair face reddened, "I not go."

An hour later, Jessica, trying on gray shoes in Gregory's while at the same time she discussed club finances with her friend, Flo Hastings, looked up at Flo's sudden exclamation.

"Why, Jessica, isn't that your sister helping that Swedish girl buy shoes? You didn't tell me that she was in the work, too. I should think she would be fired! Isn't she making that girl have a good time—just buying shoes!"

She—why, that's our new Swedish maid," Jessica answered hurriedly. "Peggy isn't doing anything at the club. I couldn't get her to. She says she hasn't the time. What do you think of these shoes, Flo?"

"Lovely," Flo replied, but she spoke in a perfunctory manner. She was watching Peggy and Olga, and thinking one or two new thoughts.

A Present From Norley.

As a package, rather dingy and battered at the corners and several times readdressed, was put into her hands, Aunt Clarissa laughed delightedly.

"It's my birthday present from Fidelia Bonney. She always sends one,—she hasn't missed since we were schoolgirls,—and I was just as uneasy as could be when it didn't come. I was afraid that she must be sick, or that Uncle Si had one of his 'dying spells' again."

"Why don't you open it, auntie?" demanded her namesake—who preferred to be called Clarice. "Here are my scissors."

Aunt Clarissa shook her head in good-natured disapproval at her niece.

"You're a hustling daughter of the great metropolis, Clarice," she said good-naturedly, "but I'm Norley born and bred, and I can taste my pleasures without bolting them whole. Just look at that address, please—right in the first place; then crossed out and put wrong, and crossed out twice more, readdressed, and then back to the right one again. Fidelia knew where I'd be,—I'd told her, special,—but Joe Lake at the post office thought 'Boston' was a slip for 'Bolton,' and changed it, to be obliging. I'm generally in Bolton with Cousin Anna at this time, as Joe knows very well."

"But surely a post-office official wouldn't—"

"Joe Lake would! He's Joe Lake first, which means everybody's friend in general and Sister Sally's old beau in particular, and he's an official afterwards. He wouldn't meddle with a stranger's address, but Em 'Clarry' to him still, just as I was when he used to bribe me with peppermints to go and play in the far end of the garden while he called on Sally. That's the Norley way. So the box went to Bolton; and Cousin Anna wasn't sure where I was, so she tried Cousin Ruth; and Cousin Ruth tried Cousin Mary, and Cousin Mary sent to back to Fidelia, and Fidelia sent it on to me. Now, I'll open it—"

"O Aunt Clarissa! Candied mint and rose leaves! Why, that doesn't seem'n bit like s—well, a village offering. I never saw them anywhere except in the Christmas parlor of the Women's Exchange and at the very finest grocers' and confectioners' They couldn't possibly keep company with striped peppermint sticks, and chewing gum, and gluey candy lumps on sticks—the kind of things you find in a country store."

"No," said Aunt Clarissa, delicately nibbling a rose leaf, "they couldn't and they didn't. But they're a 'village offering' all the same. There's been mint along Fidelia's brook since before the Indians deeded over the farm, and cinnamon roses up against the house wall since it was built, and the big pink hundred-leaf growing by the gate. Confectioners and exchanges are well enough, but when I get a present from Norley, child, it's the kind that's never sold and never bought, and never can be. Not at any price."

But that was verging very near sentiment for Miss Clarissa. She changed her tone briskly:

"Try a mint leaf, Clarice. Mint's always such a good, clean taste to finish with."

Parker House rolls can be made with a little cornmeal in them.

When you cut up fresh pork recently slaughtered, the knife soon gets dull and does not take hold. Take a strip of good quality emery-cloth on the board or table and frequently and quickly draw your knife over it.

Family Friction.

A few sarcastic words from the father, a sharp retort from the mother, that was all. But was it all? What about the effect upon Johnnie and Susie, sitting there quietly at their evening lessons? And did neither parent notice that Thomas slipped out of the house at the first intimation that there was to be a quarrel between his father and mother? For quarrel it really was, although brief and clothed in the language of educated, respectable persons; and long after these harsh and unkind words had been spoken the atmosphere of the family living-room remained charged with an emotional disturbance in which no one could concentrate his mind upon his reading or study.

Family friction is always fatal to happiness, and when there are children in the home it is almost sure to work irreparable harm upon their minds and souls.

One of the most powerful causes of the exodus of young people from their homes at an age when they are not fitted to enter upon the work of life is friction in the family. Young people are by nature loyal to their parents, and it is almost never that a young person will give as a reason for his leaving home the fact that his father and mother quarrel or nag at each other or do not agree upon certain points.

Friction in the home creates an intangible, impalpable atmosphere in which the sensitive child chokes and pants for the free air of happiness, or is warped and stunted mentally and morally.

Afraid.

Little noises do not bite!
Darkness will not harm you!
See, my arms will hold you tight
When we fears alarm you.

Wise ones say I do you wrong,
Facing dangers for you;
You will not grow brave and strong
With me bending o'er you.

But the time is all too brief
When some pain or other,
And each baby fear and grief
Drive you to your mother!

—Burges Johnson.

"Ring out old shapes of foul disease;
Ring out the narrowing lust of gold;
Ring out the thousand wars of old,
Ring in the thousand years of peace."

—Tennyson.

Brass polished with oil and rotten stone will have a deep rich yellow tone.

The Paisley Advocate

PAISLEY, JAN. 23rd, 1918

Agricultural Society Meeting

The annual meeting of Paisley Agricultural Society was held in the council chamber on Saturday afternoon, with a good representation of members present. The treasurer's financial statement showed a balance of $425 on hand. The next egg is growing larger, and if favorable with good weather for the fair in the next few years the former good standing of the Society will be restored.

A committee was appointed to build a corral on the grounds for cattle on fair day.

It was decided to continue the school competitions in next year's prize list, and no effort will be made to have such discontinued, other county agricultural societies to the contrary notwithstanding. That the regular school fair will not clash with this.

The officers of 1917 were re-elected, viz President—J T Richardson
1st Vice-Pres—J M Hopper
2nd Vice-Pres—J B McBride
Sec'y-Treas—W R Barnett
Auditors—I Shoemaker and
Delegate to Central Association o Fairs and Exhibitions—J T Richardson

The meeting to revise prize list, etc, will be held on Saturday, June 15th.

The Fair this year will be on Sept 12th and 13th.

—Mr Wm. Valens, who contested South Bruce as candidate of the Patrons of Industry in 1904, died at Saskatoon on Dec. 23rd, in his 68th year. Prior to going west Mr Valens lived in Kinloss. He was a man of more than ordinary intelligence.

How to Obtain County Grant to Red Cross Work

In reply to enquiries from societies as to the grant made by the County Council to Women's societies for Red Cross and similar work the County Clerk has sent out the following letter of instructions:

Kincardine, Dec 26th, 1917.

Dear Madam—I am in receipt of yours enquiring as to grant made to Ladies' Societies by the County Council.

The council has made a grant of one dollar for each dollar expended by any Women's Society for material to be made up by the ladies for the soldiers. In order to get this grant it will be necessary for the Society to make a statement showing the amount of money raised and expended for this purpose since the first of this month. I think the most convenient way would be to make up an account something as follows;

—yds flannel for —— at per yd,
Dec. 1—the wool for socks at—per lbs. and other items in the same way. This should be certified by the President and Secretary of the Society that the above statement is correct and that moneys therein mentioned have been raised and expended by the Ladies of the Society solely for materials to be worked up into articles for the use of our soldiers and expended since the 1st day of December, 1917. Signed by the President and Secretary. This also must be certified to by your Reeve and then sent to Mr Norman Robertson, County Treasurer, Walkerton, who can then issue you a check for the amount.

I trust this will explain the procedure.

Yours truly,
P A MALCOLMSON,
County Clerk.

SAUGEEN COUNCIL

The Saugeen Council met on Jan 16th. Members all present. Rev Mr Rectour-Brough opened the session with devotional exercises and short addresses were made by the Reeve, H R Bayles and Rev Rockborough. The following appointments were made: Auditors—Arch Bell and D R Campbell; Representatives on Board of Agriculture—J R Muir and N E Loeder; 1 member Board of Health, Wm Howe; Sanitary Inspectors—Alex Bell and A J Rowand. Wooster—Atkinson—That the Women's Patriotic Leagues entirely within the township be granted $25 each, and border societies $10 50 each.—Carried. The following accounts were ordered paid: The Times, printing, $30 75; Truss Bridge boundary account, 75c; H Thede, fixing washout, $1; Jas Cassidy, 40 yds gravel, $4; A J Rowand, 6 yds gravel, 60c; J W Elliott, postage and stationery, $1 90; Council meeting No 1, $14 95. Wooster—Atkinson—That the members of Council, assessor and collector receive the same salaries as in 1917.—Carried. Christie—Greathead—That the clerk's salary be increased $15 per year.—Carried. The clerk be instructed to advertise for an assessor for the current year and for 1000 lb of cedar or tamarac fence posts. Council adjourned to meet again on Feb 5th at 10 30 a m. when the statute labor situation will be considered, and tenders were, poundkeepers, etc, will be appointed.

F W ELLIOTT, Clerk.

—Both animals and men exposed to the blizzard of Saturday, Jan 12th, suffered a great deal. The Owen Sound Sun tells of the death of a team of horses hauling logs in that locality. As they were facing the wind they could not get their breath and finally both suffocated, dying on the road within a few minutes of each other.

HOCKEY

The Paisley Continuation School challenged the town to a game of hockey which was staged on Monday, last. During the first period neither side had any advantage, the play being fast and strenuous ending with score tied 3—3. The last period started faster than ever. The school team's back-checking and combination was excellent, while the town made strenuous efforts to score. The combination soon had its effects and the school team scores at will the final tally being 13—4. Line up:

School		Town
Geo Grant	right wing	D McGregor
Fred Shoemaker	left wing	D Howe
Albert Stanley	centre	Reggie Beston
Harold Collins	cover point	L C Spofford
Alan Shoemaker	point	T D Muir
Farewell Fletcher, goal		Douglas Cottrill

Children Cry
FOR FLETCHER'S
CASTORIA

On Friday last the Paisley Hockey team was visited by the Ebenezer team. The game started off at a furious pace, Ebenezer notching the first goal. Paisley evened the score shortly afterwards. The play then became very strenuous and the first period ended 3—3. The second period the Paisleyites came to themselves and with beautiful combination scored 6 while the opponents only notched 1 the final score being 9—4. Ebenezer has certainly become much improved and with a little practise should be able to play a good game. Return match will be played next Thursday evening.

Paisley		Ebenezer
D Cottrill	goal	D Grant
A Shoemaker	point	W Underwood
H Collins	cover point	J Scott
A Stanley	centre	R Grant
D Howe	left wing	R Grant
D McGregor	right wing	
Geo Grant	rover	E Rushton

Games this week. Wednesday—"Has cents" vs Town teams, at rink. Thursday—Ebenezer vs Paisley at Ebenezer. Friday—Paisley vs Chesley at Chesley.

F. CARTER & SON

ALL AT HOME SHOULD PREPARE FOR WAR

The first test a man is put through for either war or life insurance is an examination of his water. This is most essential because the kidneys play a most important part in causing premature old age and death. The more injurious the poisons passing through the kidneys the sooner comes decay—so says Dr. Pierce of Surgical Institute, Buffalo, N. Y., who further advises all people who are past thirty to preserve the vitality of the kidneys and free the blood from poisonous elements, such as uric acid—drink plenty of water—sweat some daily and take Anuric, double strength, before meals.

Anu-ric is a discovery of Dr. Pierce, and can be obtained at drug stores. For that backache, lumbago, rheumatism—"rusty" joints, swollen feet or hands, due to uric acid in the blood, Anuric quickly dissolves the uric acid as hot water does sugar. Send 10 cents to Dr. Pierce for trial pkg.

Thorold, Ont.—"I think Anuric is the best I have ever taken. My kidneys had given me trouble for some time. I would suffer from backache and also dizziness of the limbs. I took Anuric and it relieved me entirely of all my backache and has strengthened my kidneys so I feel safe in recommending it to others who suffer."—Mrs. O. A. Clarke, Box 1178.

Toronto, Ont.—"For the last eight years I have suffered with kidney trouble and rheumatism. It began with pains in my back and would go down into the feet. It developed into a chronic case. I tried every medicine I could hear of and finally concluded that I had still to continue suffering. About a year ago a friend advised me to give Anuric a trial and can happily say I am today a well man—never feel any traces at my ailment no matter what the weather conditions may be. Anuric is a real Kidney medicine in every sense."—E. G. Garriock, 8 Matilda Street.

MUST GO ON OR GO UNDER

Premier Lloyd George gave working men of Great Britain a straight talk the other day at a conference of representatives of the Trades Unions, regarding the man power bill which passed the House of Commons. In the course of his vigorous address Lloyd George pointed out that the only reply that Prussian militarism will give to the demands of civilization for restoration of Belgium, etc. and reparation of wrongs is to answer which will be given from the cannon's mouth.

"You might as well stop fighting unless you are going to do it well. If you are not going to do it with all your might, it is real murder of the gallant fellows who have stood there for three years.

"You either have got to put your whole strength into it, or just do what is done in the Russian army, and tell them brave fellows that they can go home whenever they like, and no one will stop them.

"I believe me, if there are men who say they will not go into the trenches, then the men who are in the trenches have a right to say: 'Neither will we remain here.'

"Suppose our men should leave the trenches, would that end the war? Yes, it would; but what part of an end?

"When the Russian ceased fighting, and simply talked ideals and principles with the German army did the German army retire? No! They took Riga and the Islands. Fraternization did not prevent their marching forward. If Petrograd had been nearer they would have taken it also.

"The Channel ports are not so far from the fighting line, and unless we are prepared to stand up, with the whole might of people who are dominating Germany now, and will dominate the world to-morrow if we allow them, we will find that Great Britain and the British democracy the French democracy and the democracy of Europe will be at the mercy of the most cruel military autocracy the world has ever seen.

"Democracy, put in plain terms, is government by a majority of the people: If one profession, one trade, one section or one class in a community claims to be immune from obligations which are imposed upon the rest, that is a fundamental travesty of the principles of democracy —that is the road to a new autocracy. You and I in the past have been fighting against privilege. I hope we shall be fighting on the same side again.

"We are fighting now against privilege claimed by a military caste. Democracy if it means anything, must mean that the people of all classes, all sections, all trades and all professions, must merge their privileges and their rights in a common stock. My own conviction is this—that the people must either go on or go under."

Prices Soaring

Live stock prices went up again last week. On Friday steers sold at $13.50 per cwt. at Toronto, and hogs at $19.75 fed and watered, and $20 off cars. Figure never hitherto approached for live hogs in Canada. The receipts of all lines of stock at the Toloo Stock Yards, Toronto, show an increase in 1917 over those of 1916 or any previous year, except horses. In 1916 there were 26,132 cars received there, and 27,109 cars in 1917. Of cattle the shipments were 296,608 head in 1916, and 339,074 in 1917; sheep 157,818 head in 1916, and 180,731 in 1917; calves 136,608 in 1916, and 178,085 in 1917; calves, 45,804 in 1916 and 51,85 in 1917. In horses there was a decrease from 83,930 head in 1916 to 77,-176 in 1917. The horse receipts in 1913 were the largest ever, being 125,475 head.

Children Cry
FOR FLETCHER'S
CASTORIA

Mr Thos Symon of Riversdale, who was re-elected for the third term as Councillor of Greenock, had his doubts about the Y M C A and the use this organization was making of the money they got for maintaining the boys at the front. After having heard that the free coffee and free lunch business was a horrible joke, and that the boys paid a fancy price for everything they got from the "Y." Like this man from Missouri, Tom was willing to be shown, so he wrote his cousin, Pte J O'Brien, Scout Section, 54th Battalion, France, and here is the reply contained cost here for about half the price that it is in a letter received by the Greenock statesman last week: Well, Tom, you asked me about the Y M C A. They are all right. We can get stuff from them cost in England. I found that out when I was on leave and they have coffee stalls behind the lines and when we are coming out of the trenches we get coffee and biscuits free and they help like this— when a fellow is nearly all in and half frozen. Well Tom, I wish I had some of that imperial you wrote about now for it is raining and I am about as miserable and cold as any one man could be unless he was a whale of a size, when he might be colder.—Herald and Times.

SERVICE TO THE NATION DEMANDS GOOD HEALTH

War is bringing home to every man, woman and child the fact that service to the nation is not a matter alone for the soldier and sailor and munition worker.

There is work, necessary work, for everyone to do. In the way of thrift and production and to do this work, health is the first essential. Even the most willing will find progress is slow if the health is bad.

Probably the most common complaint among those doing unaccustomed tasks is backache. Work may cause a tired feeling that will easily pass off but this backache that almost doubles one up is an indication of a condition of the system that needs treatment. The Kidneys are giving evidence of their weakness and the sufferer should be thankful for the timely warning given by this pain.

The quickest and surest relief from backache is a treatment with Gin Pills. Gin Pills are the tested specific for the healing of the Kidneys. Anyone who wishes to perform his or her full duty to the Nation in these strenuous times will find relief from backache in Gin Pills.

Sold by all dealers—50c. a box, 6 boxes for $2.50. Money back if you are not satisfied. Free sample on request to National Drug & Chemical Co. of Canada, Limited, Toronto, or to the U.S. Address, Na-Dru-Co Inc., 202 Main St. Buffalo N.Y.

ELDERSLIE COUNCIL

Gillies Hill, Jan 17th, 1918

The council of 1917 met for a short time and the following accounts were passed:

Jas E Cass, attending council meeting, $5; Jas Thomson, do, $5 50; W J Taylor, Elderslie's share of Turn Div Court district, $1 74; Calvin Crawford, salary as collector, $80; Angus Taylor, removing lamb at 9 s bridge, $1; T M McCarty, grant to British Red Cross, $1 00; S J Colborne, ring for soldier, $5 50; J Shoemaker, ring for soldier, $5 50; R Watt, balance work on bridge, lot 20, con 8, $7; J Trader, gravelling McGregor's bridge, $7 65; M A Halliday, bal contract Bruce hill, $260.

Thomson—Allen—That this board do now adjourn.—Carried.

Council for 1918 subscribed to declaration of qualification and of offices namely: Reeve, Jas A Lewis; Councillors—C A Fraser, W J Allen, John Oswald, Arthur Clement.

Fraser—Allen—That the thanks of this board be extended to Messrs Cass and Thomson, the retiring Reeve and councillor, for the kindness and courtesy at all times manifested by them during their municipal career.—Carried. Messrs Cass and Thomson made suitable replies.

Appeals for aid were received from the Saltwater Army and the Hospital for Sick Children, Toronto. On motion of Messrs Fraser and Oswald the sum of $10 was granted the Hospital for Sick Children.

Oswald—Clement—That the clerk advertise for 12 M ft cedar 16 ft long and 4 inches thick.—Carried.

Allen—Fraser—That the Tp printing for the current year be divided between the Paisley Advocate and Chesley Enterprise for 1918.—Carried.

Fraser—Allen—That the clerk procure 7 copies of The Municipal World for use of Council.—Carried.

Oswald—Clement—That David Walks be appointed assessor for current year. —Carried.

The following appointments were made: Auditors, D A McIntyre, W T Thompson; sheep valuators, No 1, Stewart Mair; No 2 J B McBride; No 3, T S McLeer; No 4, Edward Thomson; Weed Inspectors, Jas Vancise, James Robinson; Member of Local Board of Health, Geo McKay. By-laws were passed covering their appointments.

Allen—Thompson—That the following accounts be paid.—Carried.

R C Pearce, services at nomination, $5; D McArthur, postage for clerk's office, $3; D Davidson, Hospital for Sick Children, $10; Municipal World, assessment roll, collector's roll and other supplies, $8 10; R C Pearce, express charges and telephone message, 90c; John Patchell, rag bolts, $1 20; Gray & Bwart, spikes, nails, paint, etc, $11 65.

Clement—Allen—That this Board do now adjourn to meet again in the Town Hall on Monday in Feb. at 2 o'clock p m for general business.—Carried.

R C PEARCE, Clerk

Extraordinary Carriage

Some very extraordinary carriages are to be found at Thornton, on the Irrawaddy, where they are cut out of the face of a high cliff rising directly from the river bank and are of great size. They consist of a succession of widely flaring arches, in appearance something like the entrance to a tunnel, and these are full of large and small images of Buddha, who is represented in several positions. On the summit of the cliff is a pagoda of great sanctity, which is visited every year by large numbers of pilgrims.

Just So.

Crawford—To do a thing well, you know, you must do it yourself. Crabshaw—But you miss the fun of seeing the other fellow work.—Judge.

No Rivals.

Nell—Ila says he has never had a rival in love. Belle—I suppose not. He has always been in love with himself.—Philadelphia Record.

There is no possible success without some opposition as a fulcrum.—Oliver Wendell Holmes.

Ready For Him.

Little Willie—Say, pa, was the earth created before man?

Pa—Yes, my son.

Little Willie—Why was it?

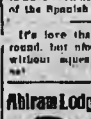
Pa—It was probably known that it would be the first thing he'd want when he arrived.—Chicago News.

India has perhaps a greater variety of plants than any other country in the world, having 15,000 native species while the flora of the entire continent of Europe embraces only about 10,000.

Poverty is the stone on which many wits are whetted.—Chicago News.

A Well Meant Act.

"How did you happen to give the cowpuncher such an unmerciful drubbing?" "I felt sorry for him. You know they are talking of giving footpads public doctrines, and I thought I'd save the poor fellow the open disgrace of having the life cuffed out of him in private."—Cleveland Plain Dealer.



Hearts may be as [illegible] qualities, but the [illegible] can only be fixed and retained [illegible] one that we get.—De Mor

The finest mountain known are said to those belonging to the Spanish crown.

The peculiar gait to which the South American horses are trained, known as the "paseo de trote," is a mincing step, so light and easy that the hoofs scarcely touch the ground. It is said to have been acquired in the early days of the Spanish invasion.

It's love that makes the world go round, but money makes it go round without squeaking.—Somerville Journal

Abiram Lodge, No. 205, I.O.O.F

HOLDER FOR MILK PAIL

Tired of holding the milk pail between his knees while milking, a farmer makes a contrivance of strap iron to overcome this. It is arranged so that the milk pail will just fit inside the curved straps supporting the weight of the pail on the knees. The holder may be made of wood, with the possible exception of the curved arms, which should be made of pieces of iron ¼ in. thick and about 2 ins. wide. The circular frame can be made adjustable to various pails by bolts and in holes in the bands.—Popular Mechanics.

LUMBER KING AT ALMOST A CENTURY

J. R. Booth, Canadian, World's Oldest Active Worker at Head of Timber, Pulp and Paper Trade

The career of John Rudolphus Booth, of Ottawa, lumber king of Canada, stands as a record for length of active service in the forestry world. Imagine a man almost a centenarian and at the same time perhaps the most active working lumberman and pulp and paper manufacturer in the world. In 1857, with nine dollars in his pocket, he landed in the capital city—then little better than a swarded hamlet—and started a small shingle mill on the site at the Chaudiere where afterwards he built the largest lumber mill in the world, which, before its destruction by fire, attracted visitors from all parts of the world. On the same property there rose later his large news-print mill, board mill, sulphite plant and ground wood pulp industry, and the owner is the largest timber limit holder in the Dominion. He also built the Canada Atlantic Railway, now part of the Grand Trunk system, from Ottawa to Parry Harbor, and established immense elevators at the latter point. He possessed a faculty of picking out men to manage his five hundred miles of road who later became national figures in the transportation world. Among these were E. J. Chamberlain, Morley Donaldson, W. P. Hinton, George Mountain and others.

At Atlantic City

Mr. Booth could never take a holiday. Once he was induced to try out Atlantic City, and was up at six o'clock in the morning vainly trying to get into the hotel dining-room for breakfast. He went out for a long stroll on the board-walk and the family wondered what had become of him. Finally he returned, telling them he had been up for hours and had nothing to eat. "I do not think much of this place," he said. "Nothing to do but walk up and down and see no person you know. I'm going home." His greatest interest was in the nine-mile board-walk with its forty and fifty feet of width. Mr. Booth made a mental calculation of how much lumber it would take to build the famous plank promenade, and reckoned that a few day's output of his saw mill would do the trick.

PAPER'S REMARKABLE USE

Made Capable of Competing with Wood and Iron

A Canadian writes: "Both pulp and paper can now be formed into solid substances capable of competing with wood or iron in point of durability and elasticity, and for some years past, treated by special methods, they have been converted into such articles as paper bottles, unbreakable writing tablets, figures, ornaments, furniture, etc. Waterproof coverings for walls and ceilings, parchment slates, flanges, and manhole rings, paper wheels, roofing and boats, paper barrels, gas pipes, boxes and horse-shoes are also no longer novelties. Probably one of the most valuable by-products of the manufacture of sulphite pulp is that of spirit from the waste lyes, and particularly in Sweden the distillation of alcohol from cellulose bids fair to become an industry of considerable importance. Then it is but a few years since the chairman of the tanning section of the Toronto Board of Trade declared that paper inventions had gradually entered into competition with leather, and that hides had advanced in price to such a degree that the output had dropped 50 per cent. in Canada, a condition of affairs which had compelled the use of such substitutes as fabrica and paper.

BUILDING OF COAL

Cost $2,500 and Expected to Last 18 Years

One of the most curious exhibits at an exposition at Knoxville, Tenn., was a building constructed entirely of Tennessee-Kentucky domestic black coal, put together with black cement. The building, which is 25 x 50 feet in size, has two rooms, with an open court or passageway running clear through the centre. The interior, like the exterior, is finished entirely of coal. The building cost $2,500, and was expected to last at least 18 years. At night a large sign, in form like an open grate fire, illuminated this striking exhibit.

$20,000 Paid for Bible

Many books have realized four figures, but the biggest price ever realized was paid by Lawrence Quarrem in 1926 at Ashburnham for the Mainzer Bible, 1462-65, on vellum, $20,000.

THE TONIC THAT BRINGS HEALTH

"Fruit-a-tives" Builds Up The Whole System

Those who take "Fruit-a-tives" for the first time, are often astonished at the way it *builds them up and makes them feel better all over*. They may be taking "Fruit-a-tives" for some specific disease, as Constipation, Indigestion, Chronic Headaches or Neuralgia, Kidney or Bladder Trouble, Rheumatism or Pain in the Back. And they find when "Fruit-a-tives" has cured the disease, that they feel better and stronger in every way. This is due to the *wonderful tonic properties* of these famous tablets, made from fruit juices.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Letters from the Soldiers

Gnr. S. McKenzie in France

Gnr Stewart McKenzie, who had been at Witley Camp since November, went over to France with an artillery draft on Dec 20th. In a letter home he expresses some personal impressions after getting a closer view of the war situation. He says: "In Canada the people hear a lot about the need of men for re-inforcing the units at the front, but they haven't the very remotest idea of HOW BADLY they are needed. Neither do they know in any way what war really means to a country like this (France). Do you know, I haven't seen a solitary perfectly fit man of military age since landing in France who is not a soldier in some branch or other of the service. All kinds of work, both in England and France, is being done by either women or men over age or not physically fit in some way. Everything in the smaller towns and villages and the country behind the lines is practically run by old men and children. Indeed is concerned, while buildings, roads, etc. are going to pieces for lack of care. There are a hundred ways and things to make one realize how great this war is and how few and the nature of the securities, if any, held. . . .

AND FURTHER TAKE NOTICE that after the said 1st day of February, 1918, the said administrator will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have received notice, and that he will not be liable for the said assets or any part thereof to any person or persons of whose claims he will not have received notice.

The AUTOMOBILE

Bearings Should Not be Neglected.

Without ball or roller bearings the automobile would be a sadly crippled vehicle. It is safe to say that you know less about them than any other important mechanical feature of the car, and this perhaps is the best testimonial of their serviceability. You are familiar with the carburetor because it occasionally gives trouble; you can change the tires because you frequently have to, you overlook the importance of the bearings because they are well behaved.

There are two kinds of bearings—plain bearing and anti-friction bearing. The plain bearing has been used for years, you are familiar with it in machines of all kinds, and you have seen it on the wheels of the big locomotive. If it is good enough for the steam locomotive why is it not satisfactory for use in any part of the automobile?

If you have ever noticed how careful the engineer is to oil these bearings at frequent intervals you have partly answered the question, according to Charles Hammond, in Motor Life. Would you like to stop every few hours and lubricate the front and rear wheel axles? That is what you would have to do, because plain bearings demand constant lubrication. This is because the rotating shaft does not bear directly against the soft bearing metal, but is separated from it by a thin film of oil, which must be constantly maintained in order to keep the metal from wearing away rapidly. The crankshaft bearings are of this type, and you know that in spite of the fact that they are constantly automatically lubricated, they wear out rapidly and allow play enough for knocks and thumps to develop in the engine.

The second kind of bearing is the anti-friction type, in which the shaft is in rolling contact with the bearing, and in which friction is greatly reduced. To understand the difference between rolling and sliding friction, place a book flat on the table and push it over the surface. Now place pencils under the books and, of course, you can move it over the top of the table with much less effort. This is the principle of the roller bearing, in which the rollers, corresponding to the pencil, are arranged around the circumference of the shaft.

Care for Two Forces.

There are two forces which the bearings must take care of at certain points in the car. If you push down on the book the rollers or balls can take care of the load, but suppose you push against the edge of the book. The book simply slides off of the rollers, and the only thing to do is to place another set of rollers against the edge of the book at right angles to the table. This is just what is done in many cases, and the force which acts along the axis of the shaft is taken up by an end thrust bearing. The tapered roller bearing is designed to take care of both of these loads. In principle it is much the same as the cork in a bottle. You can rotate the cork, but pressure behind it will not force it inside. In the roller bearing of this type provision has also been made for taking care of a certain amount of end thrust.

In the hubs of the front wheels bearings are subjected to a greater strain than in any other place in the car. Here they carry the weight of the car over bumps and in ruts. In turning a corner the end thrust mentioned above makes a second force which throws you toward the outer edge of the seat when the car rounds a curve, and it adds greatly to the burden which the bearings must carry.

In the rear wheels more than half of the weight of the car is carried by the bearings. If the car strikes a stone or drops into a rut the load is greatly intensified, and although springs and cushions protect the passenger, the full force of the blow is transmitted to the wheel bearings. It is important that these bearings be rugged enough to resist the wear and tear of the hard service which falls to their lot, for as soon as wear becomes noticeable and the wheel begins to wabble you can feel certain that miles are being clipped from the life of the tires.

In the engine, bearings are used in connection with the fan shaft, the clutch and starting motor, the magneto or generator and the steering gear. These bearings are subject to little or no shock, and usually outlive the car, demanding only occasional inspection and lubrication. The crankshaft is in some instances supported by ball bearings, but this practice is by no means common, and since ample lubrication is possible at this point the plain friction bearing continues to be used.

Lubrication Important.

Anti-friction bearings are indispensable in the transmission and the differential. In the transmission they perform the important function of keeping the shafts in use so that the gears slide smoothly in and out of mesh and run without noise. In the differential they have an added duty to perform. Power from the engine is transmitted to the rear axle by means of a driving pinion. The pressure between the teeth of the pinion and the large gear with which it meshes gives the pinion a tendency to climb on the teeth of the gear, and the bearing must take all the strain of keeping it in place.

With the exception of the tapered roller-bearing, anti-friction bearings are not adjustable, and require replacement or regrinding when worn out. Because of the important positions which they occupy in the car it is imperative that replacement be made as soon as wear has become evident, but if the car has been properly equipped the bearings will last several seasons. Occasional inspection is necessary, and, of course, any noise which originates in the bearings demands immediate attention.

There appears to be an erroneous belief that ball or roller bearings require no lubrication, and that they operate just as well when dry. Such a belief is far from the truth. Oil or grease is not only necessary as a lubricant, but also as a protective agent to prevent rust, and by surrounding the bearing to prevent the entrance of dust or grit. Only the best mineral oil or light grease should be used for this purpose. Contrary to the general opinion, graphite in grease, even though finely pulverized, causes the bearing to wear out more rapidly, and does not improve the running qualities of the bearing or reduce the friction.

INVENTIONS FOR WAR.

Many of Them Will be Found Useful in Peace.

War is a dreadful thing and we all hope the time will soon come when there will be no need for nations fighting, even for the sake of justice. Yet the effect of wars is not all bad, not every whit evil, as may be easily proved. For the sake of winning some of the most wonderful inventions ever puzzled out by the brain of man have been made to kill, to maim, to destroy the enemy and to aid, advance, protect those who are in the business of killing. And as some of these inventions, more or less changed to meet peaceful conditions, will be used after the war, some being entirely new, others improvements on methods formerly in use, there is, therefore, a decided gain to be recorded through indulging in war.

The submarine for dredging and the observation of channel bottoms, the perfected torpedo for the destruction of wrecks and derelicts, the caterpillar tread for heavy trucks and loads over any kind of ground, motor lorries for transportation in general, the improvement in excavation as practised in the trenches, the general advance in shipping, the adoption of new and wonderful methods in hospital management and surgery are some of the benefits the war will bring.

Truly in this matter of wars, as well as in most things that are generally unfortunate, there is truth in the old adage:

"It's an ill wind that blows nobody good."

The ill wind of war has blown and will blow to mankind many bigger and better ideas concerning ways of living for ourselves and for each other, besides means and methods in detail.

Queensland is estimated to have 40,000,000 acres of unexplored and unreserved forests.

A RUSSIAN VILLAGE IN ENGLAND.

Modelled After the Plan of a Community of Peasants in Their Home Land.

In England there is a village in which all of the inhabitants are Russians and in which the religion, work, customs and language are all those of Russia. It is Tuckton, which lies in the parish of Christchurch, on the Southbourne side of the river Stour. The community had its beginning several years ago when M. Vladimir Tchertkoff came there to escape from Russian oppression, says an English periodical. He had been a wealthy landowner in Russia and an officer in the Imperial Guards, but he became a convert to the wisdom of Count Tolstoy and afterwards was that noted man's chief friend and helper.

M. Tchertkoff made his home at what was then called Tuckton House, a large residence with eight or ten acres of land about it, and he brought with him friends and dependents who laid the foundation of what is now a fair-sized colony. At Tuckton Tchertkoff welcomed many other Russian exiles and found work for all, either in agriculture, labor, in printing books and pamphlets on liberty and human rights, or in the ordinary trades common to village life. The Russians built new houses and took cottages even in Southbourne itself, and went on printing the literature that was spreading Tolstoy's doctrines in every part of the world. They began bookbinding, too, in some of the houses. So prosperous did the community become that M. Tchertoff finally leased the disused premises of the old Christchurch Waterworks Company for his printing establishment.

The village of Tuckton is one of the most peaceful in England, and all its residents live in almost ideal communistic fashion. They form indeed a large band of exiles, brought together as brothers, laboring for the good of humanity, they include every sort of well-educated men from Russia, as well as many of the lower peasantry. At Tuckton you may meet and talk with clever journalists, physicians, lawyers, university folk, former wealthy people and aristocrats of Russia, who have all either escaped the clutches of the authorities who used to serve the czar or have voluntarily exiled themselves in order to share in carrying out the enlightenment of the masses of their fellows, from this secure haven of freedom by the charming banks of the Stour.

Among the hardest worked and the busiest of all the settlers in this English hamlet is M. Tchertkoff himself, for he oversees everything, and acts as the "little father" of the whole community. He moulds his own life on the simplest plan: he eats frugally, and furnishes his rooms as plainly as if he were the lowest of the peasants. The whole hamlet is guided by him, and modeled as if it were an ordinary Russian village of peasants in the heart of a Russian forest. He and those he appoints for the purpose look after the excellent sanitation, the health, the cleanliness of the settlement. They take note of any domestic arrangements among new workers that are not as satisfactory as they should be, and insist on an immediate alteration; they act as guides and mentors to the newcomers, and gradually teach them what it is necessary for dwellers in England to know and at the same time help to retain their true Russian individualism and nationality.

Faith Cure.

A young doctor recently took a young lady to the opera. The curtain was late in rising, says the Forecast, and the girl complained of feeling faint. The doctor took something from his pocket and said:

"Here, keep this in your mouth; but be sure and don't swallow it."

She placed the tablet upon her tongue and turned it over and over but it would not dissolve. She felt better, however, and after a while she took the tablet from her mouth and slipped it into her glove; she was curious to examine, when she was once street light and, unbuttoning her glove, said:

"That tablet you gave me made me feel ever so much better." She bent more in the light, the tasteless substance that had given her such relief.

After they had left the opera house the girl stopped under an electric lamp over something white and round in her hand, looked up at the doctor and stammered, "D-Dirk! Why, it's only a pearl button!"

CANADA'S CHARGE OF LIGHT BRIGADE

WHEN CAMBRAI WAS WITHIN BRITISH GRASP.

How Canadian Cavalrymen Penetrated Deep Into German Line, But Was Recalled.

Of Canada's Charge of the Light Brigade, of the magnificent dash of Fort Garry Horse and some of the Strathconas against the German lines near Cambrai, a participant told The London Telegram recently. The horseman had been over to receive his decoration from the King, and in the telling of the tale his demeanor was a mixture of pride and triumph for this splendid feat of arms, and of chagrin that this little van of the cavalry charge had not been followed up by the great masses of British riders which were waiting in reserve.

"It was Balaclava all over again—just a handful charging an army, going right through the battery smoke, sabring the gunners, and all the rest of it," exclaimed the narrator.

"It was simply magnificent. And then, when we had got away with it, and rushed the enemy off his feet, and had him in full retreat, utterly surprised and stampeded—then, when the biggest smash through the British army has ever had the chance to make was right in our mitt, the thousands of riders behind us failed to come up, and we were recalled. It was heart-breaking. Our Colonel is a bitterly disappointed man. We had Cambrai apparently in our grasp, and by taking it would have flung the Hun far back. Now we must wait, although we shall get Cambrai sooner or later, don't worry. Doubtless the higher command knew something we didn't know, and held back the cavalry in this anticipation, but at first sight it does seem as though they might have taken a chance. However, who knows?

Won Him the Victoria Cross.

"I suppose you have read how we dashed into Meuniores village right behind the tanks? It was then about 2 o'clock in the afternoon—the main body of the Fort Garrys having received orders from Headquarters to remain in the village—that Major Henry Strachan, whose exploit won him the V.C., rode out on a cavalry raid which will forever be famous in the military annals of Canada. Meuniores was about six miles in advance of the original British line. Strachan and his horsemen advanced at least another six miles into enemy territory.

"Strachan's men rode straight back towards the Boche rear," declared my informant, who was not with this squadron, "and they saw little in the way of the formidable defences we hear so much of. They also encountered very little opposition. They ran up against scattered troops and a few machine gunners, and some field artillery of a fairly heavy type. Strachan's men just rushed at these Huns and killed them. One Fort Garry corporal actually, after killing a machine gunner, turned his gun against some other Germans and wiped them out. One field battery they surprised fired its guns at point-blank from a distance of about one hundred yards. The Huns missed, and the next instant our boys were killing them with their swords in the good old style!"

Almost Reached Cambrai.

By this time Strachan's party had cut three lines of German telephone wires far in the rear, and cleared away what few obstacles had before interposed the advance of the infantry. Dusk was coming on, and yet no reinforcements. The little party of horsemen, now quite close to Cambrai, could see a stream of infantry hurrying out in great confusion—a thousand or so scratch troops, said to have been composed of batmen, clerks, and anyone they could muster at a moment's notice, to try and defend the place. These Huns proceeded to dig themselves in along a road. Strachan, expecting reinforcements any time, selected a neighboring sunken road as a good place to spend the night. Accordingly, into this ready-made trench the Fort Garry's scrambled with their horses. Several captured machine guns were set up and brought into occasional play, just to make the enemy imagine a fair-sized force opposed them.

Dawn came at last, and soon after it a message telling Major Strachan to return at once. So the remnant of the squadron rode back, having several encounters on the way, and forcing a German prisoner to show them the direction to Meuniores, which he did after much protestation, lying down at times and refusing to go on.

Afterglow.

After the clangor of battle
There comes a moment of rest,
And the simple hopes and the simple joys
And the simple thoughts are best.

After the victor's paean,
After the thunder of gun,
There comes a lull that must come to all
Before the set of sun.

Then what is the happiest memory?
Is it the foe's defeat?
Is it the splendid praise of a world
That thunders by at your feet?

Nay, nay, to the life-worn spirit
The happiest thoughts are those
That carry us back to the simple joys
And the sweetness of life's repose.

A simple love and a simple trust,
And a simple day done,
Are truer torches to light to death
Than a whole world's victories won.
—Wilfred Campbell.

"We Who Are Left Behind."

Our boys go off and we see them go,
With heart that breaks and tears that flow.
They're just "our boys," and we love them so
We who are left behind!

But England calls them to join the strife.
And mother, sister, sweetheart, wife;
We're proud to be linked to a soldier's life,
We who are left behind!

Coats of khaki, jackets of blue,
Soldiers and sailors trained and true,
God help us all! We'll be brave, too,
We who are left behind!

Brave in our sorrow for those that fall,
Brave when defeat would our heart appal;
Brave to believe God in over all—
We who are left behind!

We cannot fight—but we'll work instead,
Active with fingers and heart and head,
To help the living and honor the dead,
We who are left behind!

"THIRTEEN!"

All patriotic Americans ought to share President Wilson's belief that thirteen is the lucky number of the United States, says a London weekly. The Union originally consisted of thirteen states, the Declaration of Independence was signed by thirteen men, and there were thirteen stars in the original flag under which the Colonists fought their successful revolt.

There is a Thirteen Club, as everybody knows in this country, which meets in Room 13 at the Holborn Restaurant, sets thirteen tables, and sits thirteen at a table, if possible, and always has its knives set crosswise; but America has a Friday-Thirteenth Club,—which meets whenever Friday falls on the thirteenth of the month.

Its president considers himself the luckiest of men. He was born on Friday, 13th, graduated on Friday, 13th, and got married on the same day and date, a little later on.

The late President Morgan used to defy fate by housing his art treasures, which were priceless, at 13 Prince's Gate, London. But it is a fact that a tenth of the London streets are minus this number. There is no thirteen in the Strand, Holborn, Westbourne Grove, the Haymarket, St. James' Street, Lowndes Square, Park Lane, Threadneedle Street, Tokenhouse Yard, or London Street.

French Control of Metal.

France is taking steps to ensure the economic development and control of her mineral and metal industries after the war. A company has been formed, entitled the Societe Minervia et Metaux, with a capital of $2,000,000 for the purpose of fostering and protecting the metal industries of the country. The company, which is representative of existing interests, is not a profit-making enterprise so much as an organization which has for its object the improvement and extension of the methods of distribution, treatment, and marketing of the metals produced in France and her colonies.

ELECTRICITY VS. STEAM.

Satisfactory Experiments With Electric Locomotives on U.S. Lines.

Actual want of any commodity provides the most direct appeal possible for its conservation. The use of electricity, instead of steam, on those portions of Canada's railways adjacent to water-powers would materially reduce our dependence on the United States for coal. In 1916, the railways of Canada used 8,995,000 tons of coal, or about 61 per cent. of our total production. In fact, the increased price of coal may soon compel us to use hydro-electric energy extensively as a railway motive power.

Certain American railway companies have carried out extensive experiments in electrification within the past two years and many of the results are of more than ordinary interest. On its Rocky Mountain division, the Chicago, Milwaukee & St. Paul replaced its steam locomotives by electric. Electricity is decidedly superior to steam in operating efficiency, especially in cold weather. Electric power made it possible to operate more trains over the same tracks and that, without the need for "helped" locomotives. Again there was a great saving in terminal and round-house facilities, and the rolling stock was not subjected to so much wear and tear as when steam was used. This latter fact was largely due to the superior braking qualities of electric-drawn trains. All brakes were not used on grades, except in cases of emergency. In fact it was found that as much as 11.5 per cent. of the power consumed during the period of the test was generated by the trains themselves on the down grades. The experiment was so satisfactory that the company has decided to instal electric equipment on its Cascade division as well.

In a region so lacking in coal and so rich in water-power as is Central Canada, we may expect that, in time, the increase in the cost of coal will, in favorable situations, induce the electrification of part of our steam railway mileage. If the coal now consumed by railway locomotives could be turned to other productive uses, an important step would be taken in making Canada more independent of the American coal market. Concurrently with that advantage, the country's trade balance would be considerably improved.

WHEN PARIS WAS SAVED.

Message Sent by Gen. Joffre to the French Army.

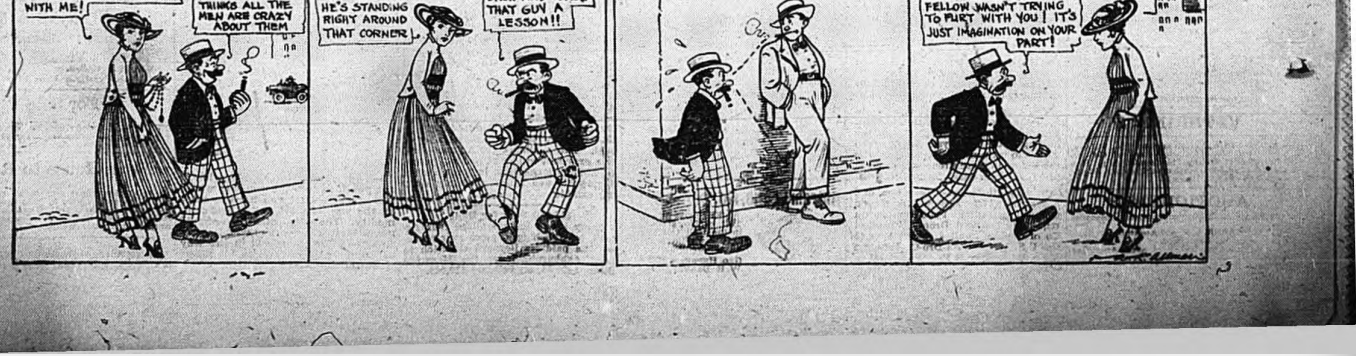
France expects from every son that before he lets the enemy pass he will die where he now stands fighting!—Joffre.

To his beloved poilus at the crucial hour Gen. Joffre sent this message before the battle which saved Paris and checked the advance of the German armies at the Marne.

It seems that Gen. Joffre before the turn in the fight came had taken seclusion in a fine chateau temporarily turned into headquarters for the Commander-in-Chief. He was well aware that the critical time for the French army was at hand.

Seated at his desk he spoke to none of the officers present. At intervals he would take up a map or military paper and study it closely. Orderlies with discouraging news dashed in and out. At one time a Colonel rushed to Joffre and pointed out a serious reverse at an important point of the line. The gray haired man silently listened to his subordinate and replied: "It is so."

The place was immersed in gloom. Some of the officers in subdued voices were discussing what might happen to Paris. Suddenly a change came. A bulletin had been handed to Joffre. His cheeks flashed and a curious expression came in his face.



Two divisions were going to withdraw and give the enemy a foothold. The bulletin was given the most careful scrutiny. Joffre seized a sheet of paper and started writing. When he had finished he ordered that the contents of the sheet be transmitted to all the officers and men of the French army forthwith.

The message was delivered. Paris was saved. The Germans were stopped and started to dig in. From Papa Joffre had come the words:

"France expects from every son that before he lets the enemy pass he will die where he now stands fighting!"

Prussianism can be whipped with the four B's—bread, bacon, beans and bullets. The farmer supplies three fourths of these.

The Doings of the Duffs.

Two Practical Designs

Middy Dresses are very comfortable and practical for school or play. McCall Pattern No. 7892, Girl's Middy Dress. In 6 sizes, 4 to 14 years. Price, 15 cents.

Quite a good-looking tan coat is this for early spring wear. The raglan sleeves are considered very smart this season. McCall Pattern No. 8175, Ladies' Coat. In 3 sizes, small, medium and large. Price, 20 cents.

These patterns may be obtained from your local McCall dealer or from the McCall Co., 70 Bond St., Toronto, Dept. W.

LISTLESS, PEEVISH GIRLS

When a girl in her teens becomes peevish, listless and dull; when nothing seems to interest her and dainties do not tempt her appetite, you may be certain that she needs more good blood than her system is provided with. Before long her pallid cheeks, frequent headaches, and breathlessness and heart palpitation will confirm that she is anaemic. Many mothers as the result of their own girlhood experience can promptly detect the early signs of anaemia, and the wise mother does not wait for the trouble to develop further, but at once gives her daughter a course with Dr. Williams Pink Pills, which renew the blood supply and banish anaemia before it has obtained a hold upon the system.

Out of their own experience thousands of mothers know that anaemia is the sure road to worse ills. They know the difference that good red blood makes in the development of womanly health. Every headache, every gasp for breath that follows the slightest exertion by the anaemic girl, every pain she suffers in her back and limbs are reproaches if you have not taken the best steps to give your weak girl new blood, and the only sure way to do so is through the use of Dr. Williams' Pink Pills.

New, rich, red blood is infused into the system by every dose of these pills. From this new, rich blood springs good health, an increased appetite, new energy, high spirits and perfect womanly development. Give your daughter Dr. Williams' Pink Pills, and take them yourself and note how promptly their influence is felt in better health.

You can get these pills through any dealer in medicine or by mail postpaid at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Squash is a perfect substitute for pumpkin in pie.

A workshop and a harness-room are farmstead requirements, especially in the winter. Don't do blacksmith work, nor oil harness around the kitchen stove.

HOW THEY WON THE VICTORIA CROSS

STORIES OF THRILLING ACTS OF HIGH COURAGE.

How British Heroes by Conspicuous Bravery Won Coveted Medal, Most Prized of Honors.

The Victoria Cross is a decoration conferred on officers and men of all ranks of the British army and navy for personal bravery. It was founded on January 29, 1856, and consists of a bronze Maltese cross, bearing in the centre the royal crown, surmounted by a lion, while on a scroll underneath is the inscription, "For Valor." The distinction had been gained by 522 officers and men before the present war, and approximately 300 more have been won in the last three years.

The London Gazette with official brevity, gives account of the heroism and devotion to duty of nine British soldiers, who have been rewarded by the highest honor the British soldier can win—the Victoria Cross. The brief stories from their very reticence tell all the more effectively of thrilling bravery and of the exhibition of capacity for leadership on the part of an officer, non-commissioned officers and men.

Lance-Corporal Hamilton.

Brown Hamilton, Highland Light infantry (Lanarkshire), during the enemy's attack on the line held by our brigades the greatest difficulty was experienced in keeping the front and support lines supplied with small-arm ammunition owing to the intense and continuous belt of artillery fire placed systematically by the enemy between our various lines and battalion headquarters.

At a time when this ammunition supply had reached a seriously low ebb, Lance-Corporal Hamilton on several occasions, on his own initiative, carried bandoliers of ammunition through the enemy's belts of fire to the front and support line, and then, passing along these lines in full view of the enemy's snipers and machine guns—who were lying out in front of our line at close range—distributed the ammunition to the men.

Lieutenant Parsons.

The case of Second-Lieutenant H. F. Parsons, who belonged to the Gloucester regiment, is one where a junior officer grasped the importance of the post he was holding, and at the cost of his own life, and despite severe burns from liquid fire, saved the situation on his part of the line. The bombers holding the post were forced back, but Lieutenant Parsons hung on, bombing the advancing enemy, and delayed long enough to enable a bombing party to be formed and come into action. The party succeeded in driving the enemy out of the line before they reached any of the British trenches.

How long Lieutenant Parsons held the position is not stated, but we do know that he was severely burned before the situation developed and that during the time he held the enemy he received such severe wounds that he died from them. The picture one naturally conjures up is that of a badly wounded man, suffering agreat deal, yet, by sheer force of will, coolly throwing bombs and placing them every time where they would be most effective. It requires skill under the best conditions to throw bombs accurately. One may judge of the endurance and fine spirit of the man, the concentration of courage, that he held his post under such conditions.

A Gallant Canadian.

Another man who displayed the same grasp of the facts of a situation, and gave his life to hold an important post, was a Canadian infantry sergeant, Frederick Hobson. During a strong hostile counter attack, an enemy shell exploded on a forward post where there was a Lewis gun, and buried the gun, killing all the crew but one man. Sergt. Hobson climbed from his trench and ran up to the gun. He helped to dig it [illegible] got it into action against the [illegible] enemy. The post lay in a communication trench that led to the hostile lines, and the enemy were coming down the trench and across the open. No doubt the burial of the gun had something to do with the fact that it jammed and stopped firing. There was nothing now to hold the enemy. Sergt. Hobson had been wounded, but he told the gunner to correct the stoppage, and rushed forward. Single-handed, he fought the enemy with a bayonet and clubbed rifle until at last he was killed with a rifle shot.

But his bravery had saved the situation. The Lewis gun again came into action and held the enemy until re-inforcements arrived, when the attack was completely defeated. The few minutes' delay that the gallant sergeant secured for the gunner undoubtedly saved a very serious situation. He saw the only possible way of gaining that delay and gave his life in the doing of it.

Brave Deed of a Private.

Private Charles Melvin, Royal Highlanders (of Kirriemuir), whose company had advanced to within fifty yards of the front-line trench of a redoubt, where, owing to the intensity of the enemy's fire, the men were obliged to lie down and wait for reinforcements.

Private Melvin, however, went on by himself, over ground swept from end to end by intense rifle and machine gun fire. On reaching the enemy trench he halted and fired two or three shots into it killing one or two of the enemy, but as others in the trench continued to fire at him he jumped into it and attacked them with his bayonet in his hand, as owing to his rifle being damaged, it was not fixed.

On being attacked in this resolute manner most of the enemy fled to their second line trench, but not before Private Melvin had killed two more and succeeded in disarming eight unwounded and one wounded. Private Melvin bound up the wounds of the wounded man, and then driving his eight unwounded prisoners before him, and supporting the wounded one, he bustled them out of the trench, marched them in, and delivered them over to an officer. He then provided himself with a load of ammunition and returned to the firing line where he reported himself to his platoon sergeant. All this was done, not only under intense rifle and machine gun fire, but the whole way back Private Melvin and his party were exposed to a very heavy artillery barrage.

THE ONLY MEDICINE THE BABY NEEDS

Baby's Own Tablets is the only medicine a mother needs for her little ones. They are a gentle but thorough laxative which instantly relieve all stomach and bowel disorders thus banishing all the minor ills of little ones. Concerning them Mrs. Jos. Leveaque, St. Simon, Que., says: —"Baby's Own Tablets are a marvellous medicine for little ones. They never fail to cure stomach and bowel troubles and neither my sister-in-law or myself would use any other medicine for our little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co. Brockville, Ont.

NOSELESS, BUT CAN SMELL.

Experiments Prove Fish Are Susceptible—Odor Travels Through Water.

A fish hasn't a nose, but it can smell. Recent experiments have proved this. What is more, these experiments have proved that odor travels through water, just as it does through air. Anglers have laid so much stress on the need of exciting a fish's interest by the look of food that the effect of scent has been overlooked. A shark will bite at a hook containing a piece of pork, although the pork does not look like any kind of fish that swims the sea.

It may be heresy in angling to suggest that a fly should smell like a fly. Those scientific experiments show how large a part smell plays in the food pursuit of fish. Fish, such as small herrings, which are found and eaten by the fishes two or three times as rapidly when the shells were broken.

Bait placed inside a gauze bag was smelled within three minutes of being lowered in the water, and almost at the same time all the fishes began nibbling at the bag. When cotton was stuffed into its so-called "nostrils" the dog-fish would seldom observe the food that came near them.

MARINE Granulated Eyelids Sore Eyes, Eyes Inflamed by Sun, Dust and Wind quickly relieved by Murine. Try it in YOUR EYES Eye Comfort Murine Eye Remedy At Your Druggist's or by Mail 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye—Free. Address Murine Eye Remedy Co., Chicago.

Cabbage will have a more delicate flavor and will make no odor while cooking if boiling water is poured over it and allowed to stand until you can set the cabbage out with the hands. Then put it on in boiling water to cook as usual.

Minard's Liniment Co., Limited.

Gentlemen,—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of La Grippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,
W. A. HUTCHINSON.

Who First Camouflaged.

A word that has quite a vogue at the moment, but was probably never heard of until the outbreak of war, is "camouflage"—the art of making a thing look what it is not. The word and, to a great extent, the idea, is French in origin. Early in the war a group of young painters in France formed what they called the Battalion de la Comoufle, and their duty was to "make up" guns, cars, shelters, and gun emplacements, and whole stretches of landscape, to deceive German aviators.

The art of camouflage is both negative and positive. It aims at making practically invisible what is to be hidden by merging it into the background and it rejoices in ingenious fakes—fake batteries, fake trenches, fake ambulances—to make the enemy waste a little ammunition.

Stumps are converted into shavings, by a new rotary cutting machine and the shavings are drawn into bags for removal by a vacuum.

Minard's Liniment Cures Garget in Cows

LIFT YOUR CORNS OFF WITH FINGERS

How to loosen a tender corn or callus so it lifts out without pain.

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called freezone, applied directly upon a tender, aching corn, instantly relieves soreness, and soon the entire corn, root and all, lifts right out.

This drug dries at once and simply shrivels up the corn or callus without even irritating the surrounding tissue.

A small bottle of freezone obtained at any drug store will cost very little but will positively remove every hard or soft corn or callus from one's foot.

If your druggist hasn't stocked this new drug yet, tell him to get a small bottle of freezone for you from his wholesale drug house.

Departure.

He took the sunlight with him,
The blue from out the skies,
And on our hearts deprived of these
What heaviness there lies.

He was the dawns white comrade,
The laughter of the wave;
To common tasks their sweetest
Significance he gave.

He was not learned or lofty,
Not always even wise,
But one had hints of heaven through
Those two brown, merry eyes.

The faith that centres effort
He nourished with a smile;
His spirit's lightest gesture could
Our apathy beguile.

He was not made for hardship—
The battle's rough employ;
He clove the air with radiant wing
On offices of joy.

What storms shall blur his vision,
What signatures of pain
He set on those white brows before
He comes to us again?

—Helen A. Saxon.

If Stomach Hurts Drink Hot Water

A Physician's Advice.

If dyspeptics, sufferers from gas, wind or flatulence, stomach acidity or sourness, gastric catarrh, heartburn, etc., would take a teaspoonful of pure bisurated magnesia in half a glass of hot water immediately after eating, they would soon forget they were ever afflicted with stomach trouble, and doctors would have to look elsewhere for patients." An explanation of these words is well known New York physician stated that most forms of stomach trouble are due to stomach acidity and fermentation of the food contents of the stomach combined with an insufficient supply of the stomach. Hot water liberates the bisurated magnesia in the proper quantity neutralizes the excessive stomach acid and stops food fermentation, the combination of the two, thus forming marvelously successful and decidedly preferable to the use of artificial digestents, stimulants or medicines for indigestion.

Ages of Common Birds.

An English investigator says the average ages to which some of the more familiar birds live are as follows: Crow, eagle, raven and swan, each 100 years; heron, 60; parrot, 50; goose and pelican, each 50; sparrow-hawk, 40; skylark, 30; ranan, crane and peacock, each 24; pigeon, 20; nightingale, 18; goldfinch, pheasant and partridge, each 15; lark, 13; robin and blackbird, each 12; thrush and common fowl, each 10; wren, 3.

MONEY ORDERS

"Quoth the Raven."

In all times and countries people have regarded the raven with superstitious awe. Poe's bird said "Never more!" in a sepulchral voice, and the croak of a raven is considered a sort of presage of defeat, calamity, and death.

The Royal house of Austria, the Hapsburgs, is perhaps the most unfortunate in the world. Calamity dogs their steps, and it is always associated with the raven.

When the Archduke Maximilian and his wife were taking their last walk at Miramar, prior to leaving for Mexico, a raven continually followed them, and at last hopped on the archduchess' train. Three years later the Archduke was shot at Queretaro.

When the Archduchess Maria Christina left for her unhappy life in Spain, a raven is said to have hovered over her carriage, and another dashed a perch from the hand of the Empress Elizabeth, wife of the late Emperor Francis Joseph, the day before she was assassinated at Geneva.

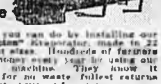
Most famous of all was the flight of ravens said to have been seen over Olmutz at the moment when Francis Joseph the Unlucky was becoming Emperor of Austria.

LEMON JUICE IS FRECKLE REMOVER

Girls! Make this cheap beauty lotion to clear and whiten your skin.

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear, and how clear, soft and white the skin becomes. Yes! It is harmless.



The man who will not get out and help to shovel the drifts out of the road so the mail-carrier or the school wagons can get through, ought to be taken by the nape of the neck and set out in the biggest drift of all and made to stay there till he gets up spunk enough to dig himself out.

Minard's Liniment Cures Colds, Etc.

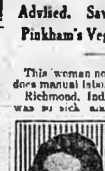
Bruises and Sprains

Have Sloan's Liniment handy for bruises and sprains and all pains and aches. Quick relief follows its prompt application. No need to rub. It quickly penetrates to the trouble and drives out the pain. Cleaner than mussy plasters or ointments. Sloan's Liniment does not stain the skin nor clog the pores. For rheumatic pains, neuralgia, sciatica, lame back, lumbago, sore throat, and sprains, it gives quick relief. Generous sized bottles at all druggists.



Sloan's Liniment KILLS PAIN

CLIMBED STAIRS ON HER HANDS

Too Ill to Walk Upright. Operation Advised. Saved by Lydia E. Pinkham's Vegetable Compound.

This woman now raises chickens and does manual labor. Read her story:

Richmond, Ind.—"For two years I was so sick and weak with troubles

from my age that when going up stairs I had to go very slowly with my hands on the steps, for I must stop at the top to rest. The doctor said he thought I should have an operation, and my friends thought I would not live to move into our new house. My daughter advised me to try Lydia E. Pinkham's Vegetable Compound as she had taken it with good results. I did so, my weakness disappeared, I gained in strength, moved into our new home, did all kinds of garden work, shoveled dirt, did building and cement work, and raised hundreds of chickens and ducks. I cannot say enough in praise of Lydia E. Pinkham's Vegetable Compound and if these facts are useful you may publish them for the benefit of other women."—Mrs. M. C. Johnstone, Route D, Box 190, Richmond, Ind.

REAL ESTATES CORPORATION, LTD.
60 Front St. West, Toronto

GLAMIS

Nursing Sister Lizzie McKinnon is home from overseas on short leave, also her sister Miss Kate, of Chicago.

Mr Arthur Nesbitt, who has been staying for the last week with his sister-in-law, Mrs R J Nesbitt and family, returned to Chesley on Tuesday.

Rev Mr McClung is confined to his bed the last few days.

Mr and Mrs Stocks, of Port Huron, are spending some time with Mrs R J Nesbitt.

Mr Hugh McKinnon and son Malcolm, of Minto, Man, are visiting friends and relatives on the 10th of Kincardine.

Rev O C Elliott, of St Thomas, who has been holding special meetings in the Baptist church here, left on Monday for Mount Forest, where he expects to continue the work.

Mr Graham is confined to the house the last few days suffering from asthma.

Mr Neil McIntyre, of Edmonton, arrived on Friday last, and will spend some time with his mother, Mrs J C McIntyre.

Mrs Wansborough, of Toronto, is visiting her sister, Mrs R J Nesbitt.

Miss Lily McKinnon, of Brantford, is visiting her home on the 10th of Kincardine.

(Intended for last week)

Mr Jackson, of Holland Centre, is spending some time with his daughter, Mrs R J Nesbitt.

There was no service in any of the three churches here on Sunday owing to the terrific storm that has been raging since Friday night. The roads were simply impassible.

Mr J C McCauley returned on Tuesday from Tara, where he was called on Friday owing to the very sudden death of his father.

Mr J C McLean is down from Saskatchewan to spend the winter with his mother and brother on the boundary.

Rev Donald MacIntyre, of Toronto, who was called to attend the funeral of his father, the late J C McIntyre, returned to the city on Wednesday of last week.

Rev O C Elliott will continue the special meetings this week in the Baptist church.

Quite a gloom was cast over our village on Saturday afternoon when the sad news spread that R J Nesbitt had passed away. On Monday afternoon he appeared in his usual health, and attended the funeral of the late J C MacIntyre in the Baptist church. At night he took suddenly ill and the doctor was called. He pronounced it an attack of acute appendicitis. Dr Hall of Walkerton was sent for, also Dr Bricker of Cargill, and the patient was operated upon on Tuesday and came out of the operation alright, but pleurisy set in and he passed away Saturday afternoon. Much sorrow is felt for the widow and four small children who are left to mourn the loss of a loving and affectionate husband and father. The late R J Nesbitt conducted a hardware and grocery store, and will be very much missed both as a business man, citizen and neighbor. He was always obliging, and ever ready to help anyone in trouble. He will also be missed in St Paul's church, where he was a devoted member both of the church and choir.

EBENEZER

Our hockey team went to Paisley last Friday evening and played their first match of the season. Our boys made a very good showing, as they have had very little practice. At the end of the first half the score stood 4 all. During the last half the lights got dim and the Ebenezer boys couldn't locate the goal, while the Paisley boys added four more to their list. The next match will be here on Thursday evening when the return game will be played. The Ebenezer team nearly always wins on their own ice, so a lively game is expected, as Paisley is playing very fast hockey this winter.

Mr Frank Thomas, of Hardy, Sask, is visiting his brother here, Mr C A Thomas.

Mr Geo Maxwell, of Chatsworth, is visiting at Mr Robt Quigley's.

Miss Irene McKelvey, who has been attending high school in Paisley, is obliged to give up her studies on account of her eyes. We hope she may soon recover and be able to resume her studies.

Saturday evening was the leap year skate at the rink. The girls had a very busy time taking the boys. They can now sympathize with the boys, as some young gentleman kept the girls out longer than was comfortable to them.

PINKERTON

Miss Jennie McMillan of Paisley and Mrs John Wright of Great Deer Sask., are visiting their sister Mrs. Adam Reid.

Mrs A. C. McKee received word that her son Carl broke his leg at Belleville last week, and left for that place on Wednesday accompanied by Miss Kathleen Pinkerton.

Mr and Mrs John Mutrie have returned from St. Louis where they attended the funeral of their son Wm. Mutrie. They were accompanied home by Mrs Wm. Mutrie and children.

Miss Alma Reid returned to Paisley on Thursday last.

At the regular meeting of the Red Cross on Thursday last, the following were packed and shipped: Red Cross supplies—22 suits pyjamas, 12 pillows, 4 pillow covers 24 towels (Turkish), 2 quilts, 4 wash cloths, 1 old blanket, 1 package old linen. Soldiers' comforts—83 pair socks, 30 flannel shirts, 1 scarf, 30 turkish towels.

The ladies of the Red Cross wish to thank Mr Alex Carr for his donation of $5 this being the prize he received for his team at Walkerton Christmas Fair.

ELORA ROAD NORTH

Mr Wm. Pearce has been on the sick list.

Mr John Ewing left for his home in the west last Saturday.

Mrs Jas. Hay of Victoria visited at Mr. Arch. Bryce's last week.

Mrs. J. W. Brown has been spending some time in Paisley, since her accident some weeks ago.

One of our popular young men Mr Isaac Beech, was united in marriage with Miss Myrtle Robb of Williscroft last Saturday. The happy young couple are spending their honeymoon in Toronto.

Mr Richard Harcourt is away to the west with a load of horses.

Mr Kenneth McNeill is employed with Mr I. Stanley of Paisley.

News is hard to gather in this stormy weather. However, we know a few things which are of rather too delicate and private a nature to be put in print. Such happenings frequently lead to happy results so we will await in patience. Give your correspondent all the news, my good people.

ORESHAM

We are sorry to learn that Mrs Peter Dobson is very ill.

Miss Hester Nelson of North Bruce was visiting at the homes of her uncles here.

Miss Isabel Cameron has accepted a school at Chalk River, Ont.

Mr Wm Parker was in Walkerton last week.

We hope Mr John Metcalf, who has bought a farm in Greenock, does not decide to move off our line.

Mr Leonard Schell, who lost his life at Port Elgin during the storm was an old resident of this line and much sympathy is felt for his sister with whom he lived.

LOVAT

Mr P Barrie's new house has been finished inside, and the flitting from the old domicile is over. May the household long enjoy its comforts.

Mr John G McKay met with an accident while working in the bush a few days ago. A limb he had pitched on team to swung back and struck him on the knee. Although no bones were broken the injuries are painful and will be slow to mend.

THE STORE OF QUALITY

BUSINESS CHANGE

Perfection Oil Heaters

Royalite Oil

THE world is changing. The map of Europe has changed. It has taken a lot of change to manipulate this change. The banks give you change, sometimes charge you exchange. And we find we are in need of some loose change to give the other fellow some change. Therefore, after Jan 15th all accounts not then paid will be charged and collected with interest. We have decided to cut down our credit limits, and will after this date render our accounts every three months. If not then paid interest will be added.

Economize Wisely
—A Maxwell Car Will Help

Waste is often committed when the intention is to economize.

A Maxwell car, famous for its economy, will cost you only a few dollars a month to operate and maintain.

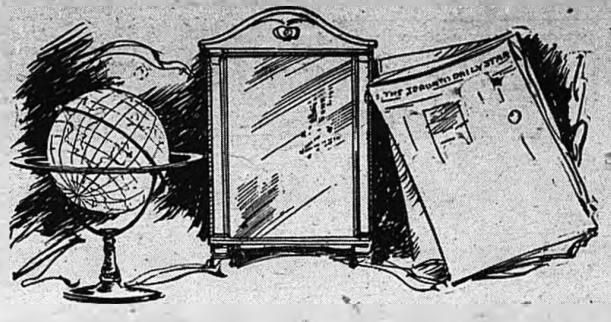
Which is the real economy:

(1) To use the car and save time, strength, and mental vigor?

(2) To do without the car, lose time in your business, lose the health gained from motoring, and worry yourself into illness?

Use of a Maxwell car will give you self confidence.

Your neighbors and associates will get mental inspiration from you.



As wave circles widen when a pebble hits the water, so will your good example benefit your entire community.

Save—yes; but do it sensibly, and let the Maxwell help.

Touring Car $1045; Roadster $1045; Coupe $1540
Berline $1670; Sedan $1670; F. O. B. Windsor

"My Paper!"

The Mirror of the World's Happenings

Because it mirrors the news of the world in which I live and am interested.

Whether it be an epoch-marking event like the sinking of the Lusitania, or but the story of a local happening, I know I shall find it described, pictured, or commented upon fully and sanely in "My Paper!"

Whether it be the current sport or the latest theological discussion, I know I shall find its importance fully recognized in "My Paper!"

Whether it be a political discussion of a Government measure, or a searching analysis of some sociological problem, I know I shall find the matter sanely treated in "My Paper!"

Whether it be just the Bedtime Stories for the Kiddies, or the Fashion News from New York, Paris, and London for my wife, "The Star" to each of them is "My Paper!"

Whether it be a witty paragraph, or the problems in "Bringing Up Father," the whole family enjoy the humour of "My Paper!"

A Few of the News and Special Features Exclusive to The Toronto Daily Star

Cable service from The Star's own staff men, notably F. A. McKenzie, our London resident correspondent, a veteran war writer.

In Italy, Miss Hammond Boultbee, the only Canadian woman writer in any of the war zones.

In Britain, Thomas Oggie, late Sergt.-Major R. G. R. R., now on regular Star staff. He has been in regular army for 20 years.

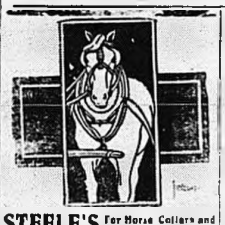
In Canada, special staff men in Ottawa, Montreal, Quebec, Winnipeg, and other important centres.

United Press, leased wire, exclusive in Toronto, giving world news and including splendid war cables. Special correspondents in each allied country.

All the Chicago Daily News' special cables from a staff of specially trained war correspondents at various centres in Europe.

All the Montreal Daily Star's special cables from Windermere and staff.

Frequent specially contributed articles from best writers in the world.



The Daily Star also receives all regular news services of the other Canadian dailies, such as Canadian Press, American Associated Press, and Canadian Associated Press.

Exclusive rights to the pictures of the London Daily Mirror, also Underwood's Daily Mail Topical, and Canadian Official War Records, sports, etc.

The Canadian Farmer's Real Friend

YOUR letters will be answered, you will get the exact information you need, you will get the advice and assistance you desire free, provided by experts to whom we pay real money for the answers we send you, if you become a subscriber to FARMER'S MAGAZINE. This magazine is for—

The Men on the Farm

Helps them plan, and tells them how to construct barns, stables, sheep barns, hen houses, silos and dwellings.

Tells all about septic tanks, hydraulic rams, water supply and lighting systems, power farming.

Gives advice and information about feeding and breeding and the health of animals, about the business side of farming, co-operative methods, investments and insurance.

The Women on the Farm

Helps them in their house planning and moving.

In their kitchen problems.

In matters pertaining to children—their health, reading and school.

Deals with styles, dress patterns and other feminine interests.

Gives help in gardening and flower culture.

Gives news of women's work.

For all it provides stories, special articles on literary subjects by experts—not amateurs or experimenters; and the latest and most accurate information on every matter of concern to farmers.

FARMER'S MAGAZINE

has three times as many regular departments as are ordinarily found in farm papers, and is about the most satisfying paper you can get at any price. Subscription $1.00 per year.

EVERY issue of FARMER'S MAGAZINE is worth a dollar bill, because it is downright helpful in practical ways. The free advice and information it supplies on request—by private letter—may be worth many dollars. Have the FARMER'S MAGAZINE in your home as you would a barnyard or a new—an ever-ready and indispensable help. Have it for its friendship.

The price is One Dollar per year. Did we send it to you, and remit for it when we send you the bill. Address the publishers:

The People's Popular Store

Our Price-Cutting Sale Still Continues

PREPARING for stock-taking brings forward all winter goods, remnants, odds and ends, and although they have been marked below their market value they are further reduced to clear.

The scarcity of labor will make it still more difficult to get goods when needed. You take no chances to lay in a stock now for next winter, and if you should be needing any of the goods required for the present cold spell, you will find that our prices in many lines have been cut in two. Look over our Furs, Ladies' Mantles, Sweater Coats, Men's and Boys' Heavy Rubbers, Overshoes and Overcoats, and you will find that prices on these lines are slaughtered. We want the room and money to take in spring and summer goods. All cut-price goods will be sold for cash or produce at time of sale. We must also have our old books out of safe before the end of January, so please settle your old accounts by cash or note before the 31st of January.

THE PAISLEY MERCANTILE CO.

THE CITY BAKERY

Always has something special.
We have a

Maple Flavored Syrup

in wine quart bottles. This is an A1 syrup, and the price is right. Also

Our Bulk Teas

In Black and Green. Special lines at a special price. Try them.

F. S. MacLachlan

Knox Church Annual Meeting

Owing to the heavy winter weather on Tuesday, Jan 22nd, the meeting this evening was not largely attended, but those present made a very representative gathering of members and adherents. The chair was occupied by the pastor, and Mr Wm Dryden, clerk of session, acted as secretary. The statistical report of session showed a slight decrease in membership, removals and deaths having reduced the list. The Sunday school had a total enrolment of 91 pupils, including 20 of a Bible class. While there were no deaths among the pupils, the school mourns the loss of John Hamilton and Dugald Bain, two ex pupils who died for our freedom. A box of Christmas gifts was sent to a school up north. The secretary's report mentioned the need of more teachers in training. The church treasurer's financial statement shows the total receipts to have been $1057 59, the principal items of which were the contributions for revenue per envelopes, $1292 12; missions, $604 45; open collections, $183 73; for furnace, debt, etc, $170 90; and bank borrowings, $526 75. The present liabilities of the congregation amount to $658 90, of which $500 is for manse mortgage. The different reports show the actual givings and contributions towards every department for the year aggregated $2832 55. Mr M A Halliday, of Chesley, a delegate from the Bruce Presbytery, addressed the meeting anent the fixing of the minimum salary of ministers at $1200, which was done by the General Assembly of 1917. It was decided by motion to raise the pastor's salary to that amount. The present organist was voted a salary of $125, and the caretaker's salary was increased to $200. Messrs J B McArthur, J Sheepy, A Thornburn and D McGillivray were re-elected to the Board of Management, also Messrs W G Brown and D Forrester as additional members, the Board now consisting of fourteen. J Logie and W McKenzie were appointed auditors.

An ample supply of binder twine for Canadian requirements next year at reasonable prices has been ensured as the result of an agreement reached between the United States Food Administration and the Mexican sisal growers of Yucatan. The growers were holding out for a high price but under the arrangement just consummated the entire crop has been secured at a slight advance over last year's price. Co-operation of Canada and the United States in controlling food exports from this continent was one of the factors which made it possible to secure the sisal supply on reasonable terms. Regulations regarding length and price of binder twine have been beneficial all round, it is said.

—The President and Food Controller of the U.S. have issued their proclamations for a rationing system in the Union. Millers are to make nothing higher grade than 74 per cent flour, bakers must use mixed flour for bread, householders must buy equal quantities of wheat flour and substitute flour, there are two wheatless days a week—Monday and Wednesday—and one wheatless meal a day, one meatless day a week—Tuesday—and one meatless meal a day, also two porkless days a week.

Children Cry
FOR FLETCHER'S
CASTORIA

—Premier Hearst has stated that the peat question is receiving consideration by the Ontario Government. Large areas of peat lands have been set aside already for examination and exploration, but will have to be drained before the work of producing fuel can be advantageously proceeded with.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D FORRESTER, Barrister.

CARD OF THANKS

Mrs Nesbitt, of Glamis, wishes through THE ADVOCATE to express to her friends and neighbors the deep gratitude and sincere appreciation of their great kindness and sympathy during the illness and after the death of her husband, in which Mr. Arthur Nesbitt, brother of deceased, joins.

Rates May Not be Raised

—The general increase of fifteen per cent. in railway rates ordered by the Board of Railway Commissioners to go into effect on February 1st is indefinitely postponed. It possibly may never go into effect. That was the outcome of the protests made on Thursday last to the Cabinet Council by the representatives of the Governments of Manitoba, Saskatchewan and Alberta. The complete arguments in the matter are to be presented to the Premiers in written form during February.

BORN

DAVIS—In Tara, on Jan. 19th, to Mr and Mrs Geo. Davis, a daughter.

DIED

UNDERWOOD—In Arran, on Jan. 22nd, Mary Hanson, relict of the late James Underwood, aged 93 years.

McCULLUM—In Elderslie, on Jan. 23rd, Martha McCullum, relict of the late Matthew McCullum aged 83 years.

—Miss Lewis, of Clifford, recently visited at Mrs Alan Pace's, Bruce Tp.

—Russell Bone have bought lot 17, con 6, Bruce Tp., from Mr Henry Roppel.

—Remember the Y.M.C.A. Trinket Fund, Friday and Saturday Feb. 1st and 2nd.

—Mr Lewis Elves was up from New Hamburg visiting at the home of his sister, Mrs A. E. Archer.

—Mr Robt. Burns, of Elderslie, who has had a very severe attack of pneumonia, is now recovering nicely.

—Gnr. Wm. Dent, of the 65th Battery, returned to Guelph on Tuesday after a short visit at home in Bruce Tp. on last leave.

—Mrs Wm. McAngus, of 12th Bruce had a rib broken and was also considerably bruised when she fell down stairs in her home a few days ago.

—Miss Boyle, of the P. S. staff, is off duty, suffering from ear trouble. Miss Struthers, of Port Elgin, is engaged as substitute, and the room will be re opened on Monday next.

—The Kincardine high school board is in a quandary. The school has been closed since Christmas for want of coal. Coal has arrived, and it was discovered that the boiler leaked, and it would take several weeks to have it repaired. The high school students will have a hard time this year to get through their work.

—Rev F O Nicbol, a former pastor of Pinkerton and Cargill Presbyterian churches, died in Harper Hospital, Detroit, on January 24th, following an operation for cancer. He had been in Amherstburg for the past four years. Three weeks ago he collapsed in the pulpit while preaching, and a telegram revealed malignant cancer of the liver. He was 57 years of age.

OUR MAILING LIST has been corrected, and all payments on subscription received up to Jan. 26th are credited thereon. All who have paid should look at the label to see that we have marked it correctly. We would be glad to be advised of any mistake that appears. We must thank those who have already paid up for another year or more. If your label does not read "Jan 19"—which means paid up to 1st Jan., 1919—the subscription is due us. As we require a large sum of money for the purchase of an expensive piece of type setting machinery that we are obliged to invest in because of war conditions, we hope our subscribers will give our needs a little extra consideration and all pay up promptly in advance.

Train Service to Be Cut in Two

Although no official notice has yet been given out, it is rumored and believed that on Feb. 3rd there will be only one train a day each way on this and all other branch lines of railway.

Must Have Tickets Before Boarding Train

Beginning Feb. 1st, all passengers will require to show their tickets upon entering a G.T.R. train. Patrons are requested to purchase their tickets before hand and have them ready to present upon entering the train.

Died at Emo

News was received on Tuesday of the death of Henry, son of Mr and Mrs John Aneese, 10th Bruce, from an attack of pneumonia. The deceased has been farming near Emo, Rainy River, for ten or twelve years, as was also his brother Fred, who has been visiting the old home in Bruce Tp. since New Year's.

A Western Wedding

A quiet wedding took place at St John's Church, Saskatoon, Sask, on Thursday, Dec 27th, when Rev Canon Smith united in marriage Winnifred S Case, youngest daughter of Mr and Mrs W H Case, formerly of Evelyn, Ont, and Norman Herbert McIntyre, youngest son of the late Donald McIntyre and Mrs McIntyre, formerly of Paisley. The bride was charming in a white silk crepe de chene dress, and she wore the groom's gift, a sunburst of pearls. After the ceremony the newly married couple left for Regina, where they spent a short time at the home of the groom's mother before taking up their residence near Plate, Sask.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

The Silver Thimble and Trinket Campaign

The Ontario W.C.T.U. is endeavoring to raise a fund of $25,000 for free Tea Cocoa, Coffee and Lemonade.

The National Y.M.C.A., whom the Ontario W.C.T.U. is aiding, will need $50,000 to cover their free drinkables.

The W.C.T.U. has already sent to France, mainly for this purpose, about $11,000—but the need grows more insistent.

In addition to the free drinkables, the Ontario W.C.T.U. has become responsible for the cost of printing a weekly leaflet of cheer and spiritual help, which is being sent through the mails to all the soldiers in the forward trenches, who express a desire to receive it. The appreciation of the men for this bit of comfort can be judged by the fact that in one division alone, and within one month after the issue began, 13,000 soldiers asked that their names be entered on the "Pay Book Leaflet" list—the leaflets being so named from the fact that they are designed to fit into the soldier's pay book.

To aid in raising the necessary funds the W.C.T.U. of this town will hold a

Silver Thimble and Trinket Day

— ON —

Friday & Saturday, Feb. 1st & 2nd

When they will ask every citizen to look through their possessions for broken, useless, unwanted bits of gold and silver trinkets; discarded jewelry or table silver, gold or triple-plated.

Any of the following articles will be thankfully received at Mr Putnam's office on above dates, and the proceeds of their sale used for the above purpose.

Old gold or silver thimbles
Bracelets, Brooches, Scarf Pins
Rings, Chains or links of chains
Silver Match Boxes, Watch Charms
Old Gold or Silver Watches
Odd Cuff Links, Studs
Gold or Silver Tops of Canes or Umbrellas
Broken Spoons, Forks or Toilet Articles in sterling silver or triple plate
Coins in gold or silver, which have been monogrammed or punched

All these articles will be melted down and the proceeds used to finish the forward trenches with the harmless drinks our boys so need.

Articles that would bring more money if sold than as "scrap" will be sold.

All parcels to be closed and name of donor outside.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

W. H. BAKER, Paisley

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your order with us. We have a good assortment of the very newest patterns in fall suitings. Look them over before buying. Also in Ladies' Suitings we have a fine line to choose from of the newest patterns and styles,

I. S. CRUICKSHANK, the Tailor

Court Saugeen, C.O.F No. 58

MEETS in Oddfellows' Hall on the third Monday evening of each month, at 8 o'clock. Sojourning brethern are welcome.

ELLIOTT Business College

Yonge and Charles Sts., Toronto

Canada's Popular School of Business Training! Satisfaction assured all who come here! All graduates and scores of our undergraduates of the past year have secured good business positions and still the demand is far beyond our supply. Our catalogue gives full particulars. Write for one. Students may commence a course at any time.

W. J. ELLIOTT, Prin.

Wood Wanted

TENDERS will be received up to Monday, Feb 4th, for 50 cords of green maple and beech body wood, 18 inches long, to be delivered at Paisley public school. W. G. BARNETT, Sec'y.

Tenders Wanted for Cedar, Tp. of Elderslie

TENDERS will be received by the undersigned up to noon on Monday, Feb 4th, 1918, for the delivery of 175 M. fence posts and cedar 10 ft. long and 6 inches thick, 7 ft. to be delivered at Ira Hall, Bentinck line, to be delivered at Paisley public school. Not later than 15th May next. No tender necessarily accepted. C. HARRIS, Clerk Elderslie, R R No 3 Paisley.

Assessor Wanted

APPLICATIONS for Bruce Tp. to be received by the undersigned up to 6 o'clock on Saturday, July 27th. Salary $200. J D MacKAY, Clerk Bruce Tp.

—Another storm blocked the railway on Monday, and no train came through arriving from the south until 9 a m on Tuesday

"Preparedness!"

By Hector Raynle Berleigh.

(Copyright, by W. G. Chapman.)

"Preparedness is the keynote of the hour," read Miss Letitia Parker in the weekly newspaper of the little village in which she lived.

She scarcely understood the full meaning and specific application of the word, for here was a placid life, avoiding war's alarms. She never forgot that word thereafter, however, for directly below it was a four-line local item that made the color rise to her cheek and her breath come quick. It ran:

"Our former townsman, Abel Drake, is sojourning with some relatives down Gosport way. Five years is a long time. Drop around and get a good friendly handshake. Neighbor Drake!"

"He—has—come—back!" breathed Miss Parker tumultuously, and her hand grasped the paper with a nervous twitching of the fingers, and her eyes took to their depths a yearning, fluttering faraway expression.

For it, was indeed five years since Abel Drake had gone away, and all that time he had been enshrined in her heart of hearts as the model, the idol of her sentimental dreamings.

He was twenty-two then, she two years younger. Now she was twenty-five, but time had not dissolved the velvet softness of her cheek nor the azure luster of her eyes. She had grown a trifle prim with the dawning of womanhood, but her heart was still young.

She had always liked Abel, despite his quiet retiring way. A stray expression of a friend of Abel, coming to her ears second-hand, had cast the die that fixed her life's hope and aspiration. "I'm going away to wrestle with fortune," Abel was reported to have said. "If I make a go of it I am going to ask the woman I most admire and respect to be my wife, and that is Letitia Parker."

And upon this frail bud food Letitia had existed during the long patient years. At the first she had hoped Mr. Drake would write her from his new place of sojourn in the West, but he had not done so. Then she had folded her hands and sighed, telling herself that it was "better to have loved and lost than never to have loved at all."

Just now all the old romance was revived. The newspaper announcement stirred her magically, mightily. Of course, sooner or later he would come to Wayne to see his old friends. He might not have succeeded in his plans for getting on in the world. He might be only making a flying visit. He might have forgotten all about her.

Below It Was a Four-Line Local Item

Still, hope burned brightly in her longing heart.

"Anyway," whispered Letitia to herself, "I shall—prepare." She flushed a trifle as she said it, her self-consciousness causing a sensitiveness that made her shrink from anybody guessing the motives that lay under her secret plans.

Then the neighbors began to talk. They all knew that Miss Parker had a comparatively small income and that her surplus was sparse and incidental. The old house was given a new coat of paint, the interior was also but cheaply redecorated. Some chairs and a hammock adorned the porch. A cozy lover-suggesting rustic seat was set under a shady tree in the garden.

"She must have more coming in than we thought," gossiped a neighbor, "to go to all that expense."

They little know the hard paring and scraping the frugal Letitia exercised to carry out her project of "preparedness." Miss Parker blushed again when she finished some soft down pillows for the hammock. She was not planning for her own comfort. She was "preparing" for "visitors," and it through her mentality there ran a vision of a stalwart, manly young fellow lolling in the hammock, her good, kind soul was at fault, not vanity nor the base manoeuvring of a really designing woman.

How her innocent, tender heart fluttered as the postman handed her a letter postmarked "Gosport." That was the town where Abel Drake was visiting his folk. She opened it with trembling fingers, the perused it with longing eyes.

"Oh, he is coming!" she breathed. "Will he remember the old days?"

Abel had written a brief respectful note. He was coming to Wayne on business, he said, and would be glad to meet her again. Her reply was formal, but it put her in a flutter all day long. Then her day of days! She had donned her new gown with all the pretty ornaments she possessed. She might well feel a thrill of pride as she glanced at the mirror. A regally beautiful woman showed. Letitia was not vain, but she could not but realize the fact.

She feigned to be trimming the rose bushes lining the fence when she saw her expected visitor coming down the street. Her breath came quick. Ahl he had stopped to greet an old friend. Then a neighbor, a woman standing at her gate, detained him so long that Letitia fairly stamped her foot in vexation. And then—he came, and his bronzed, handsome face filled her vision and she was happy.

From the first she detected a certain constraint in his manner and marveled at it. He was distinctly formal and insisted that he could stop for only a moment. Her heart sank as he told her that he was going to return to the West. Then—sadly, she fancied, quite sadly—he bade her good-by and was gone.

It was all so nasty, so different to what she had anticipated, she sat down on the rustic bench—aloal so lonesome-looking now. The tears came. Her proud woman's heart sought to stem the overpowering torrent of despair vainly.

"I loved him so—oh, I loved him so," she sobbed forth, "and he is gone forever!"

"Oh, Miss Parker, please mamma wants to borrow three eggs, if you've got them. We're going to have company for supper, and she didn't expect it, and she'll send them back tomorrow, and please don't cry. Are you sick, Miss Parker?"

It was quite natural that the little prattle-box, when she returned home, should tell of the kind lady she had found in tears. Her neighbor, Mrs. Earle, at once divined the reason. Abel Drake got a new viewpoint on things in general. His hostess corrected some false impressions he had received.

"I fancied from what I heard in the town and the general air of prosperity about the place, that Miss Parker had got far out of my sphere of limited means," and then from what she told him he learned the truth.

Letitia, seated on the porch an hour later, started as a firm hasty footfall crunched on the gravel path.

"I could not go away without seeing you once more," spoke Abel, seriously, steadily, "after coming so far only to say to you what has been in my heart ever since I left here five years ago.

And then he told of his hard work to acquire a few thousand dollars—seeming to him pitifully small when compared with the apparent wealth of the women he loved.

And then the truth came out—she was poor, and glad of it, for he was rich—oh, infinitely rich in love! and Abel Drake did not leave for the West.

SHIP SCUTTLERS.

Mechanism of Interned German Liners Wrecked by Orders From Berlin.

There were scenes of mingled sadness and exultation in the engine-rooms of the German liners interned in United States ports, when the Berlin orders came commanding the destruction of the internal mechanism. The engineer loves his engine. To many a bluff sailor the order to wreck the engines was as a command to stab his sweetheart. Each engineer had been instructed in advance what to do to put his engines out of commission, and as he put the tactile irreplacre for the vessel you he felt like an unwilling lanyman preparing the gallows. Engineers and firemen wept as the explosions crashed, and many a sentimental fellow was prompted to record his love for his mistress of power.

With chalk they scrawled their sentiments on the great machines they were first to maim and then to leave.

"Farewell, sweetheart, till we meet again," wrote one engineer.

"Forgive me, my bonnie, for the injury I do you," wrote another.

"To break you is to break my heart," scribbled another.

"May the parting be brief, dear one," said a fourth.

There is no doubt that many engines would have been wrecked far worse than they were but for this love of the engineers and mechanics for their fine mechanism. However, no such sentiment affected the masters of the policy of ruthlessness; with them it was a question of pure logic and cold calculation.

Clipper Ships.

War has not touched a finer pinnacle of romantic thought than the staying of the doom of the old sailing ships. The arrogant steam competitors have been swept from the sea by the thousands since the war began. The old square riggers and multiple-masted schooners are again coming into their own. Formerly they were too slow for most trans-Atlantic freight traffic. Many of them were gathering barnacles at the empty wharves of decadent shipping centres when the submarine warfare began. Now they are scraped and painted and fitted with white canvas and sent out to foil the U-boats of the Hun. Tonnage has become so important that ships that were virtually in the "boneyard," as a sailor would say, have been refitted. The sailing ship is cheaper to operate than a steamer and has hung on doggedly, despite the rapid increase in steam-propelled bottoms. The war has accentuated the importance of sailing ships. The veterans of the forties and fifties are again coming into their own.

Chinese Poultrymen Preserve Duck Eggs.

Chinese poultrymen preserve duck eggs fresh for many months by coating them with a mixture of ashes, tea dust, clay, salt and lime.

SOMERSAULTS IN THE CLOUDS

SENSATION OF LOOPING THE LOOP 5,000 FEET UP.

Herbert Sykes, the Well-Known British Air Pilot, Recounts Some Experiences.

Why do I like looping the loop? Well, because I like it, that's the reason, and because a fellow must have something to amuse himself with up in the clouds, where it's pretty lonely if you are content to set on an even keel, with nothing but the noise of the engine to keep you company, says Herbert Sykes, whose duty it is to test aeroplanes before they are delivered to the fighting forces.

Looping is the joy of my existence, and it is my intention to keep on doing it until I have created a record which will take a lot of beating. What I want to do is to climb upstairs to about five thousand feet and do somersaults all the way home. My record stands at thirty in one circle, and before I achieved it I did about twenty-five, and finished up the evening by looping the loop on quite a different machine to any I have ever seen in the air. Like to hear the story? It is rather amusing.

A Fly'n-Eye View.

One night, when I was on my way home with my 'bus, I thought I would turn over, just by way of relieving the motonony, and so I jammed her nose down and got her over comfortably on her back.

Almost simultaneously I heard a crack behind, and, jumping to the conclusion that there had been an accident to the rudder, I turned my head round to look.

It was a thing I had never done before, and what I saw was one of the greatest revelations of my life. My range of vision was amazing, and everything I saw had such a weird effect that I realized I had made a wonderful discovery. What I had heard was merely a bit of mud, which had dropped down and struck the tail, and as the latter seemed to be coming up towards me, and everything below taking on a new look, the excitement of the new experience got such a hold on me that I went on looping and looping, and finding out for myself the exact sensations of a fly on the ceiling, until I realized it was time to flatten out.

Still Going Strong.

By this time it was getting dark, and as I could not see my hangar, I was forced to fly on and on for miles until I could make out a safe place in which to land.

In the meantime there was the greatest consternation at the aerodrome. All my friends, who had been watching me coming down in somersaults, were hurriedly throwing stretchers into motor-cars and dashing off to find anything that might be left of poor Sykes.

Hither and thither they went scouring the country, and, to make matters all the worse, it took me about an hour to find a 'phone, and another to get a connection when I found it. I met part of the lamenting crowd on my way home, convinced them that all was well, and after supper I decided to go back to Shepperton, where I had left my aeroplane, and put a cover over it for the night, as it had commenced to rain.

An Unexpected Loop.

We set out on a light car, and as the roads were muddy and full of holes, made the journey on the rail-ator. Everything went all serene until the journey back, when, with your humble servant still sitting on the radiator, the car dived into a particularly deep pocket in the road, and before it stopped dead turned over three times. I was still sitting on it when it settled down peacefully, so I think I can lay claim to being the only aviator who has looped the loop on a motor car.

There is really nothing except exhilaration and excitement in looping. I know it is difficult to convince landsmen that this is so. But come up with me, and I assure you that you won't want to go home without doing one or two stunts to finish up the trip.

I have taken three girls up who had never seen an aeroplane in their lives before, and each one of them finished up with my machine tying a lover's knot in the air. Fact, I assure you! The first girl I took upstairs was enjoying herself immensely till I gave my machine a dip and looked round, with a glance which could easily be interpreted to mean "Shall we reverse?" Her face went very pale, she looked worried, and shook her head frantically.

Away we flew, and when I thought she had settled down a bit I jammed the nose down again and shot round my head. Her reply was even more emphatic, so on we flew until I thought I would make a third attempt to win her consent.

This time there was a sparkle of anticipation in her eyes, and though her face was still pale, it looked determined. At a nod of approval from her I began to loop, and before we reached the aerodrome that little lady had made three somersaults. She told me she liked the sensation immensely, and would not have missed it for worlds.

A Mild Flistation.

"That is what they all say," said I, I suppose I must have the knack of inspiring confidence, for people who have vowed that nothing will ever persuade them to fly express the desire for me to take them upstairs after I have talked to them for a minute or two.

Once I took two girls up at the same time, and the trip was one of the most enjoyable I have made, although I was tickled to death most of the time. The girls weighed about ten stone each, and as one would not go up without the other, I was at a loss what to do at first. There was no room in the machine for them to sit side by side, but, as usual, I found a way out of the difficulty!

Nature having compressed what what there is of me into small bulk, I am forced to use cushions to enable me to see over the front. So I simply removed the three of them, put one lady in the pilot seat and sat on her lap. Her friend sat behind us. Everything went well when we were climbing, but when we were in the air I found my cushion a bit nervy. She was trembling in every limb, and every time the machine rocked she put her arms round my waist and hugged me tight.

The Tale That Failed.

Oh, yes, it was nice and all that, and as I had never been hugged in the air by a girl before I took my hand off the control, and, slipping it into the hand of the lady, I squeezed it in the fashion most approved by readers of Aunt Ermyntrude's penny novels, and thus assured the maiden that she was safe in the air with Sykes.

It's a pity there isn't a sequel to this story, but although I'm a daring enough chap in the clouds with a lady, I'm not a bit of good at love-making on dry land.

COMBAT CHILD MURDERERS.

Safeguarding School Children of England During Air Raids.

A bell rings sharply in the schoolroom. Fifty chubby, childish faces are turned toward their teacher. Somewhere overhead drone the motors of airplanes, British and German. The children at a signal slide from their desks and lie prone in the aisles. Their little faces are preternaturally solemn, save where here and there an irrepressible youngster persists in giggling. For the half a hundred children are lying face downward to save themselves from the splinters that will ensue upon a German airman's bomb alighting upon the school.

When the Huns are abroad in England—and air raids are a frequent occurrence—every precaution is taken to safeguard the school children, says Popular Science. The whole nation shrinks from the consequences of a bomb alighting in any of the coast town grammar schools. Yet every step that British ingenuity can suggest has been taken to safeguard the tiny youngsters from the darts, bombs and shrapnel of the Hunnish airmen.

The desks themselves afford considerable protection from flying splinters or falling beams. Each child is coached, accordingly, to lie prone upon the floor in the shelter of his or her desk as soon as the police signal is flashed to the schoolroom. In the back yards—where they run if the danger is not too imminent—are huge concrete dugouts, well sheltered with sand bags.

"I know of no other spectacle," says a British army officer, "that better epitomizes the brutality of these slaughters of children than a ruly-poly British youngster in an unfortified town, lying prone upon the floor to protect its body from Hun bombs, and a little child in Belgium trying with terrified and inexperienced fingers to adjust its own gas mask as the hell-pumed green gas rolls nearer."

A SPECIALIZED "TOMMY."

Why the British Army Is a Highly Efficient Fighting Force.

The British Army of to-day is strong for individuality. The enlisted man, as well as the officer, is encouraged to develop himself. Whenever he shows aptitude in any particular line he is given opportunity to let his talents have full swing. This keeps him interested in his work. British soldiers neatly talk shop. They take only casual notice of things outside the big business in which they are engaged.

Tommy is now a scientific, specialized fighting man. He has learned, and is learning every day—tricks of warfare never dreamed of by Kitchener's men. Many of these he invented himself. Others he has acquired from the Germans—but he never halts to improve on the latter, as for example in the fine arts of sniping, gassing, liquid-firing, grenading, and camouflage.

Tommy is cheerful because he is confident. He knows he is a better man than the Boche. He hasn't the slightest doubt about the outcome.

These are some of the reasons why the British fighting machine has reached its present pinnacle of efficiency.

Planes and Kerchiefs.

The principal effect of the recent announcement that the British government had placed orders for 50,000,000 yards of linen for airplane sails has been to indicate a scarcity of handkerchief linens for some time to come. Inasmuch as the fabric weighs about eight ounces to the square yard, the order will cause the consumption of upward of 18,000,000 pounds of linen yarn, or much more than the total of the annual yield of Irish flax.

DOMESTIC SCIENCE AT HOME

Twenty-Fifth Lesson—Children's Foods (Continued.)

The child between the ages of six and fourteen years needs plenty of nourishing food. The body at this time forms new teeth and makes additional demands for bone and muscle structure.

Well-cooked cereals, plenty of milk, home-made bread, well-cooked green vegetables and soups, together with fruit, should form the largest part of the child's diet.

When children reach this age they oftentimes form a dislike for certain foods. Do not seek to convince the child of the goodness or the necessity of eating the food in question; rather try new ways of serving it.

Fried foods should not appear in the child's menu. Large quantities of fat retard digestion. Meat or its equivalent should be served at least once a day, preferably at the noon meal. The average child will demand sweetmeats; therefore it would be well for the mother to have the children help her in making these delectable goodies. Have old-fashioned gingerbread, oatmeal and crumb cookies once in a while.

Do not get into the habit of giving the children a few pennies to buy cheap candies of unknown make and origin.

The boy or girl more than fourteen years of age will require entirely different food. The boy, owing to strenuous exercise, won't plenty of the coarser foods. He will care little or nothing for soups, salads or dainty desserts. He craves meats, potatoes and the plainer and more substantial deserts. It will take care and forethought to arrange the menu of this period of childhood.

The boy will enjoy, for breakfast, hot cakes, cereals, eggs, hash and other homemade dishes. For lunch he likes soups, meats, vegetables and some home-made goodies. For supper he may care to eat macaroni and cheese dishes, vegetables, whole-wheat and rye bread and fruits. Have the children drink plenty of milk, which is a cheap but nutritious food.

The growing girl will require a light, dainty, yet nutritious diet. For breakfast try fruit, cereals, omelet and toast. For lunch she may like soups, salads, whole-wheat or rye bread and dessert. For dinner she should eat meat or its equivalent, vegetables, salad and dessert. Cocoa and chocolate may be given to children in place of tea and coffee.

Use the recipes for Oatmeal Goodies and Crumb Crackers given in the Twelfth Lesson. They are especially suitable for children.

Gingerbread

Here is a two-in-one recipe for making a ginger cake and also some cookies: One cupful molasses, one-half cupful sour milk, five tablespoonfuls shortening, one egg. Put the ingredients in a large bowl and mix thoroughly, then add one teaspoonful of baking soda dissolved in one tablespoonful of water, two teaspoonfuls ginger, one-half teaspoonfuls allspice, one-half teaspoonful salt, one teaspoonful cinnamon, two cupfuls flour. Mix thoroughly. Place two-thirds of the mixture in a bread or cake pan and bake in a moderate oven for thirty-five minutes. To the remainder of the dough add enough flour to roll. Roll one-eighth of an inch thick, then cut with a three-inch cookie cutter and bake on the bottom of an up-turned dripping pan for ten minutes in a hot oven.

Whole-wheat flour may be used in place of the white flour.

War-Time Menus.

Breakfast
Cornmeal Porridge
Toast Marmalade
Tea or Coffee
Dinner
Fried Cod
Baked Potatoes Stewed Tomatoes and Onions
Tapioca Pudding
Supper
Turkish Rice Brown Bread
Butter Oatmeal Cakes Apple Sauce
Tea

Turkish Rice.—Wash and drain one-half cup rice; cook in one tablespoon dripping until brown; add one cup boiling water, and steam until water is absorbed. Add one and three-fourths cups hot stewed tomatoes, cook until rice is soft, and season with salt and pepper.

Breakfast
Oatmeal Porridge Toast
Stewed Prunes Tea or Coffee
Dinner
Baked Haddock
Stewed Tomatoes Mashed Potatoes
Lemon Snow
Supper
Succotash
Bran Bread and Butter Baked Apples
Tea

Succotash.—1 can of corn, 1 cup milk, 1 tablespoon butter, pepper and salt to taste. Cook slowly for ten minutes. Add an equal amount of cooked beans. Serve hot.

Breakfast
Oatmeal Porridge Toast
Tea or Coffee
Dinner
Oriental Stew Carrots Potatoes
Baked Apples
Supper
Corn, Tomato and Cheese
Stewed Prunes Toast Tea

Corn, Tomato and Cheese.—¾ cup corn, 1 slice onion grated, ½ teaspoon pepper, ½ cup strained tomato pulp, 1 teaspoon salt, 1 cup grated cheese, 3 level tablespoons of sweet dripping. Melt the dripping, add the corn, tomato, salt, pepper and onion. Cook for a few minutes. Toast slices of bread and when ready to serve add the cheese to the mixture and as soon as it is ready remove from the fire, and pour over the toast.

Oriental Stew.—2 cups cold mutton, cut in cubes, 1 cup of water, 2 tablespoons dripping, 1 chopped onion, 2 small cold potatoes sliced, 1 cup cooked peas, ½ cup rice. Season with salt, pepper and a very little curry powder, if liked. While stew is heating boil one-half cup of rice. When tender, put into hot vegetable dish, hollow out the centre, and fill with the stew. Serve at once.

The Useful Cranberry.

Winter is the season of cranberries and they are very valuable in the diet when other kinds of fresh fruit are not plentiful. They contain iron and acid and can be used in so many ways that they ought not to be passed over even when sugar is scarce. They can be canned either cooked or uncooked although few housewives are aware of this.

To can them uncooked wash and pick over the berries. Then put them in jars and let cold water run over them for about ten minutes. Fill with cold water and seal.

In Scandinavia cranberries are dried by being stringed. They are used first for Christmas decorations on the tree. Then they are hung up to dry.

Cranberries make a good filling for pies and tarts. They combine well with other kinds of fruit in preserves and jams. In sauce for a pudding, in a jelly, added to apple sauce or plain snow pudding or frozen into a sherbet, cranberries are excellent.

To make cranberry pudding allow two eggs, a little salt and 4 tablespoons of flour to a pint of cold milk, beat smooth and add a cup of chopped, uncooked cranberries. Steam two hours and serve with sauce or syrup.

The King of Space

An albatross in a storm is a wonderful sight. No matter how furious the gale, no matter how fierce the hurricane squalls of Cape Horn, the great bird soars up against the blast grim and serene. Then when he comes sweeping down on the wings of the gale at a speed so tremendous that it cannot be less than 80 or 90 miles an hour, when, describing a low but immense circle, with the tip of his long-wing just brushing the top of the giant waves, he again takes his flight upward against the storm. No living creature conveys the idea of boundless freedom so perfectly as the King of Space, the Wandering Albatross.

Many People Make a B-Line

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Mistakes in Buying Land.

One of the first things to consider when planning to go to a new place, is to find out whether that particular section of the country is suited to the kind of farming you propose to do. Next, find out whether there is a good market for the things you will grow. Then there is the all-important question, the health of the community; next, the moral and social conditions of the people.

Many people who change locations are induced to do so by some real estate agent. The individual decides that he wants to go to some other place to live, and writes to maybe a dozen real estate agents in as many different places; and the agent that claims the most impossible things for his special section of country is the one that gets the most consideration in for too many instances. As I have had some experience with this, I want to give some advice to people who contemplate moving to a new location.

Never buy until you are sure that you have the kind of land you need for your particular kind of farming; don't buy land with the idea of growing crops that you know nothing about. When you go to a new location to look at a piece of land with the idea of buying it, never be in too big a hurry; better pay a few days' hotel bill than to lose a few thousand dollars in the deal.

Now let me say that it is an easy matter to get fooled in regard to values in farming land. You may see a farm that looks as good as farms selling for $200 per acre near your old home, and in fact it may be just as fertile; but that is no proof that it is worth as much locally or anything near it. While it may produce as much per acre, you may not have a market for your crops. There are too many things that influence the values of land for me to try to call attention to them all. The best way to find out the value of the land is to go and talk privately to the people who own land around the piece you are thinking of buying. Ask them all about it, what it ought to sell for, etc. Next, go to the local banker and ask him what the land you want to buy is worth, and find out how much money he would loan you on it. Then go to the tax books and find out what the taxes are on the property, and what per cent. of value property in that county is taxed. Better take this trouble than to pay two or three times the value of the property.

Another big mistake many people make in buying farms, is to buy a too expensive farm for the amount of capital they have. You can take a very little money and buy a large or high-priced farm. You pay down all the money you have as first payment, then you find that you have to go in debt for your supplies. When your first note comes due you can not meet it; hence you lose what you paid down on the place. If you had bought a smaller and cheaper farm you would have had no trouble in meeting the payments. Better buy a small place at first. And never pay out all your money—keep enough to run you until you make a crop. You can make more money if you have a little money to use as you go. Go slow at first; it is the safest way.

Poultry

As the poultryman starts the new year, it is advisable that he start operations on a well-planned system. System saves both time and money, and makes the work more pleasant and much easier. At this time of the year it is not always the most pleasant task to go out to do the chores among the poultry, but the man who takes a deep interest in the work goes about it cheerfully, just the same.

On days that are intensely cold, or when there are high winds or cold rains, or if there is snow on the ground, it is best to keep the fowls indoors. If they have plenty of house room, and a good supply of litter to encourage scratching, the hens will not only busy themselves, but will warm up their bodies and feel a great deal more comfortable than if allowed to be outdoors. It is the comfortable, contented hen that does good winter laying.

Keep up the good work of culling. Get rid of every undesirable fowl, so as to cut down the expense and encourage the workers. Follow good business principles.

Gather the eggs several times each day, and especially when the days are very cold. Eggs that are intended for incubation should be held in a temperature of 50 degrees.

There is something wrong with pullets that do not start laying this month. Either they have been hatched very late, or they have not been properly fed and cared for.

Do not ship dressed poultry to market before the middle of this month, unless by special order. Many people have not yet fully recovered from the holiday feasts, and chickens do not high feed cost. One lot of pigs which was fed nine parts of corn and one part of tankage gained nearly twice as much as another lot on corn alone, and required almost twenty per cent. less feed for a pound of gain.

It's a poor practise to purchase hogs in small lots and hold them in local stock-yards four or five days until a car-load shipment is collected; facilities for feed and watering are inferior in small yards, the hogs make no further gains on their feed and often suffer actual loss of live weight. Local buyers would do well to specify a certain day for the delivery of hogs from the various farms and load and ship without holding. Farmers also could club together to make up car-load shipments on regular week days.

Hogs

Buttermilk is equal to skim-milk for feeding hogs, while whey is half as valuable. Whey, being low in protein, is not well suited for young pigs and should be fed to older animals.

To keep the hens out of the hog house, hinge the doors at the top, so they will swing both ways. The hogs can push them open and the doors will swing shut after the animals have passed through.

There isn't much curl in the tail of a hungry pig.

Corn, when fed alone to young pigs, produces relatively slow gains at a

The Dairy

When the roughage for dairy cows is clover or alfalfa hay, the grain rations may be 200 pounds corn- and-cob meal, 100 pounds ground oats and 100 pounds gluten feed; or 250 pounds corn-and-cob meal, 100 pounds wheat bran and 100 pounds gluten feed.

Bulls, like bad eggs, are best left strictly alone except when it is necessary to handle them. Give them plenty of exercise and keep them where they can see the other cattle and the attendant. Let them have no chance to try their strength and they will not be so likely to manifest it in an ugly disposition.

There is not much milk in timothy hay. Instead of feeding it to dairy cows, give it to the herd bull and use alfalfa, clover, vetch, cow-pea or velvet-bean hay for the milkers.

Skim-milk, if made into cottage-cheese, furnishes nearly seven times as much protein and nearly as much energy as the dressed pork it would produce. As far as possible, therefore, skim-milk should be used for human food and only the excess fed to live stock.

Sheep Notes

Sheep can be wintered with a smaller use of grain than is needed for other live stock. All depends upon the kind of hay or other roughage used. Coarse-stemmed hays like timothy, red top and blue-grass have very few leaves and therefore are poor sheep feeds. Timothy is unpalatable, causes constipation, and the dry timothy heads work into the wool, causing irritation to the skin, lessening the value of the clip and making shearing difficult. When timothy or other coarse-stemmed hay is fed to sheep in winter quarters, supplementary protein feed is needed. From one-quarter to one-half pound of linseed-meal per sheep daily should be used, depending upon the size and condition of the animal and the other feed used.

A shed opening to the south, built in the corral, protects sheep from cold rains. This equipment, including fence and shed for 100 mature sheep, costs about $125. It affords dog protection, simplifies the breading of ewes, the feeding of grain, the weaning of lambs, and safeguards against exposure to severe weather and, if well drained, provides dry quarters.

Instead of keeping the pancake griddle smoking on the stove while waiting for a late comer, just slip it into your oven and shut the door until you are ready to use it again.

Family Portraits

"Really, you needn't laugh. It's the thing! Everyone says so. Uncle Jim, what are you doing?"

Young Uncle Jim's keen, spectacled eyes revealed sudden alarm.

"Hold on, Eveline!" he implored. "Don't move! There, that's better. Just keep still a minute more and I'll be done."

"But what are you doing?"

"Making your portrait, of course. I—"

Eveline made a dash at the paper. "Why, Uncle Jim, I didn't know you drew! Let me see it!"

Uncle Jim's long arm kept the paper tantalizingly out of reach.

"Curb your impatience, infant. Artists can't be browbeaten. When the masterpiece is finished, it will be put upon exhibition—not before."

"It had better be finished pretty soon!" Eveline threatened ominously.

"It will be. There will be an exhibition of family portraits in the library after dinner. Seven sharp." And Uncle Jim fled to his den, sacred from feminine intrusion except by special invitation.

Uncle Jim was esteemed in the family as a rising young biologist, to say nothing of being a very lovable young fellow to boot. His invitations were never slighted. Even Mr. Evarts joined the procession to the library at seven o'clock.

"He probably has pictures of our skulls or something equally artistic!" Eveline grumbled.

But there were no pictures whatever; indeed, at first sight there was nothing unusual; then Jack gave a shout. He had discovered a sheet of paper covered with Uncle Jim's sprawling writing, under a big interrogation point.

"'Adore,'" he read "'Darling—Crazy over—Crush—The thing—Elegant. Garnish plentifully with italics.'" The boy's voice, full of perplexity, cleared to a whoop of joy. "I know—it's Ev."

"Never mind," Eveline retorted, coloring a little over the applause that greeted the recognition of the salient characteristics of her vocabulary. "Here's another. 'Us fellers—Play ball—Punk—Bonehead—Sport—Airships—You bet!'"

Jack grinned; then he hunted up the next.

"'National—Graft—Statesmanship vs. Politics—Yellow Journalism—Sound—Sane—True Democracy—Rant—Common sense, the rarest virtue under heaven.'"

This time Mr. Evarts joined in the laughter; but Eveline's applause was distinctly absent-minded. Only as she left the room did she give a clue to her thoughts.

"We've enjoyed the exhibition so much, Mr. Kline," she said. "I am expecting to give a little one myself very soon. I do hope you will be able to come."

"Nothing shall keep me away," Uncle Jim responded, with twinkling eyes.

As he took down the "portraits" a few minutes later his eyes were still smiling. Unless he were greatly mistaken, Eveline's would need a rather complete revision before very long.

The Load Line.

"How about a walk till dinner time, Jess?"

Jessica pushed back the pile of papers on her desk and turned a tired face to her uncle.

"I've no right to," she said doubtfully. "Look at all the work waiting! But my head does ache, and you will be here only a few days. I'm afraid I can't resist the temptation."

"That's right," her uncle agreed heartily. "I'll give you five minutes to get ready. There's going to be a great sunset, and it will be wonderful down by the water. Besides, I have an errand that way."

Jessica was prompt; it was not quite five minutes later that the two were on their way to the wharves. Even before they caught the breath from the bay a bit of color crept into the girl's face, and a little of her weariness fell away from her. But the trouble in her eyes was still there. Her uncle, talking lightly of one thing and another, was in reality waiting; and presently the outburst came.

"Uncle Andrew," Jessica cried passionately, "how do you stand it?"

"Stand what, little girl?" her uncle replied.

"All the sin and suffering and pain in the world. If I find it so hard here where I see so little, if I feel the burden of it all the time, how do you stand it over there in China?"

They were down by the wharves then. Before them were a dozen vessels rocking slowly on the tide; some, already loaded, lay close to the water, but many of them sat high, and all those showed marks upon their hulls. Her uncle pointed to one of them.

"Do you see those marks?" he asked. "Do you know what they are for?"

The girl shook her head.

"They are the marks that indicate the capacity of a vessel—the amount of burden that it may legally carry. You will see that they are not the same; the limit of safety differs in different vessels. But wherever the line is, its place has been carefully computed, and it is a crime to send that vessel to sea overloaded. However great the amount of cargo waiting to be transported, no vessel can carry more than its own appointed share; no matter what the urgency, to carry more is a crime.

"It is God's world, child, not ours. We have a certain amount to be responsible for, but not more. To try to take more than God gives us, to risk health and perhaps even life, and in consequence the defeat of God's plan for you or for me, that is to load our lives beyond the safety line—to do in the moral world what is a crime in the physical world. Here's my man coming. Will you wait here for me? I'll be back in ten minutes."

Her uncle and the other man disappeared behind a pile of freight. Jessica waited, watching the vessels in the bay.

Fencing in the Garden.

Another year's use of our fenced-in garden has proved that the expenditure for fence wire, posts, and labor required to fence it was a good business move, says a successful farmer. Our garden is twenty rods long and four rods wide, fenced with strong four-foot woven wire that will turn hogs, chickens, or any stock, with the strand of barbed wire six inches above the woven wire. The ends are enclosed with substantially made panels of the same fencing, which allows of their easy removal for plowing and cultivating.

There is no longer worry and damage from our own poultry, stock, or dogs, or those of our neighbors, and the permanent support for vining plants furnished by the fence is worth the effort of fencing in itself. Furthermore, our chickens can now have free range for a much greater portion of the year than before the hen-proof garden fence was erected.

If a Horse Steps on a Nail.

If one of your horses steps on a nail, remove the nail as soon as possible and thoroughly cleanse the wound. If the horse limps, investigate the cause. The removal of the nail can easily be accomplished by the ordinary claw hammer, a small block of wood being used as a fulcrum over which to pry. If the nail is not too large a pair of pliers is suitable for this work.

If not cared for immediately the wound may cause lockjaw or permanent lameness. For cleansing the wound, a syringe and warm water may be used if care is taken to cleanse thoroughly. The best method is to apply liberally and coat-tar product, as it is effective in breaking up the infection. If a nail wound is given immediate and careful attention the life of a horse is usually safe.

To heat dishes quickly put them into hot water. This is a safer and better plan than heating them in the oven.

It is not a bit too early to get in touch with dependable nursery concerns and seed houses to get prices and full information about the trees, shrubbery, flowering plants, and seeds that will be wanted early next spring. Do it now!

SELLING STUMPS

Turning a Waste Product Into Dollars and Cents.

By Lawrence C. Longstreet

One day about a year ago found me with a lone dollar in my pocket and no work in sight. After doing some hard thinking as to how I could add to my available funds, I thought of some pine stumps on land belonging to a milling concern. On inquiry I found that the owner would be very glad to get rid of those stumps.

Accordingly, I invested my dollar in as much dynamite, fuse and caps as it would buy. That wasn't very much, but it was sufficient to blow out and break up three full loads of the stumps, that I was able to sell at $1.50 per load as fast as I delivered them. In short, in less than a half day, I converted my original dollar into $4.50. With that capital I purchased a larger supply of explosives, and repeated the operation on a larger scale. Before I finished I had a pocketful of money in the place where the lone dollar had formerly reposed.

The average-sized stump in this part of the country will yield a good one-horse load of the finest kind of firewood. When the stumps are blasted out they are broken up into pieces about right for firewood. The smaller pieces can be used in the kitchen stove, and the larger ones in the sheet-iron heaters commonly used in this locality. The wood readily sells for $1.50 a load here, although I am told that in the large towns a two-horse load of the wood brings $8. It takes about six stumps to make a two-horse load. They can be blasted in from one to two hours' time, and at a cost that will enable the blaster to more than double his money by selling the wood.

It is easily possible to make money both ways in a business of this kind. Men that have stumps on their land are usually willing to pay a fair price to have them taken out. This will at least cover the cost of the work, and the amount realized from the sale of the wood should be clear profit.

It seems strange to me that so many farmers permit stumps to remain in their fields when the stumps can be taken out at no expense to the farm owner. By that I mean the stump wood can be sold for more than it costs to blast it out. I believe that if farmers owning stump land knew this, there would be more clearing done.

FUNNY FOLD-UP

CUT OUT AND FOLD ON DOTTED LINES

Our Will was fishing in the brook,
When 'las-a-lack he snagged his hook.
But did he hesitate? Not he;
Just waded in and set it free.

GOOD HEALTH QUESTION BOX

By John H. Huber, M.A., M.D.

Dr. Huber will answer all signed letters pertaining to health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John H. Huber, care of Wilson Publishing Co., 73 West Adelaide St., Toronto.

Every child has the right to be protected from disease.

Baby's Development II.

Second Month: Squint in occasional until the end of this month. Baby now recognizes human voices, turns its head toward sounds. Pleased with music and with human faces—not however with all it sees. Sleeps three, sometimes five or six hours. Tickle it about the eighth week and it will laugh. Clasps with its forefinger at eighth week. First consonants from forty-third to fifty-first days as am-ma, ta-ho, gooo, ara.

Third Month: Sixty-first day, cry of joy at sight of mother and father. Eyelids not completely filled when it looks up. Accommodates its eyesight to light and distance at ninth week. Notes the ticking of a watch at ninth week; listens with absorbed attention. Now some considerable baby!

Fourth Month: Eye-movements perfect. Objects seized are moved toward the eyes. Grasps at objects too distant. Enjoys seeing itself in mirror; girl babies exhibit this phenomenon earlier and more insistently than boy babies. Can grasp with thumb contraposed to hand at fourteenth week. Can hold up head without support. Sits with back supported at fourteenth week. Begins to imitate.

Fifth Month: Discriminates strangers. Looks inquiringly. Takes pleasure in crumpling and tearing newspapers, rings a bell with zest; likes to pull hair; has been known to pretty nearly if not altogether eviscerate an adult ear or uproot a mustache. Can sleep ten to eleven hours without food. Desire shown by stretching out arms. Seizes and carries objects to mouth. Enlarges its vocabulary with the consonants l and k.

Sixth Month: Raises itself in sitting posture. Laughs and raises and drops arms when pleasure is great. "Crows" with pleasure. Compares image of father in mirror with original.

QUESTIONS AND ANSWERS.

Have it Snipped off.

I have been troubled for the past yet appeal to them.

4 years with an elongated palate, I have painted it with various remedies. I have been advised to have it snipped, but others claim this would cause an impediment of speech. I find it worse when I lie down at night.

Answer—Be sure first there is no infectious inflammation of the upper air passages then have a good doctor snip it off. Applications having been tried and found wanting, this is the best way. It is possible for an extra long palate to obstruct breathing seriously during sleep. No speech difficulty will follow amputation.

Winter Itch

I have the winter itch of which you write—an itchy stinging sensation nearly all the time; and my finger nails look like warped planks after a rain. My hands crack easily in winter. I have to be careful about putting them in water. My skin is smooth enough in the summer but chaps with the first Norther in the Fall.

Answer—Eczema, fissured, of the hands; am mailing you advice. As you note, water makes the ailment worse, always does in cases of eczema.

When Your Shoes Get Wet.

Many who do not like to wear rubbers take a chance of not getting caught in a storm and once in a while the shoes get wet. Drying directly over a register or near the stove makes the leather hard and brittle, in which case it will soon crack, so dry slowly in warm air, stretching upon shoe trees.

An old-time and very good method used by our forefathers is to fill the damp shoe with hot oats; the grain soon absorbs the moisture and the leather is left pliable. After shoes are wet give them a treatment of yellow vaseline. This will not injure the finest kid, but, of course, is not feasible for colored shoes, as it darkens tan or brown and makes gray or champagne muddy and dirty-looking.

Colored shoes are best dried by stuffing with tissue paper, after which they should be treated with the dressing intended for that particular leather and finish.

To wear wet shoes is to court a cold, for the feet are very sensitive and dampness close against them constructs and closes the pores. It is a peculiar fact that one seldom gets cold when the shoes become damp with salt water. This is because the salt is in itself a tonic, and one with damp shoes usually walks upon the dry sand after, so the moisture is pretty well absorbed.

With the coming of cold weather coughs and colds are sure to be prevalent, many induced by wearing damp shoes. Coughs and colds lead to more serious complications. There is a deal of truth in the advertisement which says, "It was the cough that carried him off."

Take good care of the shoes; alternate one pair with another frequently, and one step will have been taken toward maintaining good health.

Old-Time Corn Bread.

Hotel and restaurant men as well as housewives will find the following corn bread excellent for serving cold on wheatless days. In olden times the Saturday's baking was incomplete if this corn bread and a big crock of well-browned beans were not baked:

One quart rye flour, two quarts Indian corn meal (yellow), put in deep pan; scald by pouring over it just enough boiling water to merely wet it, not make a batter, stirring constantly with a spoon. When it is cool enough so it will not scald the yeast add one-half teacupful molasses, two teaspoonfuls salt, one of soda, one cup yeast. Make as stiff as can be stirred with a spoon by adding warm water and let rise over night. Then turn into a large, well-greased pan, smooth the top with the hand dipped in cold water, then with a spoon spread melted drippings over the top. Let it stand for a while to rise again, then bake in a moderate oven slowly for five or six hours. If preferred, graham flour may be used instead of rye. This bread in olden times was baked in the iron kettles on the hearth before the fire and coals heaped on the lid.

Cost of a Soldier.

It costs Uncle Sam approximately $5,000 to put a soldier in England, as against $3,700 to place a Canadian soldier in the same place, according to recent figures given out by the War Department. So it is expensive to train and equip a man and send him overseas, unless he is physically fit and stays so.

—Canadian millers have commenced the manufacture of standard flour under the food regulations. A good many people have heroically hauled home supplies of the high-grade flour to last them a year or more.

—Some radical views on rural education were expressed by Prof. S. B. McCready, at a meeting of the Corn Growers' Association at Petrolea last week. Prof. McCready is secretary of the organization of resources committee, and formerly of the London Collegiate institute. He characterized the present rural school, with one teacher, as a crime, and showed the importance of consolidating schools. One large school to serve half a dozen rural communities, would, he claimed, be of far more value than the present one-teacher school. With larger schools, he said, the boys and girls could be kept in the country, and need not be sent to the cities. The principal of every rural school should be a graduate of the Ontario Agricultural College, and a man thoroughly familiar with farming in all its details. Instead of teaching country boys and girls a lot of subjects which lead them away from the farm, the subjects should be along practical lines of agriculture, farm bookkeeping and domestic science. Co-operation should be applied to education as well as other things and the results would be most satisfactory.

—The failure of Britain to crush out the drink trade is so generally and deeply deplored that it would be difficult to find a person who is satisfied with the British people on this score. However, much we may fume about, we can do very little else to bring about an improvement. But here is one thing the citizens of Paisley and district can do. That is, to support the W.C.T.U., in their patriotic service of supplying soldiers at the front with free drinks of the non-alcoholic kinds, such as coffee and cocoa. Our readers have all heard something of this good work, also of the silver trinket and thimble fund to which all are asked to contribute on Feb. 1st and 2nd. See the particulars of this little campaign, as announced on the first page of this paper, and prepare to use your old silverware to make ammunition for the W.C.T.U. and Y.M.C.A. fortresses against strong drink.

—The motion introduced in the Quebec Legislature, advancing the idea of secession of that province from confederation, did not stir up much of a row after all, its effect being wholly negatived by the speech of Sir Lomer Gouin, who is thoroughly alive to the folly it would be for Quebec to separate itself from the Dominion. In time the Quebec legislators may see that they are pursuing an unconstitutional course in attempting to force upon Ontario and the other provinces the school regulations favoring French teaching. The political troubles arising between the French and English speaking sections of Canada are due to the agitation of extremists only, which should receive no encouragement anywhere.

—Those who consider that the Canadian Food Controller has done nothing to help the war might try out individual plans of their own. There is no objection to anyone doing that. But each should be certain that his or her plan will be of some benefit to the nation as well as to themselves. Merely hoarding and saving, or denying oneself necessary things with the object of saving expenditure, is not going to accomplish any good unless there is a willingness to apply the savings to patriotic purposes. Piling up a bank account is not conserving food or war material. This is not a do-nothing time, but a time to do many things that we never did before. Economy must be exercised in various ways by everyone, but the first economy that is called for pertains to the use of foodstuffs, fuels, wearing materials, etc., etc. Saving of these is vitally essential to the equipment and maintenance of the greatest war machine the world has ever seen. Without sacrifice on our part the success of the stupendous operations in which our fighting men are engaged will assuredly be endangered. Not only must we cut down our consumption of food, etc., but we must do our best to produce or help to produce wheat, potatoes, cattle, hogs, butter, cheese, vegetables, and leave a large surplus of staple products for export and army use.

The fixed price of newsprint paper has been increased from $2 50 to $2.85 per hundred pounds, which is an addition to cost that will be felt by every newspaper in Canada. The paper-makers have won in this a prolonged fight, and the results will be larger dividends for the companies' stockholders. Since the government commission has the power to fix prices of paper, many are asking why the price of foodstuffs, etc, cannot also be fixed, with a view to cutting out manipulation by profiteers. Should the war continue over another harvest, with no more prospect of an early conclusion than just now, it is quite probable that the government may be obliged to do a great deal more than they have done to "control" prices. There should be a stronger "whip" our eatable raw materials should be regulated in price as well as the paper for our readables.

—Conscription of labor to help in the food production campaign is proposed in some quarters. To a certain extent that is already being done by the tribunals, who exempted thousands of young men from military service on condition that they get on the land or remain on the land. Out of Ontario's population of 2,500,000 there are about 1,000,000 engaged in farming. Taking for granted that every man thus engaged is doing his utmost for food production, it stands to reason that with each one working out his own plans there is a tremendous waste of effort through lack of system and co operation. Our armies of producers should almost be organized on a plan similar to that of our armies of fighters. It is through such industrial organization that Germany is able to continue to defy the world in arms and maintain her food supply. While we may not look for any move to form our farmers up into battalions of land workers, it may become necessary, if the struggle continues much longer, to call every able bodied young man into the army and conscript many other classes of labor to do the work on the land. Not only will it be necessary for the Government to assist farmers to procure workers, but also to formulate a scheme for raising grain extensively on the great stretches of fertile vacant land in the west. Youths under military age, men over the age, also girls and young women can all be trained to assist either the farmers or such government plans on the food line, and their services be made a great factor in beating the Germans.

—The fuel situation for Canada does not improve any, and the middle of this exceptionally severe winter finds nearly every community in difficulty to obtain supplies of coal and wood sufficient to keep the people warm. While we are not actually brought to suffering yet, our troubles so far are enough to make us think of the future. We have still large areas of forests, but these are located rather distant from the centres of population, and our great coal fields are more distant from the majority of consumers. There is plenty of peat in Ontario which could be utilized if handled properly. The only immediately available fuel in Ontario is the small wood lots on farms, which for lack of labor are not being cut into as much this winter as in the past. Farmers, however, should be able by co-operation to get their fuel supply from this source, and also help to supply townspeople. But it is not only in cutting wood that the farmers should busy themselves. The conservation and increase of wood lots is an important phase of the fuel question. Young timber grows readily and it is possible to encourage the development of a nice bit of new timber land without much expenditure of money or labor. Towns and villages, too, might with profit grow large numbers of extra shade trees on the streets and in parks that could be cut for fuel in a time of shortage such as we are having this winter. The Government can do a great deal to prevent and relieve distress by controlling and directing transportation, also preserving the large forests, but the whole responsibility should not necessarily be thrown upon the governments and railways when individual efforts can be of material assistance in providing for both the present and the future.

—The Union Government at Ottawa have an imperative duty before them to take the drastic steps needed to increase food production. The cabinet was in session all day Saturday considering the situation, and the new food controller, Mr. Thomson, was present at the deliberation. It is known that Hon. A. T. Crerar, Minister of Agriculture has been working on plans for a far-reaching and important campaign for increased production this year and has conferred with representatives of provincial agricultural departments in connection with this matter. Hon. Duncan Marshall attended the conference at Ottawa, gives out the information that "a public announcement will shortly be made as to what steps the Dominion Government will take. Several propositions were under discussion which I am unable to discuss with you, but the questions of farm help and greater production were the chief matters discussed."

NURSING THE WOUNDED

It takes strength and courage to nurse the wounded. Every woman should make herself fit for war's call at home or abroad. Health and strength are within the reach of every woman. They are brought to you by Dr. Pierce's Favorite Prescription. Take this medicine, and there's a safe and certain remedy for the chronic weaknesses, derangements, and distresses peculiar to women. It will build up, strengthen, and invigorate every "run-down" or delicate woman. It regulates the natural functions.

At some period in her life, a woman requires a special tonic and nervine.

If you're a tired or afflicted woman, turn to "Favorite Prescription," you will find it never fails to benefit. Sold in tablet or liquid form. Send Dr. Pierce, Pres. Invalids' Hotel and Surgical Institute, Buffalo, N. Y., (or Invalids' Hotel, Bridgeburg, Ont.) 10c for trial pkg. tablets.

Toronto, Ont—"I found 'Favorite Prescription' a splendid tonic for women. Some time ago I became all run-down, weak, nervous and could not eat, or sleep. Had severe headaches, pains in my right side. I took Favorite Prescription and it completely built me up in health and relieved me of all the annoying pains and aches."—Mrs. Thomas Grantham, 425 Front St.

Niagara Falls, Ont.—"During middle age, I began to go down in health, I would become dizzy, black spots would appear before my eyes. I also suffered with severe pains in the back of my head and my back would ache constantly. I was most miserable when I began taking Favorite Prescription, but by its use I came through this critical period in a good healthy condition. It is a splendid medicine for women at this time of life."—Mrs. W. F. Tretter, 187 Bridge St.

COUNTY COUNCIL

The January Session of the County Council was held in Walkerton, opening on Tuesday, the 22nd inst., according to Statute. All members were present and ready for business.

The Clerk asked for nominations for Warden and the following were nominated: Messrs. D. Triplan of Greenock, W. R. Brown of Chesley, D. B. McDonald of Tiverton, D. G. Craig of Amabel, G. Kastner of Wiarton, Jas. Douglas of Hepworth, M. Flisinger of Carrick. Messrs. McDonald, Craig, Phelan and Brown retired, with an intimation that they would probably be in the field in the future, perhaps next year. Two votes were necessary to make a choice, Mr. Flisinger relinquishing after the first vote, and on the second vote Mr. Kastner had a small lead over Mr. Douglas and was declared elected Warden for 1918.

STANDING COMMITTEES FOR 1918

Finance—Messrs. Brown, Forbes, Ferguson, Johnston Robert, Mosing, Munn and Rowand.

Road and Bridge—Messrs. Johnson Jas, Scott, Phelan, Lewis, Flisinger, Craig, Case, Willoughby, Rattle, Christie, Johnston Jos.

House of Refuge—Messrs. Henry, Flisinger and the Warden.

Equalization and Salaries—Messrs. McDonald D. A., Douglas Jas., Moore, Dobson, Pattison, Johnston Robt., Steele.

Petitions and By-Laws—Messrs. Douglas John, McDonald Dan. B., Whicher, Landon, Thomson.

Education and Printing—Messrs. Grant, Douglas Jas., Dobson, Brown, Ferguson, Pattison, Henry.

Property — Messrs. Rowand, Douglas John, Phelan, McDonald D. A., Case.

Warden's—Messrs. Johnston Jas., Christie, Forbes.

Hugh McLaren and W. J. Taylor were re-elected County Auditors and A. E. McNab and N. Robertson Auditors of Criminal Justice Accounts.

High School Trustees were appointed as follows: Walkerton H.S., Thos. Phelan; Port Elgin H.S., Neil McGillivray; Kincardine H. S., Rev. T. H. Farr; Chesley H. S., C. J. Mickle; Wiarton H. S., T. A. Pickard.

The usual grants were made to Agricultural Societies, Women's Institutes, Boards of Agriculture, Libraries and Teachers' Institutes.

It was ordered that a form be printed for the Women's Societies doing work for the soldiers showing what was required in order to get the grant from the County. This form can now be obtained from any Reeve or from the Secretary, Mr. Norman Robertson, Walkerton. All applications for this grant should be made on this form, thus saving applicants and officials much trouble and correspondence.

The question of grants to Patriotic purposes was considered at length. It was decided to make a grant of $100,000, same as last year, divided: Patriotic Fund $75,000, Belgian Relief $5,000, Y.M.C.A. $5,000, Navy Relief $2,000, and hold balance in reserve for such Patriotic objects as Council may deem best during the year. Of this amount $60,000 will be raised by ten year debentures and the balance in this year's rates, Council believing part of these amounts should be raised now and not altogether left for the future.

The high cost of living has been responsible for small increases in the salaries of the Clerk, Treasurer, Caretaker of County Buildings and Keeper and Matron of the House of Refuge.

Messrs. C. E. Whicher of Albemarle, D. A. McDonald of Kinloss, and Wm. Case of Culross, were appointed County Highways Committee. The chief duties of the Committee will be to advise with the Superintendent as to the work to be done and to audit all accounts in connection with Co Highways. It is not the intention this year to do any material work on the system but to keep same in proper repair and any work that has to be done will be done with a view to permanency.

Special grants were made to Tiverton of $100, to boundary Carrick and Culross $100, and the usual grant of $125 each to Lindsay and St Edmunds.

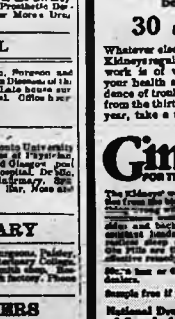
At the request of Mr Scott, Kincardine Tp, a committee was appointed to investigate the bridge on the South Line as to whether or not it is a county bridge.

Mr E Briggs was appointed High Constable.

A committee was appointed to see what arrangements can be made, if any, for two or more adjoining counties to amalgamate for the purpose of maintaining joint Children's Shelter and Gaols.

On motion of Messrs Jas Douglas and Moore a petition was sent to the government asking that the pay of witnesses summoned to attend court be made the same as the pay of jurors, witnesses at present not getting enough to pay actual expenses.

The House of Refuge committee was instructed to have the cemetery of the House of Refuge levelled and put into proper condition.



The attention of the Food Controller was, on motion of Messrs Christie and Rowand, called to the waste of feed at the Union Stock Yards, Toronto.

A large number of motions were made to add certain pieces of road to County Highway System. These were all referred to the Highway Committee to investigate and report at the June Session.

A hearty vote of thanks was paid to Col A E Belcher for the oil painting of himself presented to the council, and urging other prominent pioneers to do likewise.

Council closed a very busy session on Friday and adjourned to meet in Southampton on Monday, 17th June.

P A MALCOMSON, County Clerk

THE KIDNEYS
between
30 and 40

Whatever else you do, keep your Kidneys regular and active. Their work is of vast importance to your health and at the first evidence of trouble, often occurring from the thirtieth to the fortieth year, take a treatment with

GinPills
FOR THE KIDNEYS

The Kidneys' work is to filter impurities from the blood. Symptoms of weakness in the Kidneys may be backache, headache, rheumatic twinges, sallow and baggy complexion, swollen joints, irritability and urinary troubles. Gin Pills are a quick and most effective remedy you can take.

Letters from the Soldiers

Red Cross Work Important

The following letter was addressed to Miss Esther McGillivray and Miss Lizzie Barnes, of 12th Bruce:

1st Can Res, Seaford, Sussex
Dec 26, 1917

DEAR LADIES—Many thanks to you and the Red Cross Society of No 15 for your kindness in once more sending your Christmas box. The box arrived this morning and I have liberally sampled the contents and find them of the best. When I had the pleasure to write you a similar letter a year ago I expressed the hope then that we would all be home for this Christmas, but our hopes have not been realized, for our work is not yet finished. There are some of our boys who have gone out to the front and will not return again, and among the number I was sorry to find Alex McGillivray. I am sure his mother misses him. The price of patriotism is not paid only by the men who fall at the front. There is a sharp and sudden payment and is often paid before they know that their time has come to make the extreme sacrifice, but those who are bereaved pay, if not the most at least the most prolonged price, and I wish to extend my deepest sympathy to his parents and all for their bereavement. I must consider myself extremely fortunate that I have not been in France the past summer. The boys have had a hard time but never have they once failed. I am pleased to know that your Red Cross and other like societies are doing such noble work. Your work is as important to the success which we all hope to eventually achieve as any other branch of the service. Though we cannot look back over the past year with a feeling of any great satisfaction of success which we all expected but failed through no fault of our own, we can still look forward with hope to the future. Kindly convey to your Red Cross Society my heartiest greetings for the New Year,

Yours sincerely,
N McGILLIVRAY

From the 160th Chaplain

The following cheerful epistle has been received by parents and friends of the boys from Bruce at Witley Camp, England:

January 1, 1918

Dear Friend—As Chaplain of the 160th I wish to convey to you Good Wishes and New Year Greetings from the men of the Bruce County Battalion.

We are all looking forward cheerfully and hopefully to the strenuous duties and tasks which 1918 holds in store for us.

I trust that we may have received a bright and helpful message from the people of Canada, through the Rev Dr Neil, Moderator of the Presbyterian Church, and I assured him that you could rely upon our men remaining true to the higher principles instilled into them at home, that I believed the great majority would return to their homes and loved ones better and stronger men because of their sacrifice during this great war.

We are proud of our battalion's recent record. In many respects it stands at the head of the Division. As you no doubt already know it leads by a big margin all battalions both in England and in France in its subscriptions to the Victory War Loan. Not only was this a very loyal and patriotic thing to do, but it is significant of the sobriety and carefulness on the part of the men.

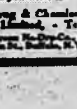
It is a pleasure to me to know that more men attend the Khaki College from our battalion than from any other unit in camp. It may also interest you to know that last Sunday night at our Good-night Service one hundred and sixty-five men were present.

Our men are very eager and impatient for the fray, and to watch them in their drill, bomb throwing, anti-gas protection tests, musketry and other forms of training one is impressed with their "determination to win," that "will to victory."

Our Brigadier tells me that very few battalions in camp can compete with them in a march past.

I heartily agree with those outside our numbers who are constantly assuring me that we have an exceptional group of men. Under the very efficient and genial leadership of Major Moffat, our acting commanding officer, our men lack nothing. He does everything possible for the welfare of all men under his command, and they fully appreciate the constant thoughtfulness of their kindly commander.

I am fully persuaded that Bruce County has every reason to be proud of the 160th Battalion. They greet you and wish you a Happy and Prosperous New Year.



Very sincerely yours,
E F JOHNSTON, Capt.,
Chaplain 160th Batt.

GOOD ROADS IN BRUCE

Subject Well Handled by Reeve Gilbert Christie at Sangeen Nomination Meeting

It must be over 50 years since the county of Bruce adopted a system of county roads under very difficult and trying circumstances, known as the Goderich, Hiora and Durham roads. All honor, we say, to those noble pioneers who had the energy and foresight to build such splendid highways under circumstances as they existed at that time.

For reasons I never could understand those roads were put back on the municipalities, where in many localities they have allowed them to get in a worse condition than some of our township sideroads.

Following the lead of the other provinces of Canada and the states of the Union, many years ago the province of Ontario established a system of good roads. The system has been improved upon from time to time. Those counties that held back have benefited by the experience of those who went in years ago, till now the whole province with the exception of two or three counties, has adopted the system.

It is the opinion of some of the best minds in the county that a mistake was made that Bruce county did not go into the system before those large bridges were built. However, at the June session of the county council it was unanimously decided to enter the system and laid out about 350 miles of road. A resolution was adopted that no work of a permanent nature should be done until after the war.

It was discovered, after the by-law was ratified by the department, that those roads became county roads, and that the municipalities had no jurisdiction over them. And in order to get the benefit of the bonus given by the province, it was necessary to appoint a road superintendent for the county. The province pays 40 per cent of his salary.

Mr Wm Hunter was first appointed to act as superintendent. Mr Hunter resigned and Mr D J Isard was appointed for 1918. The government and, I think, the county treasurer have to be consulted in making this appointment. I think it should be a matter for congratulation that we have the superintendent in this part of the county.

At the first meeting of our council, two years ago, we sent a memorial to the government asking them to return a portion of the auto license they received from the county. In conversation with the Minister later he pointed out to me the unfairness of the proposition. The licenses from Bruce that year were $8,500, while the county of Peel received from the police. The policy of the department is to divide this money among all the counties as they came into the good roads system.

The government will soon have three million dollars spent on the roads, and Bruce has not received one cent. They pay 40 per cent on salaries, machinery and road construction, and 20 per cent on maintenance, and 65 per cent on roads leading to provincial highways. The standard of road required by department is similar to the Goderich road. The concrete taken off, properly drained either two inches or underdrained, plenty of width with a good gravel or crushed stone. We built about a mile under the new standard, this side of Denny's this fall, under the supervision of Mr John Cook and complied with the requirements of the department. The engineer told me it was a first-class piece of road, if it was properly cared for till it gets solid. This is where experience with our system fails. We recommend road drags or graders should be kept on them to keep the gravel in place and level till it gets solid.

The question for us is: Can those roads be built more cheaply by the county than the municipalities? I have paid a good deal of attention to this phase during the last few years, and I came to the conclusion after getting all the information I could, that with proper management, a uniform system of construction and proper equipment, we will have better and cheaper roads than we have under our present system. It is the only way we can get our share of the provincial grant. It will relieve the township of the Goderich, the Burgoyne and Hiora roads, thus giving more money to spend on the township roads. It does not look like good business to be building roads for other counties and receiving nothing in return.

BRUCE TP COUNCIL

Jan 16th 1918

Bruce Tp council elect met in the Tp hall on the above date, viz. Reeve J Johnson, Dep reeve P Dobson, Councillors, Geo Baker, Jas McKenzie and M McNeil.

After subscribing to and making the requisite declaration of qualification and office, council met for the transaction of business:

Minutes of last meetings read, adopted and signed.

A number of communications were read and dealt with.

McNeil—Baker—That the Clerk order 6 copies of the Municipal World and all other necessary supplies for 1918.—Carried.

McKenzie—McNeil—That J B Struthers and J Richardson be auditors for 1918.—Carried.

On motion of McNeil and Dobson the clerk was instructed to advertise for cedar

McKenzie—Dobson—That the clerk ask for tenders for life for 1918. Tenders to state price a yard and be delivered at Underwood.—Carried.

McNeil—Baker—That the sheep valuators for 1917 be re-appointed for the year 1918.—Carried.

McNeil—McKenzie—That we accept the offer of Mr Steinecamp for printing for 1918.—Carried.

Dobson—Baker—That Dr Struthers be Medical Health officer, that J R Hunter be member of the B of H. and that John Neilsell and W J Parrell be sanitary inspectors for 1918.—Carried.

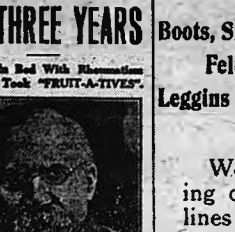
McKenzie—Baker—That Jas Kippen be appointed collector for 1918, and Alex McGillivray be appointed assessor for 1918, collector to furnish bonds satisfactory to council.—Carried.

Baker—McKenzie—That this council pay J G MacKay, 35 8, $12 for road and damages to gate while building W C bridge.

McNeill—Dobson—That the following salaries be paid for 1918, viz. Assessor $100, Collector $100, Auditors $7 each, Clerk $170, Treas $150 and Tp pay for bond, Council meetings $3 and 10c a mile one way, Committee work $3 a day, Caretaker $1.50 for outside meetings, to collect 0.75 for hall for meetings that only pay caretaker's fee, $4 for other meetings.—Carried.

McNeil — McKenzie — That By-laws 253, 253, 254 and 255 as now read be passed.—Carried.

McNeil—McKenzie—That the clerk have the Treas. guarantee bond renewed in the same Co, and James Johnston, reeve, be a committee to examine said bond and take charge of same.—Carried.



A number of accounts were then passed and council adjourned to meet Feby 4th for general business.

A CRIPPLE FOR THREE YEARS

Helpless In Bed With Rheumatism. Until He Took "FRUIT-A-TIVES".

MR. ALEXANDER MUNRO

R.R. No. 1, Lorne, Ont.

"For over three years, I was confined to bed with *Rheumatism*. During that time, I had treatment from a number of doctors, and tried nearly everything I saw advertised to cure Rheumatism, without receiving any benefit.

Finally, I decided to try 'Fruit-a-tives'". Before I had used half a box, I noticed an improvement; the pain was not so severe, and the swelling started to go down.

I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place".

ALEXANDER MUNRO.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Old Sight and Old Age.

Old age is a matter of years
Old sight is a question of glasses
If you find difficulty in reading, while for distance your sight is good you require old sight glasses.
Old sight shows itself at about forty
A competent optician should be consulted.
We examine eyes free and guarantee satisfaction.

That
Erring Time-piece

There is no time like the present to have your watch or clock repaired and regulated if it is out of order. And should it be beyond repair at a reasonable cost, we shall be pleased to sell you a new one to replace it. When time is so valuable as now, not a minute should be lost on account of a defective time-piece.

Our Jewellery stock is always replete with the best lines of goods. Wedding rings and presentation goods a specialty.

For the BOYS & GIRLS

Little Bear and The Woodchuck Babies

Little Bear loved the old Ground Hog, whose other name is woodchuck. The reason why he loved him was because every year, on February 2, Mr. Ground Hog used to wake from his long winter's sleep and go out for a walk. If he saw his shadow, back to bed he went, to sleep six weeks more; but if he did not see his shadow, he travelled joyfully about to tell the world that spring had come.

Little Bear liked to get up early in the year, while there was still snow on the ground, and that is another reason why he loved the old Ground Hog. Every autumn that old Ground Hog used to wink at Little Bear and promise, "Yes, yes, Little Bear, I will call your father early, if I do not have to go back to bed myself for another long nap."

Naturally, Little Bear loved the woodchuck babies, who sometimes played in the woods with him the livelong day; but he always wondered why they laughed when he would say, "It is time now to run home to your mother, little Woodchucks, because my mother is calling me."

At last the old-breed-up Blue Jay told Little Bear that Woodchuck babies are turned out to take care of themselves when they are only a few weeks old. Little Bear was feeling distressed over that news, when Father Ground Hog himself came along and explained that it is a custom in the Woodchuck family, and that no harm comes to the little ones if they obey their parents and stay in the woods; but that if they visit farmers' gardens and eat the farmers' beans and peas, they run the risk of being shot or taken in traps or killed by dogs.

"So long as our children stay in the woods or the meadows, and eat grass and clover, they are safe and happy," he said to Little Bear. "You never saw a little Woodchuck crying!"

Little Bear laughed when he remembered that he never had seen a baby Woodchuck crying.

"I'll take care of the Woodchuck babies," he promised their father, "if you will tell me what traps are like, so I can look for them."

"Very well," said Father Woodchuck, "I will tell you how a steel trap works. It lies on the ground like an open book, only it is hidden by grass and leaves. In the middle of the trap is a little platform or pan, and on that pan is placed something good to eat. When the little Woodchuck sees the good thing to eat, he tries to get it, and in doing it he either steps on the pan or presses it down with his nose. That makes the prong shut quickly, and there the little fellow is caught in the trap. He cannot get away by dragging the trap, because it is fastened to a log or a stump by a chain."

The old Woodchuck then walked away slowly; he was laughing to himself, because he did not believe that there was a steel trap in all that ancient wood.

After Little Bear had told his father and mother about his talk with their old friend, he inquired, "What shall I do if I find a trap?"

Father Bear did not suppose that Little Bear would ever find a trap in the forest; so he laughed and said, "Take a long stick, Little Bear, and let the stick step on the pan and get caught. Then the trap cannot catch anything else for a while."

"I will do it," promised Little Bear, "and I will look and look for traps, so that the baby Woodchucks will be safe."

"If you ever should find a trap," cautioned Mother Bear, "be careful to stand away from it when you poke the stick on the pan. Do it this way." And Mother Bear, with a broom, did her best to show Little Bear how to spring a trap.

She looked so funny, leaning over, thumping the floor with a broom, that Little Bear forgot to feel sorry for the young Woodchucks. Father Bear laughed, too, and when he laughed of course Mother Bear laughed, and straightway the three had a jolly dance.

The next time Little Bear took the baby Woodchucks to play in his playground, he looked and looked and looked for a trap, because he wished to protect the baby Woodchucks, and sure enough, he found one. That is, he saw a most tempting bit of honeycomb, dripping with honey, lying in the grass. For a second he thought of nothing except the honey, and was about to help himself, when he thought of the baby Woodchucks. What if there should be a trap under it to catch them! So he cried out, "Just a moment!" and held back the baby Woodchucks.

Sure enough, when he poked away the leaves and grass, there was the trap, and there was the chain fastened to a stump! And it was such a big trap that little Bear did not dare to spring it with a stick; so home he ran for his father and mother to come and show him how it worked.

When Father Bear saw the trap, he looked steadily into the bushes for a moment, and then, before Little Bear had time to wink, away Father Bear went, crashing after something! The next thing Little Bear knew, four big boys were running like deer through the woods, hop and away!

When Father Bear came back, out of breath and laughing, he pressed the end of his cane on the spring, and—clang! went the trap.

"Little Bear," said Father Bear solemnly, "it is a good thing for you and for us all that you took such good care of the little Woodchucks, because that is a bear trap, and those boys were trying to catch you. But I frightened them so much that they will never venture into your playground again."

Sure enough, they never did. As for the baby Woodchucks, they thanked Little Bear when he taught them how to look out for traps themselves; and then they lived happily for a long time afterwards.

THE WAR ON THE WESTERN FRONT

POSITION OF THE OPPOSING ARMIES.

What Has Happened to End of 1917 in Anglo-French Section of Europe.

Germany's first act in the war was to trample over Luxembourg and invade Belgium, occupying Brussels on Aug. 20, 1914, and burning Louvain on Aug. 25. Descending on France, the Huns drove straight for Paris, reaching within twenty miles of the capital. Threatened on their right flank by two new French armies, they swung to the east and crossed the Grand Morin, an affluent of the Marne, south and east of Paris. On Sept. 6 began the battle of the Marne, and in three days they were pushed back to the Aisne.

British troops in the meantime had landed and hung on the German flanks in a race to the sea, paralleling them with a human wall from Noyon to Arras, to Ypres, to Nieuport, until on Nov. 15 a solid line was established from the North Sea to Switzerland. There was then a lull until April, 1915, when the British made some gains around Ypres, but were immediately driven back by the first gas attack and lost four guns which were recaptured later.

Turning Point of the War.

Little else was done during 1915 except to dent the German line about Loos. Souchez was taken by the French in September. The year 1916 saw the turn of the tide. The British extended their lines to the Somme, and on July 1 the great joint Anglo-French attack on the Germans began in which more than 130 square miles of territory were reconquered and 70,000 prisoners taken. The British extended their drive north-ward through Ancre, capturing Thiepval on Sept. 26 and Beaumont-Hamel in November and forcing the Germans to make an extensive retreat along their whole line from Arras to St. Quentin, while the French on the south forced them to evacuate the Noyon salient. The battle of the Somme, following the German defeat before Verdun by the French, marked the turning point of the war.

On Feb. 27, 1917, the Germans began a retreat between the Somme and the Ancre. The British followed up the retreating Germans, taking Bapaume on March 17 and Peronne the next day. On April 9 the Canadians captured Vimy Ridge.

On June 7 the British launched an offensive directed against German positions on the heights southeast of Ypres. The whole Messines-Wytschaete Ridge was blown up by probably the greatest artificial explosion the world has ever known, felt even in London. Operations were continued, the British delving to wedge into the heart of Belgium, threatening the Germans' submarine bases on the North Sea coast and their occupation of Lille in France, just below the Lys River, which forms the boundary. The apex of the drive was pointed towards Roulers, an important junction on the Lille-Ostende railway. Passchendaele, about four miles from Roulers, was captured on Nov 6.

The Cambrai Drive.

Two weeks later General Byng began his great drive on Cambrai without preliminary bombardment, using the armored caterpillar car "tanks" to smash the enemy's wire entanglements. Three trench defenses constituting the famous Hindenburg line in this sector were passed over and 8,000 prisoners captured. The Germans were taken completely by surprise and by Nov. 25 the British had Bourlon wood and village and were within three miles of Cambrai. The fighting was in the open for the first time in months and cavalry took part. In Dec. 1 the Germans began a very powerful counter attack on both sides of the salient General Byng had creat-

[illegible] broke the [illegible] the southern angle, crossed the old line where the British had been established for months and pushed on to Gouzeaucourt, a mile and a half behind it. On the northern side they recaptured Bourlon and forced General Byng to retire from half the ground he had gained. He succeeded, however, in pushing back the Germans from Gouzeaucourt to Gonnelieu, the point on the old line where they had broken through.

Offensive Ended.

An offensive over a twenty-five mile front between Soissons and Rheims was begun on April 16 by the French. Auberive, east of Rheims, was taken the next day and a bridgehead south of the Aisne at the junction of the Vesle, which the Germans had held ever since the battle of the Marne, was obliterated. Fort Conde, opposite this bridgehead, fell on April 20 and the Germans retired to the crest of the Aisne Heights, between Fort Malmaison and Craonne, along which runs the road called the Chemin des Dames. On May 4 Craonne was taken.

Position at End of 1917.

Unremitting and desperate fighting followed all through May and June on the heights and in the caves on either side of the steep hills. The Germans were driven from the California Plateau on the northern side on July 25, but it was not until Oct. 24 that their victory was made complete by the capture of Fort Malmaison. The next day Pinon and Allemont were captured, threatening the whole German line to the north as far as St. Quentin. By Nov. 4 they had reached the Ailette River, which runs parallel to the Aisne and about five miles north of it, drawing their lines closer toward Laon. All attempts to move them from this position so far have failed.

WHALE MEAT A DELICACY.

Can Hardly Be Distinguished From Beef in Appearance and Flavor.

To most people it will be a surprise to learn that whale steak, roast whale and whale in other appetizing forms are now offered on the menus of a few of the best hotels and restaurants in New York, Boston and Philadelphia.

During the last few weeks considerable quantities of whale meat have been shipped in refrigerator cars to eastern cities from the Pacific coast. Hotel stewards declare it excellent and are anxious to know how they can obtain regular supplies.

It is hardly distinguishable from beef, either in appearance or in flavor. When raw it is red and the fat looks exactly like beef fat. While steak, under its own proper name, has figured on the bills of fare of restaurants in Seattle and San Francisco for many months past.

At last accounts, while [illegible] in San Francisco was fetching [illegible] cents and a half cents a pound, but in the Seattle markets it has sold more commonly at ten to fifteen cents. From the housewife's point of view it is very economical, inasmuch as it contains no bones.

A whaling company at Gray's Harbor, Wash., sold 217,000 pounds of whale meat between August 1 and October 15, and it could have disposed of a far greater quantity if its cold-storage facilities had been adequate. The meat is now being canned on a large scale at Victoria, B.C.

The above-mentioned company (a Canadian concern) has newly obtained permission from the United States Fisheries Bureau to extend its whaling operations off the coast of southern California in the winter time, when the huge marine mammals seek warm latitudes.

It is safe to predict that from this time on there will be no more of the foolishness of throwing away whale meat. There will be a profitable market for every procurable pound of it—not merely during the war, but (its edible quality having come to be known) always in the future, so long as there are whales to be caught.

There are a number of species of whales in the North Pacific and in size they differ. Taking an average, however, it may be roughly said that a fair-sized whale will yield from 6,000 to 10,000 pounds of meat.

We're British Still, O Motherland!

Though traitors in our land exist,
And men with treacherous wits assist
The deadly Hun to trample down
The free man's rights, our fair renown,
We send this cheer to Britain's strand,
"We're British still, O Motherland!"

No British subject could withhold,
Though bribed by power or German gold,
To help our soldiers' need.
To smash the monster—German greed—
And so we shout to Britain's strand,
"We're British still, O Motherland!"

Our boys have died on Flanders' field
That we, in our fair land, might yield
Our manhood's strength in Freedom's cause,
Defending our fair name and laws,
And still we shout to Britain's strand,
"We're British still, O Motherland!"

O Motherland, we'll aye be true
To thee, our fealty we renew,
Shoulder to shoulder with thee stand,
At Home, Abroad, "In No Man's Land"!
One rousing cheer to thee we send,
"We're British still, O Motherland!"
—W. W. Staples, Lindsay, Ont.

While a bridal wreath in this country is usually composed of orange blossoms, Italy uses white roses, Spain red roses, and Greece vine leaves.

KAISER'S BLACK DREAM FADES

MILLION SQUARE MILES AND 14,000,000 PEOPLE.

Prospective Colonial Empire of Germany Wrested From Hun by Boer Kinsmen.

The kaiser's black dream has dissolved into thin air. He has still nightmares in plenty, but this particular dream was black with a capital "B." It was his calm glorious hope that some day he might build up an African colonial empire, a colossal empire of the south which would send tribute in men, ivory, gold and grain to the proud throne in Berlin. He saw millions of negroes bending the neck and owning him their lord. Caesar, triumphing over Gaul. Egyptians, Britons and Huns and receiving their testimonials of indebtedness, was Wilhelm's model. He pictured himself cracking the whip over sooty backs, hosing a continent.

He woke up from this highly pleasant dream the other morning when the rude Britishers shook him and dashed cold water in his face.

Not a Foot of Africa.

Germany owned 910,150 square miles of African territory when William began dreaming. To-day she possesses not a foot. The Boers, once England's enemies, have co-operated with the Belgians and Portuguese in decupling all German colonies in the dark continent. Under the military genius of General Jan Christian Smuts the organized forces of the Union of South Africa have vanquished their relatives, the Germans. Aside from its military significance this victory is a superb tribute to England, the ruler, for it proves that sixteen years after she conquered them Boers in bloody warfare the vanquished men have become so loyal that they will fight their own flesh and blood to protect her.

German East Africa was the last German stronghold to fall. General Smuts had been hammering at it for two years. In November 1915, he, but lately one of the Transvaal's best leaders in warring on England, was placed in command of the expedition which was to attack Prussia's main possession in the colonial world. Against him were arrayed 5,000 Germans and 50,000 well-armed and disciplined native troops. Cooperating with him from the south and east were Belgian and Portuguese armies, allies with whom he could not join lines, but who, like him, were ready to draw in closer on the province.

Work of General Botha.

German Southwest Africa, with an area of 322,000 square miles, had already fallen before the army of the Union. General Botha, also an ex-Boer leader, had guided this effective attack. Togo, a strip of only 33,700 square miles in area in the north, had been occupied by British and French armies almost without a struggle. British soldiers were cornering the German defenders of Kamerun, the last of the four taken colonies. Some 910,000 square miles were speedily surrounding in the new rule.

In February, 1916, Kamerun surrendered and the territory of East Africa alone resisted.

German claims to Angola had never been established, but they had, shortly after the outbreak of the war, been supported by a large native force officered by Prussians. The Portuguese made short work of those pretentions, however.

East Africa Last to Fall

Likewise the Germans sought to seize into the English Sudan by fomenting rebellion among the natives, but a quick assault at the malcontents by a British force operating out of Khartoum soon put down the rebels but added 150,000 square miles, with a population of 4,000,000, to the actual possessions of Great Britain.

So a half-dozen hammer strokes riddled Wilhelm of all his African colonies save one and increased the prestige of his enemies, England, Portugal and Belgium.

Germany gathered all her resources in East Africa for a desperate resistance. Her engineers and big game hunters, who had been the earliest explorers of the African jungle when it broke out, worked their way, whenever possible, to this section, where they enrolled with the defenders. Such raiders as were at sea in that part of the world worked their way to this coast, bearing arms and munitions, until the British blockade made such an act impossible.

Gen. Smuts' Advance

Native loyalty and military service was bought with gold and the promise of gaudy uniforms. The resistance grew stronger as the outlying forces fell back before General Smuts' advance. Some bloody battles were fought, and frequently native allies of the Boers coming into conflict with the black hirelings of Germany discarded their shooting irons and rushed to the hand-to-hand battle armed with their favorite knives.

When in the early summer the various states in the union agreed to prosecute the war more vigorously Germany's fate was sealed in the dark continent, for General Smuts' force was therefore augmented steadily with recruits and the artillery branch of the expedition materially strengthened. In the last of the summer his force was so powerful that no German army could stand against it, and the Huns began leading their badly battered regiments in retreat.

Drove Runaway Sea

In September, 1917, the Belgians, under General Tombeur, brought their lines to a junction with General Smuts' right wing, the Portuguese carried their vanguard to complete the semicircle and the entire half-circumference of allies closed in, driving the Germans toward the sea.

The recent surrender of the last Huns was known and expected in Berlin. Nothing more can be done by the Kaiser in Africa.

Previous to 1884 Germany's political policies had been purely continental, but in that year F. A. E. Luderitz, a Bremen merchant, prevailed upon his government to take a great tract of territory and protect his factories and trading stations. Germany did so very suddenly, thus stealing a march upon England and creating the state of German Southwest Africa.

The same year Germany sent the imperial consul general, Dr. Nachtigal, to "investigate the German factories on the west coast." England recognized the colonial danger lurking behind this phraseology and sent its officials up from the cape provinces to beat the Germans. For many years the tribes of black men around Kamerun had begged English protection, but Great Britain had also considered the business too trival for attention. The result was that in July Togo and Kamerun both placed themselves under German protection.

A year later a German fleet appeared off Zanzibar, on the east coast, and forced the natives to admit that Prussia ruled that section, since called German East Africa. It is odd to note that the colonies fell in the same order as they were created, Southwest first, Togo second, Kamerun third and East last.

A PLEA FOR NUTS.

A Wholesome Source of Protein and of Easily Digested Fats.

An eminent physician asserts that the fats of nuts, their chief food principle, are the most digestible of all forms of fat.

Fats entering the body do not undergo transformation changes which take place in other foodstuffs, but are so slightly modified in the process of digestion and absorption that after reaching the blood and the tissues they are reconstructed into the original form in which they are eaten.

Nuts are free from waste products, uric acid, carmine and other tissue wastes.

Nuts are aseptic, free from putrefactive bacteria and do not readily undergo decay either in the body or outside of it. Meats are always in an advanced stage of putrefaction. Ordinary meats contain from three million to ten times that number of bacteria per ounce.

Nuts are free from trichinæ, tapeworms and other parasites as well as the infection due to specific diseases. Nuts are clean and sweet. Liquid nut preparations have saved the lives of hundreds of infants within the last twenty years.

A nut orchard 200 miles square would supply one-third enough food to feed 100,000,000 citizens.

The nut should no longer be considered a table luxury. It should be a staple article of food, replacing the pork and meats, which are inferior foods and a prolific source of disease.

Every highway should be lined with nut trees. A row of nut trees on each side of our country roads will provide sufficient food for thousands of people, and leave all our cultivated land to be worked as it is now.

FAMOUS INVALIDS.

Men Who Became Famous in Spite of Poor Health.

Those who are afflicted with ill-health may derive some comfort from the statement, quoted in a recent book on "Suffering and the War," that "Coleridge exclaimed that the three greatest works of the nineteen centuries were all written by men of feeble health—Spinoza's 'Ethics,' Bacon's 'Novum Organum,' and Kant's 'Critique of Pure Reason.'" As another instance of the triumph of the spirit, Sir Isaac Newton, it is stated, was a most unpromising child, with a frail body and poor eyesight. "He showed no aptitude for study, and was first incited by the desire to get ahead of a boy who kicked him."

Another great writer who accomplished much despite the handicap of poor health was Herbert Spencer. Like Newton, as a boy he was backward in his studies. A new life of Spencer by Hugh Elliot says: 'He was very backward as a boy in the ordinary subjects of children's learning. . . . Morally, he was extremely disobedient, and contemptuous of authority." At thirteen he "found the discipline (of his school) more severe than he cared about, and ran away home to Derby again, walking forty-eight miles the first day." Yet as a man, "without money, without special education, without health, he produced eighteen large volumes of philosophy and science of many diverse kinds, published a variety of mechanical inventions, and on endless other subjects, great and small, he set forth a profusion of new and original ideas."

Cereals are the cheapest grade of food on the market for the amount of nourishment contained in them. Milk comes next in giving food value for money paid.

WHAT HEROES DO TO WIN CROSSES

SOME RECENT RECIPIENTS OF HIGH HONOR.

A Brief Description of the Valorous Deeds Rewarded by the Victoria Cross.

The following awards of the Victoria Cross are announced in a recent issue of the London Daily Mail:

Major Lewis Pugh Evans, D.S.O., Black Watch, commanding Linc. R., nephew of General Sir J. Hills-Johnes, V.C.

He took his battalion in perfect order through a terrific enemy barrage formed up all units and led them to the assault. He himself rushed a strong machine-gun emplacement, and by firing his revolver through the loophole forced the garrison to capitulate. Severely wounded in the shoulder, he refused to be bandaged, and again led his battalion forward, being again badly wounded. After taking an objective he collapsed from loss of blood, but refused assistance.

Sergeant William Francis Burman, Rifle Brigade (Stepney, E.).

He went forward alone to what seemed certain death, killed an enemy gunner and carried the gun to his company's objective, where he used it with great effect. With two others he ran forward and got behind the enemy, killing six and capturing two officers and twenty-nine men.

Sergeant John James Dwyer, Australian M.G. Corps.

In charge of a Vickers machine gun, he rushed it forward to within thirty yards of an enemy gun and fired point-blank at it, killing the crew. He then seized the gun and, ignoring the snipers, carried it back across shell-swept ground to our line.

Sergeant Joseph Lister, Lancaster Fusileers (Radish, Stockport).

He dashed ahead of his men and found a machine gun frame from a shell hole in front of a pill box. He shot two of the gunners and the rest surrendered. He then went on to the pill box and shouted to the occupants to surrender. They did so except one man, whom he shot dead; whereupon about 100 emerged from shell holes and surrendered.

Sergeant Lewis McGee Australian Imperial Force (killed).

Single-handed and armed only with a revolver, he rushed a pill box, shot some of the crew and captured it, thus enabling an advance to proceed. He was later killed.

Sergeant John Molyneux, Royal Fusileers (St. Helens).

After clearing a trench in front of a house he called for some one to follow him, and rushed for the house. By the time his men arrived he was in the thick of a hand-to-hand fight. The enemy surrendered, and, in addition to the dead and wounded, between twenty and thirty prisoners were taken.

Lance Sergeant John Harold Rhodes, Grenadier Guards (Tunstall, Staffs).

Seeing three Germans leave a pill box he went out single-handed through our barrage and bomble machine gun fire and got into the pill box, where he captured nine, including an officer with a telephone.

Corporal Ernest Albert Egerton, Notts and Derby R. (Longdon, aged only 20).

Volunteers being called for to clear dugouts, he dashed out under heavy fire at short range. He shot in succession a rifleman, a bomber and a gunner, by which time he was supported and twenty-nine surrendered.

Private Arthur Hutt, R. War. R. (Earlsdon, Coventry).

When all the officers and N.C.O.'s of a platoon had become casualties, he took command; ran forward alone and shot the officer and three men in a post, causing between forty and fifty others to surrender. He carried in four wounded under heavy fire.

THE FATTED BRIDE.

Cornmeal Bolus as Chief Ingredient of Beauty Treatment.

Throughout the empire of Morocco and in Tunis there are villages where the elder members of the adult population follow professionally the pursuit of fattening young ladies for the matrimonial market of Barbary.

The Moors, like the Turks and most other Orientals, give a decided preference to "moon-faced" wives over lean ones, and are more solicitous as to the number of pounds which their brides weigh than about the stock of accomplishments they possess.

A girl is put under the process of fattening when she is about 12 years of age. Her hands are tied behind her and she is seated on a carpet during so many hours every day, while her "papa" stands over her with a stick, and her mother, at times, pops into her mouth a ball of stiff maize porridge, kneaded enough to be swallowed without a patient choking.

If the unfortunate girl declines to be stuffed she is compelled by torture, and gulps down the boluses, lest she should be beaten.

In Brazil corpulence is also considered the essential point of female beauty, and the greatest compliment that can be paid to a Brazilian lady is to tell her that she grows fatter and fairer every day.

We should take an inventory of our friends as well as of our goods.

YARNS OF A CANADIAN SEAMAN

TORONTO SAILOR RECOUNTS ADVENTURES WITH SUBS.

"One Hundred and Eighty Miles From Land and Our Boat Was Leaking."

"I shall never forget my first experience with a U-boat," says John Nugent, able seaman from Toronto. "I had shipped out of Liverpool on a three-masted schooner called the Grenada, a vessel of some 1,200 tons. We had no cargo and were under sealed orders.

"We were tacking along in the Bristol channel when suddenly the lookout spied a periscope, and five minutes later a U-boat of a large type came to the surface. The submarine attacked us savagely, dropping shell after shell on our decks. It was cruel the way that shrapnel ripped up that wooden ship. The masts were virtually torn up by the roots and bundled over the side into the sea. The decks were blown into kindling wood, and the starboard side of the ship was blown full of holes. The submarine fired fifteen shells in all.

"The crew lost no time in scrambling over the port side of the ship into small boats. We were ten miles from land, and we pulled shoreward as if the very devil was after us. Right here[1] want"to say that I don't care to take chances again with submarines in wooden boats. The steel variety are good enough for me.

"I got my next experience with a sub when I shipped on the Mauretania, formerly in the service of the Cunard Line. Just outside of Malta a sub popped about the surface of the ocean and gave us a merry chase, firing shell after shell. But we were too speedy for the Hun, and finally the U-boat got sick of the job and submerged.

A Thrilling Adventure.

"The last time I met with a sub was when I was firing on the steamship Platuria. September 15 we left Gibraltar bound for an Italian port with a big cargo of gasoline and benzine aboard. About 3.15 in the afternoon I was having a peaceful pipe in the engine room, when suddenly there was a terrific explosion 'midships. I went sprawling to the metal flooring of the place, and my pipe flew ten feet away. I knew what had happened; we had been torpedoed, and I lost no time in scrambling to the deck. As I reached the span a shell landed on the steamship and exploded, a fragment striking my hand and inflicting a painful wound.

"The initial explosion caused by the torpedo had resulted in the killing of ten men.

"I found everything in confusion on the deck; the crew was attempting to lower the lifeboats, of which there were two. Captain John Leslie, of New South Wales, stood on the bridge of the Platuria and refused to leave his position. One of the lifeboats was launched, but the one I was in capsized, throwing about twenty of the crew into the water. Just then the Platuria sank stern downward, and Jim Whittaker, an oiler, of Minnesota, was dragged to his death by the suction. Captain Leslie went down with his ship.

"Three of us in the water clambered on top of the overturned lifeboat; the man clinging to the keel on my right was a fellow by the name of Mills, from Georgia, who had been torpedoed four times; the experience was really nothing new to him.

U-boat With a Conscience.

"At this juncture it seemed that the submarine commander must have been stricken with a twinge of conscience, for the U-boat rose to the surface and came toward us. He allowed us to come aboard the submarine while some of his men righted our boat. He gave us a dram of rum around and cigarettes. This submarine commander seemed to possess a sense of humor, for after we had gotten the rum into our systems and had lit our cigarettes, he informed us with a grin that he had stolen the rum and tobacco from an English ship. But right at that moment we were not at all particular where the rum or the tobacco came from; the liquor warmed up our aching bodies and the cigarettes calmed our nerves.

"It developed that the Hun commander was a very curious person. He inquired concerning our nationalities, and asked a number of questions about the war. It seemed that he had been travelling underneath for a considerable time and was out of touch with world-events. He asked questions concerning the name, cargo and crew of the Platuria and wanted to know what had become of the captain. We told him that the captain was dead and that information seemed to give him satisfaction. Right here I thought it was time for the Hun to play the role of the questioned, and I asked him to give us the number of his U-boat. That made him angry.

"'Look here, young man,' he growled, 'don't get impertinent; you are lucky to be alive.'

Story of Eight Survivors.

"After that we were bundled into our boat without ceremony. We were 180 miles from land, and our boat was leaking. We took turns at rowing and bailing. We were a miserable feeling lot; some of us were suffering from injuries, and nearly all were sick from swallowing salt water. The next morning we were picked up by the Italian steamship Andrea, from Spezia.

"The Andrea landed us in the Madeira Islands, where we remained for a month before we got a ship.

"While waiting to ship we heard many first-hand stories of German submarine savagery on the high seas. One of the worst cases was related by eight survivors of an Italian ship.

"When the ship was torpedoed, the crew, numbering forty-nine men, took to the small boats. The submarine shelled the small boats, killing twenty-five men. But this did not satisfy the Huns. They attacked two of the lifeboats with axes, stoving holes in their sides so that they sank, drowning the men in them. Only eight of the crew of forty-nine escaped to tell the story. Surely, Germany cannot expect the world to ever forget her barbarities on the seas."

THE CAUSE OF BACKACHE

Every muscle in the body needs constantly a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment, and the result is a sensation of pain in those muscles. Some people think pain in the back means kidney trouble, but the best medical authorities agree that backache seldom or never has anything to do with the kidneys. Organic kidney disease may have progressed to a critical point without developing a pain in the back. This being the case pain in the back should always lead the sufferer to look to the condition of his blood. It will be found in most cases that the use of Dr. Williams' Pink Pills to build up the blood will stop the sensation of pain in the ill-nourished muscles of the back. How much better it is to try Dr. Williams' Pink Pills for the blood than to give way to unreasonable alarm about your kidneys. If you suspect your kidneys any doctor can make tests in ten minutes that will set your fears at rest, or tell you the worst. But in any event to be perfectly healthy you must keep the blood in good condition, and for this purpose no other medicine can equal Dr. Williams' Pink Pills.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

LOST IN THE DESERT.

Terrible Experience in Death Valley in California.

The late Maj. Gen. Funston was once employed as a botanist in the United States Agricultural Department. He was one of a party sent out to explore Death Valley in California. The experience is said to have been the cruelest in all Funston's life, and it so nearly proved fatal that he always declared that he could not understand why he had not died or become mad.

He had started out one morning to ride one hundred and twenty miles down the desert to mail some important letters and packages at a post office. All day his pony trudged over the desert, breaking through the crust up to its fetlocks and rending up beneath its feet stranglingly, smoke-like clouds of powdered, white alkali.

The thermometer rose that day to one hundred and forty-seven degrees, a height no one there had ever seen it reach before. The hot air blew across the wastes as dry, so penetrating, that it peeled the skin from Funston's face, parched his lips and made them bleed, stung and burned his nostrils, and caused a thirst that nothing could satisfy.

He had only a quart of water in his canteen and no forage for his horse, and, realizing that to go on farther meant certain death, he decided to return. He picketed his horse in the evening, slept until three o'clock in the morning, then mounted and started back. When the fiery sun rose over the mountains his horse gave out and staggered weakly; and so Funston dismounted and led it. For many miles he walked, determined, in spite of his agony, not to give up until life left him.

Suddenly he heard two distinct shots. He stopped and looked in every direction, but could see no smoke or sign of anything human on the desert. Three times he heard shots, and then it dawned on him that they did not come from the desert or from the mountains. The fever brought on by the terrible heat had caused the snapping of the nerves in his head to sound like rifle shots.

At four o'clock the next morning he staggered across the doorway of a ranchman's house and weakly cried for water. He had walked forty miles through the desert in a night and day of such fearful heat as even Death Valley had scarcely ever known before.

Rose Hedge.

Rose hedges are not uncommon in Great Britain and in Europe but they are somewhat of a novelty here. Rose hedges are good for screening the vegetable garden or as a dividing line between neighbors.

Make a deep trench of well manured soil and use such varieties as American Pillar, Crimson Rambler, Dorothy Perkins, Climbing Captain Christy, Excelsa, Caroline Testout.

For supports use posts with galvanized wire stretched between them. Three or four strands of wire will be required.

A Fashionable Winter Dress

Smart indeed is this semi-fitted dress with the shaped tunic. McCall Pattern No. 8125, Ladies' Semi-Fitted Dress. In 6 sizes, 34 to 44 bust. Price, 20 cents.

This pattern may be procured from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

A SIDNEY OF TO-DAY.

Story of Courtesy Which Surpassed That of the Famous Courtier.

We are accustomed to think of certain heroic figures of the past as a sort of supermen, whose gallant and knightly deeds we cannot expect the men we meet every day to equal. But this war—like every other war—proves that the nobility of human spirit is eternal and essential, and that it manifests itself quite as often in men of humble birth as in the sons of the proudest families.

I remember, says a writer in the Fortnightly Review, that when I was a boy the story of Sir Philip Sidney at the battle of Zutphen hit deeply into my imagination. I derived it from a large, popular history of England, in which the incident was made the subject of a full-page engraving over which I used to linger with delight. For years afterwards the picture, with additions and embellishments, would come back at intervals to my mind. The scene, as I envisaged it, was replete with an ornate dignity. The battle raged decorously in the background; men in correct attitudes, with corselets and bright lances, stood about; in the centre lay the dying hero, an arresting figure, with his curled and, I suppose, perfumed ringlets, his elegant sword hilt, his white and spotless ruff, his slashed jerkin, his Elizabethan hose and stockings. You saw the draft of water offered (in a silver goblet); and then you beheld the knight, about to raise it to his lips, turning to the wounded soldier at his side, with his courteous "Friend, thy necessity is greater than mine." Certainly a grand thing done in the grand manner!

In the earlier days of the war I came upon a paragraph in a newspaper correspondent's letter about the fighting near Festubert. A British soldier was lying wounded on the ground, fevered with thirst, close by a German even more desperately hurt. Stretcher bearers arrived and offered the Briton a tin of water. The man was reaching for it eagerly when his glance fell on his tormented enemy. "After 'im," he said, and handed back the vessel for the German to drain.

So now, when I seek to recall my old vision of Sidney at Zutphen, it is blotted out by another: a vision of a man in drabbled khaki lying in the horrible crimsoned filth of no man's land; of another man in a torn gray tunic, drenched with blood, staring with wolfish eyes at the water; of the former shutting his own parched lips tight over his teeth and putting the precious draft by with a short, ill-said word of refusal. Surely a greater hero, that nameless cockney, than the sworded and scented courtier! "After 'im!" It is better than the noble mellifluous phrase that made Sir Philip Sidney immortal.

Deafness in Soldiers.

A novel cure for deafness in soldiers has been found by British doctors, who believe in the power of suggestion to accomplish much that their medical skill cannot. Much of the deafness at the front is hysterical, born of the soldiers fear of going deaf from the incessant pounding of the explosives about him.

Many times these men cannot be cured by direct treatment, and it is then that the unique system is brought into play. They are given very slight anesthesia and a tiny incision made in the skin behind an ear. Then an iron plate is hammered violently close to the ear. In almost every instance where the deafness is hysterical the patients regain their hearing immediately, convinced that a serious and therefore helpful operation has been performed.

Minard's Liniment Cures Colds, Etc.

The Folly Of Taking Digestive Pills

A Warning to Dyspeptics.

The habit of taking digestive pills after meals makes chronic dyspeptics of many thousands of men and women because artificial digestants, drugs and medicines have practically no influence upon the abnormally acid condition of the stomach contents which is the cause of most forms of indigestion and dyspepsia.

The after dinner pill merely lessens the sensitiveness of the stomach nerves and thus gives a false sense of freedom from pain. If those who are subject to indigestion, gas, flatulence, belching, bloating, heartburn, etc., after eating would get about an ounce of pure bisurated magnesia from their druggist and take a teaspoonful in a little water after meals, there would be no further necessity for drugs or medicines because bisurated magnesia instantly neutralizes stomach acidity, stops food fermentation and thus insures normal, painless digestion by enabling the stomach to do its work without hindrance.

Marching Men.

From the silver coasts outlying,
Where the pallid ships are plying,
Sweeping in from East and West
Over crag and mountain crest,
Up from desert, grove and glen,
Still there come those hosts of men;
In their hands the sword aflame,
On their lips an ancient name,
Cleaving hearts and lives asunder,
Trampling thrones and empires under;
Temples lately love-forsaken
They have entered and forsaken,
Earth itself their tread has shaken—
Marching men, marching men,
Sleeping gods your shouts awaken!
—Helena Coleman.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

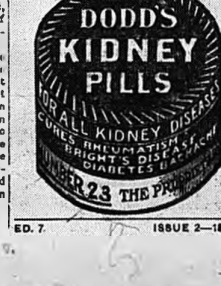
Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvellous to smoothen rough, red hands.

Every piece of farm machinery should be put under cover. Grease all the bearings heavily and cover the exposed bright metal parts with cheap grease of some kind. Vaseline is good and can be had in large quantities at small cost. The iron frames and wheels of mowers etc., should be painted. It is the height of extravagance to leave tools out in the weather at any season, particularly during winter.

Minard's Liniment Co., Limited.

Gentlemen,—Theodore Bourin, a customer of mine, was completely cured of rheumatism after five years of suffering, by the judicious use of MINARD'S LINIMENT.

The above facts can be verified by writing to him, to the Parish Priest or any of his neighbors.



A. COTE, Merchant.
St. Isidore, Que., 12 May, '98.

The best mulch material to use is clean straw; this is placed on the strawberry plants four to six inches deep after the ground has been frozen. In the spring after the ground is thawed, the straw is worked around the plants. This serves several purposes, such as keeping the patch free from weeds, conserving the moisture, and forming a clean mat for the berries to ripen on. After the fruit has ripened, the straw may be removed.

Minard's Liniment Cures Diphtheria.

We saw a couple of men sawing wood the other day with a cross-cut saw, and felt sorry for them, the saw lugged so. There was not enough set in it. Half an hour spent in putting that saw in good order would have saved a great deal of strength, and the men could have sawed far more wood. Getting ready for work is just as important as working.

"It is not being out at heels that makes a man discontented; it is being out at heart."—Bliss Carman.

Mesopotamia Stories.

Canon Parfit, of Jerusalem, who described himself as 'Vicar of Mesopotamia and Rural Dean of the Garden of Eden," recently told a few Eastern tales in London.

He said that when he first saw his "charge" the scenery did not impress him. The people were poverty-stricken and begged for "baksheesh," the children were brilliantly clad in olive oil and the sweetest of smiles."

A soldier, referring to scorpions and mosquitoes, said: "Everything in the Garden's lovely (I don't think!) It wouldn't take a flaming sword to drive me out of it!"

At Bagdad, the pontoon bridge having been washed away, the Sultan determined to build a new one, so he set about raising the money. The people were whipped and blackmailed into parting with £40,000. The bridge cost £4,000, the tax-gatherer pocketed the rest.

Granulated Eyelids, Sore Eyes, Eyes Inflamed by Sun, Dust and Wind quickly relieved by Murine. Try it in your Eyes and Baby's Eyes. No Smarting, Just Eye Comfort. Murine Eye Remedy at your Druggists. Write for Free Book of the Eye. Ask Murine Eye Remedy Co., Chicago.

The use of glass bricks for building purposes is being adopted in many European cities. As a means of admitting light to dark hallways and basements these transparent bricks have been most satisfactory, and there has been no loss in stability of construction when they have been substituted for the ordinary clay bricks.

Minard's Liniment Cures Distemper.

When winter snows are piling over
field and fence and bough,
There are apples in the cellar, there
is fodder in the mow;
And though the north wind threatens
dreary frozen months to bring,
We laugh because beneath it all we
hear the voice of Spring.

MONEY ORDERS

The safe way to send money by mail is by Dominion Express Money Order.

The liquor business has always been a curse to the world. Before Columbus discovered America, the authorities of the city of Ghent, in Europe, found it necessary in a time of dearth to forbid the conversion of grain into the brewing of beer. Thus does history repeat itself.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN

Apply a few drops then lift corns or callouses off with fingers—no pain.

Just think! You can lift off any corn or callus without pain or soreness.

A Cincinnati man discovered this ether compound and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off.

Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterwards. If your druggist hasn't freezone, tell him to order a small bottle for you from his wholesale drug house.

will reduce inflamed, swollen Joints, Sprains, Bruises, Soft Bunches, Heals Boils, Poll Evil, Quitter, Fistula and infected sores quickly as it is a positive antiseptic and germicide. Pleasant to use. Does not blister or remove the hair, and you can work the horse. $2.00 per bottle, delivered. Book 7 M free.
ABSORBINE, JR., the antiseptic liniment for mankind. Reduces Painful, Swollen Veins, Wens, Cysts, Bruises, sore throat, quinsy and tonsilitis. Price $1.00 per bottle at dealers or delivered. Will tell you more if you write. Liberal Trial bottle for 10c in stamps.

EBENEZER

The big January thaw that was expected for the last month hasn't arrived so far. Whenever the wind does get around to the south it feels as if it were coming around the corner of an iceberg. So long as the wood pile hangs out the people will be able to hold out against Jack Frost's bombardment of snow, frost and wind.

The skating social held at the rink last Thursday evening under the L A Society, was a big success. Almost $50 was made. After the expenses are paid a nice sum will be left to buy comforts for the soldiers. The main feature of the evening was the hockey match. Although the Paisley seniors could not come on account of having a match the following night with Chesley, they substituted their junior team, who played a good game but were defeated by our boys by the score of 13 to 4.

Mr Alex Greig, of Newton, Alta, is visiting his old home on the 2nd con, and called on Mr and Mrs John Robinson of this line last week.

Mr and Mrs Geo Lowrey and little son, of Dartingford, Man, are visiting at Mr Frank Quigley's.

Mr John Hanbidge occupied the pulpit here on Sunday in the absence of the pastor, Rev T J Stapleton, who went to his former circuit at Lion's Head to open a new church.

Sergt George Martin received orders last week to go overseas immediately, and hadn't time to come home to bid his friends goodbye. We hope he may have a safe journey over the pond. L Corp Wilbert Martin is still in the hospital at London suffering with tonsilitis. We hope he will soon recover and be able to join his brother George overseas.

Ebenezer puck chasers beat the river road boys Saturday afternoon in a very close, exciting game. Both teams were in the lead at different times, but when the game was finished our boys were one goal to the good.

GLAMIS

Mr Jas McCormick, of Edmonton, who has been visiting some weeks with his parents and relatives, left on Monday on the return trip.

Mr and Mrs Stocks, of Port Huron, who have been visiting Mrs R J Nesbitt, returned on Saturday.

Mrs Angus McGregor of Jarrow, Alberta, who are visiting friends, spent Friday evening at Mr Jos Cunningham's.

Miss Mary McSween is employed in the brush factory at Port Elgin.

Miss Greig, of Lindsay, is visiting her nephew, Mr Wm Graham.

Mr Jack Carr, who was down from Kerrobert, Sask, has left again for the west.

Mrs Murdoch McKay, who has been visiting her daughter, Mrs Jas Coward in Toronto, returned on Friday.

WILLOW CREEK

Mr and Mrs Wilber Bean, who have been in Listowel, returned to this neigeborhood for a further visit before leaving for their home at Weyburn, Sask.

All the farmers from No. 9 School house east to Paisley had to turn out to break roads on Monday of last week to let the doctor through.

Mr Chas Smith had his sale on Tuesday. Mr Smith is going to drive the dray between Tiverton and Kincardine.

Mr Fred Thede has sold his farm to Mr Chas. Helwig, who will move on in the near future. He is welcomed among us.

Considerable damage was done in this locality by the wind on Jan. 12th. Wind insurance is becoming quite popular.

CANTIRE

(Intended for last week)

During the severe storm on Saturday week the chimney on Mrs Blackburn's house caught fire and for a time it looked as though the house would go up in smoke. However several neighbors gathered and succeeded in extinguishing the blaze.

Several who have been hearing the delusion that we have a misbrious climate have changed their minds somewhat after suffering from frost bites.

Mr Geo Stewart went to Walkerton hospital on Monday to have a growth removed from his breast. During Geordie's four year residence in this community he has made many friends who hope for his speedy recovery.

Mr Cunningham Long of Bessano, Alta, is visiting friends and old neighbors on the 4th. It is thirteen years since Cunningham headed for the plains and his many old friends here are glad to know that prosperity has blessed his labors. Last year he built an elevator on his farm at a cost of $5,000 and with good crops and good prices the last two years this old Bruce boy is now on easy street. As help is scarce he has sold half his land and later a going more into ranching. One thing these lackest, a wee bit wife, and another visit to Biderslie in the near future should mend matters in this line.

Mr John Carr of Sask., was visiting here last week.

Mr and Mrs Wm Gray of Sask. are visiting at the home of the former's sister, Mrs Harry Winch.

Mr Howard Johnston who has spent two years at Earl Grey, Sask is paying a visit to the old roof tree. His brother Willie who went west at the same time has signed up with a western unit and is determined to do his bit for king and country. Willie volunteered at Chesley when the 160th was recruiting but was turned down as medically unfit.

Children Cry
FOR FLETCHER'S
CASTORIA

WALKERTON

A letter received here on Monday from a member of the 160th Bruce Battalion states that prior to writing a Russian of the 166th Battalion, which is camping alongside of the Bruce forces at Witley, came over to the 160th lines after midnight and set fire to the big mess tent and recreation room of the 160th. The culprit was caught in the act and locked up, and will probably be taken out and shot for his traitorous conduct. Not much damage was done, as the blaze was checked early in the stage.

Tom Kelly, a rich farmer from Ashfield township, and who had been in the habit of stealing for years out of sign in the hotel sheds at Lucknow, was brought to Walkerton on Thursday last by Constable Cameron, the Lucknow sleuth, who had been laying for him for some time. The following Friday morning the thief was arraigned before Judge Greig at the court house here, and after pleading guilty to a long list of thefts, was sentenced to six months in the Walkerton jail and also to pay a fine of $50 for his crimes. If he fails to liquidate his fine the prisoner is to serve an additional three months for this neglect. That Kelly is as much fool as knave was demonstrated by the loot that Constable Cameron captured in his place, for although a bachelor and living like a hermit, he had swiped a goodly quantity of women's clothes. Unless he were contemplating matrimony these could be of no use to him. The plunder captured made a good sized sleigh load and showed what an adept at pilfering Kelly was. The plunder included articles all the way from a suit of clothes down to children's school books. That he was a miser as well as thief is evidenced by the fact that although in good circumstances and owning a valuable farm, he would beg scraps of meat from the butcher shops and leavings from the bakeries. On being placed in the lock-up prior to coming to Walkerton he was eating three hearty meals in the belief that someone else was paying for them, but on being informed that he might have to cash up for these he decided he could hang out on two meals. In the Walkerton jail he boasted of his adroitness as a thief and told how he knew the constable suspected him, and the measures he took to fool him. His game was to drive on to the sheds where other rigs were standing, and after making sure that no one was around, to go through the rigs, load up and drive off. As he never sold any of the stuff or were it about, he was able to pull off his work for years before he was nabbed and brought to time. That his skin was like his actions, dirty, was amply demonstrated when the limelight was turned onto him, for it was then he was done time in the Walkerton jail having anything on him for a dusty hide. The hands at the bath tub had a busy spell before they had their silent guest in proper trim.—Herald and Times.

GREENOCK COUNCIL

McNab's Hotel, Clarendon
Jan 19, 1918

Council met for the township of Greenock met on above date, owing to the severe storm which made it impossible to meet on the 15th. Members present—T Phelan, reeve; Jas D Campbell, Thos Symmes, G W Gilchrist and Thos Sawyer, councillors, who after subscribing to declarations of qualification and of office, took their seats, the reeve in the chair. The minutes of last meeting were read and adopted.

Accounts presented for payment: Thos McGregor, 46 yds gravel, $4 60; Municipal World, blank forms, $1 37; D S Campbell, 15 yds gravel and 2 days' road work paid in taxes, $4; Robertson & McNab, advice to reeve and three letters, $1 05; A Mc Kinnon, salary as collector $00, postage $5—$05; J G Bricker, salary as M O of Health, $100; L A Reid, bal printing contract, $50; Dr J J Williams, maintenance A Cunningham, Orford Hospital, $15 50; M McNab, room for council meeting, $2.

Sawyer—Campbell—That the forgoing accounts being found correct be paid, and that the reeve and treasurer sign checks for same.—Carried.

Geo Winter refunded $10, being overpayment on gravel contract on Durham road, through mistake of county finance committee.

Gilchrist—Symon—That the deputy returning officers, poll clerks, owners of polling booths and of nomination hall be paid.—Carried.

Checks were issued to the D R officers, total $38 50, to poll clerks for $14, owners of polling booths $16, and nomination hall $4.

A communication was read from R J Stewart, barrister, claiming $4 for Geo T Haines for filling holes on highway under instructions from pathmaster. The clerk was instructed to reply asking for certificate from pathmaster.

Symon—Gilchrist—That the clerk be instructed to draft a by-law for the purpose of fixing salaries of officers.

By-law No 565 was drafted and duly passed fixing salaries as follows: Treasurer $100; clerk $300; assessor $100; collector $120; auditors each $8 and 10c per mile one way; D R Officers $4 and 10c per mile returning ballot boxes; poll clerks $3; selectors of jurors $4; M O of Health $100; sec'y of L B of Health $10; sanitary insp $1 for inspecting schools and slaughter houses, and $2 for disinfecting houses and 10c per mile one way; members of council $3 per day and 10c per mile one way.

Gilchrist—Symon—That J Meagher be appointed a member of the L B of Health.—Carried.

Symon — Gilchrist — That this council appoint T Houston and J B McKinnon auditors for current year.—Carried.

Sawyer—Campbell—That David Pinkerton be appointed a representative on the Board of Agriculture for this district of Centre Bruce.—Carried.

Symon—Gilchrist—That the reeve and clerk be instructed to sign and attach the seal to the agreement with C Crowley & Son re the constructing of the Keake drain.—Carried. Agreement duly signed and sealed.

Gilchrist—Sawyer—That this council do now adjourn to meet at Pinkerton on Feb 4th, for general business and to receive applications for the offices of assessor and collector, and tenders for township printing for current year.—Carried.

Thos H Peary, Clerk

THE LATE JAMES McCAULEY

The late James McCauley, who died in Invermay on the 4th of January, was born in Holland Township, Grey County, almost sixty-seven years ago. When a few years old he came to Arran Township where he spent nearly sixty years of his life. His boyhood days were spent near Arkwright where his father was an early settler. In 1883 he went West to bring back his choice, Martha McMullen. They were married in Greely County, Nebraska, in March, 1883, and in October of the same returned to Bruce County, for more than twenty years Mr McCauley had lived in Invermay. He was a man respected by those who knew him best, true to the duties that rested upon him, and who will be missed by those of his own household. For several years Mr McCauley suffered from the weakness which resulted in his quiet passing on the morning of January 4. His widow; his sister, Mrs Wm. Rowlin his brother, Blythe; his daughter, Mrs R. J. Bell; and his son J E, are left to mourn his death.—Leader.

UNDERWOOD

Bruce Tp. council met on Wednesday Jan 16th instead of Monday on account of the storm and blocked roads.

The Presbyterian annual meeting was postponed till Friday.

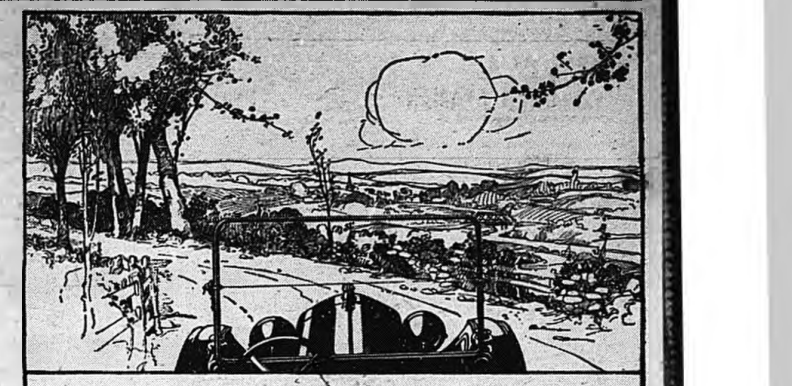
Mr W. A. MacKay, Superintendent of Dairying for the province of Nova Scotia, spent a few days visiting his brother, Mr J G MacKay, clerk and treasurer of Bruce Tp., and other friends. Mr MacKay was in Ontario attending a Creamery Convention in Toronto, the Dairyman's Association meeting in Stratford and other business in connection with dairying. It is now about nine years since W A went east to engage in the butter business in Nova Scotia

Reeve Johnson and Deputy-Reeve Dobson were at Walkerton last week.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

—Hon W J Hanna has resigned from the position of Dominion Food Controller because his personal business interests require attention and could no longer be neglected. The tangible results of Mr Hanna's seven months of Food Controller, apart from the educational campaign inaugurated, include the hotel and restaurant regulations regarding meatless days, the restrictive regulation with regard to the sale of cereal package goods and canned goods, organization of facilities for increased consumption of fish, the introduction of oleomargarine, limitation of the profits of the milk dealers and of millers, and the restriction of the use of grain in the manufacture of liquor. Mr Hanna declares that he believed the saving in the use of meats, wheat and other necessaries needed by the Allies amounted to at least 25 per cent of the normal Canadian consumption.

THE STORE OF QUALITY



BUSINESS CHANGE

THE world is changing. The map of Europe has changed. It has taken a lot of change to manipulate this change. The banks give you change, sometimes charge you exchange. And we find we are in need of some loose change to give the other fellow some change. Therefore, after Jan 15th all accounts not then paid will be charged and collected with interest. We have decided to cut down our credit limits, and will after this date render our accounts every three months. If not then paid interest will be added.

Get Behind the Wheel of a Ford and Drive

TRY it just once! Ask your friend to let you "pilot" his car on an open stretch. You'll like it, and will be surprised how easily the Ford is handled and driven.

If you have never felt the thrill of driving your own car, there is something good in store for you. It is vastly different from just riding—being a passenger. And especially so if you drive a Ford.

Young boys, girls, women and even grandfathers—thousands of them—are driving Ford cars and enjoying it. A Ford stops and starts in traffic with exceptional ease and smoothness, while on country roads and hills its strength and power show to advantage.

Buy a Ford and you will want to be behind "the wheel" constantly.

A TERRIBLE WASTE

Mr J Rowland, of Walkerton, sent the following statement to the press regarding a wasteful stock dealing custom:

Having made a study of the live stock business for 35 years, and given a great deal of thought to the question of Food Conservation and the awful waste that is going on during the nation's crisis, the wonder to me is that our men in authority have not stopped the terrible waste of hog food that is being fed each and every day at the Live Stock markets in Toronto. They must know that in order to have the pork in the best condition, the hog must be fed or starved for 24 hours before killing. Go into the Toronto markets to-day and you will see men buying tons and tons of hog food every month and this food being fed to the hog that is on its way to the packing house to get slaughtered within a very few hours after having been filled up with food. Surely at this critical time this is pure and simple waste. The Steers of Sangeen Township, a prominent farmer and a large feeder of stock, told me on Saturday that if the farmer could only get that feed that is being wasted in this way, that is feeding the hogs that are going to be killed in Toronto, that it could be used to increase the weight of the hogs on the farm. What a good thing it would be to help the increase of production by putting a stop to this unnecessary waste. It would not cause loss to anyone but the profiteer who is making his profit out of the farmer, and the cutting out of this waste would leave the hog in better condition for killing when sent to the packer. The difference between the price of the fed and watered hog and the price of the weighed off car hog is supposed to be on an equal basis, but some men have become mechanics at the feeding process and claim they can feed the hog back to its home weight but doing that means a lot of stuffing of food which is a waste and which ought to be sold to the farmer. Our farmers are anxious and willing to do their part in this awful war but let our men in authority do their part and see that this wasted food is placed on the farm and very soon the Food Controller will be surprised what an increase it will make in hog production. We all know to-day the farmer cannot procure the extra food necessary for feeding his hog in order to give the increase which is asked of him. It is up to the Food Controller to see that our farmers get this wasted hog food in order that they may be able to increase the hog product.

In reference to the foregoing it is explained by an official to a city newspaper reporter that the people at the Stock Yards had nothing to do with feeding hogs or other animals in their pens; that all they did was to sell feed to the owners, who, as a matter of common humanity, were required to feed their stock. "As a rule," said an official with whom the reporter discussed the matter, "hogs require feeding as soon as they arrive, on account of having been a long time on the road without any. The owners have no idea when their shipment will be sold or how long the animals will be kept before being killed after they have been purchased." As for feeding them for weight, purposes the suggestion was scouted as absurd. "The men who do the buying are not fools, and would not have it put over them in that fashion," said a prominent stock man. It was also pointed out that in a great many cases hogs and other stock were re-shipped when they had been sold.

The Canadian Farmer's Real Friend

YOUR letters will be answered, you will get the exact information you need, you will get the advice and assistance you desire free, provided by experts to whom we pay real money for the answer we send you, if you become a subscriber to FARMER'S MAGAZINE. This magazine is for—

The Men on the Farm
Helps them plan, and tells them how to construct barns, stables, sheep barns, hen houses, silos and dwellings.
Tells all about septic tanks, hydraulic rams, water-supply and lighting systems, power farming.
Gives advice and information about feeding and care and the health of animals; about the best methods of farming, co-operative methods, improvements and insurances.

The Women on the Farm
Helps them in their home planning and making.
In their kitchen problems.
In matters pertaining to children—their health, rearing and school.
Deals with stylish dress patterns and other feminine interests.
Gives help in gardening and flower culture.
Gives news of women's work.

For all it provides, stories, special articles on timely subjects by experts—not amateurs or experimenters; and the latest and most accurate information on every matter of concern to farmers.

FARMER'S MAGAZINE

has three times as many regular departments as are ordinarily found in farm papers, and is about the most satisfying paper you can get at any price. Subscription $1.00 per year.

EVERY issue of FARMER'S MAGAZINE is worth a dollar bill, for it is couse it is downright helpful in practical ways. The free advice and information it supplies per request—by private letter—may be worth many dollars. Have the FARMER'S MAGAZINE in your house as you would a hammer or a saw—an ever-ready and indispensable help. Have it for its friendship.

The price is One Dollar per year. Bid us send it to you, and remit for it when we send you the bill. Address the publishers:—

The People's Popular Store

Stock-Taking

THE continued extreme cold weather, scarcity of such raw materials as fur skins, wool and fuel for manufacturing and transportation, should make our reduced prices in Ladies' Furs, Coats, Sweaters, Overshoes, Men's Overcoats, etc., very attractive buying. Odds and ends and broken sizes in all lines reduced to clear before listing on stock sheets.

The price of a cord of wood, a bushel of grain, a hog, cow or old hen, a pound of butter, a dozen of eggs, etc., will buy more average goods in any household than ever before, and there is absolutely no possibility of being very cheap till at least a year after the war is over, unless the fuel situation becomes so serious that transportation becomes so crippled that the products of the farm cannot be transferred overseas. As it is now, manufacturing is being restricted in order to export the necessaries for the brave boys in the trenches. Do not be surprised if we do not get all the imports we would like. We can help out a lot by using more wood and hasten the harnessing of our great water powers.

We are taking stock of our books too, and must get the old books out of safe, and therefore must insist on old accounts settled by cash or note before 15th Feb. Cash is a great factor in getting supplies in these strenuous times. Imagine a person going through the country to buy anything without money.

For Union Church Services

At the regular meeting of the Quarterly Board of the Methodist Church, held on Feb 4th, Messrs R A Lyon, P Carter, J S Cruickshank and P B More were appointed a committee to meet a committee or committees from other churches of the town with a view to making some arrangements for union services for the winter months.

Public Library Board

The annual meeting of the Public Library Board was held on Thursday evening, chairman presiding. The treasurer's report showed the library to be in good financial standing, with liabilities all met and a small balance on hand. Mr. Alex. Jack was elected chairman for 1918. Miss E. Miller re-elected treasurer, and Miss S. McCallum re-appointed secretary and librarian at an increase of $30 in salary. Other members of the board are Messrs. S. P. Ballachey, G. L. Carter, Thos. Muir and H. McKerracher. The librarian's report gave the number of books issued in 1917 as 7,919. There were 108 new books purchased, making the total number in library 5 983. In the reading room there are 13 periodicals and magazines on the table, also 2 daily papers and 3 weeklies.

—Rubbers, rubbers to foot every shoe. Get our prices. L C Spofford.

—Full lines of fine engagement and wedding rings at I. Shoemaker's jewelry store.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D Forrester, Barrister.

Helping the Armenians

The union Sunday School in S.S. No. 15, Bruce and Saugeen, have contributed $66 to the Armenian Relief Fund, which amount was remitted to headquarters on Tuesday by Mr. J. H. Thornburn, the S.S. superintendent.

Will Improve Our Lighting Plant

We are informed that the Electric Light Co intend rebuilding all their lines in town and putting the system in first class shape. The street lighting will likely be put on a separate circuit which will insure better service. Estimates of material are out and several companies are figuring on cost of same. It is expected the work will begin early in the spring.

Died Suddenly in New York

Her large circle of old friends in Paisley will deeply regret to learn of the death of Miss Hanna McNeil, a former resident of our town who was very highly respected here. The deceased was the only daughter of the late Duncan McNeil, who was in business here as tailor and stationer. Miss McNeil left here about twenty years ago, and after graduating as a nurse, held the position of superintendent of an hospital at Cromwell, Connecticut, U.S., and latterly has lived in New York city. Her death was due to a stroke of paralysis. The remains were brought to Kincardine for burial, accompanied by her friend, Miss McNeil Bell here about twenty years ago, and after graduating as a nurse, held the position of superintendent of an hospital at Cromwell, Connecticut, U.S., and latterly has lived in New York city. Her death was due to a stroke of paralysis. The remains were brought to Kincardine for burial, accompanied by her friend, Miss McNeil Grant of Paisley, who is also a nurse in New York. The deceased was 49 years of age.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

P. B. MORE, Druggist

—Mrs J Irwin, Queen St north, is visiting in Georgetown.

—Mr Wm Mooney, formerly of Greenock, is down from the west on a visit.

—The thermometer at Mr W H Davison's home registered 42 below zero on Tuesday morning.

—Mr and Mrs Sam Farewell and child'ren, of Black Falls, Alta., were visiting his sister, Mrs D Fletcher.

—Mr Isaac Cooper, from Sask., has been down from the west visiting his friends at Kingarf and Dunblane.

—The new railway time-table coming off trains on the branch lines has not yet been issued, but it is still expected.

—Citizens will have to do their food buying in the forenoons of the heatless days, Saturday and Monday, Feb 9 and 11.

—Mr D J McArthur, of Coaldale, Alta., is visiting his brother-in-law, Messrs Alex and Neil McDonald, 10th Bruce, and other friends in this vicinity.

—Mr John T. Sparrow, formerly of Elderslie, has been elected a councillor in Fort Elgin, heading the poll in the 1st election on Monday. Mr Bin. Hilker was also elected.

—Rev. R. J. McEwen has resigned the pastorate on Wiarton Baptist church on account of ill health. Rev. Mr McEwen was pastor of Paisley Baptist church before going to Wiarton.

—Mrs Sheaffer, who has been living in Walkerton since giving up business as a milliner in Paisley, is again a citizen of our village, having come to reside with Mrs Geo. Grant, on Victoria St., for the winter.

—Mrs Cateliffe, of Brantford, is the guest of her sister Mrs A. Sinclair. Mrs Cateliffe's husband, Col. Ashton Cateliffe, is at the head of the R.C.V.C. in France, and has been overseas since the first year of the war.

—This is another very cold touch, with no mail through from Toronto since Monday, and the fuel controller's heatless day orders indicate that the conditions are quite general. To cap it all, weather prophets are no prospects of a mild spell until April 1st.

—James H. Thompson and sisters wish through the newspaper to give their heartfelt thanks to all from town and country who put forth such an heroic effort to save their home and contents from being destroyed by fire and for the great sympathy and kindness shown them.

Store Property Sold

Mrs R J McIntyre, of Toronto, has exchanged her two stores in Paisley for two dwelling houses in the city. Mr Dimond, of Toronto, is the new owner.

Ontario is the Country

Mrs J G Hay, of Victoria, B.C., daughter of Mr Robt. Stoddart, of Elderslie, left for Toronto on Monday after spending a six weeks' visit to her old home and friends. She will attend the opening of the Legislature, also visit a few days in Toronto and Ottawa before going to her home in the West. Mrs Hay says there is no place like old Ontario, after all. She has been in B C for 21 years, and would be glad to return to Ontario any day, as this is the country for health, wealth and comfort.

Fuel Saving Holidays

The Fuel Controller of Canada has ordered a shut-down of manufacturing plants and stores in Ontario and Quebec on Feb 9, 10, 11. The only exceptions are plants which must be continuously operated seven days of the week to avoid serious injury to products, plants manufacturing perishable foods and food needed for immediate consumption, also newspaper plants. For the purpose of selling food only stores may maintain necessary heat until 12 o'clock (noon) Feb 9 and 11. The regulations do not apply to the heating of restaurants, hotels or places where meals are regularly served.

House Burned

A fire started about the chimney in the garret of Mr Jas Thompson's house at the north end of town, on Wednesday afternoon, and before the blaze was extinguished the upper part of the building was badly destroyed. The house is just outside the corporation limits, and cannot be reached by the water works hose, but the firemen ran the hook and ladder outfit down, which was used to good advantage in fighting the fire. Citizens formed a bucket brigade and carried water. As the fire was between ceiling and roof, a good deal of axe work had to be done, which accounts for some of the damage which could not be avoided. The house was recently brick veneered and otherwise improved, and all regret to see the family deprived of their comfortable home in the midst of winter. Nearly all the contents were saved, though some in a damaged condition. The insurance, we understand, was only $800 on building and contents.

CARD OF THANKS

Mr and Mrs J. Annett and family desire to thank their neighbors and friends for kindness and sympathy extended to them in their recent bereavement.

—Commencing the first of February the pay car on the Grand Trunk railway will cease to run and the employees will receive their pay by check instead of by cash as formerly. This is the result of the plans laid down by the committee of national defence to economize in coal. The employees, however, will benefit by the new regulation. Instead of being paid once a month they will receive their checks every two weeks. It has been decided that by saving by check the cost of the pay car will be released for the other work and a certain amount of coal saved.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

The Magic Powders

Administered to the Daughter, Who Seemed to Be Well, They Cured the Doctor's Real Patient.

By L. D. Stearns

Mrs. Ballard stood in the back doorway, drawing in, with slow, measured breaths, the fresh spring air. Somewhere, a robin chirped; two kittens bounded across the yard; and from the garden, a stone's throw away, a rollicking song, in the fresh, clear notes of a boy, rang blithely.

Mrs. Ballard wiped the perspiration from her face with a damp, patboiled hand. "It's no wonder," she sighed, "that young things feel frisky. Time was, I remember that I used to whenever spring came along."

A neighbor clicked the gate. Mrs. Ballard greeted her. "Good morning, Mrs. Winn. Come right in."

She led the way into the kitchen where a basket of snowy clothes was waiting to be put on the line. "It's not often," she excused herself, "that I daily over the wash. But I've the most aggravating headache this morning—the kind that just keeps a-nagging like."

Her caller nodded. "I don't wonder," she remarked shortly, "that you have headache. There isn't a girl in town has so many frills as Joyanna. And I've never seen her even so much as help you at the rinse."

The mother sighed. "She's young," she apologized. "I want her to have her youth. I never had any." She was piling the breakfast dishes into the washing pan. "Mother died when I was only nine and by the time I was twelve I was keeping house for father and the two boys. There wasn't much time to think about youth in those days. But I always said if so be's I had a girl of my own she should have a few years to enjoy just being young."

Mrs. Winn moved a little impatiently. "That's all right, as far as it goes," she acknowledged. "But what's the matter with you getting a few years to enjoy just being a woman? Seems to me, just because a body didn't have a chance to be young is no reason why they shouldn't get a chance to live. You need your turn."

Up the walk came a vision of girlish beauty. Joyanna Ballard entered the

"I Thought My Happiness Was All That Mattered. Teach Me Another Way!"

warm kitchen. "Mercy!" she cried. "You're stifling in here! Why in the world don't you go out and visit on the porch, Mother?"

"Your Mother's work happens to be inside, my girl," Mrs. Winn answered. "And I didn't come to visit. I came for a dozen eggs. We were having a chat first. Your Ma's plumb beat out with the spring weather."

Joyanna turned anxious eyes toward the sink. "Don't you feel well, Mother?" she asked. "I just asked Sue and Ned Thom to come for tea tonight. Had I better run over and say you're ill?" If an added bit of rose touched the velvet of her cheeks at the mention of Ned Thom's name, only her mother noted it.

"No, no, child," Mrs. Ballard spoke facetiously. "I dare say I'll be all right by noon. What's you want for supper?"

Moving backward, Joyanna stood framed in the open doorway. The morning breeze tossed bright strands of coppery gold about her cheeks and ears. Her white morning dress, open at the neck, showed a throat as white and smooth as ivory. "I wonder," she inquired, wrinkling her pretty brow, "if it's too late for hot raised rolls? And Ned does love angel cake! And couldn't we have brulee?" Her voice was pleading. "I forgot all about it being washing day," she confessed. "If it is going to be too hard, I'll run right over and say you're sick."

Abruptly Mrs. Winn rose. "Did you ever have a headache, Anna?" she inquired crisply.

The girl in the doorway flushed. "Why, yes," she replied shortly. "I suppose everyone has."

"Then," declared the grim-faced woman, "you know how it feels, for though some's worse than others, a headache's a headache, same's a humanize a human and a heart's a heart. Can I get a dozen eggs, Mrs. Ballard?"

A moment later she stalked majestically down the walk. As she passed Joyanna who was bending over a flowering shrub, she remarked, "You'll be mighty lone-some, I'm thinking, if you wake up some day and find your mother gone."

Joyanna straightened. "Gone!" she repeated. "Where on earth would she go?"

"There comes a time—" Mrs. Winn's words were as clear and cold as an icicle glistening in the sun—"when we go."

Mechanically Joyanna brushed a bit of dust from the front of her morning gown. When she spoke her voice seemed strange and harsh. "I do wish," said she fretfully, "Winston would stop that whistling." But clear and joyous and loud, the whistling went on.

Mrs. Winn regarded her curiously. Then she turned. "I saw her go into Dr. Wattles' office yesterday," she said and snapped the gate with an aggressive click.

The minutes passed and still Joyanna stood as if rooted to the spot. A vague wonder flitted through her mind as to whether she could ever again bear to look at the bush beside her. The twittering of the birds hurt her. The gay tune from the field seemed like thunder in her ears. Then she flew into the house.

As she stepped inside the door a cheery "Good morning!" made her turn. Dr. Wattles' car stood by the gate. Dr. Wattles, gravy, keen eye, was looking her up and down.

Closing the door behind her, she went out to him.

"I brought two powders'" he announced slowly. "I thought I'd see you either in the yard or somewhere along the way."

"For Mother?" The strange sharpness was still in her voice.

"No." He ran one finger thoughtfully about the edge of the steering wheel. "For yourself." His eyes met hers. "Your mother was in for a tonic yesterday. A mere tonic, it appeared to me, wouldn't fill the bill. So I've brought along these two powders for you to manage. Mix 'em thoroughly and take at once. If they act right, I guess she'll come out all right in time." With a whir, he was off down the road.

Joyanna gazed at the neatly folded powders in her palm. Then she retraced her steps to the house. Not for nothing had she gone through college with the highest honors of her class. In her quick brain lurked a vague premonition of what she was to find.

In her cool, dainty room she slowly unfolded one of the "powders," smoothed it gently and through a blurring mist, read, "Not alone our lives but the lives of those we love, are in a great measure what we make them. The sun and the sound of the birds and the glory of the spring are for all alike. Share ye one another's burdens and so fulfil the law of Christ."

Then she opened the other: "A little honest love; a little help; a little cheer. To be given at intervals every day."

Like a panorama, the years since her father's death spread before her. How full of brightness and sweetness and love they had been! In correct pooling proportion, how full of dullness and work and thanklessness they had been for her mother! With cutting clearness she saw the cheap calico dresses, varied by one dull, rusty black, hanging opposite her own dainty whites and pinks and blues.

Crossing to the window she drew a long tense breath and raised a white but earnest young face to the sky. "O God!" she whispered. "I thought my happiness was all that mattered! Teach me another way!"

A second later she was fastening a plain gingham in place of the dainty white. Then she ran briskly downstairs.

"Mother," she cried, crossing to the sink where Mrs. Ballard was still at the dishes, "you go straight upstairs and lie down. I'll do these!"

"No, no, child," her mother demurred. "It's too hot. You'll get all fagged out for to-night."

Like the sting of a whip, the thought of Ned Thom stung her. His student life, so far removed from all household care—he would never understand!

"They're not coming to-night." Her voice was soft and sweet. "I guess they'd just as soon go over to Lora Dale's lawn party anyhow. I'm going to 'phone them that you and I are going shopping, if your head gets fit, all afternoon. I've been looking over my things. It's scandalous to have so much half-worn stuff on hand and I'm not going to have a single new dress this year. We're going to get a few things for you, for a change."

At sight of the wistful, eager light that flooded the tired face some'hing new and clean and sweet swept through the soul of the girl. It crowned her, for the moment, with a touch of something almost beyond earth. "Mother," she said slowly, "I never knew how really much I loved you before." Then, with a gentle push she moved her mother toward the stairs. "Do get to bed! I'll be up in a jiffy to bathe your head, same's you do mine when it aches."

She hurried to the telephone. "I'll have to cancel that invitation," she said a moment later. "Mother has a headache and she'd never let me get supper for you and Sue, and I'm not going to let her. And—" just a moment she hesitated, "—I'm not going to ask you again, either, until I've learned to get up a meal by myself. I'm afraid Mother's been doing too much. . . . What's that? . . . No." Sweet and clear, her voice carried over the wire; sweet and clear, the light still shone in her eyes. "You'll have to count me out. I can't go, Ned. I'm through playing. I think I'm just starting to—live. I want to get Mother off to Aunt Nell for a rest and we'll be snowed under with sewing."

The April sun streamed in and touched the tawny gold of her hair. Her face was hidden in her folded arms; and in her heart Ned Thom's words, rang, like chime of silver bells —"Joy Ballard!" The words seemed to the listening girl a tender caress. "I've often wondered if the heart was quite as sweet as the name. Now I know! I'll be round there in about fifteen minutes to say three words I was just a little—afraid to say—before."

From the field, the sound of a merry tune wafted through the air. "Dear old Win!" she smiled. "I hope he never forgets how to whistle. It sounds so—glad!"

About the House

Why Not a "Bean Day"?

We have had wheatless days and meatless days urged upon us, but why not consider the merits of one "bean day" every week? Beans, as we know, are meat equivalents; and even though the price has trebled in the last year, they are still cheaper and give more nourishment of the same kind than animal protein. Now, with the gathering of the crops, dried beans should be hanging a-plenty in cellar or attic and the creative housewife will find still more ways to use them than before.

There are black, red, white and all manner of mottled beans. Their value is about the same; all are high in protein and starch, so that really the bean is meat and potato combined. The whole family has also sulphur compounds of great value. The one disadvantage they possess is the thick leathery skin, which sometimes irritates the stomach and makes people think that "beans don't agree with them." It is better to keep back the skins when cooking for children and persons of weak digestion.

Mashed Beans

Until recently few housekeepers were familiar with the method of using pulp instead of the whole bean in the familiar "pork and beans." To make this pulp, boil any lima, pea or red bean in very little water until tender. Press through a fine puree strainer and season. This pulp can then be used hot instead of mashed potato, or it can be made into croquettes or patties or as a stuffing for meat and vegetables. The pulp of lima beans is particularly sweet and delicious. If combined with beaten egg yolks and stiffly beaten whites it makes a soufflé or baked custard which is most delicious and nourishing, especially for children.

This pulp is really a 100-per-cent. no-waste food, for even though the price of beans is abnormal, it must be remembered that there is not an ounce of loss through bone, gristle or trimming; they are the most concentrated food. The one ingredient that they lack is fat, so it should always be combined in their cooking with contrasting flavors, like tomato, pepper, thyme, etc., should also be used.

Much is being made of the new emigrant from Japan, the soy bean. It is the most nutritious of the entire family, is as easy to cook and tastes just as well as our own navy bean. It can be boiled, baked or made into soup and the flour makes delicious muffins and pancakes. Ask your dealer about the soy bean and try some of your favorite recipes with it.

Another bean that could be used more in the large red kidney bean, whose pulp is particularly mealy. This is the kind used by Mexicans and Italians and which is so tasty in hot, pungent dishes. The pulp mashes well, makes excellent croquettes and stew. The small red and white mottled Italian bean has very good flavor, especially excellent for baking. The lima has the sweetest flavor of all and makes the best mealy pulp.

It is now possible to secure in packages form flour made from various beans. These make excellent soups very quickly or can be used as a thick cereal or made into puddings in which children delight.

Making Up Leftovers

Beans are also a food which use up scraps and leftovers to the best possible advantage. Any small trimming of meat, ham, celery tops or the water in which vegetables were cooked can be used as the water in which to boil the beans and increase their nourishment. There is not a ham shank too small or a bacon rind too old to be used for flavoring. Carrots, cabbage, and celery too wilted to appear as vegetables can be cut in fine bits and combined in the various bean dishes. Beans should always be cooked with the pot lid off in order to let the sulphur compounds escape. The water in which they were soaked should not be used; but do not throw away the water in which they were parboiled, as this holds some of the valuable elements. It seems natural for beans to cook best in earthenware, and many of us should try the plan of cooking soup in crockery like our frugal cousins, the French. The flavor is better and the service made easier by cooking and serving in the same dish.

Cold beans can be utilized in many kinds of salad. A delicious one is made by combining the cold beans with thinly shredded cabbage, green pepper and mayonnaise. The cooked beans make a stuffing for tomato cups or when combined with sliced apple or celery give a substantial salad. When you want something new for a snack lunch try cold beans with boiled mayonnaise and diced celery eaten with a hot frankfurter and a cup of coffee. There are so many ways to serve beans that they could be served every day in the week; but if we decide to have only one bean day we will help along the war and at the same time benefit our own stomachs and pocketbooks.

Save the Fat and Soap.

What can be done when once women really set their minds upon the conservation of all resources is wonderful. A splendid example of a big institution run with the best of everything used, but nothing wasted, is the Ontario Military Hospital in Kent, England. The Army Medical Service there is conducted with the greatest efficiency, and the food for the sick men is the best to be had, but there is not one ounce of fat or anything wasted. Even the greases off the plates is melted down and used for munitions or other purposes. Wounded soldiers who have been nursed in England at the Ontario Military Hospital at Orpington speak in glowing terms of the treatment they receive there, and one and all express the wish that if they ever get wounded again it will be to this hospital they are sent.

If we have learned nothing else we have learned the value of the stock-pot in our larders since the war began. Even the remains of oatmeal porridge, bacon rind, scraps of vegetables and bones, when boiled long enough and strained, make most delicious soup.

This snowy weather the children's boots would be made much more watertight by being rubbed over with a little melted fat or oil. This also prolongs the life of the leather, which is a consideration these days. Many ways of using scraps of soap have been adopted by the thrifty housewife. One of the simplest is to save the pieces until two or three handfuls are accumulated, then put into a stone jar, or tin, and fill with boiling water, stirring until melted. When cold you have a splendid soap jelly, which is excellent for washing flannels.

Even broken china can be used to feed your fowls—occasionally! The next time a plate is broken try smashing it almost to powder and throw it to the hens. The lime and clay in earthenware and china is very good for them and they enjoy pecking at it. The fowls lay much better for an occasional tonic of broken plates!

ENGLAND'S BRAVEST WOMAN.

The Dowager Duchess of Sutherland Has Won This Appellation.

Millicent, dowager Duchess of Sutherland, once known as England's most beautiful woman, is now called "England's bravest woman." She was one of the first British women to go into France on nursing duty. Her first year in the service was spent much of the time under shell fire and several fragments of shells ripped her garments during those bitter days when British pluck "held on" without sufficient shell protection from its own forges.

In 1915 she was captured by the Germans, being too busy binding up the wounds of the maimed Tommies" in the trenches to bother about retreating when the Huns took one section of the first line. For eighteen months she was detained in Germany and finally exchanged for a German lady whom the English had similarly captured.

After a few weeks' rest at her home she returned to the firing line, where she is now stationed, actively directing a section of nurses in one of the hospitals nearest the fighting line.

Grated cheese and chili sauce make a good sandwich filling.

"Our greatest glory consists not in never falling, but in rising every time we fall."—Goldsmith.

Buying In Toronto

You'll enjoy buying in Toronto. The big stores are so huge and attractive. And the range of merchandise is so extensive that it is certainly a great pleasure—buying in Toronto.

And this pleasure is the greater because you can stay at the most comfortable of home-like hotels, THE WALKER HOUSE. (The House of Plenty) where every attention is given to ladies and children travelling without escort.

And your purchases may be delivered there for you and relieve you of all worry.

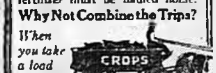
When you come be sure you stay at

The Walker House

The House of Plenty

TORONTO, ONT.

Haul A Load *Each* Way



Crops must be hauled to town, and fertilizer must be hauled home.

Why Not Combine the Trips?

When you take a load to town

Plan To Haul A Load Of Spring Fertilizer on the return trip

Play safe and get your fertilizer stored in your own barn. War conditions have decreased the supply of fertilizer, and increased the demand.

Co-operate With Your Dealer

Your dealer's have sufficient storage space. Shipments in less than capacity car loads—40 to 50 tons—are discouraged, even so found. Order now—co-operate your dealer to combine orders and make up a full car load. When car arrives take your part of the fertilizer direct from it—release car for other uses.

Order Spring Fertilizer NOW.

Make certain of your supply and at the same time help relieve railroad congestion.

Farm Prosperity is Directly Dependent on Good Roads

The only kind of road surface that will not be torn by either fast moving vehicles or heavy slowly-driven trucks are those known as Permanent Highways of Concrete.

Concrete is just as important a factor in improving Road conditions as it is in bettering a farm. It makes a Road as durable and satisfactory as your Concrete Silo, Concrete Tank or Concrete Barn Foundation.

The Greatest Help a Farmer Ever Had

This is the book that over 100,000 Canadian farmers are now using as a text-book for the improving of their farms. In it you will find 100 pages of valuable advice—each page devoted to some one money-saving improvement that you can make yourself quite easily of

CONCRETE

Tells how to build a Silo, a root cellar, a water-trough, a culvert, a retaining wall, or a garage. Explains why it is better to build these and numerous other farm utilities of concrete, than of any other known material. Gives simple yet complete directions. All the buildings and small jobs the farmer needs to build can be constructed of concrete, which is nothing more nor less than a combination of cement, sand, pebbles or crushed stone—all staple products easily and cheaply obtainable.

Consider these important advantages of Concrete: fireproof; watertight; durable, vermin-proof; sanitary; weatherproof; rigid; rapidly built; no repairs; no painting.

Write for the book—check off on the coupon below the subjects in which you are interested.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. A stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Planting the Garden.

A study of good seed catalogues will enable you to decide many people needed in the course of the season's work, as the information they contain is compiled with a view to being of service to their readers to enable them to decide just which varieties will best suit their purposes.

To insure the best germination there should be three things: the proper degrees of heat, moisture, and contact between the soil and the seeds. It is distressing to the knowing gardener to see people carefully and lightly covering their seeds with a thin film of soil—which perhaps the wind will blow away—and expect good germination.

There are some seeds which are slow of germination, on account of their hard protective covering, such as peas and beans, the coating of which must be soaked, allowing moisture to enter the interior, before germination can take place. We can assist the process by soaking such seeds in warm water over night and plant while still moist.

Some vegetable seeds are so fine that the only feasible way to plant them is to broadcast them. Others are planted this way by custom and thinning out done later.

Aids to Seed Planting

There are a number of aids to seed planting which will be of service to you. A straight-edge is one of them. With this, and a pointed stick, you can mark off the furrows into which to plant fine seeds, drawing the stick lightly along the edge, which will make a tiny furrow. By bearing more on the stick you can in this way make a furrow of any depth up to two inches.

If this straight-edge, which can be made out of a piece of board, eight feet long, four inches wide and half an inch thick, is marked off in equal spaces, say one inch, it will be a guide for quick and even planting, as you can lay it along the furrow and set the seeds at the right distance very rapidly.

To cover these small seeds use the straight-edge, pushing the soil back into the small furrow, lay it on top and walk on it. It is an advantage to use these devices to make the rows straight, as beauty adds much to the interest in the garden. A crooked row is not beautiful.

If quick germination, especially of small seeds, planted shallow, is desired, the top of the soil must be kept moist. To accomplish this without washing out the seeds requires some care. The average watering pot has a nozzle too coarse for the purpose. But if you have at command a garden hose with a spray nozzle it can be done to perfection. Turn the nozzle down until the water comes in a fine mist. Direct the hose upward so that the mist will rise into the air and fall on the soil containing the fine seeds. Once a day is usually sufficient.

The Required Quantity

Keep in mind, however, that as soon as there are signs of germination be careful not to overwater, or there is danger of a fungus disease known as "damping-off," which attacks the young plants and for which there is no cure. This is more likely to occur when watering is too heavy when the weather has been cloudy for several days in succession.

In order that you may have some idea how many seeds to procure, I give below a list of the vegetables ordinarily grown in kitchen gardens. The quantities are for a family of five, and will plant a row of each 100 feet long:

Beans, snap, one pint; beans, pole, half pint; beans, bush, lima, one pint. Beets, four ounces. Cabbage, early, half ounce; cabbage, late, half ounce. Carrot, one ounce. Cauliflower, one packet. Celery, one packet. Corn, sweet, one pint. Cucumber, half ounce. Eggplant, one packet. Kale, half ounce. Lettuce, one ounce. Parsley, one packet. Parsnip, half ounce. Muskmelon, one ounce. Onion sets, two quarts. Peas, two to four quarts. Salsify, one ounce. Spinach, four ounces. Squash, summer, half ounce; squash, winter, half ounce. Tomatoes, quarter ounce. Turnip, one ounce. Melons, one ounce. Potatoes early, one peck; potatoes, winter, one half bushel or enough to plant desired space.

Rules For Tree Planters.

If the roots of a tree are frozen out of the ground and thawed again in contact with the air the tree is killed.

If the frozen roots of a tree are well buried, filling all cavities before thawing, the tree will be uninjured.

Never place manure in contact with the roots of trees in planting.

Set trees as deep as they were originally.

A small tree at the time of transplanting will usually come into bearing sooner than a large tree planted at the same time.

Constant, clean and mellow cultivation is necessary for the successful growth of a peach tree and it is as necessary for a young plum tree, but not quite so much so for an old plum tree; it is nearly as essential for a young apple tree, but not so much so for an old orchard.

A small, compact, smooth earth mound a foot high around the stem of each young tree will afford protection from mice.

The roots of a tree extend as far on each side as the height of the tree and cultivation should extend over this entire surface.

Watering a tree in dry weather does more harm than good unless the soil is thoroughly moistened down to a considerable depth. Light watering crusts the surface, which should be kept mellow, or if this cannot be done mulch with straw or manure; flat stones will afford a mulch that is better than a hard crusted surface.

If trees are received in a shriveled condition, make a shallow trench and lay them in, filling up the trench so the whole tree will be covered with earth. Allow them to remain buried for several days and if the trees have any life in them they will swell up and become plump.

Do not water trees before the leaves expand. If the weather is dry water the bark, stem and branches frequently. Trees in leaf and rapid growth may be watered at the roots if watered thoroughly.

Young trees will be benefited by spreading manure over the roots in the spring, covering a radius equal to the height of the tree; spade this manure in in the autumn and cover with fresh manure, which should be spaded in in the spring.

Young trees should not be set in grass fields, or sowed grain or clover. Potatoes, carrots and low crops that are well cultivated may be raised among young trees.

First Steps.

Like a desert vast and cheerless
Stretch the nurs'ry lands.
Who could gaze with vision fearless
O'er those trackless sands!
Though there waits a shelter peerless
Mother reaching hands.

Eyes alight with exultation,
Lips that shape a shout;
Just a flutt'ring hesitation.
Just a sigh of doubt.
Dare and launch a generation!
Sturdy legs, step out.

—Burgess Johnson.

A Woman's Way.

Men folk tell us that we cannot drive a nail, but here is a suggestion for setting a screw in some out-of-the-way place or starting a nut on a bolt which is beyond the reach of wrench or fingers. If this comes to the attention of any men readers, they will find that they too can use it to good advantage. Stick a piece of gum on the end of the driver and then set the screw in position on the driver. You can then move the driver about and the screw will not fall off. And you can start it in the most out-of-the-way place imaginable. To start a nut on a bolt use the same idea, stick the gum on the end of a screwdriver, bolt or piece of wood, press the nut down into the gum and start the nut wherever you please.

BOYS AND THE CHURCH

By Beatrice Bence.

"Why is it almost impossible to keep our really worth-while boys after they reach the age of fourteen and upward, interested in church and Sunday school?" is the query of an anxious mother.

As a lover of boys, as well as the mother of boys, I want to tell you how I think we might do so. Of course, every boy is worth while, no matter who he is or what he is; but what the anxious mother meant was red-blooded, healthy, bright, and life-abounding boys.

All too often this class of boys are not found interested in the church, and their love of life, and excitement, and adventure often leads them into wrong paths. They could do so much for the church, and the church so very much for them, if only we would meet them on their own plane.

I think all who understand boys from fourteen to eighteen years of age, know their shrinking from any show of sentimentality. All their tender thoughts and feelings are hidden under an assumed brusqueness of manner, and they are so afraid of being "sissified."

On the other hand, they have a good deal of penetration, and the majority of them are doing considerable thinking on their own responsibility these days. They can't see any harm in going into an orderly, well-regulated poolroom and knocking a few little balls about on a table. It does not harm them so far as they can see, nor anyone else. They meet many boys there from the best families in town. There are seats a-plenty to lounge—everyone is at ease and sociable and jolly. Where is the harm? they reason to themselves, and to their mother and father.

But the church says, "It is wicked and they are bad boys." If their love of motion and music and life leads them to want to dance, the church doesn't approve. If a few get together on Sunday afternoon and send up a few shouts of joyous, exuberant laughter, the neighbors are shocked. If they smoke a cigarette they are on the way to the gutter or the gallows.

Now, why can't the church gather these boys together and lay aside some of its stiffness, and sobriety, and sanctimoniousness, and teach the Bible as simple ancient history, with Jesus a simple pattern for all mankind to follow? They would be interested almost immediately, for nearly every boy likes history. Boys are not naturally devout, and they dislike things taught in a devout manner. To them it seems affectation, and what man's man can endure affectation? And the boy is only the younger man.

Again, teach the Bible from the standpoint of its literary composition. For classic simplicity, dramatic element, dignity of style, power and forcefulness of expression, brevity and terseness, it stands preeminent. Taught from this standpoint, boys who are already studying English literature in school, and making a study of many of the classics, will find the Bible fascinating. Teach right for right's sake. Teach them that they may reap what they sow in the hereafter, but they most certainly will reap just what they sow in this life. Teach them the power of right thinking. Teach them the value of a moral life to them now. Healthy, normal boys are not thinking of dying; they are thinking of living—living abundantly; if they have a religion they want it to be a religion to live by. And, after all, don't you think a religion to live by would be a good one to die by?

Teach not how to die, but how to live. Let us gather our boys into the church and guide them into ways that will lead to their highest good, and do it by getting their point of view. Then I think we will have our "big boys" in the church—and we want them there.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed question is of general interest it will if not it will be answered personally, if closed. Dr. Currier will not prescribe for individual cases or make diagnoses Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St West, Toronto.

How to Avoid Pneumonia.

Pneumonia is a winter disease identical with lung fever, a disease to which the mature and the aged are very susceptible. It is especially prevalent at the present time in conjunction with war, pestilence and famine, and because of strains of all kinds which have made people unusually susceptible to it, its toll of victims is unusually high.

The young are suffering from it in great numbers this winter, and because of high prices and poor nutrition they have not the power to resist it they have in normal times. Those who are enfeebled by disease or dissipation particularly alcoholics, are its easy victims.

Pneumonia is a germ disease due to one or perhaps several varieties of bacteria. When doctors speak of a mixed infection they mean that several kinds of germs are found in the material which is coughed up by the patient.

This disease usually begins with a hard chill, high fever, severe headache and soreness and aching of the entire body. The air cells of the lungs become filled with mucus and other material and therefore are impervious to air. When both lungs are filled up in this way the patient is bound to die for want of air as surely as if a rope were tied around his neck. When only one lung or a portion of it is obstructed there is hope for him, but he will be compelled to breathe much faster than usual in order to get the requisite volume of oxygen into his blood.

He coughs and expectorates the substance in his air cells to get more breathing space but if it accumulates faster than he can get rid of it he will lose the game. His blood is carrying poisons which it cannot get rid of while its supply of the vital oxygen is diminished; the candle is being burned at both ends. The chances of the patient's recovery naturally diminish with the diminution of his resisting power. It is better to ward off such a deathly disease altogether than to try and cure it.

Sometimes it will attack a person when there is a sudden drop in the temperature no matter how carefully he has been living.

Sometimes it follows sudden cooling of the body when one goes out of a warm room without adequate protection. Or it may follow fatigue and exhaustion, as it often does when a doctor has been out all night with a trying obstetric case. Deep breathing is important in preventing it; because the aged are shallow breathers they often die of pneumonia.

The whole body, but especially the feet, must be kept dry and warm. Constipation and indigestion must be controlled, habits in eating and drinking must be simple, and, above all things, one must get plenty of sleep and not worry. Simple as these statements may seem, it will pay to heed them.

Questions and Answers.

M. E. 1. What is the difference between chronic arthritis and rheumatoid arthritis?

2. Would a sufferer from either disease be injured by living in a house which has sewer gas in the cellar?

3. To whom should one go to find out whether sewer gas really is present in the cellar?

Answer: 1. Chronic arthritis is any form of inflammation of the joint. Rheumatoid arthritis is chronic joint disease with wasting and deformity and loss of power.

2. Anybody would be likely to suffer from such a condition, sewer gas being one of the most pervasive of gases.

3. To your local health officer. He would make the proper tests to determine its presence or absence.

The Lost Thimble

Prue withdrew her head from under the sofa, brushed a bit of lint from her eyelashes, scrambled to her knees and glanced at the clock. Twenty minutes! She came to her feet and rapped firmly on the table with her thimbled forefinger. The others, some tiptoeing, some crawling, some pawing over the piles of completed work, some shaking out their skirts for the dozenth time, turned expectant faces.

"Oh, have you found it?" cried Louise Bemis.

"No, I'm sorry to say! But, girls, this won't do; we're losing too much time. Remember, this is a special meeting called expressly because we were notified that this month's consignment must be ready earlier than we expected, if it is to go by the first ship. That means using every minute, and we shall only make good by the skin of our teeth at that. Now, Adele's gold thimble is here, in this room, safe if it's where it can't be stepped on—"

"It isn't on the floor. I've crawled over every inch!" interrupted Louise.

"Well, then, I propose we stop hunting and go back to work. I'll hunt again, alone, after our job is finished and you're all gone, and simply keep on till I find it. Of course, you're all eager to help Adele, but I'm sure she'll understand if I don't let you—won't you, Adele?"

"Oh, of course," assented Adele stiffly. "I'm sorry to have made trouble—very sorry. It was a present, and set with a turquoise hard, and my initial in diamonds, or I'd never have mentioned it; but, of course, it's of no consequence."

Prue's heart sank. Adele was plainly resentful. Nevertheless, she set her committee to work once more, and the last comfort pillow was triumphantly completed before the meeting broke up. She invited Adele to remain; but Adele declined, and departed abruptly to keep an engagement.

"Prue, you were fine, and you did exactly right!" declared Louise, her "chum," who had lingered. "Adele's a pig of selfishness, anyway, and it doesn't matter what she thinks."

"Oh, yes, it does, I'm afraid—when she was the loser and my guest!" sighed Prue. "But the work came first; and then, we were all flustered and hindering one another and wasting precious minutes, and all of a sudden I remembered one of Aunt Prudence's maxims,—It's the first time I ever did remember a maxim at the right time,—and I acted on it. But, all the same, I'm frightened! Suppose we shouldn't find the thimble? It must have been valuable."

"I suppose so—it was fairly lumpy with ornament; I don't see how she could sew with the clumsy thing," said Louise, withdrawing her hand from exploring behind a shelf of books and daintily flipping the dust from her fingers with her handkerchief.

As she pulled the handkerchief from her apron pocket, the lost thimble came with it, and rolled clinking and glittering on the floor. The girls uttered a simultaneous cry of delight.

"It must have dropped off into my lap when Adele leaned over to watch how I turned that fussy corner of my bag," said Louise; "and then it slipped down into my pocket. We might have hunted the whole afternoon and never have found it. Lucky you stopped us. Prue, what was that maxim you were stalking about? How did it happen to fit the circumstances?"

"When I was a headless youngster, visiting my Quaker name-aunt Prudence, I was forever losing my toys, and then unsettling everything and everyone hunting for them immediately, insistently and frantically, looking half a dozen times in the same place,—you know how an impatient child does hunt,—and Aunt Prudence used to sit back, exasperatingly calm, and give me good advice.

"'Child, child, if thee has lost one article remember thee does not improve matters by losing three others, which are generally more important: thy head, thy temper and time.'"

"Good for Aunt Prudence!" said Louise, with a laugh. "Likewise, good for Niece Prue! Let us telephone Adele we've found her thimble."

A Real Youngster's Day.

A good breakfast to start him off—milk, cornmeal mush, apple sauce. It makes him fit for school and fit for play.

Milk and plenty of it makes him grow—a quart each day if you can. Put it on his cereal and in his cup. Make it into soups, puddings or custards for him.

While milk is best, of course, but skim milk is good if there is a little butter in his meals. Cottage cheese is good, too.

No coffee or tea—not even a taste. Leave them for the grown-ups. Milk, cocoa, not too strong, and fruit juices are the drinks for children, and plenty of water always.

Fruit they enjoy, and they need it, too—baked apples, apple sauce, thoroughly ripe bananas, prunes, oranges, etc. Give them vegetables, fresh or canned. Plenty of fruits and vegetables tend to prevent constipation. Use proper food and do not depend upon laxatives. The youngster can't be well unless the bowels move regularly. Don't let him hurry off in the morning without attending to this duty.

Other foods a child needs: Whole-wheat bread, not too fresh, corn bread, well-cooked oatmeal, cornmeal, rice. They help make strong boys and girls. Some fats, butter or margarine or meat fats on his bread or in gravies. An egg, perhaps, particularly if he doesn't get his full quart of milk, or he can have a little meat or fish, but he does not need much.

Sweets are good for them—the right ones at the right time. Dates, raisins, stewed fruits, simple puddings, sugar cookies, are better than candy. Give them at meal times.

Between meals let them have bread and butter, a cracker or fruit. They won't spoil the appetite, and candy will.

"Utmost wisdom is not in self-denial, but in learning to find extreme pleasure in little things."—Ruskin.

Poultry

Just because you culled your pullets at the age of five or six months is no reason why a second culling is not necessary. Also, a culling of the yearling hens, to determine which should have a right to hold over for breeders, is equally important. That these statements are good poultry gospel I have proved again and again.

Pullets of the smaller breeds, and even Rocks, Reds, and Wyandottes, if well fed and properly housed and handled, should be laying when six months old, or soon after. Any well-raised pullet that delays laying longer than six and a half to seven months from the shell, seldom will make a profitable egg producer.

The profitable yearling hens to hold over are the ones that commenced laying comparatively young (not too young, before being well-matured), and continued with but few and brief interruptions for ten or eleven months before molting. The productive layer will then have a ragged, toil-worn condition of plumage, toe nails worn to stumps, and shanks bereft of their color. But, in spite of her disreputable appearance, the hen that has laid heavily will still wear a bright, velvety comb and head furnishings, and exhibit plenty of hustle and life even up to time the molt begins. The hens laying steadily eleven and twelve months in their pullet year before molting are treasures, and are worth keeping for breeders as long as they continue vigorous and their eggs prove fertile.

If the weeding out of loafing hens has been neglected, delay no longer. Slacker hens have no business consuming feed at present prices.

The Dairy

An experience in my herd has convinced me that it pays, and pays well, to feed grain to dry cows—even at the present high price of grain, says a successful U. S. farmer.

In November, 1916, I bought an ordinary grade cow from one of my neighbors. She had been fresh for about two months with her fourth calf, and was giving 18 pounds of milk a day. Her owner told me that she had been out on pasture and received no grain while dry, and that she had given three gallons, or about 26 pounds, of milk a day when she was fresh.

As feed was high last winter, I fed grain rather sparingly; but when she went dry in June she received a small amount of grain along with the other cows—to keep her quiet, more than for any other reason. In August she gave us a fine heifer calf, and began milking 13 pounds daily. Two months after calving—being in the same stage of lactation as when I bought her—she was giving 24 pounds, and was still going strong.

She was dry a little less than two months, and during this time she consumed not over 120 pounds of grain, being fed at the rate of about two pounds daily. At $52 a ton for the feed, it cost a little over $30. But during the first two months after calving she gave on the average about 6½ pounds of milk more per day than she had given during her previous lactation. At a net price of $2.60 per hundred for the milk, the increase in milk was worth a little over $10 for the two months. Beginning with the first of October, when the net price of milk is about $3.00 per hundred, the showing will be still better.

This increase in milk was due to the grain fed while the cow was dry, because her former owner and I manage our herds very much alike, even to feeding the same brand of dairy feed.

Sheep Notes

Ewes which are in poor condition must be sorted out and given a little extra feed and care. When the flock has not been properly cared for during the winter, the lambs are often too weak to stand, and unless given immediate care will become chilled and die.

Pens four feet square should be provided for the ewes at lambing time. These protect the young lambs from the rest of the flock and keep them from becoming separated from their mothers. If the attendant sees that the young lamb gets up and nurses by the time it is fifteen or twenty minutes old there will be little need of giving it further attention.

Twins or triplets are not uncommon, and the ewe sometimes refuses to own the weakest one. In case of twins, if the stronger lamb is removed for an hour or two the ewe will turn her attention to the other lamb, and when the stronger one is put back she will own them both.

Binder Twine Available.

An ample supply of binder twine for Canadian requirements next year at reasonable prices has been assured, as the result of an agreement reached between the United States Food Administration and the Mexican sisal growers of Yucatan.

PAISLEY, FEB. 6th, 1918

Letters from the Soldiers

Soldiers' New Year Feast in France

Pte. J.F. Brown, of the C. M. G. Corps, son of Mr. and Mrs. Geo. Brown, 8th Bruce, writes home under date of Jan. 6th, from France:

Dear Mother—I am now going to tell you about our New Year's dinner. We held it last night (Jan. 5th) which was as early as circumstances would permit, but, nevertheless, as New Year's comes only once a year every one did justice to the repast. Each section ate in their own huts, which were well accommodated for the purpose. Picture, if you can, a long table in the centre of the hut, uncovered and decorated only by half a dozen candles which served to illuminate the cheery faces of the thirty partakers of the feast. At seven o'clock the dinner, which consisted of roast pork (in lieu of turkey) potatoes, turnips and carrots, was served, and soon one expression only was noticed on the faces of those present—which more than reminded us that contentment. Soon after the dinner the hut became so full of smoke with cigarettes and aroma of cigars that it was necessary to open the door, and in came the cold January air, it was New Year's season. The dishes were now cleaned away and someone struck up a favorite rhythmic song in which we all joined. The programme of songs, recitations and toasts continued until some sergeant, probably the orderly sergeant, shouted, "Lights out in the mansion." Then there was a scramble making beds, which is no easy accomplishment in a hut 12x8 ft. when everybody is striving to attain the same end. Soon we were all in bed, satisfied that we had enjoyed ourselves, and only one worry on our minds—whether there would be any physical training next morning or not. However, there was not.

The boys along the line gave Fritz a New Year's greeting in the form of high explosive shells and shrapnel. I had been asleep but awoke just as some one on the other side of the room shouted, "It's twelve o'clock!" After exchanging greetings I lay down again with the intention of going to sleep when a sudden thundering boom of guns opened up all along the line, lasting for about five minutes and very clearly heard through the frosty air. I wondered for a moment what was going on, but soon came to the conclusion that the Canadians were giving Fritz his well deserved greeting. There are numerous rumors that the Germans are going to work the offensive soon, but believe me, we are prepared to face anything the Hun cares to put against us.

We are having very cold weather and had more frost last night than ever before this winter. I was on air picket duty on New Year's day and it was very cold. A Fritz scouting plane came over and although it was far out of the range of our guns we fired a few hundred rounds to keep the guns from freezing. A fellow who was up the lines with me on the first trip was wounded on the second trip while carrying ammunition.

The World is Moving

Will the private companies continue to operate the railroads and the coal mines after the war? They may, but we doubt it. The war has simply shot to pieces the iron fences that have for years been kept six feet high around everything that comes within the range of those mystic words "Vested Rights." It looks as though a good slice of our present system of control and operation of those things vital to the existence of the people, was due to slide off into the melting pot of conservation. The railroad companies of the United States are already planning to fight public ownership of the roads at the conclusion of the war. They are reading correctly the signs of the time but it is doubtful if they can block the progress that is bound to be made in this and other directions.

—Signs of a commercial supply of gas under the surface of the earth at Hepworth are again attracting attention of enterprising business men of Owen Sound and Hepworth, who are preparing to develop the field. About 15 years ago a well was giving a good flow of gas at Hepworth, but owing to careless usage it was flooded with water

Eden Grove Postmaster Quits

Mr Alex McKeeman, who for the past nine years has been postmaster at Eden Grove, has resigned, and is selling off his general store stock preparatory to leasing in the near future for Edmonton. His son, Jim McKeeman, is a student of the Walkerton High School, and the proposed departure of the family for the west is sincerely regretted by their many friends in this district. Former Deputy-reeve Mack Scott of Brant Ist been appointed postmaster of Eden Grove and will move the office to his residence next door to the blacksmith shop. As the Eden Grove hotel, which was one of the oldest public houses in the county, was boarded up last month after being over half a century in business, the proposed closing out also of the only general store in a place which formerly had two hotels and two stores, shows the change that is featuring our neighboring burg, and demonstrates what the preacher meant when he said "that the years do not leave us and find us the same."—Herald and Times.

Man's Greatest Friend

A local auctioneer, while selling a cow recently eulogized the animal as follows: "Of all the animal friends of man she is the greatest. I will that I, as you are about to sit down to your Sunday dinner might take, from your table what she placed thereon. I would remove the cup of milk waiting at chair, I'd take the cream, the cheese, the butter, the custard pie, the cream biscuits, the roast beef and leave you a meal of potatoes and tooth picks. Every scrap of her, from her nose to her tail is used by man. We use her horns to comb our hair, her skin upon our feet, her hair keep the plaster on the wall, her hoofs make glue and her tail makes soup, her blood is used to make our anger white, her bones are ground to fertilize our soil. She has gone with man from Plymouth Rock to the Setting Sun. It was her sons that turned the sod in the settler's clearing, it was her sons that drew the prairie schooner for the stanny pioneers while she followed, and when the day's march was done she came and gave her milk to feed the babe, that was purchased to become the ruler of his country."

W. H. DAVISON

—Oats sold at $1.00 a bushel in Owen Sound last week. The Sun observes that what this means to the country in general is hard to estimate but it will undoubtedly greatly reduce the number of horses kept in towns and cities. Horses must have grain to keep them in good working condition, and with oats at a dollar a bushel there is little money in feeding horses at the present prices of horses. The price of oats will also have the effect of raising the price of cattle, hogs and other fattened stock. The Food Controller set a price on wheat and it is about time that he curtailed the speculation in all foodstuffs, or the prices will soon become prohibitive.

Killed by Poisons

All scientists agree that poisonous products in the blood are eliminated by the kidneys and liver. The kidneys act as a kind of filter for these products. When the kidneys are changed or degenerated, by disease or old age, then these poisons are retained in the body. If we wish to prevent old age coming on too soon, or if we want to increase our chances for a long life, Dr. Pierce of Invalids' Hotel, Buffalo, N. Y., says that you should drink plenty of water daily between meals to flush the kidneys. Then procure Anuric at a drug store. This Anuric drives the uric acid out. Scientific men have learned that in gout, also rheumatism, poisonous uric acid crystals are deposited in or about the joints, in the muscles—where inflammation is set up.

If we wish to keep our kidneys in the best condition a diet of milk and vegetables, with only a little meat once a day, is the most suitable. Drink plenty of pure water, take Anuric three times a day for a month.

You can obtain a trial pkg. of Anuric by writing Dr. V. M. Pierce, Buffalo, N. Y., or Bridgeburg, Ont., enclosing 10c.

St. Catharines, Ont.—"For sixteen years I have been a sufferer from kidney trouble; my back has ached unceasingly and I have had rheumatic pains in my arms, hands and lower limbs. I have doctored and tried every medicine recommended to me, but have never found the relief in anything as Anuric. In one week the soreness disappeared and my bladder was stronger than for years, so that I was not disturbed at night, where I always had to arise several times during the night. I only hope that many will read this and will try Anuric if they are troubled with any form of kidney trouble."—MRS. JACOB LOHEHEN, 68 Ave.

A TALE OF TRIPLETS

There is a pretty general idea that when triplets are born, it is very seldom, if ever, that there are at least, one member of the trio is short lived. There are few cases of triplets growing up.

The Hills town of Port Colborne has produced an instance where triplets not only grew to manhood, but are today living khaki. The three sons of Mr. and Mrs Edward Wegerich of Port Colborne—James, William and John—but more familiarly known as Jim, Bill and Jack, were born just a little over twenty years ago. Jack is in the Royal Flying Corps, and Jim and Will have joined the 67th Battery. They all wanted to join the Flying Corps, but the authorities ruled otherwise. The trio, who are good-looking manly boys, all started to school together, and wrote their entrance examinations on the same day. One of the three failed, but when the circumstances were brought to the attention of Hon. Dr. Pyne, Minister of Education, he simply issued a certificate for all three. So they all started to high school together and quit the same day, two of them going into a bank, and the third taking a position as bookkeeper. They offered themselves for military service the same day.

The three boys are so remarkably alike that only in recent years was their father able to tell them apart. It is related that once Jack wanted to go to Buffalo, but his father refused him permission, but Jack got up early and went. Will and Jim had their breakfast together, and when Jim got through he went outside, walked around the barn and then came in and had another breakfast. The father never suspected anything.

Naturally there have been many interesting happenings, as a result of their similarity in appearance. Will says he has often spent a very pleasant evening with Jack's girl and she was none the wiser until Jack called next evening.

HE SAID

He was giving vent to his feelings about the Union Government in no uncertain manner. And he wasn't a disgruntled Grit, either. He was a real good Conservative, in fact good enough to be called a Tory. It was the day after the latest prohibition move had been announced from the capital. Some of the language he used when "according to Hoyle" and is indicated by marks known to the printers and but vaguely understood by the reading public. As the interview was gets it, he said: "They told us Tories before the election that we'd still have things our own way in the Union Government and that the—| | Grits would be in the minority and we had nothing to fear from them. Borden wasn't brave enough to tell us before the election that then"—|—| | Union Government would cut off the last chance of having a drink shipped in. By—if he had done so he'd have been licked so—|—| | hard he would have been busy yet crawlin' out from under the storm that struck him. Tories are in control of the Union Government? Ha! They are, like—| | Kowell's running the country now, and the Tories were not voting for him. It looks to me as though he'd put one over on them as big as a farm house. Those —| | | shops of Tories down in Ottawa make me sick."

So there now. It will be a matter of some satisfaction for the Liberals to know that one good Tory thinks they are really running the country.—Guelph Mercury.

REVISING SCHOOL BOOKS

Hundreds, and even thousands of public and high school text books are going to be discarded this summer according to information received. This will mean a loss to the publishers of the several books, who always have a stock on hand and to the retailers in every town and city who have the books on the shelves. But the greatest loss will be to parents in every part of the province. Boys and girls will not be able to use the books of their older brothers and sisters, but instead the new editions will have to be purchased. The reason for the situation which is drawing near is that the authorization for more than a dozen books expires this midsummer. In some cases it is known the Department of Education is revising the books now in use. In other cases the authorization has been extended. In normal times the revision of the books goes on almost continually, but in these times it is contended that it is an unnecessary burden which the parents are being asked to shoulder. The books the authorization of which expires this midsummer are Public School Arithmetic, History of England, Hygiene, composition, high school reader, English Grammar, physical geography, French reader, German grammar, German Reader, Physics and bookkeeping.

"Just the Daily Paper a Farmer Needs—"

Farmers can make real profit from reading The Toronto Daily Star, because—

It reaches the farmer with all the day's live stock, grain, and produce quotations anywhere from twelve hours to one full day ahead of the next morning's paper—which has only the same quotations in it.

You know what it means to you to have market quotations quickly!

You know how often you have said to yourself: "If I had known earlier just how the market was going, I could have made money."

Half a cent on a few hundred bushels of wheat or oats will more than pay for a year's subscription to The Toronto Daily Star, and 25c a cwt. on hogs may mean dollars of profit to you.

When you subscribe to The Toronto Daily Star, the edition that will be sent to you each day contains the market quotations for that day.

In many cases it will actually reach you on the night of publication, or by the first mail next morning, whereas you couldn't possibly get the next morning's paper until the afternoon—too late—on the day of publication to take advantage of the market quotations.

The Toronto Daily Star's quotations feature Toronto, Montreal, Buffalo, Chicago, and Winnipeg market prices.

The Toronto Daily Star

In addition to this service, you get a magnificent daily newspaper, one that will keep you informed upon the war news and every other subject that a good citizen and a man of the world should know about.

Subscribe for It To-Day

The price is $3.00 per Year in Advance. You may send this to the publisher of your local paper, to your postmaster, or direct to **The Daily Star, 18 King St., West, Toronto**

INTESTINAL PARALYSIS

"Fruit-a-tives" Quickly Relieved This Chronic Trouble

260 Cambrain Street, Montreal.

"In my opinion, no other medicine is so sensitive for Constipation and Indigestion as 'Fruit-a-tives'.

I was a sufferer from these complaints for five years, and my sedentary occupation, Music, brought about a kind of *Intestinal Paralysis; with nasty Headaches*, belching gas, drowsiness after eating, and pain in the back.

I was induced to try 'Fruit-a-tives' and now for six months I have been entirely well". A. ROSENBURG.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

HER PART

Be this my part
Until he come again:
To keep the hearth-fire lighted
And his name
Unsullied from all stain:
To keep mine own and other hearts in mind
The debt we owe the humblest of his kind
Who have gone forth yielding their life, their all,
In their swift answer to their country's call.

Be this my part:
To hold my courage high.
To falter not, nor flinch, although the cry
Of sorrow may not pass me by;
To keep my soul
From hate and malice free,
To grant to all love's perfect charity:
To heal all wounds with mine own gentleness
And crave for all His Spirit's tenderness.
But, if the hour of stress shall come to me,

Let me not yield my soul's nobility
To aught save death—
For I would die
With face uplifted to God's questioning sky,
Even as he.

Be this my part:
So when he shall come home,
Albeit in suffering,
He shall gladly come.
But if no more he shall return to me,
Who is the very music of my life,
My shield in strife,
The laughter and the sunlight of my days,
Let me give praise
That thus he died,
The holder of his country's love and pride.
And, kneeling, thank Him
That beneath the rod
Lies manhood worthy
Of his Maker, God.
—Irene B. Angleman, in The Churchman.

—"There are many Americans," said Mr Daniels, secretary of the U.S. navy, "who are eager to give their bit; there are others who are eager to get their bite." We regret to say that Canadians can be similarly classified.

—Owen Sound Methodists and Presbyterians have accomplished what church people in other places have talked about only. A piece of interdenominational co-operation has been effected between the 4th Ave. W. Methodist church and St. Paul's Presbyterian, by which it is arranged to worship half time in each church until June 30th. As a local trial of church union this one will be watched with interest by many.

—To be beaten but not broken, to be victorious but not vain-glorious, to strive and contend for the prize and to win it honestly or lose it cheerfully, to lose every power in the race, and yet, never to wrest an undue advantage or win an unlawful mastery; verily in all this there is training and testing of character which searches it to the very roots, and this is a result which is worth all it costs.

Children Cry
FOR FLETCHER'S
CASTORIA

—The United Farmers of Alberta passed a resolution at their convention last week calling upon the Federal Government to exercise control and operate the railways of the Dominion during the war, with a view to Government ownership after peace is declared.

—"Advertising is the education of the public as to what you are, where you are, and what you have to offer in the way of skill, talent and commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service." Elbert Hubbard.

The AUTOMOBILE

Painting the Car.

"John, we'll have to get the car painted. It's just awful!" And John, looking the car over, had to admit that it did look bad.

The body, once so lustrous and smooth, had a dull grayish appearance and also had a number of dents and scratches. Careless hands had rubbed the paint from the top of the doors. The right rear fender sagged in a sickly manner. The top was stained and rather pale. Mud was frescoed all over the running gear, and the grain of the wood showed in a number of places on the wheels. Freckles of rust appeared upon various parts of the body. Wind and rain and dust had certainly made a change in the appearance of the good old "ship" and something would have to be done.

An interview with a nearby painter revealed that fact that the car could be painted for $40. But John had once seen a car painted, and decided he could do the job himself. So he went to a friend who understood such work and talked the matter over.

The labor of course was the main item, the paint and other material being a comparatively small expense, three or four dollars usually covering all the outlay necessary.

The first step was to get the car thoroughly clean. This meant more than the usual removal of mud and dirt. The grease and oil on the parts to be painted had to come off also. This was done with a brush, a small pail of gasoline, and a cloth.

Get Rid of the Dirt

The radiator and hood and all the cracks and crevices that accumulate dirt were carefully attended to. If this dirt had been allowed to remain in the car it would have turned to dust, which would have settled on the freshly varnished surfaces and made a rough-looking job.

If the surface of the car is very much scratched up and rough it is necessary to remove the old paint. This can be done with a good paint remover applied with a brush. After the paint has been softened it can be scraped off. All lumps and patches of paint must be removed and the surface rubbed down with sandpaper till all is clean and smooth. Then the car should be washed with gasoline and allowed to dry.

Next a coat of primer is applied, preferably with a camel's-hair brush. After this has been allowed to set for a day or so, go over the surface and fill all cracks and holes with putty. Allow the putty to become thoroughly dry, then rub smooth with sandpaper. Dust is the enemy of good painting, so after each rub-down, remove the dust as thoroughly as possible. Next a coat of body color can be put on, and permitted to dry as before. This in turn should be rubbed down with a very fine sandpaper or steel wool and the dust removed. Then a coat of color varnish may be applied and rubbed down after perfectly dry.

Now, if an extra fine and durable job is desired, a coat of what is known as rubbing varnish should be put on. This, when hard, should be rubbed down with a piece of felt and some pumice and water. Then the coat of finishing varnish is due, after which the car should be allowed to stand for at least a week before being put into service.

If the car is not badly scarred or scratched a coat of color varnish rubbed down and followed by a coat of finishing varnish will make a satisfactory job. The running gear can be painted with ordinary carriage paint, with little or no rubbing. The engine can be enameled with a special heat-proof preparation which can be obtained from any accessory house. Outfits containing all the needed materials for refinishing a car can be purchased from a good accessory house or reliable paint store."

Redressing the Top

The inside of the top, which as a rule becomes dull and stained by the rain, can be refinished with a lining dye, which is applied with a brush and gives a nice even color as when new. The outside of the top may be renewed with a good top dressing. The radiator, if of the enameled type, should of course have a new coat of enamel applied, but not over the cooling fins, as this would interfere with the efficiency of the radiator.

Any mechanical troubles that the car has may conveniently be attended to during the painting process. In fact, the body may be removed and the engine and other parts overhauled while the body is being painted if room permits. Any dents or cracked places in the fenders or body should be repaired. Frequently a weak fender can be strengthened by applying a plate to the under side and riveting through in a neat way. If the fenders are badly damaged it would be more satisfactory to replace them. The under side of the fenders should be painted, as the rust attacks that part first and soon weakens them.

WAR TANKS TERRIFY TEUTONS

NEW WAR ENGINE APPEARED ON AUGUST 29, 1916.

These Ungainly Monsters Have a Paralyzing Effect Upon the German Troops.

It was on August 29, 1916, that the first batch of tanks, fifty in number, landed in France, says Lieut. J. F. Lloyd. They made their way up the line, some by rail, others by road, with due precaution for secrecy, and arrived in time to take part in the second stage of the great allied offensive on the Somme.

That the Germans expected something unusual is shown by a captured army order of September 14, which spoke of "new engines of war, as cruel as effective." But the realization was even worse than the anticipation. A German newspaper thus described the horror of the men in their trenches as they saw the tanks advancing out of the mist:

"One stared and stared as if one had lost the power of one's limbs. The monsters approached us slowly, hobbling, rolling and rocking, but they approached. Nothing impeded them. Some one in the trenches said 'the devil is coming,' and the word was passed along the line like wildfire."

Paralyzed the Enemy.

The sight of these monsters was as exhilarating to our men as it was paralyzing to the Germans. The ungainly appearance and queer waddling inspired them to laughter, but there was no doubt about the efficiency. Machine gun emplacements, such as had taken heavy toll in previous attacks, fell an easy prey. Bombs exploded harmlessly against their solid flanks. Naturally the element of surprise was partly responsible for the overwhelming success of the tanks on their first appearance. The unexpected arrival of their new ally put fresh heart into our men, just as it lowered the morale of the Germans.

But they proved in addition that they were capable of destroying the machine gun emplacements, of dealing with enemy personnel, and above all of flattening out a broad way for the infantry through the deadly wire entanglements. They were impervious to rifle and machine gun fire and even at their slow gait of three miles an hour their low height and protective coloring made them a difficult target for artillery.

It was obvious that the tanks had come to stay. Their activities were by no means confined to the western front. Some of them entered Egypt before the end of the year and were in action before Gaza. During the winter great strides were made both with their manufacture and development. The tanks that took the field in the spring of 1917 had all the improvements that experience and experiment had suggested. Their limitations and their relation to the infantry had been discussed and decided. They took the field no longer as free lances, but as one unit in a harmonious whole.

Share Every Offensive.

They have taken part in 1917 in every offensive on a large scale on the western front. They were at Arras in the spring, at the battle of the Messines Ridge in June, and at the operations around Ypres in August, each time over a widely different country and under different conditions. Nor have their services been solely offensive. When there have been no machine gun emplacements ripe for cracking they have good naturedly turned their attention to work for which their great strength and their ability to manoeuvre across rough ground has particularly fitted them. They partake of the nature of the ox as well as of the lion.

The impression which this new arm has made on the Germans and the wholesome dread with which they regard it is revealed by the counter measures which they have adopted, though with little success. They appoint special observers to watch for the approach of the tanks and have established new "tank guns" in the trenches. Riflemen are served out with armor piercing bullets for use at close quarters, and cunningly camouflaged "tank traps" have been prepared to engulf the monsters. But, in spite of all, the success of the tank has been uniform and continuous.

It was not until the recent advance at Cambrai, over a year after its first appearance, that the full measure of the tank's usefulness was revealed. It was the first attempt to use tanks on a really large scale, and, as the world knows, they justified the confidence that had been placed in them. By paralyzing the defence and clearing a passage through the wire entanglements for the infantry they obviated the necessity for the preliminary bombardment which would have betrayed the impending attack.

Smashed Hindenburg Line.

A German account of the battle shows that the tanks have not lost their power to inspire terror since the Somme: "Like an avalanche advanced in masses, with very small intervals between them, they reminded one of Hannibal's elephants or the sickle chariots of the Pharaohs."

"The western front has become so strong that we can withstand every attack," said Hindenburg in April, 1917. He was thinking of the maze of concrete and sand bags which is called the Hindenburg line. And it was the Hindenburg line that the tanks helped to smash in a single morning.

WHEN THERE WAS NO SUGAR.

2,000 Years Ago Honey Was the Only Kind of Sweet.

Think of it, girls! In Rome 2,000 years ago there was not a single candy store. Not even the most attentive young man could offer to his lady love a box of lollipops, for such things were unheard of.

Sugar in those days was known in Europe only in the form of honey, which was considered a great luxury, obtainable only by the well-to-do. The high price it brought offered much encouragement to bee keeping, which was then a much more important and extensive industry, especially in Asia Minor, than it is to-day. Boats loaded with hives floated along the Nile, the bees flying ashore to gather nectar from flowers on the banks.

It is thought likely, however, that sugar derived from cane was known in China and India as long ago as 4000 B. C. The sugar cane was originally native to those countries, and in the early middle ages cane sugar was brought to Europe by traders from the East. Europeans called it "honey made from reeds."

In 1747 a Berlin chemist discovered that the same kind of sugar could be obtained from beets, and since then the percentage of sugar has been increased so considerably by selective breeding of the vegetables that nowadays a ton of it is derived from nine tons of the roots.

The average person in this country consumes two-thirds of his own weight of sugar in a year.

Farmers may help the coal situation by using wood and by making wood available for use by others.

The craving for sweets in grown-ups as well as in children may be satisfied by dried fruits because the fruit sugar answers the natural physiologic demand for sweets and without the injury that accompanies the consumption of ordinary sugar foods. Many of the objections to pastry and sweet desserts will be removed if more fruits are used in their preparation to the exclusion of sugar.

ZERO DAY: THE DAY OF DAYS

THE PREPARATION FOR A BIG ATTACK.

From Rest Billets to Front Trench With Bayonets Fixed Ready For Advance.

Zero day, the day of days, has come. Every hour of it that passes has an added value, says Lieut. J. S. Smith. Pleasures and sensations of that day come and go with added intensity, for zero day is the one preceding attack, and who knows what the morrow will bring?

It is a day of busy preparation from daylight to dark, checking over and issuing to the men all their needs and requirements, the cleaning of billets before we march off, and while waiting to march we lie about, getting as much rest as possible, for when we start to move from our billets, then is rest over for an indefinite period. As each company is ready it goes down the road to lie and wait for the rest of the battalion. The colonel is there at the appointed meeting place as we come along. We halt, and he walks towards us, one of the "old contemptibles." Our company commander calls us to attention, salutes, and the colonel returns it and then, instead of a long harangue, he simply says, "I will meet you all at our objective. Please be there on time." That's all, but he meant a great deal more. He knew, and we knew, we all wouldn't get there—but why prattle about it?

The Colonel's Message.

To each company as it came up he went in the same quiet, confident manner, giving his message to them. That little message did more to give them confidence than a long line of "'ot hair," as the company grouch always called the long speeches that are sometimes inflicted on the boys.

"Tommy Atkins" knows he is a better man than the Boche and he doesn't need to be told it, and he doesn't believe in worldwide advertising of the fact. He knows it and so does the Boche. They are two interested parties, so why say any more?

The adjutant reports "battalion present and correct" to the colonel, and by his command we move off. In the distance, preparing the way for us as we march with our faces toward the rumble, we hear the steady pounding of the guns. Any one looking for any signs of emotion or nervousness would be fooled. If a man feels anything, and every one almost invariably does, he doesn't show it.

Clad in fighting kit we swing along out of the village to the tune of "The Black Bear" from the pipe band. All the old French people come to wave us goodby. One old French woman inquires of Tommy, "Pooch?" and he replies in excellent French, "Oui, Madame, Allemand Rhine toot sweet," which pleases her greatly. She hobbles off to tell the rest that at last the German swine will be shooed over the Rhine immediately, if not sooner, and the whole village cheers in their feeble old voices. We answer with a roar, which leaves them all in such good cheer that they go back and feed the chickens a little extra grain and the pigs a little more turnip. The chickens cackle louder, the pigs grunt with pleasure, the old people talk about the Allemand and the Rhine and we go on our way singing. So everybody is happy.

The Prisoners' Cage.

On our left is a big square compound, enclosed with barbed wire to a height of about eight feet, with raised sentry boxes. It is the prisoners' cage. At the same time to-morrow it will be full of Boches. As we pass it we enter the shell zone. We know because the prisoners' cage is always just on the edge of the enemy's extreme range. From now on we are "in it," and before we know it we are at the centre of what seemed such a peaceful little village. Now it fairly teems with activity. Troops everywhere; trench mortar batteries, machine gun companies, engineers, field dressing stations, pioneers and artillerymen; horses, trucks—big and little—automobiles, wagons, water wagons, feed wagons, every kind of wagon, piles of ammunition—big and little—timber in all sizes and shapes, barbed wire and barbed wire stakes. Over it all the big howitzers fire continually with a crash that startles, and through it all we march, on, out and beyond, leaving it all behind, for those things in the village cannot move until after dark. One thing we don't leave behind are the guns. Instead, as we go on, they get thicker, their flash and bang grow more continuous. There is no wind, yet the air is full of strange and weird sounds. We come to the last village we will pass through—at least it was once a village. Now you could not tell the Mayor's house from the poorest villager's, except maybe from the size of the pile of bricks.

Reaching the Trenches.

Marching in half platoons we leave the village and come out into the open fields. About half a mile in front we can see the entrance to our communication trench, winding up the side of a gradually sloping hill, until it reaches the top of the crest where our front line rests. In the morning we shall go down the other side of that hill to meet the enemy.

The air smells strongly of powder, for the Germans are not taking their punishment quietly. We are fortunate, though, and get into the C. T. with no damage done. We enter the trench single file as it gets dusky and we stumble along in silence, for it has been a long day and we have not yet started on our job. We are anxious to get to our assembly trenches so that we can rest. So we scramble through what seems leagues of trenches, until finally we branch off to our final position in No Man's Land. There we lay, until dawn should break, so that we could move into enemy territory and fill up our prisoners' cage.

You may wonder what a man's thoughts are lying out in the mud a short distance from the enemy with nothing but the sky as protection. Well, there are no thoughts. Almost every man snatched what sleep he could. To those who could not sleep their thoughts were far too sacred for publication. To those who did not, dawn came, with the air full of a strange, rushing, whiney sort of roar, beggaring description, to end in a lurating crash, and a wall of flame in front of their very eyes. Those who slept woke to the din, saw that wall of flame and mechanically reached for their bayonets to fix them on their rifles.

The time had come, we had passed from zero day to zero hour.

MAKING TRENCH CANDLES.

Convalescent Soldiers Eager to do More for the War.

Propped up with pillows in the hospital cot, many a wounded Canadian lad, returned from the front as unfit for further military service, is doing his bit for the boys at the front by rolling paper candles which will light the dugouts of the comrades he left behind or brow their tea.

In the convalescent hospitals of the Military Hospitals Commission, candle making has become a popular occupational work for the men who are too wasted by battle to do anything more strenuous at this time. It cheers the men to think that they can still do a little something to win the war, and hundreds of the new trench candles are being turned out weekly.

They are made of strips of newspaper folded and rolled tightly into different sized candles. They are then dipped into paraffin and allowed to dry. They are then very handy to extinguish and so resist draughts well. They also give off more heat than the usual wax candle and burn longer.

To stop hiccups give the patient a teaspoonful of granulated sugar and vinegar. If this remedy does not afford instant relief repeat the dose.

"Since you worked your examples so nicely," said the pretty teacher, "I shall give you a kiss." "Teacher, I didn't know there was to be a reward," responded the bewitchin. "It's only fair to tell you that my big brother did them sums."

Potato Bread.—Two and a half cups mashed potato, two and a half cups flour, two and a half teaspoons salt, one and a half tablespoons sugar, one cake compressed yeast and two tablespoons water. Add the dissolved yeast to the lukewarm potatoes. Then add the salt, the sugar and half a cup of the flour. Mix the sponge thoroughly and let it rise until it is very light (about two hours). To this well risen sponge add the remaining flour and allow it to treble in volume. Turn under, shape it into loaves, and after it has doubled in bulk bake it for forty-five to fifty minutes.

LETTING LOOSE THE "DOGS OF WAR"

AS LITERALLY TRANSLATED BY TEUTONS.

Toronto Lady Living in England Tells How Kaiser's Men Trained "Police" Dogs.

Letting loose the "dogs of war" is an expression which this struggle has translated literally, as may be verified by more than one Britisher, yes, and possibly Canadian, prisoner who has felt the fangs of the German canines trained by still greater human brutes to bite.

A Toronto lady of your correspondent's acquaintance tells an interesting story in this connection:—"Several years before the war," stated she, "I was spending a few months in Germany. One day at the small town where I happened to be staying, a German lady whom I had met stopped me on the street and asked me to come to tea. She had a huge dog accompanying her, and as we stopped to talk, this beast trotted up, suddenly stopped, and springing from the ground, rested its forepaws on my shoulders. I drew back in alarm and it retreated.

"'Oh, don't mind Fritz,' exclaimed the German haus frau with a half apology. 'he is half wolf, and has no town manners. He won't hurt you.' But I did mind Fritz, and resented his familiarity very much, and then and there determined not to accept the German lady's invitation to tea. But she would not be denied. If I was engaged on Tuesday perhaps I could go on Wednesday, and if not on Wednesday, then Friday would suit her equally well. So, in the end, I was practically forced to accept.

Kept as a House Pet.

"I simply dreaded going to her house," said the Toronto lady. "That horrible dog had given me the creeps. However, there was nothing for it but to go, and at the time appointed I arrived at her residence. I was ushered into the drawing-room and simply felt a shudder at the prospect of that fierce-looking creature of hers springing out at me again. Sure enough, in a corner of the well-furnished drawing-room, I spied a basket, large as a wickerwork clothes basket, such as we use in Toronto back yards wher hanging out the washing. It was lined with a nice soft covering, if you please, and was ostensibly the bed of this balking big beast to which I had taken such an intense dislike. Imagine such a nasty brute in a drawing-room! I sat there in apprehension expecting every moment that the dog would romp in and repeat his unpleasant attentions of our first encounter. Then my hostess appeared, and pointing to the empty basket, exclaimed in a tearful voice: 'Ah, poor Fritz, he will not bother you to-day.

Taken by the Military.

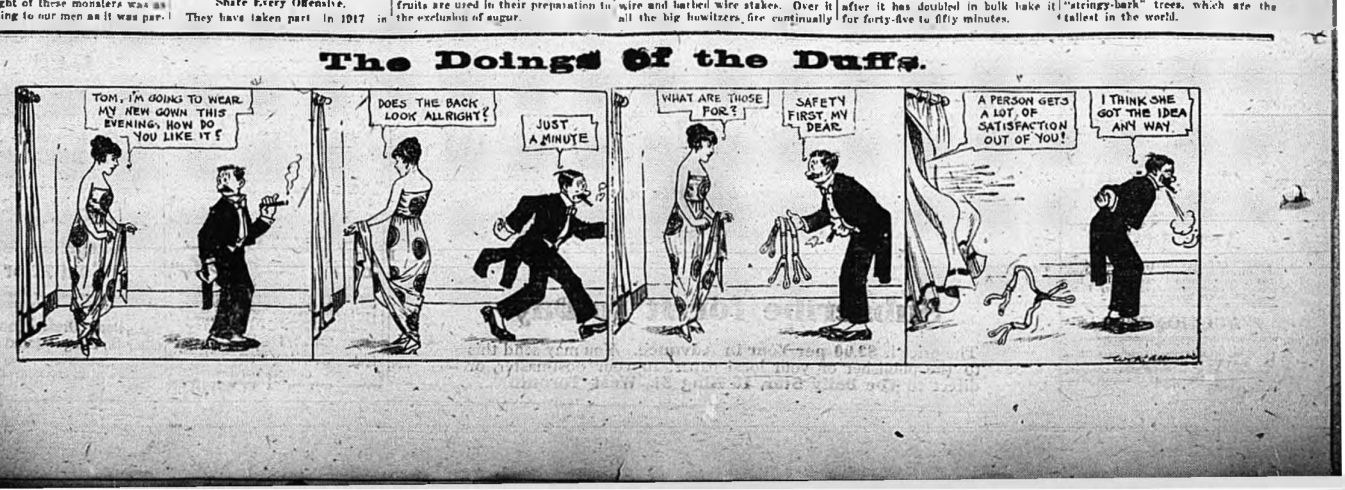
"The military authorities have taken him away for his six months' training as a police dog!'"

Such is the German military system. Both man and beast must serve their turn, and the dumb brute would have many a cruel blow and whip-stroke ere he learned his lesson of pulling down prisoners and biting dummies arrayed in uniforms different from the Hun field-grey. Truly the Kaiser's statement that he would enrol every cat and dog in Hunland was more than a mere figure of speech.

To a Red Cross Dog.

Brave dog, you share the fighting risk
On fields of France afar,
Yet never for your sake is flown
A shining service star.

And thread where wounded lie,
Then heedless of the shell and shot
You bring their succor nigh.



Were I your master I should want
To give your valor hail,
And fly a comet on a flag
A star that has a tail.

—New York Sun.

Whey left from making cottage cheese should not be wasted. It can be used in beverages in place of milk for making bread and in desserts.

Australia has a movement on foot for the preservation of its gigantic "stringy-bark" trees, which are the tallest in the world.

The Doings of the Duffs.

RHEUMATISM A MYSTERY

This Trouble is Rooted in the Blood, and Can Only be Cured by Enriching the Blood.

Some diseases give immunity from another attack, but rheumatism works just the other way. Every attack of rheumatism invites another; worse than that, it reduces the body's power so that each attack is worse than the one before.

If any disease needs curing early it is rheumatism, but there is scarcely any disease that physicians find more difficult to treat successfully. When a medicine does cure rheumatism therefore it is worthy of special notice. Medical authorities agree that the blood becomes thin with alarming rapidity as rheumatism develops. Maintaining the quality of the blood is therefore a reasonable way of preventing and combating rheumatism. That it works out in fact is shown by the beneficial effects which follow the treatment of rheumatism, acute, muscular and articular, with that great blood tonic, Dr. Williams' Pink Pills.

That thousands of people who have taken Dr. Williams' Pink Pills for their rheumatism have been cured is a fact beyond dispute. That rheumatism does not return as long as the blood is kept rich and red is equally true. If therefore, you are suffering from rheumatism in any form you should lose no time in giving Dr. Williams' Pink Pills a fair trial. Mr. A. E. Hinton, Western Ave., Toronto, says:—"Up to about a year ago, my wife had suffered for nearly three years from rheumatism, from which she suffered greatly. She had been under the care of several doctors, besides spending dollars on advertised cures, but did not get any relief. One day talking to a fellow clerk, she said her sister had been cured of this trouble by Dr. Williams' Pink Pills. Although not feeling very hopeful I took two boxes home that evening and urged my wife to try them. By the time they were used they had done her so much good that she required no pressing to continue the treatment, and after taking six or seven boxes she was completely cured. As I have said this was about a year ago, and she has had no return of the trouble since. I feel very grateful for the immense good Dr. Williams' Pink Pills have done my wife, and I hope other sufferers will benefit by her experience.

You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

THE FIRST BRITISH BARRAGE.

The Effect of a Concentrated Effort on the Part of the Artillery.

The Boche batteries were celebrating the new year—in fact they were a little previous, because it was but noon of December 31, and the year was 1915—at Ypres.

Ever since daylight the Canadians had been having a beastly time of it. The Boche five-point-nines had been coming over with unceasing regularity and the British artillery was replying with a feeble fire. They claimed shortage of ammunition and in reply to the repeated calls from the infantry for shells they would sing out "You've 'ad your allowance."

The Canadians got pretty mad at this continued shelling, and a friend asked a gunner whether they couldn't do something to distract the Boches' fire.

"That's all right," was the answer; "this is Fritz's last day. Wait till tonight!"

He waited—this friend. Exactly at the stroke of midnight pandemonium broke loose. It sounded as though all the express trains in the world were running overhead. And well it should. Thirty 12-inch howitzers had been rolled into position during the day and were at that moment flinging half-ton projectiles onto the German batteries.

The British bombardment went on for twenty-four hours; and for three weeks afterward there was not a solitary heavy German shell fired on that sector. Which all goes to show another form of tactics—the holding back of shells for a concentrated effort.

Soap for Wounds.

Common yellow soap, the kind used by housewives in washing clothes and dishes, has been found to be a wonderful cure for wounds in French hospitals and its use has spread to the British medical stations. A solution is made from a cake and injected into soldiers' wounds, even in the latest instances into the deepest bullet holes, where it has proved itself to be a superior antiseptic to hydrogen peroxide and most other germ killers and in addition a strangely effective healer of torn tissues.

Wounds treated with soap need few dressings and lessen pain far more than do wounds treated with other antiseptics. These facts greatly expedite the work of the surgeons, who can handle more men than when using other solutions.

Not a minute should be lost right now in looking up your seed supply for 1918 planting.

Gunns Shur-Gain Fertilizer

Practical Designs

For the youngster who is just beginning to walk, as well as for his brother a few years older, this design is particularly good. McCall Pattern No. 7738, Child's Bloomer Dress. In 3 sizes, 2 to 6 years. Price, 15 cents.

A splendid idea is this for an overdress, to be worn over a waist. The three-piece skirt is in round or instep length. McCall Pattern No. 7617, Ladies' Overdress. In 5 sizes, 34 to 42 bust. Price, 20 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

WINTER WEATHER HARD ON LITTLE ONES

The Canadian winters are extremely hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes colds and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They regulate the stomach and bowels and prevent or cure colds. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

REPORTING THE SERMON.

Opinion of a Highland Hostess Regarding Her Lodger's Shorthand.

A kilted regiment, while on the march in a part of Scotland, halted for a Sunday of rest at a remote village in the Highlands, and some of the brawn laddies were billeted on the inhabitants.

One old lady had to find lodging for two of the soldiers, Sandy and Tam, and she was delighted to know they were going to the kirk in the evening. She herself was unable to go, and her pleasure increased when one of her guests, who happened to be an accomplished writer of shorthand, promised to tell her everything that the minister said in his sermon—although she had her doubts as to how he would be able to remember it all.

The two "kiltics" came back from church, and Sandy read the sermon from his notebook, to the admiration and astonishment of his landlady, who had never heard of shorthand, and could not understand how anyone could write as fast as the minister spoke.

When Sandy had finished and the good lady had expressed her thanks for the privilege of hearing the sermon, she asked him to let her look at the book he had been reading from. She seemed much disappointed, however, because she could make nothing of it.

At last, after a close inspection of the mystic signs, she said to the blushing warrior:

"You're a grand laddie and a verra guda reader, but I must tell ye, and if I was your sin mither I wad has to admit it, ye're the verra wurrst writer I ever came across."

Peanut and Cottage Cheese Loaf.—

Three-quarters cup kidney beans, one cup cottage cheese, half cup ground peanuts, one tablespoon chopped onion, one cup bread crumbs, two tablespoons drippings or savory fat, one cup cooked tomato, one cup cooked rice, salt, pepper. Bake the loaf in a moderate oven twenty-five minutes and serve with pimento or green pepper sauce.

THE MESSINES GRAND STAND.

How a Canadian Engineer Officer Watched the Big Fight.

The featured participant of this story was a Canadian engineer officer. The tale can never be proved true because the C.E.O. has since "gone over"—never to return.

He was stationed in front of Messines Ridge. His work as an engineer attached to the British Army had carried him to this position and he could go no further. As his work was completed he was just waiting 'round—for something to happen. A British artillery officer happened along.

"Now that everything's finished, when is it coming off?" he asked the gun officer.

"We're going to touch 'er off tonight, perhaps," he replied with a twinkle in his eye.

"By jove, that's bully. Say," he added, "where can I find a good seat to get in on it?"

The artillery officer pointed to the crest of a hill which at that time was being methodically shelled by the Boche guns.

"That's a jolly good view—but it's too near the orchestra," he laughed.

"Oh, that'll be all right," was the reply. "The Boches will be too busy to attend to the hill."

About eight o'clock, when the British guns opened for a preliminary bombardment, the Hun batteries stopped and the engineer took himself up on the hill. He looked about him until weary, then lay down in a shell hole to sleep. Early in the morning the big guns stopped firing suddenly. He awoke. Half asleep he tried to discern what was happening. He climbed out of his shell hole and stood looking at the ridge.

Suddenly there went up, one after the other, a number of enormous sheets of earth, smoke and flames, which rose slowly until each formed a huge mushroom. Apparently they were a mile high to him.

Then he was knocked head over heels by the shock of the explosion. He was stunned for the moment, but soon realized his position and roused himself. To him it sounded as though every British gun on the British front was firing as fast as it could.

Exactly one hour and ¾ half afterward he was on the ridge, following the infantry and carrying on his work. He afterward learned that so well had the aerial photographers detected the German batteries that eighty per cent of them were put out of action ten minutes after the explosion occurred on the ridge.

CARE OF INSANE SOLDIERS.

Mental Cases to be Maintained by Dominion Government.

Provincial institutions will be entrusted with the care of the members of the C.E.F. returned to Canada suffering from insanity, but the Dominion Government will pay for their maintenance. This decision was reached in the conference of the Military Hospitals Commission, the Board of Pension Commissioners and the representatives of the provincial governments held in the M.H.C. headquarters Tuesday.

Heretofore the Military Hospitals Commission and the Board of Pension Commissioners have paid a flat rate in hospitals for the insane for the 350 men suffering in varying degrees from mental ailments. By the new arrangement they will pay provincial institutions for their maintenance and in addition Sir James Lougheed on behalf of the government agreed to pay an extra allowance per capita, which sum will be directed to the equipment and maintenance of the buildings.

Over 50 per cent. of those now receiving treatment in institutions had been suffering from mental diseases before they enlisted and eventually would have become public charges in the ordinary course of events.

The Limit.

The following amusing story concerning Madam Sarah Grand, the well-known novelist, was told to me recently by a personal friend of hers.

It appears that the gifted author of "The Heavenly Twins" is very absent-minded. One day her friend, calling on her unexpectedly, found her with a big awkward volume on her knee, heated, excited, and evidently very much put out.

"Is anything the matter?" asked the caller.

"Oh, yes," she answered, desperately: "I've lost my pen, and I want to write to catch the post."

"Why, where are you looking for it?"

She glanced at the questioner and then at the book.

"I—I believe," she faltered, "I was looking for it among the p's in the dictionary."

The morning breakfast food is varied in this menu by frying the cold left-over mush and serving it with syrup. The milk, usually served with the cereal and most essential to health, must be introduced in another form. By serving cocoa for supper this is accomplished satisfactorily.

Minard's Liniment Cures Diphtheria.

Are Very Popular in Prince Edward Island

Mr. M. Arseneault Tells What Dodd's Kidney Pills Did For Him.

They Gave Him Quick Relief From Headache and Backache—He Recommends them to All Sufferers.

Cape Egmont, P.E.I., Jan. 28th—(Special)—Dodd's Kidney Pills have numerous friends in this fight little island, and among the most enthusiastic of them is Mr. Mathurin Arseneault, of this place.

"I recommend Dodd's Kidney Pills to all who suffer," Mr. Arseneault says. "I had been troubled with headache and backache about two years till I read in Dodd's Almanac how many sufferers had benefited by using Dodd's Kidney Pills.

"I decided to send for two boxes. Before I had finished taking them I was feeling as well as ever.

"It gives me great pleasure to say a few words for Dodd's Kidney Pills."

All over the island you find people who tell of benefits received from Dodd's Kidney Pills. They are recognized as the standard remedy for kidney ills. Acting directly on the kidneys, they refresh and invigorate these organs. The result is that they do their full work of straining all the impurities, all the seeds of disease, out of the blood. That is why Dodd's Kidney Pills are recognized as a tonic.

Ten Thousand Substitutes.

Ten thousand substitute food articles have been introduced into Germany since the war, according to a statement made in the Berlin newspapers by Professor Juckenack, a prominent German food expert. He mentions as the most striking examples of successful substitution the following: Artificial butter, eggs, salad oil, honey, milk, coffee, tea, sugar, tobacco, fish, sausage, cheese and caviar. Some of the substitutes are directly harmful but others are so good that they will outlive the war and become regular articles of consumption, he asserts.

The publisher of the best Farmer's paper in the Maritime Provinces in writing to us states:

"I would say that I do not know of a medicine that has stood the test of time like MINARD'S LINIMENT. It has been an unfailing remedy in our household ever since I can remember, and has outlived dozens of would-be competitors and imitators."

Less Sugar for Candy.

Preliminary steps have been taken to curtail the use of cane sugar in the manufacture of candies. Manufacturers have been informed of the necessity for saving such sugar and are now endeavoring to adjust their business to the requirements of the situation.

The money spent for candy in the United States and Canada in the next year is double the amount of money needed to keep Belgium supplied with food for a year.

Minard's Liniment Cures Colds, Etc.

Island is a "Hardship."

The island of Ascension, in the Atlantic, is the property of the British Admiralty, and is borne on the Navy List as a vessel, being classed as a tender to one of His Majesty's ships of war. The island is governed by a naval captain, and the men stationed there (chiefly Royal Marines) are subject to the same rules as they would be on board ship. There is no private property in land, so there are no rents, rates, or taxes. The flocks and herds are public property, and the meat is issued in rations; so are the vegetables grown on the farm.

New York state has passed a law requiring counties with a population of 35,000 or over to erect and maintain tuberculosis hospitals.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon-juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quarter pint of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

CANADIAN TIMBER GROWTH.

In France Yields of 30,000 to 45,000 Board Feet Per Acre Are Common.

Lt.-Col. J. B. White, woods manager of the Riordan Pulp and Paper Company, Montreal, and for the past two years in charge of forestry work in England and France, stated recently that if yields of 30,000 to 45,000 board feet per acre were frequent in France, as his own investigations had shown, there seemed no reason why Canadians should tolerate the relatively small productivity of timberlands in Eastern Canada where soil and climatic conditions were not dissimilar to those of France. One plot, measured by Col. White, contained 100,000 board feet within an acre. Such a showing did not tend to increase our satisfaction with Canadian lands producing only two to three thousand board feet per acre.

MONEY ORDERS

Buy your out of town supplies with Dominion Express Money Orders. Five dollars costs three cents.

It matters not what money crops you grow, give your soil a change. Introduce legume crops frequently and constantly. They will keep nitrogen and humus in the soil, keep the soil mellow and friable and open the subsoil to other roots.

Minard's Liniment Cures Garget in Cows

When you put a porridge saucepan to soak always fill it with water.

The prevalent guess is that next year is not going to be as good as the average for crops. All the more reason to do your best work.

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—It's like magic!

Sure corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

The Soul of a Piano is the Action. Insist on the "OTTO HIGEL" PIANO ACTION

The Cause of Heart Trouble

Faulty digestion causes the generation of gases in the stomach which inflate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup, after meals sets digestion right, which allows the heart to beat full and regular.

Rheumatic Aches

Drive them out with Sloan's Liniment, the quick-acting, soothing liniment that penetrates without rubbing and relieves the pain. So much cleaner than greasy plasters or ointments it does not stain the skin or clog the pores. Always have a bottle in the house for the aches and pains of rheumatism, gout, lumbago, sprains, strains, wind joints and all muscle soreness.

Sloan's Liniment KILLS PAIN

NO ALUM

MAGIC BAKING POWDER CONTAINS NO ALUM

MADE IN CANADA

It is many years since there was on hand in Ontario so generous a winter supply of both grains and general roughage, with the exception of corn, which is lower than usual in bin and silo, says a bulletin of the Department of Agriculture.

Minard's Liniment Cures Distemper.

In cold weather clothes pins are apt to freeze to the clothes and cause a tear when removed. This can be avoided by first soaking the pins in salt and water.

THOSE AWFUL CRAMPS

Suggestions that may save Much Suffering

Marysville, Pa.—"For twelve years I suffered with terrible cramps. I would have to stay in bed several days every month. I tried all kinds of remedies and was treated by doctors, but my trouble continued until one day I read about Lydia E. Pinkham's Vegetable Compound and what it had done for others. I tried it and now I am never troubled with cramps and feel like a different woman. I cannot praise Lydia E. Pinkham's Vegetable Compound too highly and I am recommending it to my friends who suffer as I did."—Mrs. GEORGE R. NAYLOR, Box 72, Marysville, Pa.

Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

Write for free and helpful advice to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Only women open and read such letters.

REAL ESTATES CORPORATION, LTD.
60 Front St. West, Toronto

GRESHAM

The annual meeting of the congregation of Centre Bruce church was held last Tuesday. The finances are in a very satisfactory condition. All the old officers were re-elected. The new members on the managing board are Messrs Robt McKay, T R Curry, Jas Johnson.

We understand that Mr Ed Smith has bought Mr Duncan Morrison's farm.

The people of this vicinity were very sorry to learn of the sad and sudden death (from pneumonia of Henry Annesa, of Emo, Ont, second son of Mr and Mrs Jonathan Annesa, 10th con. The late Mr Annesa was farming near Emo and was living with his brother Fred, who at the time of his brother's death was visiting his home here. Henry was a strong young man, and was very popular, of a kind, genial disposition, honest and upright in all his business transactions, an affectionate son and brother. His untimely death is deeply regretted by all. The bereaved parents and family have the sincere sympathy of the community.

We are sorry to learn of the illness of Mr John Milne, of Paisley. Mr Milne is one of our former neighbors and we hope for his recovery.

CHESLEY

Queens Presbyterian church has now a membership of 362. The contributions for missions during the past year amounted to $1666.12.

The membership of Eldersile council, re-eeve Case of 1917, R C Pearce, the township clerk, and Engineer McDowall of Owen Sound, met in Mr Mickle's office on Monday to consider what action should be taken in regard to the pending lawsuit with J R Turner of lot 5, con 8, who thinks he has had the patience of Job in regard to having a big ditch, constructed about 30 years ago, cleaned out by the councillors' orders to give him an outlet for drains from the low portion of his land. The case comes off in Walkerton shortly unless a compromise is effected. J. David Robertson of Walkerton is counsel for Mr Turner, and Mr Mickle for Eldersile township.

Chesley maintained their unbroken record against Paisley on Friday evening last, but it required all the energy and ability the team possesses, together with 5 minutes overtime, to accomplish the victory. Both teams put up a brand of hockey that will be hard for any team to beat this year. There was not a weak spot to be found on either team, the puck travelling from one end of the rink to the other with lightning rapidity. Chesley got off to a good start by notching 4 goals in the first period, but Paisley gradually settled down and when the final bell rang the score stood 7 all, and this about represented the game, as there was very little to choose between either team. Both teams agreed to play five minutes each way to try and settle the argument, and Chesley was very fortunate in scoring twice, leaving the final score Chesley 9, Paisley 7.—Enterprise.

SECOND CON. ELDERSLIE

Hugh Campbell is engaged with John Black, 4th con., for the coming season.

David Gribble has sold his farm, lot 10 con 3, to Wm Manley.

Gordon Vanzice, of Manitoulin Island, is visiting his brother James Vanzice of this concession.

Mrs John Caldwell, who has been seriously ill for the past month, is somewhat improved.

Mrs T Pepper and family have moved to Chesley.

Owing to low water, A Dawson has been unable to operate his saw and chopping mills satisfactorily during the past two weeks.

Mrs Geo Clark is visiting his sisters, Mrs A Campbell and Mrs T Sealth.

Jas Vanzice was called by telegram to Manitoulin Island last Wednesday by the severe illness of his sister, Mrs Thomas Allen, who is in a critical condition from blood poisoning.

Owing to the severe cold on Friday evening the attendance at the Red Cross box social in S S No 12 was not as large as otherwise it would have been. Nevertheless, there was a good turnout and a good programme, which was enjoyed by all present. The children did their parts exceptionally well. The proceeds, which amounted to over $60, will be devoted to Red Cross and Y M C A purposes.

Queen the bear saw his shadow, and we think Jack Frost must have seen his, too, for he seems to be going in farther every day, smoaking into pantry and cellar all along the line. He also wants to stop the habit of drink among men and beasts, as he is doing his best to close up streams, water pipes and taps. A number of the farmers in this section have difficulty in getting sufficient water to supply their stock.

The late Mrs Rae, who died in Brant on Jan 22nd, was a native of this con., having been born and raised on the farm now owned by Thos Sealth, sr.

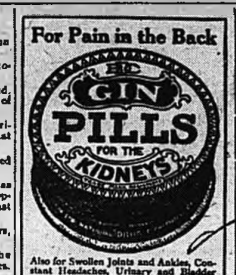
GLAMIS

Mr Albert Pickard, of Wiarton, spent a few days with friends in the village.

Mrs Wainsborough, who was visiting her sister, Mrs R J Nesbitt, has returned to her home in Toronto.

Mr Webb Knake, of Cabri, Sask., who is visiting friends in Bruce, spent a night with Jos Cunningham and family.

Mr Alex McIntyre and Will Cole of the 4th of Bruce, spent Sunday afternoon at Mrs J C McIntyre's.



Rev Mr Eagle, of Hamilton, district elder of the Free Methodist church, conducted quarterly services here on Friday, Saturday and Sunday.

Rev Mr McClung, who has been laid aside with sickness, is able to be around again.

We are sorry to report the illness of Mr Neil McLure.

Miss Lily McKinnon, who has been visiting her home on the 10th, has returned to Brantford.

At our Red Cross Society meeting on Thursday last we enjoyed the pleasure of having with us Nursing Sister Lizzie McKinnon, who is home from overseas on short leave. She gave us a very instructive talk on their work there, and of the good work the Red Cross Society is doing. Lunch was served at the close.

Also for Swollen Joints and Ankles, Constant Headaches, Urinary and Bladder Troubles and all Irregularities of the Kidneys. 131

WALKERTON

An old and esteemed resident of Walkerton passed to her reward on Sunday evening last in the person of Mrs Elizabeth Whitehead, relict of the late Thomas Whitehead, in her 86th year.

That the 160th (Bruce) Batt is shortly to be on the battlefields of Flanders is evidenced by the fact that Adjutant Roy Whitehead, Quarter-master Allen Todd and Capt. Foster have already crossed over to France and are arranging for the pioneer party to immediately follow and take out the encampment. As letters home also stated that the Battalion has been given orders to prepare at any time now for crossing the channel, it would seem that the 160th, which has become famous in England for its prowess on the athletic field, is likely to be given an opportunity shortly to prove its metal on the battle-ground. As the Battalion is the last word in efficiency and training, Bruce will soon have an additional reason to be proud of its great fighting machine. Spring is opening up in France, and the greatest combat on the Western front since the war began is now being planned by both belligerents, and hence the Bruce boys are likely to feature soon in the fiercest battle of the great world war.

On being appointed High County Constable of Bruce on Thursday last Mr Ham Briggs in a speech to Bruce Parliament intimated that the list of constables in the county should be revised, and stated that while some places had no constables at all, others were shouldering in a superfluity of policemen, Walkerton for instance having no less than nine official wielders of the baton. "And that is not enough for Walkerton," shouted Reeve Denny Phelen. "We should have twenty cops to properly look after the people of that town," continued the Greenock Irishman amid wild applause and much laughter. But notwithstanding Denny's humorous interruption, Mr Briggs' point was well taken, there being altogether too many policemen in this town. Two or three of them practically do all the work, while the others merely pose as figure-heads and fall heir to some easy money for attendance at the Court Sessions, Assizes, etc. A lot of this timber could be lopped off and appointments made where they are needed in the county.—Herald and Times.

Children Cry
FOR FLETCHER'S
CASTORIA

WILLOW CREEK

Mr and Mrs Wilbur Bean, of Weyburn, Sask, who were visiting friends here, have left for that western city.

Mr Will Wrightson had a successful sale last week. Mr Wrightson will move to Paisley and live in town, whither the good wishes of their old neighbors follow them.

Mr and Mrs Sprich, of Carrick, were visiting at Mr Chas Stelwig's.

The wedding of the V I A gathered at Mr and Mrs Chas Schmidt's one night last week. A very pleasant time was spent. A short programme was rendered with Mr F C Schnitker in the chair, who gave a short address. Mr Henry Berndt, who is home from the west, gave a fine talk, also Mr Chas Schmidt. Several musical numbers were given.

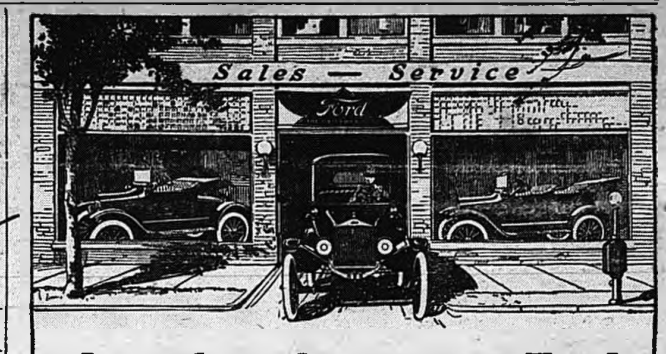
CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

PINKERTON

Mr Cecil Garland spent Sunday at Mr Jas Thompson's at Glamis. Mr Thompson, we are sorry to say, has been ill but is now on the way to recovery.

Mrs H Clark, of the 16th con., attended the funeral of her sister, Miss Ruby Clark, eldest daughter of Mr and Mrs Walter Clark, of Southampton last week.

Miss Kathleen Pinkerton returned from Toronto on Thursday.



Mrs A Pinkerton and Miss Verna Donnelly attended the Stratford Normal "At Home" on the 25th of Jan.

You will notice in this poem,
The first letter of each line,
Spells the name of whom it it written,
Who has crossed the border land.
In the year of nineteen eighteen,
In the first of the year,
On the twelfth day of Dismonth,
God claimed that poor so dear.

Round the great white throne
On the streets of gold,
By the beautiful mansions
Earth could never behold'
Rivers of life are flowing
Through the streets of gold.

Joined with the heavenly number
Over on the heavenly shore,
Has the soul of this one gone
Never to return any more.

Near the throne of Jesus,
Earth's loved one has gone,
Soon to receive the portion
Bought with Jesus' blood.
Into that Holy Country
'Tis but a short narrow path
To those who have been faithful to the end of the pilgrim's task.
—Composed by Rev J A McClung, Glamis

Complete Service to Ford Owners Everywhere

COURTEOUS attention to your needs wherever you may travel is something you appreciate, and being a Ford owner you can get it. You are always "among friends".

There are more than 700 Ford Dealer Service Stations throughout Canada. These are always within easy reach of Ford owners—for gasoline, oil, tires, repairs, accessories, expert advice or motor adjustments.

The cost of Ford Service is as remarkably low as the cost of the car itself. Nineteen of the most called for parts cost only $5.40. Just compare this with the cost of spare parts for other cars and you will realize the advantage of owning a Ford.

Ford

BRANT TP. COUNCIL

The Brant Municipal Council met (Reeve) W. A. Rowand (Dep. Reeve) on Jan. 18th, 1918. Members of Wm. Johnston, D. W. Gregg, jr., J. W. Findlay, Councillors, all present. Each subscribed to declaration of property qualification and of office. Minutes of last meeting read and declared correct.

Johnston—Gregg—That the salaries of the various Township officers for the year be as follows: Clerk $225, treasurer $135, assessor $125, collector $100, auditors $6 each, medical officer of health $50, sanitary inspector $2.50 per day with 10c per mile one way for other work, inspecting included, deputy returning officers $2.50 per day while taking the poll and $1.00 for returning the ballot boxes to the clerk with 10c per mile one way, poll clerks $2.00, poling booths $3.00, reeve, deputy reeve and councilors $2.50 each per day for council meetings, committee and other work, with 10c per mile one way, and that the clerk prepare a by-law confirming this resolution.—Carried.

Findlay—Gregg—That Alex Robertson and Chas. Kyle be appointed auditors of the treasurer's accounts and that the clerk prepare a by-law confirming the appointment.—Carried.

Rowand—Johnston—That by-laws No. 104 and 105 A. D. 1918, by-laws appointing auditors and fixing salaries for the current year be now read a first, second and third time, passed, signed and sealed.—Carried.

Findlay—Rowand—That the clerk advertise for an assessor, also tenders for all ordinary printing for the township, application and tenders to be in the hands of the clerk before noon of Monday, the 4th day of February, 1918, the printing contract to include the sending of a printed copy of the minutes of Brant council to each of the following papers in time to have them appear in the paper securing the contract: Bruce Herald and Times, Hanover Post, Chesley Enterprise and Paisley Advocate.—Carried.

Rowand—Johnston—That John Whitehead be appointed a director of the South Bruce Board of Agriculture by this council.—Carried.

Findlay—Gregg—That a grant of $10 be made to the South Bruce Board of Agriculture.—Carried.

Rowand—Johnston—That the collector's roll be accepted, and that his Monk be paid his salary in full.—Carried.

Gregg — Findlay — That Wm. Rowand be appointed a member of the Board of health for the township of Brant for the year 1918.—Carried.

Johnston—Gregg—That the clerk be instructed to subscribe for a copy of the Municipal World for each member of the council, the clerk and the treasurer.—Carried.

Rowand — Johnston — That the members of this council supervise in the various districts of the township as hereby specified: Wm. Johnston, that part of the township west of the Saugeen river and including the 6th con.; D. W. Gregg, jr., that part of the township west of the Saugeen river and north of the 6th con.; W. A. Rowand concessions 1, 2, 3, north and south of the Durham Road and east of the Saugeen River; J. W. Findlay that part of the township north of and including the 4th concession and east of the Saugeen River to and including the 20th sideroad; D. Willoughby that part of the Township north of and including the 4th concession and east of the 20th sideroad.

Rowand — Johnston — That the Reeve and Clerk issue orders on the Treasurer for all accounts passed at this meeting of Council.

J. S. Dewar, cement tile for culverts ..... $ 14 00
Archie Catto, hauling tile and placing culvert 4 00
Wm. Atkinson, balance on grant 3 00
Geo. Alexander grant on townline B and G..... 200 00
Sidney Parker, 55 yds. gravel 5 50
John L. George, repairing railing on hill, 4th con..... 50
Hydro-Electric Com., re hydro for Elmwood..... 333 35
Wm. Elliottt, refund of dog tax 2 00
Wm Liefso, refund hydro rate 9 00
D. Willoughby, preparing financial statement 2 10
Jos. Monk, salary as collector and postage..... 103 55
D. E. Crawford, bail for nomination 5 00
Election expenses for taking poll, $82.20, and supplies $11.90 ..... 94 10
Johnston — Rowand — That this council do now adjourn to meet on Monday, the 4th day of February, 1918, for the appointment of an assessor and awarding the printing contract for 1918.

M. A. McCALLUM, Clerk

MAXWELL

Most Miles per Gallon — Most Miles on Tires

$1045
F. O. B. WINDSOR

Those figures have a vital significance to you.

Think for a moment of the exact temperature at which water boils.

Below that you have merely hot water—above it, part of the water becomes steam.

In years of motor car production on a gigantic scale, the Maxwell builders have learned:

(1) That, in building a car to sell for less than $1045, while materials cost what they do today, they would have to sacrifice something—efficiency, durability, economy, comfort, beauty, or standard equipment, all of which the Maxwell possesses.

(2) That, in building a car to sell for more than $1045, they could give you no more practical value—but only increased size, weight or hazardous trappings.

They have found the point of definite motor car value, as fixed as the boiling point of water.

Think that over before you buy a car costing either more or less.

The People's Popular Store

Stock-Taking

THE continued extreme cold weather, scarcity of such raw materials as fur skins, wool and fuel for manufacturing and transportation, should make our reduced prices in Ladies' Furs, Coats, Sweaters, Overshoes, Men's Overcoats, etc., very attractive buying. Odds and ends and broken sizes in all lines reduced to clear before listing on stock sheets.

The price of a cord of wood, a bushel of grain, a hog, cow or old hen, a pound of butter, a dozen of eggs, etc., will buy more average goods in any household than ever before, and there is absolutely no possibility of being very cheap till at least a year after the war is over, unless the fuel situation becomes so serious that transportation becomes so crippled that the products of the farm cannot be transferred overseas. As it is now, manufacturing is being restricted in order to export the necessaries for the brave boys in the trenches. Do not be surprised if we do not get all the imports we would like. We can help out a lot by using more wood and hasten the harnessing of our great water powers.

We are taking stock of our books too, and must get the old books out of safe, and therefore must insist on old accounts settled by cash or note before 15th Feb. Cash is a great factor in getting supplies in these strenuous times. Imagine a person going through the country to buy anything without money.

THE PAISLEY MERCANTILE CO.

THE CITY BAKERY

Specialty this week, this month, and all this year

All accounts rendered monthly

Over 30 days 8 per cent. interest will be charged just the same as the banks do. We want your patronage. We need your trade. We need the cash. We do not want to charge anyone interest.

F. S. MacLachlan

—In Guelph police court on Feb 8th Magistrate Watt quashed the city by-law recently passed by the council, compelling vendors of wood to sell by the cord and not by the load. He pointed out that it was against the statutes to pass such a by-law, and that wood could be sold in any manner so long as the parties agree.

Arrested at Owen Sound

The first arrest under the Military Service Act has occurred in Owen Sound. The young man's name is Ohlson Brechen, and he has been living in apartments with his mother and sister at the Coulson House for some time. He is 22 years of age. The local police were notified from Toronto to apprehend him, and they took him into custody.

West Bruce Orangemen

The County meeting of the West Bruce Orangemen, which was scheduled to be held in Walkerton on Tuesday, was, owing to the failure of the afternoon train, with twenty Orangemen aboard, to arrive that day, postponed till Wednesday, when about thirty brethren were present from Southampton, Port Elgin, Paisley, Wiarton, Cargill and Walkerton. The meeting, which was held in the L.O.L. rooms here, was opened by County Master Chas. Green, who did the job in a neat speech. Letters were read from members of the order in the 160th Battalion, and after some discussion and the general routine of business the following officers were elected for the ensuing year: County Master, Peter Dobson, Underwood; Deputy Master, Frank Boiden, Walkerton; Chaplain, Calvin Crawford, Williscroft; Rec.-Sec., Art Rushton, Williscroft; Treas., John Nelson, Underwood; Lecturers, Wm White and John Dobson; Director of ceremonies, Jas A Garland, Carnell. The next meeting will be held in Paisley in Feb. 1919.—Herald and Times.

School in Churches

Kincardine high school pupils now pursue their studies in the basements of both the Presbyterian and Methodist churches. It is expected the damage to the school furnace will be repaired in about three weeks.

Union Service for the Conservation of Fuel

Committees of the various churches in the village met on Monday afternoon and decided to hold union services for the next four Sundays. Union services will be held morning and evening in the Presbyterian church on Sunday, Feb 17; in the Anglican church on Feb 24th; in the Methodist church, on March 3rd; in the Baptist church, on March 10th. Members using envelopes will place them on the offertory plates as usual, and they will be passed on to the respective treasurers of the church to which they belong. The superintendents of the Sunday schools will make arrangements for the holding of their individual Sunday schools.

Trimmed Chesley

No league can Chesley hockey team claim to be the unbeaten. They got theirs from Paisley on Friday night in the victor's home rink. It was a speedy exhibition of the game, in which every player seemed to be there with the go when needed. Sticks were handled dexterously, and checking was close at every point. The teams are still very evenly matched, but Paisley did seem to have just a noticeable bit the best of it, towards the end of the play at least, as they kept up a strong assault upon their opponent's goal. While every player was doing his bit with snap and celerity when the puck came his way, there was not a single action by any that called for a penalty by the referee. Such a clean sportsmanlike contest is a pleasure to witness.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpariel line for first insertion, 5c per line for each subsequent insertion.

Oddfellows!

A full attendance of members of Abram Lodge is requested for next regular meeting, Tuesday, Feb 19th. Urgent business. Lunch at close of meeting.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5½ per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D. FORRESTER, Barrister.

Auction Sale of Pure Bred Stock

Parties having pure bred live stock for sale should get in touch with the Bruce Stock Breeders' Club at Walkerton, as they are holding a consignment auction sale on March 7th. Entries close Feb 20.

—Mrs T Muir is visiting friends in Toronto.

—Mr A A Sinclair was in Toronto for a few days last week.

—Miss Sutherland, of Bradford, is the guest of her sister, Mrs F C Ryan.

—A special meeting of the W.C.T.U. will be held in Putnam's hall, Friday afternoon at 3 o'clock.

—Mr Jas. Hope was called to Chesley this week owing to the death of his eldest sister, Mrs Rich Jeffrey.

—Mr F S McLachlan received word this week of the death of his brother, William, at Sault St Marie, Mich.

—Miss Jean Pollerton won first prize at the patriotic carnival in Port Elgin on Tuesday night, for ladies' fancy costume.

—Mr Geo Davison, of 20th Greenock, has sold his farm to Mr Roy Salmon, of 12th Bruce, who will take possession in March.

—Mr James B Fleming left on Tuesday morning for Toronto where he expects to reside. Mrs Fleming will follow in a few days.

—As would be expected in a season like this, ice on the rivers is very thick. Some cut from Stark's dam measured 40 inches, we are told.

—Mrs Jas Craig and her daughter, Mrs Colin Campbell, spent a couple of days in Guelph last week, visiting the former's sister, Mrs Hadden, who is ill.

—THE ADVOCATE is late this week, the fuel boilers having cut a big hole in our working period, and with no gasoline in town we could not operate our type-setting machine.

—Mrs A B J Simcox, who has been under treatment at Guelph for more than two months, is, on recent word received by friends, much improved and hopes are good for a full recovery.

—The big thaw that set in Monday is melting down the snow, and roads are in a bad state. The resulting water supply is welcomed by everybody, particularly the farmers who have been without drink for their stock.

—Mr Alex Galbraith was taken ill suddenly while in McArthur's bookstore on Friday, and is under the doctor's care. We are glad to report that he is recovering, and it is expected he will soon be himself again.

—The heatless days were rigidly observed in Paisley. Whether any fuel was saved or not, the business people did their full duty towards the order. The skating rink, which was exempt, was about the only place open. It is said that should a similar fuel saving holiday be again necessary, the Controller will not bring it on at the week end.

—Nursing Sister Jessie Ross, in a Canadian hospital for convalescent soldiers in France, recently made an appeal to the Women's Patriotic League for needed comforts for the soldiers. This week parcels were mailed to France from the League containing 24 flannel shirts, 12 pr socks, 9 suits pyjamas and a scarf, part of which was contributed by Lockerby and from Knox Church Patriotic Society 10 pr socks and 36 personal property bags. The latter Society also recently sent parcels to all the boys on the honor roll in England and France—31 in number—containing socks and other comforts.

W. P. L. Meeting

A meeting of the Women's Patriotic League will be held on Friday, Feb 22nd, instead of the 15th.

Fire Near Tiverton

The splendid home on the farm of Mr. Wm Begg, boundary Bruce and Kinloss Tps., was destroyed by fire which started in the attic on Tuesday of last week, when the family were about to sit down to dinner. The blaze could not be checked, and consumed the whole building. A good part of the contents were taken out. The house was one of the most up-to-date in the district, being equipped with sanitary fittings, etc.

Ditch Case Settled

The action of Mr Job Turner, of lot 5, con 8, against the Tp of Elderslie for damages to his land because a ditch had not been cleaned out, was settled by the council offering to pay $200 in full of all claims, also to pay the costs. This offer was accepted, and the suit withdrawn. The costs may amount to one or two hundred dollars. In a case such as this municipalities are liable to suffer the extreme penalty, and Elderslie may be considered fortunate in arriving at a settlement on a moderate basis.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

J. S. DEWAR, Proprietor

Honorably Discharged

Pte Gordon Daniel, who has been in the Military Hospital in Guelph since returning from overseas three months ago, has now been honorably discharged from doing further military service. Pte Daniel enlisted in the 28th Batt. in the first year of the war, and was on active service in France for nearly two years, and was in the thick of many of the engagements in which that corps participated, and also in the transport and pioneer corps. He would like to have continued on to the end of the war. Although he did not receive any wounds, Gordon's health became impaired through the hardships and privations of trench life, necessitating a complete relinquishment of military life.

Wood Cutting Bee

It is proposed that men of Paisley who can work a day in the bush to relieve the fuel situation should organize a wood cutting bee for next Monday. The men are to go to Mr Hugh Watt's wood lot at McTavish's farm in Greenock and lend their assistance in cutting operations for the day. Everyone who can is requested to leave word with Mr J S Dewar, at the rink by Saturday night so that arrangements can be made for conveyances, &c. Mr Watt has done a great deal to tide the town over the severe winter by supplying wood at a reasonable price, but is badly handicapped because of bad roads, &c., and additional help is urgently required to get out as much as possible before the roads break up. The bee is being organized on a voluntary basis. If you are willing, get into the forestry battalion at once. The fading of fuel should be a popular pastime for those who can at all spare the day.

VILLAGE COUNCIL

Council met Feb 7th. Members all present. Minutes of last meeting read and confirmed.

Treasurer reported return of collector's roll for 1917, fully collected excepting $10 69.

Bread inspector reported the seizure of 85 loaves of bread from retailers for underweight.

Communication read from H. B. Putnam, urging that sale of cigarettes be prohibited or licensed. He addressed the Council. Mr Stanley also addressed the Council.

Logie—Pearce—That the Reeve and Councillors Forrester and Skinner be a committee to investigate the matter of sale of cigarettes and cigars in the municipality and report at next meeting of Council.—Carried.

Logie—Pearce—That the annual grant of $175 be made to the Public Library Board, of which sum $100 be paid forthwith.—Carried.

Logie—Forrester—That the town constable be instructed to inform the retail merchants of the village as to the Fuel Controller's order re closing their places of business on certain days and that he report to this Council any infraction of said order.—Carried.

Pearce—Forrester—That the rate allowed to be charged by the sexton for digging graves shall be four dollars instead of $3 as heretofore.—Carried.

Draft of a new by-law providing for a revised scale of rent charges for Town Hall was read and approved.

Skinner—Forrester—That cheques be issued as follows:

Murdoch Leitch	$48 00
Weighmasters	18 60
E P Boyle	57 75
Hugh Watt	16 25
John Stoddart	12 00

I. S. CRUICKSHANK, the Tailor

Danger of Mirages at Sea

Mirages at sea have proved disastrous to ships in Australian waters. Phantom land lured the schooner Kona to a grave on the beach of Kangaroo Island, Australia. A hydrographic report also says that the schooner Marston nearly fell victim to a mirage of land, steering towards the supposed shore until the mistake was discovered.

Three things will insure success on the average farm, namely: Good Health, and Cream Checks. If a farmer gets the first two and looks after them properly the last will come naturally.

The AUTOMOBILE

How to Prevent Cars Skidding.

"With winter here, every driver should learn how to drive a car on a slippery road," says an expert. "Being able to handle a car on wet road has prevented many an accident. It may readily be seen that if a new driver is experienced in the necessary manoeuvring of a machine during inclement weather that the repair bill will be maintained at a normal figure.

"On the other hand, a lack of education in manipulating the steering wheel while on a slippery road surface may result not only in damaging the car but in becoming injured.

"By the way of explaining what the skid really is, it is also necessary to make known that there is another form, which is known as the side-slip. To be able to pull a car out of a serious skid it is essential that the driver know the difference between these two.

"A side-slip is a lateral or sideways movement of the car. A skid is the continuous forward movement of the car, with one or more wheels not turning. Side-slipping usually is confined to the rear wheels, but in some cases the front wheels have figured in this peculiar movement.

"When in the throes of either a side-slip or bad skid the first thing to remember is to leave the brake pedal free. Partly close the throttle, but do not close entirely, as that would be equivalent to applying the brakes. Next turn wheels in direction of side-slip and open the throttle. This should right the car.

"One reason for side-slipping may be found in the fact that some drivers take corners at a fast rate of speed. Allowing that the road is slippery, the autoist should round turns slowly and with caution. The clutch should be released if there is a tendency for the car to slip.

"When this takes place, very frequently the rear tires will lose their lateral grip on the road surface. Motorists should never steer a machine sharply from a curb when the surface is wet.

"The reason for this is simple, in that the grip of the wheels on the road is insufficient to overcome the centrifugal effect, and the result is the rear of the car is forced toward the curbing. Sometimes a sudden speeding up of the motor will overcome the tendency to skid.

Keep Spare Tires Covered.

Tire wear and depreciation is not always the result of service. And it is an unwise policy to neglect the spare tire under the impression that as long as it is not in use it will keep its elasticity and strength indefinitely. Casings carried inflated on demountable rims do not, as a rule, suffer as much as empty casings, because, even when uncovered, light, moisture, and dust can attack them only on the outside. But when an empty casing is strapped to the rear tire holder and is left uncovered, mud, road oil, and air gradually accumulate inside of the tire, and in time will weaken the fabric. Furthermore, when such a casing is put to use, attempts to clean it are seldom thorough, especially if it is a roadside job. The dust and grit consequently injure the inner tube.

Another way in which spare tires suffer is through insecure attachment to the tire holder. Use plenty of straps, and have them tight enough to prevent rubbing and chafing. A good waterproof and light-proof tire cover will greatly prevent the injuries mentioned, soon paying for itself in the greater durability of spare casings as well as in the satisfaction of neat appearance.

WHAT MR. LLOYD GEORGE READS

REST FROM STATE AFFAIRS FOUND IN BOOKS.

The British Premier Delights in Stirring Fiction of an Historical Type.

There is no more omnivorous reader than Mr. Lloyd George, though, in the case of one who works, as he does, on an average fourteen hours a day, it is difficult to see where he can snatch the time.

The Premier makes time by reading in bed at night, after the long spell of official cares, at the week-end, when he goes to Walton Heath, where he has a modest country residence, and in long train journeys.

He finds novel-reading necessary to relieve his mind and to give him a little rest from his State work, and his choice of books is largely designed not to exercise his brain, but to divert it, on the same principle that hard-working business men choose light comedies for their theatrical fare.

Fascinated by Robespierre.

While not having very distinct prejudices in his fiction, he is most partial to historical novels, and his secretaries take it upon themselves to have always ten or twelve of the latest books of this character within his reach.

The historical novel appeals to him because it is an attempt to interpret in dramatic and picturesque form the psychology of famous historical personages, and no one is more interested in the study of psychology than Mr. Lloyd George. He believes that, without the ability to understand the psychology of peoples as well as of particular men, the statesman is ill-equipped for his task.

The Premier has his favorite historical figures. Perhaps of all the makers of history, he is most keenly interested in the character of Robespierre, whose motives and emotions he is never tired of studying. Essentially dramatic in his own composition, Mr. Lloyd George is fascinated by the vividly dramatic career of the great Revolutionary.

But everything appertaining to the French Revolution is of outstanding interest to him, as are all historical periods that bear witness to the struggle for freedom of the common people.

A Cure for Brain-fag.

It is almost amusing when the Premier is leaving London for Wales or Scotland to see one of his secretaries exploring the station bookstall for the newest novels of the type to please his chief, and to watch him return to the carriage with an armful.

Mr. Lloyd George reads through a book very quickly. He skims padding. He treats a book, in fact, very much like a Blue Book—he misses the unessential, and concentrates on the material. If a book bores him to begin with, he does not persist with it; he throws it down, and takes up the next. The fiction that does not pleasantly occupy his mind fails in its purpose, for he reads as an antidote for brain fag.

His favorite authors of fiction are Sir Arthur Conan Doyle, Anthony Hope, Jeffery Farnol, Baroness Orczy, Stanley Weyman, Morice Gerard, John Oxenham, E. C. Oppenheim, and Marjorie Bowen—all the writers, indeed, who make a point of giving their novels an historical setting.

Fleeting Interest.

Having read a book of fiction, Mr. Lloyd George immediately dismisses it from his mind. Its power to interest does not survive the actual time required to scan its pages. Herein the Premier is very different from most people, who, when they like a book, are never tired of returning to it in their thoughts.

But, with Mr. Lloyd George, when a novel has agreeably attracted his attention for an hour or so, it has served its object. He wants his mind free thereafter for more important concerns. It is doubtful whether he remembers one-tenth of the novels he reads in this quick and easy manner.

But in his light reading he must not be confused with his serious reading. There his aim is to absorb and critically analyze the contents.

But the necessity with the overworked Premier to-day is that, as much as possible, he should read for mental relief.

Warmed-over meat loses flavor and celery salt will give the desired taste.

Rye mush is more palatable if made with half milk instead of all water.

TRIPS INTO NO MAN'S LAND

NIGHT-STALKING PARTIES BETWEEN THE LINES.

Their Tense Thrill and Excitement Have Never Been Better Described Than in This Article

For sheer, breathless excitement there is nothing to beat night patrol work at the front. Nothing is more trying to the nerves, not even a raid or the tension of waiting to go over the top. Big game hunters, men who habitually court danger as other men seek amusement, will tell you that never in their lives have they tasted thrills such as half an hour's night-prowling in No Man's Land can give.

It is with patrolling as it is with shells. If a man says he likes either, you can confidently write him down a liar. The bravest and stoutest soldiers in the best battalions in France will evince a certain reluctance when told off for patrol.

Like so many things in this life, the anticipation is worse than the actuality, and the same men who have clambered slowly and unwillingly over the parapet will, in almost every case, show themselves brave and resourceful and calm once they are launched into the black void of No Man's Land.

Tense and Thrilling Excitement.

For participation in an experience that grows on one. Cowering in a shell-hole, cheek by jowl with a wan and lonely corpse, in the dazzling green light of a star shell, you will tell yourself that, once back in the welcome shelter of the trench, nothing will ever make you volunteer for night patrolling again. But the danger past, some bit of good work accomplished, and one forgets the shocks and alarms, remembering only the tense and thrilling excitement of these night-walking adventures.

A good company commander need never be idle in the trenches. The reason is that his work is never done. When his routine duties are accomplished, his daily reports sent in, the hundred and one details of ordinary, humdrum trench life settled in conference with the sergeant-major, there is always the enemy to watch and study.

Harass the Enemy.

The efficient officer in modern war will never be content with the affirmative answer to the question: "Is my trench secure against attack?" That question disposed of, another immediately arises in his mind: "How can I best harass the enemy?"—or, as a classic phrase in an Army textbook has it: "How can I make myself as offensive as possible?"

Before that question can be answered to a company commander's satisfaction he must know all about the little strip of ground in front of him. He must know what work Brother Boche is doing, whether his barbed wire is in good shape, whether he is active in patrolling, in what strength his trenches are held. A company commander must know his strip of front as a policeman knows his beat. He must, to carry on the metaphor, know the inhabitants of the street and their occupation and ways, so that, if anything untoward occurs, he is in a position to take rapid and effective measures.

A War of Nerves.

Therefore, out at the front, one of the means of spotting a good battalion is by the amount of patrolling it does. Patrol work does more than keep our side well posted about the enemy. It checks the Hun's patrolling activity, and has a bad effect on his nerves. Old Hindenburg knew what he was talking about when he said that the side which is going to win this war is the side with the best nerves. There are ways of wearing down the enemy's resistance besides killing Boches.

Will you come out on patrol with me this dark and chilly night? Right! Here's the officers' dug-out in the front line (company headquarters is in the support line, just behind). That young subaltern eating tinned pears out of a soup plate by the light of a candle is going out on patrol in a few minutes. You can go with him. That dark figure, with rifle and bayonet slung behind him, is his orderly. Down the trench four men, similarly equipped, are sitting on the fire step, resignedly waiting to accompany the party. Sentries have reported hearing the sound of wheels on a road that runs through No Man's Land, and the patrol is going to have a "look see" out there.

The Dreaded Moment.

Here you are at the fire step! Do you hear that whisper passing along the trench? That's the word going along—"Officer's patrol going out!"—so as you won't get shot coming in. Now you are on the parapet. Hup! Over you go, one man after the other. Now you are through the barbed wire, and here you are in No Man's Land. You take a few paces, and then the darkness swallows you up. You wonder how on earth the young officer will ever find his way back. You look around blankly for a landmark of any kind. There is nothing, not even a ruined house, a shattered tree. All is just blackness. Don't worry! The subaltern has a compass bearing on his objective, and a back-bearing to bring you safely home again. If you look closely, you will see the luminous disc of the compass in his hand as he consults it to get his proper direction.

Appalling Uncertainty.

You feel very lonely, it is as though you were utterly cut off from humanity. The only link with the world behind the parapet—the world of light and love and laughter—are the spasmodic reports of rifles that echo with loud reverberations through the night stillness. A machine gun joins in—tap, tap, tap, tap! Tap, tap, tap! Then another. The noise swells up, then dies away. All is still again.

The subaltern marches ahead, his orderly beside him, the four men spread out in a fan behind him. They walk upright, slithering in and out of the shell holes, with many halts to listen. When a star shell goes up, beginning with a loud report and ending with a gentle plop! and a burst of radiance, every man flops down and remains perfectly still. If you remain immobile under a Very light, a Hun can't see you, unless he is very close.

A German Patrol.

Presently you stumble over a sark—an evil-smelling, soft, dank bundle. You pick yourself up, and discover you have tripped over a German corpse. You stagger on, horrified, and bump full-tilt into the orderly. He holds up his hand. You listen breathlessly. At first you only hear your heart thumping. Then you catch an unusual sound—Clink, clink, clink! Thump, thump, thump! The Boche is out working.

You plod on again. Now the grass is long and the shell holes fewer. The party crawls on hands and knees. Suddenly there is a hard ground under your feet. You are on the road. It is grass grown, and a little investigation shows that the sentries' tale of carts in No Man's Land is a myth, as far as this particular road is concerned.

Crump! A burst of orange flame to the right and a loud explosion. A bomb! You have bumped into a Hun patrol. Crump, crump, crump! go three British bombs back. Instantly the very atmosphere breaks into noise. Bullets sing overhead, a machine gun starts rapping, and there is a swish of bullets in the grass. Somewhere close by a high, quavering voice is groaning "A-a-ah!"

Getting Back.

The subaltern pushes on resolutely. You find him standing by a dark form writhing on the ground. The officer produces a knife, and slashes off the wounded man's shoulder straps.

"Identification!" he whispers. "We can't get him in over this ground. No casualties? Good! It's time we got back!"

He whips out his compass and faces about, and the next minute you are in the dug-out, in the warm and welcome candle light.

Well, how did you like it? Oh, it's all right, but—

BINDER TWINE OF FLAX STRAW

New Process to Use Prairie Product Formerly Burned.

The Flax Fibre Development Association of Regina, Sask., announces that it has discovered a process for manufacturing flax straw into binder twine, commercial twine and yarns for weaving into hessy sacking and bale filling. Heretofore, the flax straw of the three western provinces, amounting to over 1,000,000 tons annually, has been burned after threshing.

It is said that experiments carried out this autumn with the new binder twine showed that it bound 99 per cent of the sheaves perfectly, a better result than was obtained with sisal twine. A co-operative company is being formed to manufacture the new twine.

NEWS BY MAIL FROM IRELAND'S SHORES.

Happenings in the Emerald Isle of Interest to Irishmen.

A fund has been opened by the Wicklow Urban Council for the dependents of the men lost in the recent fishing disaster.

Miss Emma Gilmore, Portaleward, has been awarded the Royal Red Cross for devotion to duty.

Private Robert Howard, killed in action, was a son of the late John Howard, Deer Park, Dundrum, Tipperary.

A fuel famine is threatened in Athlone owing to the difficulty in getting peat from the submerged bogs.

A large bakery in the town of Castlerea was forced to suspend business owing to the scarcity of flour.

A very successful concert was given in the Theatre Royal, Dublin, in aid of the Irish Times' Red Cross Fund.

There is a great scarcity of hay for feeding purposes throughout the Midlands, as large quantities were uncut when the winter storms came.

The Military Cross has been awarded to Rev. Canon O. E. Ross, Hallymena, now serving as chaplain to his Majesty's forces.

A large crowd assembled at the Warrenpoint Town Hall to witness the presentation of the Military Medal to Sergt.-Major James Boyd, Royal Irish Rifles.

HOT IN INDIA!

British Soldier Stationed at Multan Describes Climate.

A little while ago I was reading an English paper that had been sent out from home, and came across an account of a heat wave in the Old Country, the temperature being 75 deg. in the shade, says Gunner D. Leahy, of Multan, India. I read the article out to the other fellows in our room, and I can assure you some remarks passed.

The average temperature at Multan, where my battery is at present, is 108 and 109 degs. during the summer; but in the last week or so of June we had a heat wave in which the thermometer rose to 119 deg. in the shade, and then, on Wednesday, June 23rd, to 121 deg. in the shade.

But in June last year, at this same station, the highest temperature reached was 128 deg. in the shade, and four European soldiers died from the effects of it.

Of course, all stations are not like ours. Some have a climate very similar to England, but these are hill stations. Multan is one of the hottest stations in India, being on the edge of the Rajputana Desert.

I have had letters from home saying that fellows who have just returned from India are wearing overcoats during the summer. This is not at all surprising, owing to the fact that after two or three years out here our blood becomes very thin, and when we return home we are not able to stand the English climate.

WHERE THE RAINBOW ENDS.

Member of Royal Flying Corps Has Solved Mystery.

Many interesting stories come from the men in the different flying corps, but none perhaps more interesting, in a quiet way, than one related by Dr. A. P. Thurston, of the Royal Flying Corps. He says he has solved whatever mystery there may be in the rainbow.

"Do you know where the rainbow ends?" he asked of an audience. "I have been there. The rainbow ends on the top of every cloud. When you are above the clouds you sometimes see the rainbow a complete and beautiful circle and whenever you go above the clouds a halo encircles the shadow of our machine. I have charged this halo and it grows smaller and smaller as you approach. It finally becomes a ball of fire and then you plunge into the cold clammy cloud and you are where the rainbow ends. Sometimes as you run over the edge of a thunder cloud, great sparks eighteen inches long form a continuous line along the front edges of the wings."

Gumption is ability to put the grease where the squeak is.

SEA TO MAKE GOOD SHORTAGE OF FATS

IN FUTURE OCEAN WILL YIELD NEEDED SUPPLY.

Even Oleomargarine is Now Being Manufactured in Norway from Fish Oil.

The world's supply of oils and fats is going to be derived in rapidly increasing measure hereafter from the seas. This is the conclusion to which investigators of this problem, which was one of the first to become acute after the war started, have brought themselves.

The problem indeed was beginning to be a real one before the war started. The production of live stock for a long time had not been keeping pace with the world's requirements. This has been in considerable part because of the increasing number of peoples that are requiring more and more meat in their diet, and partly from other causes.

The net result is that in the search for new oils and fats, and indeed for new uses of fish as a substitute for meat, important progress has been made. Some recent developments suggest that the seas are altogether likely in coming generations to take the place of the great ranges of the Americas and Australia for the production of some important food articles.

Butter Substitute From Fish.

The announcement recently from Norway that a satisfactory substitute for oleomargarine had been produced from fish oils, which it was regarded as extremely important, is in fact only one evidence of this increasing deepening of the world upon the seas' sources of supply for various necessaries. Now it is asserted that the denizens of the deep waters are presently going to be put under contribution for a variety of new foods and substitutes for leather in many uses.

The subjugation of the sea is not the only great step that men are contemplating toward a more effective utilization of nature's bounty. The tropics are going to be developed, after this war, at a rate never before imagined, unless all signs fail. Not only are the Governments preparing to give more systematic and scientific encouragement to proper colonial development in the tropical areas but the colonizing spirit has been receiving a great revival. One hears soldiers from every army, Englishmen, Scotchmen, Frenchmen, Italians and, it is said, German prisoners, talking of the possibilities of South America, Africa, the Pacific Islands, in fact, the whole great undeveloped empires of the world.

Price Will Be Higher.

In Norway milk and butter supplies are very short, but the Morgenblatt announces that the problem of a substitute for oleomargarine has been solved and that the Norwegian oleomargarine could be made of purely Norwegian materials without the admixture of foreign vegetable oils, which experts had declared to be essential.

The discovery is due to the researches of a committee appointed by Hr. Vik, the Minister of Supply. For the present the Vera fat refinery will manufacture the article, and it is asserted that the factory will be able to meet the requirements of the whole country.

The secret is the use of different kinds of fish oil, of which there is plenty in hand, both of whale and other fish. The price will be slightly higher than the former oleomargarine, because there is a duty on fish oils higher than that on the vegetable oils previously used.

A representative of the Morgenblatt has been given the opportunity of tasting the new product and asserts that in flavor and appearance it is equal to the best oleomargarine. It is expected to be on the market in about a fortnight.

Problem and Solution.

Our problem is to feed our Allies by sending them as much food as we can of the most concentrated nutritive value, in the least shipping space. These foods are wheat, beef, pork, dairy products and sugar. Our solution is to eat less of these and more of other foods of which we have in abundance—and to waste less of all foods.

The Doings of the Duffs.

A WOMAN'S HEALTH

Can Only be Maintained by Keeping the Blood Rich and Pure.

The woman at home, deep in household duties and the cares of motherhood, needs occasional help to keep her in good health. The demands upon a mother's health are many and severe. Her own health trials and her children's welfare exact heavy tolls, while hurried meals, broken rest and much indoor living tend to weaken her constitution. No wonder that the woman at home is often indisposed through weakness, headache, backaches and nervousness. Too many women have grown to accept these visitations as a part of the lot of motherhood. But many and varied as her health troubles are, the cause is simple and the cure at hand. When well, it is the woman's good blood that keeps her well; when ill she must make her blood rich to renew her health. The nursing mother more than any other woman in the world needs rich blood and plenty of it. There is one always unfailing way to get this good blood so necessary to perfect health, and that is through the use of Dr. Williams' Pink Pills. These pills make new blood abundantly, and through their use thousands of weak, ailing wives and mothers have been made bright, cheerful and strong. If you are ailing, easily tired, or depressed, it is a duty you owe yourself and your family to give Dr. Williams' Pink Pills a fair trial. What this medicine has done for others it will surely do for you. Mrs. W. H. Alberry, Mallorytown, Ont., says:—"I was very much run down and suffered from weakness and nervousness. At times I did not know what to do, as I would shake all over, and would have to go and lie down. I was treated by several doctors, who said the trouble was bad blood and weak nerves, but they did not do me a bit of good. I was advised to try Dr. Williams' Pink Pills and they made me feel like a new woman. Later when I was nursing my baby, I felt run down, and again took the pills, and my baby at six months weighed thirty-five pounds. It was this medicine that gave me the strength to nurse him, and both baby and myself greatly benefited by it. I hope every suffering woman will give Dr. Williams' Pink Pills a fair trial as I did, for I have proved their wonderful merit."

You can get these pills through any medicine dealer or by mail postpaid at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

You Shall Not Pass.

She is a wall of brass.
You shall not pass! You shall not pass!
Spring up like summer grass,
Surge at her, mass on mass,
Still shall you break like glass,
Splinter and break like shattered glass.
But pass!
You shall not pass!

German, you shall not, shall not pass!
God's hand has written on the wall of brass—
You shall not pass! You shall not pass!
The valleys are quaking,
The torn hills are shaking,
The earth and the sky seem breaking,
But unbroken, undoubting, a wonder and sign
She stands, France stands, and still holds to the line,
She counts her wounded and her dead;
You shall not pass!

She sets her teeth, she bows her head;
You shall not pass!
Till the last soul in the fierce line has fled
You shall not pass!
Help France? Help France?
Who would not, thanking God for this great chance,
Stretch out his hands and run to succor France?

—Harold Begbie.

Value of Peanut.

The peanut is a substantial food, according to the Confectioner's Gazette, six ounces of shelled peanuts being said to possess a food value of 3.3 ounces of round steak, 5 ounces codfish, 1 ounce rice, 4.2 ounces rye bread, 35.5 ounces spinach, 5.6 ounces apples or 6 ounces bacon. The peanut is rich in fat, and also has mineral salts important in the diet, such as phosphorus, lime, sulphur and iron.

Ox tails make good soups and stews at small cost.

There are 3150 British Red Cross motor ambulances at the front.

Italy's 1917 wheat crop was 3,810,-200 metric tons, compared with 4,804,-400 metric tons in 1916.

The peace that would hand Syria and Armenia back to the Turks would mean the peace of death for multitudes.

Cocoa and tea stains can be removed by dissolving one heaping teaspoonful of soda (baking soda) in a pint of hot water and soaking the stain for a few minutes.

SPITZBERGEN: NO MAN'S LAND

MAY PROVE TO BE A SECOND ALASKA.

End of the War Will See a Rush to Establish Claims to This Rich Country.

Spitzbergen, virtually the only "No Man's Land" of any value left on the earth, promises to present an important question after the war ends. Jutting up from one of Europe's most northerly points toward the regions of perpetual ice, Spitzbergen received little attention from world powers, even those near by, until its important mineral resources were revealed. By some it is said the country will prove to be a second Alaska in the surprises awaiting its complete exploration and study.

Coal in apparently unlimited quantities, easily mined without shafting, abounds in Spitzbergen. Besides there are found deposits of iron ore, marble, copper ore, iron and copper pyrites, molybdenum, galena, zinc blende and other minerals.

Areas claimed by the five different nationals working in Spitzbergen are: British, 3,574 square miles; Norwegian, 770; Swedish, 448; Russian, 80; and German, 23. In addition the Scottish Spitzbergen Syndicate, Ltd., of Edinburgh, lays claim to Bunzow Land, known also as the Sassen Bay Peninsula. This district comprises one-third of the total claims and includes five-sixths of the potential output of the Swedish coal company. After the war these two claimants of one property promise to make a hard fight for what each believe is its rights.

Extensive Mineral Resources.

This war has revealed more than ever before the advantage accruing to a nation controlling deposits of coal, metals and oil, which fact alone is enough to cause a scramble for Spitzbergen with its extensive resources.

Spitzbergen at various times has been accredited to Russia as a result of annexation, but as it is contended they failed to follow up any formal action of the kind—if it ever was taken—the Russians would have a hard time to convince other nationals of title to the land. Especially is this the case in regard to Great Britain in view of recent developments in Russia.

More than 300 years ago, in 1614, James I. of England formally claimed Spitzbergen. The Muscovy Company, a British concern, was ordered "to uphold the King's right to Spitzbergen" by an Order in Council. That claim also was allowed to lapse in the same manner in which the Russian claim lapsed, the Britons interested in the country say.

With the end of the war old data will be dug up, with records of comparatively recent times, to bolster the contentions of the various claimants, as Spitzbergen is sure to occupy a prominent place in north European affairs.

Teach Seventy Occupations.

At the present time in Montreal there are 1175 re-educational courses given to returned soldiers comprising instruction in seventy different occupations. The policy of the Military Hospitals Commission, to combine instruction under competent teachers selected from returned officers, N.C.O.'s and men, with the practical instruction under practical conditions, has been found to work most satisfactorily indeed; the marked interest displayed by the men and their ambition to succeed, is a constant inspiration to the teaching staff. The great willingness of manufacturers to co-operate with the vocational department in giving over their plant facilities for instructional purposes indicates clearly the wonderful appreciation of the services rendered by returned men at the front, and the importance of the great economic problem which confronts the nation.

KEEP LITTLE ONES WELL IN WINTER

Winter is a dangerous season for the little ones. The days are so changeable—one bright, the next cold and stormy, that the mother is afraid to take the children out for the fresh air and exercise they need so much. In consequence they are often cooped up in overheated, badly ventilated rooms and are soon seized with colds or grippe. What is needed to keep the little ones well is Baby's Own Tablets. They will regulate the stomach and bowels and drive out colds and by their use the baby will be able to get over the winter season in perfect safety. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

How the Boys Can Help.

A novel and practical plan to use school boys to assist in keeping pigs and thus to help in the campaign for increased hog production in Canada has been taken up by the Council of the Hamilton Board of Trade.

If the glass percolator of your coffee pot breaks, use a glass lemon squeezer for the time being.

SHIPBUILDING IN BRITISH COLUMBIA.

If history can be relied upon it is just one hundred and thirty-one years since the first ship was built on the Pacific Coast of Canada. A century and a quarter passed without bringing the industry to any immense proportions, but within the last few years shipbuilding advanced in British Columbia as if by magic. In the summer of 1916 there was one ship to be valued at half a million dollars in process of construction in the province. At present the industry represents an investment of $30,000,000. Nine large vessels the product of British Columbian enterprise, are now filling the vessels, the product of British Columbia which are of steel construction, are either being built or have been contracted for.

The incentives for these gigantic strides in British Columbian shipbuilding have been the demand for ocean tonnage created by the German submarines, and the many extraordinary facilities which the geographical situation of British Columbia and her forest resorts offer for the shipbuilding trade. It was for these reasons that the Imperial Munitions Board selected British Columbia to build twenty-five vessels.

British Columbian shipbuilding is carried on mainly at Vancouver and Victoria, but New Westminster has a yard of considerable proportions at Poplar Island, where four of the ships ordered by the Munitions Board are being constructed. The classes of ships being built are divided into schooners and steamers. The majority are built mainly of wood, but several are made principally of steel. At present the shipyards of Victoria, Vancouver and New Westminster are engaged in building fifty of these vessels, which will have a gross tonnage of 110,925, and a deadweight capacity of 185,000 tons.

The cost of the material alone that must be applied for the completion of these ships is estimated at $1,700,000. In order to finance the shipbuilding undertakings, actual and contemplated, the British Columbian Manufacturers' Association is endeavoring to secure a "Shipbuilding Loan" from the Dominion Government.

There is a bright prospect before the shipbuilders of British Columbia. It is possible that the yards there will be making ships for the Australian Government in the near future. Negotiations are now being carried on by the shipbuilders of British Columbia with the Government of the Commonwealth with a view to securing orders.

The great ships of the Canadian Pacific Ocean Services, now plying between Vancouver, Victoria and countries of the East, when they have lived their allotted time and done their appointed work, may be replaced by other liners, just as magnificent, that will be built in the shipyards of the Canadian Pacific Coast, for it is not likely that industrious British Columbia will ever relax its hold on an undertaking that has begun so auspiciously.

GIRLS! LEMON JUICE IS SKIN WHITENER.

How to make a creamy beauty lotion for a few cents.

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

DIAMOND-CUTTING INDUSTRY

Ideal Occupation For Maimed Soldiers, Says London Paper.

The old proverb about diamond cut diamond used to be true, but to-day a diamond can be sawn through by a thin disc of phosphor-copper revolving about three thousand times a minute. For many years all diamonds had to be sent to Amsterdam, where the Jews had a monopoly of the trade of diamond-cutting. Even the Cullinan diamond was sent there to be "cleft" in two, says a London weekly.

But there was a time when a diamond could be efficiently cut in England, and the time is coming when it will again be possible. Mr. John Hodge, the British Pensions Minister, has it on his list, as the song says, for he regards diamond-cutting as an ideal occupation for legless men. It is a much larger trade than anyone outside has any conception of, for not only is the cutting of a diamond a slow task, but the number of diamonds which require cutting is very large.

The machinery is intricate, and used to be driven by steam; but now electricity has superseded steam. Thus does war bring some compensations in giving a profitable occupation to our maimed heroes.

Minard's Liniment Cures Diphtheria.

Western Woman Speaks With Enthusiasm

Mrs. R. Eckford Tells of Dodd's Kidney Pills.

She Says They Are "All Right," and Gives Her Reasons For Saying So—Why They Are Popular on the Prairies.

Lashbrooke, Alta., Feb'y 4th (Special.)—It is with true Western enthusiasm that Mrs. R. Eckford, of this place, gives her opinion of Dodd's Kidney Pills.

"I wish to inform you that Dodd's Kidney Pills are all right," says Mrs. Eckford.

"I have only taken two boxes, and my back is fine. Of course I will keep on taking them whenever I think my kidneys are not just right."

"Your Diamond Dinner Pills are dandy, too," Mrs. Eckford added. "I keep them in the house, and take one occasionally as required."

What strikes one most on the prairies is the warm praise the people give Dodd's Kidney Pills. They are used for all kidney troubles, including backache, rheumatism, lumbago, heart disease, diabetes, and dropsy and Bright's disease, and their popularity is proof of the good work they are doing. Dodd's Kidney Pills are the standard Canadian kidney remedy.

Clean Hands.

The law of Moses, still binding on devout Jews, was ages before its time in many of its regulations, and not least with respect to diet and cleanliness. One recalls especially its insistence on the frequent washing of hands, which in later times became a sort of fetish.

The Bible makes clean hands accompany a "clean heart," and there is more in the association than meets the eye, for clean hands often mean freedom from disease or the means of communicating it; and the medical faculty washes its hands oftener and longer and more thoroughly than any profession in the world, and with most reason.

In certain hospitals they have a set of rules for hand-washing which it would be well to apply to all and strictly enforce. Before operations these strict regulations prescribe four washing processes of five minutes each.

For the first five minutes the surgeon is supposed to wash his hands in the ordinary way with soap and warm water, and then carefully to clean his finger-nails. When he has leisurely cleaned his nails, he goes to the pail again for another five minutes, still with soap and warm water.

The third five minutes is occupied in washing his hands in alcohol, and the fourth for the process of sterilization with a grash of corrosive sublimate

MURINE Granulated Eyelids, Sore Eyes, Eyes Inflamed by Sun, Dust and Wind Quickly relieved by Murine. Try it in Your Eyes and in Baby's Eyes. FOR YOUR EYES No Smarting, Just Eye Comfort. Murine Eye Remedy Keep Your Eyes Clear as by Murine Eye Remedy Co., Chicago.

Keeping Oil Sweet.

If lump sugar is added to olive oil—two lumps of the sugar to a quart of oil—it will not become rancid. If the oil comes in a can, empty as soon as opened into a bottle or preserve jar and put in the sugar. It will be kept in perfect condition to the last drop.

The Nova Scotia "Lumber King" says:
"I consider MINARD'S LINIMENT the best LINIMENT in use.
I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT and it was as well as ever next day.
Yours very truly,
T. C. McMULLEN.

The movement in England looking toward the adoption of the decimal system for currency, which has the backing of the Associated Chambers of Commerce of the United Kingdom, is gaining ground.

Minard's Liniment Cures Garget in Cows

Wring Linen by Hand.

If you put your table linen through the wringer you will have creases which are hard to remove when ironing. Rather, wring by hand, smoothing when putting on the line. Do not use starch. Iron with hot irons while the linen is still quite wet.

The Little Ghosts.

He shall see many ghosts before he dies!
The ravished and the murdered and those slain
In torture, shall arise from earth and main
And close about him, mute and shadowwise;
And ever first and foremost to his eyes
From the red streets and from the sea's vast plain
The little children shall come back again—
The frail crushed blossoms of the sacrifice.
And in their eyes no fear will be, nor wrath,
Only a child's bewilderment at hate,
And in their hands no lifted menace dwelt;
Yet these frail shadows shall obstruct his path,
And at the last, or be it soon or late,
These helpless hands shall push him into hell.

—Theodosia Garrison.

Money Orders.

Dominion Express Money Orders are on sale in five thousand offices throughout Canada.

Dr. Zavitz, of the O.A.C., says that sixty varieties of potatoes are grown in Ontario.

Minard's Liniment Cures Distemper.

Suet pudding is a good dessert for cold weather.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man, "Give me a small bottle of Freezone." This will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn relieves the soreness instantly, and soon the entire corn or callus, root and all, dries up and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that freezone dries in a moment, and simply shrivels up the corn or callus without irritating the surrounding skin.

Don't let father die of infection or lockjaw from whittling at his corns, but clip this out and make him try it. If your druggist hasn't any freezone tell him to order a small bottle from his wholesale drug house for you.

When buying your Piano insist on having an "OTTO HIGEL" PIANO AOTION

Cause of Early Old Age

The celebrated Dr. Michenhoff, an authority on early old age, says that it is "caused by poisons generated in the intestine." When your stomach digestion and prepare it for absorbed without forming poisonous matter. Poisons bring on early old age and premature death. 15 to 30 drops of "Seigel's Syrup" after meals makes your digestion sound.

ABSORBINE STOPS LAMENESS from a Bone Spavin, Ring Bone, Splint, Curb, Side Bone, or similar trouble and gets horse going sound. It acts mildly but quickly and good results are lasting. Does not blister or remove the hair and horse can be worked. Page 17 in pamphlet with each bottle tells how. $2.00 a bottle delivered. Horse Book 9 M free. ABSORBINE, JR., the antiseptic liniment for mankind, reduces Painful Swellings, Enlarged Glands, Wens, Bruises, Varicose Veins; heals Sores. Allays Pain. Will tell you more if you write. $1 and $2 a bottle at dealers or delivered. Liberal trial bottle for 10c stamps. W. F. YOUNG, P. D. F., 316 Lymans Building, Montreal, Can.

High Prices being Paid for Syrup and Sugar

Pure Syrup commands a high price. Maple Grove evaporators using our "Champion" Evaporator have been making good money on a rising market for years. You can do the same by ordering your machine now in readiness for next season's crop.

MRS. KIESO SICK SEVEN MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Aurora, Ill.—"For seven long months I suffered from a female trouble, with

pains in my back and sides until I became so weak I could hardly walk from chair to chair, and got so nervous I would jump at the slightest noise. I was entirely unfit to do my housework, I was giving up hope of ever being well, when my sister asked me to try Lydia E. Pinkham's Vegetable Compound. I took six bottles and today I am a healthy woman able to do my own housework. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound, and find out for themselves how good it is."—Mrs. CARL A. KIESO, 596 North Ave., Aurora, Ill.

The great number of unsolicited testimonials on file at the Pinkham Laboratory, many of which are from time to time published by permission, are proof of the value of Lydia E. Pinkham's Vegetable Compound, in the treatment of female ills.

Every ailing woman in Canada is cordially invited to write to the Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for special advice. It is free, will bring you health and may save your life.

REAL ESTATES CORPORATION, LTD.
60 Front St. West, Toronto

The Paisley Advocate

PAISLEY, FEB. 13th, 1918

—Premier Hearst and Mr Proudfoot, the new leader of the Liberals, were not long in arriving at an understanding to have the present term of the Ontario Legislature extended for three years. It is charged that Mr Proudfoot accepted the proposition "off his own bat," without formally consulting his followers. If he can always perform as acceptably at the bat, Mr Proudfoot should become a popular and successful leader, also soon be given a real "innings" as premier.

—Hon. T. W. McGarry is introducing a bill in the Legislature to provide for the appointment of a general purchasing agent for Ontario, which will do away with each department and sub-department making its own purchases. During the year the Government had been investigating systems of purchase and have learned something from the C.P.R. Co., and other such corporations in Canada and the U. S. The best man to be found is to be engaged as purchasing agent, and all purchases are to be by tender with certain necessary exceptions.

THE PARTY SYSTEM ANALYZED

Under the Old Party System, Men Did Not Choose Their Parties to Accord with Their Opinions, but Modified Their Opinions to Suit Their Parties.

The great objection to the old party system, as exemplified in this country, was that the divisions were so largely artificial. Under its influence men did violence to their opinions and their consciences for the sake of loyalty to their party organizations. The party system, instead of affording a means for a genuine test of public opinion, often served to make such a test impossible. The triumph of a public policy became subservient to the interest of political parties. Men who were in substantial agreement in regard to public issues opposed each other, often with the most bitterness, at the bidding of the parties. Under the old party system the chief effort was directed towards securing of party success. Men did not choose their parties in accordance with their opinions; they modified their opinions to suit their party. In this way the party system has operated as a check upon progressive development. Instead of enabling the people who favored progress to work together for a common end it kept them divided. The theory that some men are conservative by nature and some are progressive found no exemplification in the party system. In this country, at any rate, many of the men calling themselves Conservatives in the party sense were really radicals, while many others who boasted that they had always been Liberal were most intolerant of genuine Liberal ideas. A re arrangement of the political parties that would place all the liberal-minded on one side and all those of conservative tendencies on the other would cut right through the heart of both political parties.

The objection to the party system in the past was not so much that it divided people into parties as that it divided them artificially. The great change that was wrought during the past election campaign will have a good effect for a time at least. It has taught some people the real use and purpose of the party system. For once the party was made to serve the will of the people; too often in the past the conditions have been reversed and the people have been used to serve the purposes of the party. So long as the party divisions correspond with actual differences of opinion there will be little cause for complaint. Differences of opinion we must expect while human nature is what it is; what we have a right to demand is that these differences shall find honest expression. But the tendency of people is to cling to forms long after they have lost both life and meaning; and the political party which serves its proper purpose as an instrument of the people's will to-day is likely to be found controlling the people's will to-morrow. That is the danger that must be guarded against. The opportunity now offers itself, not for the abolition of the party system but for the reconstruction of the parties and the bringing of party organizations into harmony with actual public opinion.

For the better working of the party system in the future a large part of the responsibility will rest on the newspaper press of the country. The party organ still remains but except in rare cases it is no longer an organ. It is becoming more and more a medium for the expression of independent and enlightened opinion. It can be counted upon to support the party so long as the party stands for principles and ideals that commend themselves to its intelligence, and only so long. The old days when the politicians could do as they liked and trust to the party papers to defend and justify them, are gone. Let us hope they will never return. If we must have party ism let us learn to make the best possible use of it. Let it be a partyism based on real differences of opinion. Let it be a partyism sustained and justified by devotion to principles and not merely trusting to organizations for the sake of office.—Woodstock Sentinel-Review.

F. CARTER & SON

MOTHERS OF CANADA
PREPARE FOR TROUBLE

When a girl becomes a woman, when a woman becomes a mother, and when a woman passes through the changes of middle life, are the three periods of life when health and strength are most needed to withstand the pain and distress often caused by severe organic disturbances. Many thousands in this section would testify as do the following:

St. Catharines, Ont.—"Over forty years ago I was restored to health by taking Dr. Pierce's Favorite Prescription. It was after medicine and doctors had failed to help me or give relief. I had, through overwork, become all run down in health. I was weak and finally became a nervous wreck. The 'Prescription' was recommended to me, and at the time I started to take it I had not been able to do anything for over a year. I took the "Favorite Prescription' and the 'Golden Medical Discovery' as well. It took several bottles, but I was completely restored to good health and since that time when I have felt in need of medicine I always have taken them and always with perfect satisfaction."—Mrs. Wm. Bakes, 33 Page St.

Stratford, Ont.—I was all run-down, weak, nervous. I also suffered with severe pains through my back. I was very miserable when a friend advised me to try Dr. Pierce's Favorite Prescription and one bottle seemed to give renewed strength. It stopped the pain in my back, also helped my nervous condition. It is surely a good tonic for women.—Mrs. Florence Cullum, 100 Milton St.

WOOD'S VALUE AS FUEL.

Heat Value Depends on Amount of Moisture Present.

Persons who plan to relieve the coal shortage this winter by burning wood can figure, roughly speaking, that two pounds of seasoned wood have a fuel value equal to one pound of coal, according to experts. While different kinds of wood have different fuel values, the foresters say that in general the greater the dry weight of a non-resinous wood the more heat it will give out when burned.

For such species as hickory, oak, beech, birch, hard maple, ash, locust, long-leaf pine or cherry, which have comparatively high fuel values, one cord, weighing about 4,000 pounds, is required to equal one ton of coal.

Weight for weight, however, there is very little difference between various species. Resin affords about twice as much heat as wood, so that resinous woods have a greater heat value per pound than non-resinous woods.

The available heat value of a cord of wood depends also on the amount of moisture present. When the wood is green part of the heat which it is capable of yielding is taken up in evaporating the water. The greater the amount of water in the wood the more heat is lost.

Where wood is to be burned in a stove or furnace intended for coal it will be found desirable, the foresters say, to cover the grate partly with sheet iron or firebrick to reduce the draft. If this is not done the wood is wasted by being consumed too fast, and makes a very hot fire, which, in a furnace, may damage the fire box.

It is pointed out, however, that heat value is not the only test of usefulness in fuel wood, and since ninety-five per cent. of all wood used for fuel is consumed for domestic purposes, largely in farm houses, such factors as rapidity of burning and ease of lighting are important.

Each section of Canada has its favored woods, and these are said to be, in general, the right ones to use. Hickory, of the non-resinous woods, has the highest fuel value per unit volume of wood, and has other advantages. It burns evenly and, as housewives say, holds the heat. The oak comes next followed by beech, birch, and maple. The white pines have a relatively low heat value per unit of volume, but have other advantages. They ignite readily and give out a quick, hot flame, but one that soon dies down. This makes them favorites with rural housekeepers as a summer wood, because they are particularly adapted for hot days in the kitchen. The same is true of gray birch or "white birch." as it is often called in the regions in which it abounds.

Range Horse Steak.

As a partial solution of the meat problem W. F. Butler, a well known man in the Western States, is urging the slaughter of the range horses of the North-West which, he declares, are unprofitable for their present purposes.

Hundreds of thousands who cannot afford to buy beef would by this means be supplied with meat, he declares, and $30,000,000 to $15,000,000 in cash would be the return. Such a course would also help to relieve the hay shortage and provide room for 1,000,000 cattle and several million head of sheep, he believes.

"There is no staple market for the lightweight horse at the present time," he declares in a statement on the subject. "In day of practical usefulness is practically at an end. It is a hay-destroyer—a live liability rather than a live asset. This does not apply to the general utility draft horses. The farm draft horse is an asset to any country, and will remain an asset just as long as farms are plowed and man grows crops for his sustenance.

"Throughout the North-West I would say that there are over a million such animals. Among certain people there is an inherited prejudice against horse flesh, but there are many people who have not a prejudice against this food. In many countries it has been used for hundreds of years as a food product, and at the present time it is offered for sale in New York, Cincinnati, and St. Louis.

"In food value horse flesh is about equivalent to lean beef. From a sanitary standpoint, the horse is one of the cleanest animals living. Its habits require that it eat the purest food and drink the best of water. It lives in the open and is freer from transmissable diseases than are either cattle or hogs.

"I am of opinion that there will be no difficulty in obtaining a steady supply of horse flesh for some time to come. We received a communication several days ago from one of the large Western horse markets saying that it would contract to supply 3,000 horses monthly for the next twelve months."

His Superior.

The son of the well-to-do family had recently joined up as a private, and was spending his Christmas leave at home. Returning from a walk, his mother espied a figure in the kitchen with the housemaid. "Clarence," she called to her son, "Mary's got some one in the kitchen. She knows perfectly well that I don't allow callers. I wish you'd go and tell the man to leave the house at once." Clarence duly departed to the kitchen, but returned in about half a minute. Sorry, mother, but I can't turn him out." "Can't turn him out? Why on earth not?" "He's my sergeant!"

Athlete Killed in France.

Eddie Roberts, a well-known Ottawa lacrosse and hockey player, was killed in the fighting in France a few weeks ago. Roberts went overseas with the 207th, and was transferred to a machine gun squad. He was a brother to Dr. Gordon Roberts and Dr. Laurie Roberts, Montreal, Ottawa, and McGill athletes.

Wilfred Campbell 'the Lake Poet

DR. WILFRED CAMPBELL, LL.D., F.R.S.C., the Canadian poet, died at his home at Ottawa on New Year's Day. William Wilfred Campbell was born on June 1st, 1861, at Berlin (now Kitchener), Ont. His mother was of English descent. Through his father, he claimed connections by a cadet branch of the family with the House of Argyll and so with the Marquis of Lorne, Governor-General of Canada from 1878 to 1883, with Thomas Campbell, the Scottish poet, and with Henry Fielding, the English novelist. He thus came honestly by his imagination and his desire for literary expression. His boyhood was spent in Wiarton, Ont., on Georgian Bay. His lower school education was private. Upper Canada College, Toronto, claims him as one of her old boys, and Trinity College saw his introduction to the work for Anglican orders. Wilfred was chosen to follow the footsteps of his father, but he does not seem to have been particularly adapted for that path. There are rumors that he left the University without his degree. He completed his clerical education at Cambridge, Mass., where he probably came in touch with the poet Lowell. He was ordained in 1885 and carried on parish work in New England until 1888 and then at St. Stephen, N.B., until 1891, when he retired to devote his time to poetry and the Federal Civil Service. At Ottawa, he was connected with the Archives Department, where he had ample opportunity to develop his love for the historic and the tragic. For the past few years the poet lived on a small farm, Kilmorie, in the suburbs of Ottawa. He rests with Lampman at Beechwood—

"where, by wood and croft,
The wintry silence folds in fleecy blur
About his silences, while in gloome
aloft
The mighty forest fathers, without
Guard well the rest of him. . ."

When Campbell published his first poem I do not know, but one authority states that he wrote first for a village newspaper. His first volume, "Lake Lyrics," was issued in 1888.

"Lake Lyrics" was succeeded in 1893 by "The Dread Voyage" and that in 1899 by "Beyond the Hills of Dream." All three were finally superseded by the "Collected Poems" in 1905. This edition contains practically all his earlier verse of value except his tragedies which were published in one volume in 1908. In 1910 and 1915 two very slight volumes, "The Sagas of Vaster Britain" and "War Lyrics" were added.

Campbell's mastery of word music and word-power might be illustrated by numberless quotations. One or two must suffice:

"Walls of green where the wind and
the sunlight stir
Ripples of wisdom and light where the
sun looks through,
And spaces of day that widen and blur
between
Out to the haze-rimmed, purpled edge
of the world."

And this from "Winter":

"Morning shrinks closer to night and
hesitates soon
Hangs, a dull feathers, over the
winding snows:
And like a pale beech leaf fluttering
upward the moon
Out of the shadows of wakens and
blossoms and grows
And builds her wan beauty like as the
snow
Over the soundless silences, shrunk-
en, that lie
Their prisoned deathliness under the
gold of her beam."

From the reflective strain of the above, it is but a short step to the poems of purpose and subtle imagination. "The Mother" is one of the poet's most famous and most quoted poems. The subject is the longing of the dead bride-mother for her babe and her return for it:

"I nestled him soft to my throbbing
breast
And stole him back to my long, long
rest."

I have sometimes wondered if the following held any clue to Campbell's defection from the ministry. What was his creed? He has stated it over and over again:

"Simplicity is truth;
Religion reverence; wisdom but to
know
Those dread eternal laws which guide
the world."

"In every common hour of life,
In every flower that grows,
In every breath of being rife
With sweet and subtle changes,
Man feels more than he knows."

"And when from the winter of thy
wild death
Thine angels cry sunlight call,
Waken me unto my highest, my best,
Or waken me not at all."

However, Campbell's most important mission, as he conceived it, was the imperial rather than the emotional.

Here is the essence of his ideal:

"This mighty dream of the race!
What, O soul, will it give to thee?
When the magic of being burns
from the blood,
When the vision fed from the sky,
When the mother nurse from her child
When the soul of the father spurns:
And the blood of the mightiest race
on earth
To foolish ease and waste turns."

Of his tragedies little can be said in so brief space. Beyond a doubt, Campbell has used Shakespeare as his model, especially in his use of the lyrics of Dagonet, the fool, to lighten the tragedy of Mordred. The subjects are not original unless "Morning" was purely fictional. "Mordred," formed about the Arthurian legend of the unnatural son of the great king, is undoubtedly the strongest of the tragedies though by no means adapted for dramatic presentation.

Of his "War Lyrics," very few have reached the standard of his earlier work. The most picturesque perhaps is "Blood Drops of Heroes."

HOW A TREE LIVES

Sweeping of the Tree Causes Sap to Rise

Darwin, the great student of life and its laws, says the Canadian Forestry Journal, caused a twig to drink some water containing a strong dye, and then he could follow the travels of the sap as it mounted through the wood. He found that when he kept bending the twig to and fro with his fingers the sap was forced to rise much faster. The tree sways with every breath of wind. Every time it bends, the wood-cells are squeezed and the sap is forced out. Every time it straightens again the little tubes and cells fill with sap from below. But no one can really understand or fully explain the rise of the sap. Later in the year, when many leaves are spread wide in the sunshine, water is breathed away from the upper part of the tree. Some of the cells up there part with so much moisture that their sap becomes thickened, and this causes a suction which draws more watery sap up through the wood from below. When summer is here, and growth is active, there are, furthermore, little bubbles of gas in the sap, and these, as they rise, help to bring the sap up with them. But even when all these things are considered, we cannot fully understand how or why the sap rises as it does. Its upward mounting is one of the greatest wonders of nature.

Key Ring as Cover Fastener

The usual box-cover fastener in the form of a staple and hasp can be fastened quite securely, and much better than with the use of a wood pin, by applying a key ring to the staple. This is to take the place temporarily in case the lock is lost or discarded.—Popular Mechanics.

WARDING OFF WITCHES

Modern Londoners Still Believe in Charms

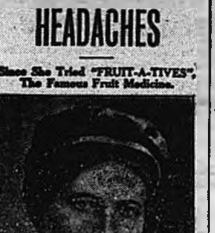
At an exhibition in London the following collection showed that belief in the supernatural is still rife: Medical charms formed a large part of the collection.

Necklaces made of the stems of the nightshade which, if put around the neck of an infant will help it to cut its teeth. A necklace of acorns is a specific against other infant ills. A knuckle-bone, carried in the pocket, will ward off rheumatism; the theory being that as the dead bone does not suffer from the complaint the disease will go into it. A specimen shown was carried by a rheumatic subject for many years. A third charm against the same complaint is a small bottle containing mercury, hermetically sealed and covered with leather. It is stated that it is sold in London by one of the largest chemists in the world. Those who suffer from night mare may welcome this prescription. A necklet of blue beads will protect a child against bronchitis, while red beads worn round the neck will avert sore throats. A small bag containing a tooth should be placed round the neck of an infant as an antidote against teething convulsions. Since the beginning of the war another charm against diseases has been introduced by Belgian refugees—the wearing of cat's skin for rheumatism and chest troubles. One of the most curious of the exhibits was a sheep's heart, pierced with pins and nails to break the spell of a black witch. It was prepared by an old woman who practised witchcraft in London as late as 1905.

WHAT REAL COLD IS

Arctic Regions where Thermometer Registers 80 Degrees

"I can't help smiling," writes Old Tar, "when I hear people groaning over the cold. I wonder what they would have thought if they had been with me in the Arctic regions fifty-seven years ago, when for days I trudged over the ice-fields, with a gale blowing and the thermometer marking eighty degrees of frost. One day one of my companions foolishly left off his mittens; his hands froze; and when he plunged one of them into a basin of warm water the intense cold of the hand froze the water solid. Often my beard and moustache were a solid mass of ice; and once, when I foolishly put my tongue out, it instantly froze fast to my lips, and part of it was torn away in releasing it. That's cold if you like!"



INDIANS WERE FIRST

Maple Sugar First Made by the Indians

The Indians were the first makers of maple sugar. Indeed, before the white man came, bringing the sugar-cane and the honey-bee, this was the richest sweet the red man knew. He came, too, when the poor Indian had just gone through his hungry time, the scanty fare, or perhaps the starvation of the cold and cruel winter. The Iroquois used to hold a public festival every spring to celebrate the tapping of the maples. "It consists," says a government report, written thirty years ago, "of a war dance which will, it is hoped, bring on warmer weather and cause the sap to flow. At the close of the sugar season, follows the maple-sugar festival, the songs of which are all connected with the new-made delicacy. This festival, in which a number of dances are introduced, lasts but one day."—Canadian Forestry Journal.

NO MORE NERVOUS HEADACHES

Since She Tried "FRUIT-A-TIVES", The Famous Fruit Medicine.

MISS ANNIE WARD

112 Hazen St., St. John, N.B.

"It is with pleasure that I write to tell you of the great benefit I received from the use of your medicine, *'Fruit-a-tives'*. I was a great sufferer for many years from *Nervous Headaches and Constipation*. I tried everything, consulted doctors; but nothing seemed to help me until I tried 'Fruit-a-tives'.

After I had taken several boxes, I was completely relieved of these troubles and have been unusually well ever since."

Miss ANNIE WARD.

'Fruit-a-tives' is fresh fruit juices, concentrated and increased in strength, combined with finest tonics, and is a positive and reliable remedy for Headaches and Constipation.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or Fruit-a-tives Limited, Ottawa.

GREENOCK COUNCIL

Knox's Hotel, Pinkerton
Feb 4, 1918

Greenock Council met as per adjournment, all the members present, the reeve in the chair.

Minutes of last meeting were read and adopted.

The following accounts were presented for payment:

A Pinkerton, 10 messages on telephone $1 25
T H Purdy, registering 45 births, 10 marriages, 38 deaths 16 00
Fred Young, contract 78 yds gravel at 25c, less half inspection, at 30 32 72
A McFarlane, inspecting Young contract, 5 days at $2 ..... 10 00
Jos Lippert, 77 yards gravel, per Young contract 7 70
Alex McRae, 2½ days work grading $5, board of man and team $2 7 00
G Alexander, half contract 1 Brant 437½ yds gravel at 95c, less half inspection 199 06
Jas Watson, ½ inspection of Alexander contract, 14 days at $2..... 17 50
J Rathwell, ½ of 437½ yds gravel at 85 A R Knox, room for Council meeting 2 00

Gilchrist—Sawyer—That the foregoing accounts be paid, and that the Reeve and Treasurer be instructed to sign checks for same.—Carried.

Simson—Gilchrist—That the Auditors' Report be adopted, and that the Auditors be paid.—Carried.

Checks for above were issued to Thos Hanson $3 60, J D McKinnon $8 80.

Applications for the office of Assessor were received as follows: Jas J Petteplace, J J Cassidy, and Robt Hetsler.

Gilchrist—Sawyer—That Robt Hetsler be appointed Assessor, and that the Clerk draft a by-law confirming the same.—Carried.

Application of Arch McKinnon for Collector of Rates was read.

Gilchrist—Sawyer—That A McKinnon be appointed Collector of Rates, and that the Clerk draft a By-Law confirming appointment.—Carried.

By-laws were drafted and duly passed appointing an Assessor and Collector for the current year.

Tenders were received as follows for Township printing: Wiarton Telescope $195, Teeswater News $175, Bruce Herald and Times $180.

Sawyer—Campbell—That the tender of the Bruce Herald and Times be accepted at $180.—Carried.

Campbell—Sawyer—That this Council do now adjourn to meet at Chepstow on Monday, March 11th, for general business and to appoint pathmasters, poundkeepers and fenceviewers.—Carried.

THOS H PURDY, Clerk.

ELDERSLIE COUNCIL

Gillies Hill, Feb 4, 1918

Council met as above date, all the members being present.

A certificate was received from the Dep Registrar-General showing that in 1917 the clerk had registered 32 births, 11 marriages and 25 deaths.—$2 to all.

Mr S K Ewart interviewed the council in the interests of the Chesley Agricultural Society. On motion of Messrs Allen and Clement, the usual grant of $25 was made to Chesley and Paisley Agricultural Societies.

Clement—Oswald—That each organized patriotic society within the limits of the municipality be granted the sum of $25, and each union society the sum of $15.—Carried.

Allen—Fraser—That orders be issued for the following accounts.—Carried.

R C Pearce, registration fees for 1917, $14 20; Jas Thomson, 81 yds gravel per T F Pearce, $8 10; T P Powell, bonus on 60 rods wire fence, $6; D A McIntyre, services as auditor, $8; W T Thompson, services as auditor, $8.

Oswald—Clement—That this board do now adjourn to meet again the first Monday in March at 10 o'clock p.m to appoint pathmasters, poundkeepers, fenceviewers, and for general business.—Carried.

R C PEARCE, Clerk

—"Advertising is the education of the public as to what you are, where you are, and what you have to offer in the way of skill, talent and commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service." Elbert Hubbard.

A Successful Failure

On the Farm, Work Had Never Been So Wearisome As It Was At Benemaker's Stationery Counter

By Nelly I. Clarke

"You couldn't marry a farmer, Laura?"

The girl's lips set themselves in a hard line.

"Yes," she said doggedly. "I could." "But—" he hesitated, "you couldn't—and be happy?"

"No."

"I'm sorry you've decided this way."

"I've always wanted to go to work in the city, Tom. Father promised I could go when I had passed the Entrance. Then that year mother was ill and I had to stay here. I'm going now."

Her face softened into tenderness as she spoke of her dead mother. "It's lonesome here now," she went on. "I can't stand it here any longer."

A week later, standing in the long line-up of girls, outside the office of the General Superintendent at Benemaker's department store, she remembered her reply.

Her feet ached with an hour of standing. A seat near the blanket counter beckoned invitingly to her but the seat was not in the waiting line and if she stepped out of the line she would lose her place and have to work up again. The line-up ahead was long; back of her it was longer still.

A girl emerged from the superintendent's office with an application blank and retreated to a chair where she wrote painstakingly. The four girls next ushered into the superintendent's office consumed not more than four minutes of his time and came out empty handed. Then came a woman of perhaps forty. She too, carried a blank sheet in her hand as she left the office. Her suit, Laura observed, was old and worn.

Busily watching those ahead of her, Laura presently found herself face to face with the superintendent. The one year she had clerked in the little store at home gave her some prestige and though she too emerged with the blank to be filled, the superintendent had not given her definite encouragement.

There were other places. In her handbag she carried a clipping which stated that the manager of a certain office would interview applicants at eleven o'clock. Thither she hastened, walking to save her nickel. She arrived at twenty minutes of eleven. Five other girls were ahead of her.

The glances of the five were condensed into a formidable look that was hurled straight at Laura who, thus rendered self-conscious, sat down upon the end of the waiting bench.

"I suppose," she said with an attempt to speak friendly, "that we're all here on the same mission so we might as w—l get acquainted to shorten time. I've been on my feet all morning and I'm glad to sit down."

The girl next her relaxed and smiled. She had been working for four dollars a week she said but she lived at home and did not have to pay for room or board. Four dollars a week bought most of her clothes, at least.

"But you can't live on four dollars a week, you know!" she informed Laura.

The girls kept on coming. Laura counted the twelfth and then watched the unlucky thirteenth. When Miss Thirteen came she was a rosy-cheeked little thing—real roses, those were. Her hair was prettily fluffy and her eyes were bright. She did not look at all unlucky. The manager summoned the girls one at a time into his office.

A few moments later the manager's private secretary came out and announced the third girl interviewed had been retained and the rest were dismissed. Laura walked downstairs at the side of the girl who had been working for four dollars a week. At the corner the girl stopped.

"I turn here. I'm going to hunt for something else. Good luck to you and remember, if you don't live at home that you can't take anything less than eight dollars a week and get away with it. And say, try to get them to make it ten! You'll really need it."

Suddenly a wave of lonesome feeling swept over Laura. She went to the room that she was renting at three dollars a week and wrote to Tom. Tom would be looking for a letter and perhaps if she did not write, he might look her up. She told herself with sophisticated philosophy that you never can tell what a man will do.

The letter mailed, she bought another paper and turned to the want-ad page. Finding a promising advertisement she hurried out, again. She found a hearty, surly man who was indisputably the "boss," a surly clerk and a surly stenographer. The stenographer had just been given notice and there was flight in her eyes. But as the place was, it was better than job hunting.

While she waited, a girl of the fluffy, ruffly, gum-chewing sort came in. Laura glanced at the long-curly head, and that her own hair was brushed smooth. Someone had told her that office-managers like sleek-haired girls. The fluffy, ruffly one, however, brought a personal letter of recommendation from an important person. In consequence, she of the fluffy hair and ruffly blouse was given the place. Laura regretted for the first time her own smooth hair.

The manager had asked her to come back to Benemaker's early next morning. She went but again a long line was ahead of her. Two girl clerks stood near by, waiting to see the "boss." One was relating her troubles.

"I missed just a half day Friday," she was saying crossly, "and she called it a day, the old hag! I can prove that I came after lunch. I was sick in the morning."

"Trouble, honey?" the other answered with sweet sarcasm. "Oh, never mind! One old dame took all morning of my time and never a sale."

One young man in the line reminded her of Tom. She had not forgotten her promise that she would marry him if she failed.

She was put to work at the stationery counter.

She knew nothing of stationery but she could read prices. To do that, she thought, and look pleasant, was about all there was to selling stationery. After the first day or so, looking pleasant was not easy. She was not used to standing all day. Even on the farm, work had never been so wearisome as this.

The others told her that it would be hard at first. They were used to it now. On the evening of the second day she was growing a little more accustomed to the work but it was difficult to appear as gay as the other girls near her counter. Every night they went to a dance or a movie while she returned to her three-dollar room, to take off her shoes and bathe her tired feet in hot water carried up two flights of stairs.

Gradually she learned more of her work. At the end of the month she received a small rise in pay. It was some encouragement and she stayed. Meantime, she wrote regularly every week to Tom. In her letters she said as little as possible about her work. It had not been as she had thought it would be.

She continued to bathe her tired feet at night in a basin of water brought up from the first floor and to eat meals much unlike those cooked on the farm where one never stops to wonder whether the milk really came from a cow and whether the eggs were really laid by a fowl or made in a factory.

In another month she earned a second small rise. The Christmas rush was approaching. That meant harder work and longer hours. Every night, along toward Christmas, the tall blonde was so tired she could just drag herself to put the embroideries back into place, and the small brunette lagged wearily as she rolled up yards and yards of colored ribbons. The other girls grew to look so wan and pale that Laura hardly dared look at herself in the little ten by twelve mirror that hung above her washstand in the three-dollar-per room, for she had heard that a country girl fades more than a city girl when she is suddenly put on heavy work and light diet.

Then, just before Christmas, Tom came.

Laura knew that he was coming. His train would arrive about eight and that night he would come down to the shop and walk home with her. It was Saturday night and she must work until nine that night.

Just before nine o'clock when she was straightening her piles of stationery, or which the Christmas shoppers had made havoc, she looked up to see Tom four aisles away, talking to the third floorwalker, a pleasant genial fellow. Then the clock struck nine, the doors closed and the girls turned away to get their wraps. At the outer door, Tom, directed by the third floorwalker, stood waiting.

Laura had never guessed just how glad she would be to see someone from home. When they were outside and Tom placed her hand in his arm, it was just as if she had not been away at all.

"Let's walk!" Laura said eagerly when again they were outside in the cold bracing air. "I love to walk across the bridge at night. The water is so quiet 'way down below that it rests me. It's only six blocks and the cars are so crowded and stuffy."

She smiled reassuringly at Tom, who looked as if he had lost his only hope. The third floorwalker had given him a glowing description of her success. Tom felt that he had lost. She had not said that she would come back to him unless she were a failure.

They stopped and looked down into the water. It was quiet place, Tom thought, to tell her what he knew.

"The floorwalker"—Tom tried to speak lightly—"says you have made good."

Laura said nothing. She had not known before that she was successful. Was that making good? Standing back of a counter selling stationery all day, going home at night to soak your tired feet in hot water, getting up and going on the next day and the next and for endless days—was that success?

"It's all a lie, Tom!" she burst out. "I haven't made good! I—I'm a failure, after all! You know, Tom dear, failure's on the inside. Why, down inside, I'm a failure. One kind of failure is where you try and fail down on your job. Another kind is where you make good but are miserable all the time you're doing it. That's the worst kind of failure and that's the kind I am. I—I don't love my work, Tom—I hate it!"

Tom took her in his arms.

"God bless my failure!" he said earnestly. "We're going home tomorrow."

Shown Up.

Ignorance, says Dr. John Grier Hibben, is quick to betray itself. A young woman met a young man in a library, and in the course of their conversation the man remarked that he was a great reader.

"I am reading Shakespeare now," said the girl. "Did you ever read Romeo and Juliet?"

"I've read Romeo," said the young man.

Feed to produce one dozen eggs costs 10c. with pullets, 14c. with two-year-old hens and 19c. with three-year-old hens in a three-year feeding test recently reported by the United States Department of Agriculture.

WHAT'S WRONG IN THE HOME?

"Well, Mother," cheerfully began Mr. Benton, "what do you want for your birthday?"

"Nothing at all!" Mother answer d defiantly.

"Why, Mother!" faltered Ruth. "What's the matter? You're not sick, are you?"

"Yes," she answered, "sick of having new things come into the house when all the time it is the old things that should have attention. I tell you, these little annoyances are getting on my nerves and I can't enjoy my home at all for worrying about all the things that need attention. The kitchen faucet leaks. The dining-room window rattles until it nearly drives me distracted. The window-blind in my bedroom refuses to go up more than half way and the bottom board on the stairway creaks loud enough to wake anyone from a sound sleep."

"No wonder you are nervous," comforted Father. "They are startling. I never thought of them collectively before. Make out a list of the little things all over, the house which need attention and the children and I will give you a shower of 'annoyance removers' for your birthday. How's that?"

"I'll begin at once!" exclaimed Mrs. Benton, determined to grasp the opportunity. "I never felt that we can afford to have an expert come out here and attend to these little things and you never have time."

"I'll take a day from the plowing," promised her husband.

Mrs. Benton immediately started on a tour of the house, trying to view it through the critical eyes of a stranger. The eyes can usually endure more than the ear so she listened carefully for disturbing sounds as well.

A squeaky hinge of the swinging door in the dining-room caught her attention as she passed through it. Down went a memorandum. The wind was blowing and the offending window in the same room began its rat-tat-tat. "Never mind, you're doomed," promised Mrs. Benton as she wrote, "West dining-room window rattles."

The bathroom door stuck at the bottom and the window had to be propped up because the rope holding its iron weight had broken. One hinge was missing from the kitchen cupboard door and the spring on the back screen was weak so that the door could not shut quickly enough to keep flies out. The offending board on the stairway and a board on the back steps, which needed additional nails were noted.

The kitchen stool had a habit of losing one leg at unexpected times. The iron grate in the kitchen range had to be handled carefully lest it fall into the ash pan.

At last the list was complete. Though much longer than she had expected, Mrs. Benton viewed it with satisfaction. What a joy it was to know that all these petty annoyances were to be wiped out in one day!

What is wrong in your home? If the items were counted, the sum total would doubtless astonish you. Induce the handy man of the house to set a certain time to attend to all these little repairs; or be your own "handy man." You will be surprised and delighted to see how much can be accomplished by determination plus glue, nails, string and a few simple tools. Try it.

WAR MENUS TO SAVE WHEAT, BEEF AND BACON.

Breakfast. — Buckwheat griddle cakes, syrup, toast, tea or coffee.

Dinner.—Boston roast, corn bread, apple sauce, tea.

Supper.—Potato soup, oatmeal muffins, apple sauce, tea.

The recipe for Boston Roast, mentioned above, is as follows:—

Boston Roast.—2 cups dry kidney beans, 1 cup bread crumbs, 2 cups grated cheese, 3 teaspoons salt, ½ cup liquid, 1 tablespoon chopped onion. Soak beans 24 hours. Cook in salted water until soft. Drain, put through food chopper, add onion, cheese, crumbs, more salt if needed enough of the water in which beans were cooked (about ½ cup to moisten). Form into loaf, bake in moderate oven for 40 minutes. Baste occasionally with hot water and fat.

Breakfast.—Oatmeal porridge, baked apples, brown bread toast, tea or coffee.

Dinner.—Fish pie, mashed potatoes, boiled carrots, cup pudding.

Supper.—Cream of celery soup, war bread, cottage cheese, tea biscuits, syrup, tea.

The recipes for Fish Pie and Cup Pudding, mentioned above, are as follows:—

Fish Pie.—2 cups flaked fish, 1 cup seasoned white sauce. Mix the flaked fish with the white sauce, put into a greased baker, cover the top with buttered bread crumbs, and cook in the oven until the crumbs are brown.

Cup Pudding.—Put into each greased cup 1 tablespoon of jam. Cover to one-half the cup with a batter made as follows:—2 tablespoons of butter, ¼ cup of sugar, 1 egg, 1 cup milk, 2½ cups flour, 4 teaspoons baking powder. Cream the butter, add sugar gradually, and egg well beaten; mix and sift flour, baking powder, and salt; and alternately with milk to first mixture. After turning into cups, put in the oven and bake.

Breakfast. — Cornmeal porridge, toast, pear jam, tea or coffee.

Dinner.—Fried haddock, mashed potatoes, creamed onions, emergency biscuits, honey.

Supper.—Pea soup, baked potatoes, brown bread, rhubarb jam, tea.

The recipes for Pea Soup and Emergency Biscuits, mentioned above, are as follows:—

Pea Soup.—Cover a shin bone with cold water, and bring to a boil. Boil gently for the whole of two hours. Then add one cup of peas brose, pepper and salt to taste, and a very little grated onion. Boil for half an hour longer strain and serve.

Emergency Biscuits.—1 cup white flour, 1 cup graham flour, ½ teaspoon salt, 2 tablespoons butter substitute, 5 teaspoons baking powder. Milk to moisten into a dough a little too soft to roll. Drop by spoonfuls onto a greased pan, and bake in a hot oven.

Breakfast.— Buckwheat griddle cakes, syrup, corn bread, coffee.

Dinner.—Baked beans, brown bread, baked potato.

Supper.—Scalloped tomato, bread, stewed prunes, tea.

The recipes for Baked Beans, Brown Bread and Barley Bread, mentioned above, are as follows:—

Brown Bread.—2 cups graham flour, 1 cup white flour, ¾ cup molasses, 2¾ cups sweet milk, ¾ teaspoons soda, 1¼ teaspoons salt. Sift the flour, salt and soda. Add the molasses and the milk. Pour into well greased moulds and steam about three hours.

Barley Bread.—1 2-3 cups wheat flour, 2 1-3 cups barley flour, 2 cups milk and water, or water, 1 cake compressed yeast, 2 tablespoons sugar, 2 tablespoons fat, 2 teaspoons salt. Soften the yeast in part of the liquid. Combine all the ingredients, and mix into a dough. Knead and let rise to double its bulk. Knead again. Put into the pan, and when double in bulk bake about ¾ of an hour. This recipe makes two loaves.

Baked Beans.—Pick over the beans, cover with cold water and soak over night. In morning, drain, cover with fresh water, heat slowly (keeping water below boiling-point), and cook until skins burst. Drain beans, throwing out the water. Put into a bean pot a few pieces of salt pork; cut into cubes. Cover with the beans, and add 1 tablespoon of salt, 1 tablespoon of molasses, 2 tablespoons of sugar. For every quart of dry beans used, add 1 cup of boiling water, and as they cook add more boiling water to cover. Cover the bean pot, put it in the oven and bake slowly six or eight hours, or cook in a fireless cooker. Some prefer to add a little mustard.

Food Control Corner

Standard Flour and Standard Bread For Canada.

Announcement is made from the Office of the Food Controller that a date would soon be named after which Canadian mills will not be permitted to use more than 266 pounds of spring wheat or more than 275 pounds of winter wheat to produce 196 pounds of flour. This will give standard grades of spring wheat and winter wheat flour for all Canada and no mill will be allowed to manufacture flour of a lower extraction than the standard. By making available a larger part of the wheat berry for human consumption and by stopping the manufacture of patent flour, a considerable saving of wheat for export to the Allied nations will be effected. Moreover a uniform extraction will be established which may be increased if considered advisable.

The Food Controller is also making arrangements for a standard loaf of bread from the standard flour. He has written to millers, wholesale flour dealers, wholesale grocers, retail flour dealers and retail grocers, emphasizing the necessity of discouraging hoarding of flour. It is pointed out that the new regulations will not lessen the quantity available for consumption in the Dominion.

Millers are asked not to sell more than the usual quantities of flour to bakers and wholesale dealers and to advise their customers not to stock heavily with regular grades of flour. Wholesale dealers are asked not to allow retail dealers to stock heavily with regular grades of flour and retail dealers are asked not to sell more than one week's flour to families, except in cases where it is impossible for the customer to secure supplies weekly. Millers are also requested not to require dealers to take certain quantities of flour when purchasing other products of the mill.

Mr. Hanna states that it should be distinctly understood that "millers, wholesalers and retailers who do not accede to these requests will be promptly dealt with and the shipment of flour by or to these persons will be prohibited."

The letter adds that a date will be set after which bakers will be required to sell their bread based on the price of the standard flour. Therefore, bakers who purchase large stocks of patent flour may find themselves in an unfortunate position when the Order is issued for the production of bread from standard flour.

The standard flour will be of high quality and will be quite as palatable as the patents and even more conducive to health. Samples of the standard spring and winter wheat flours will be furnished and all mills will be required to produce a quality of flour which will not be superior in color to the standard samples. Every mill must furnish to the Food Controller's Office every two weeks a statement showing the quantity of wheat ground and the weight of flour produced therefrom. Failure on the part of any of the mills to comply with the Food Controller's regulations may result in cancellation of license.

One hundred and sixty-seven Canadian flour mills are already under license from the Food Controller's Office. All the remaining mills will be similarly licensed. The profits of the licensed mills have been limited to a maximum average of twenty-five cents on the milling of enough wheat to make a barrel of flour (196 lbs.).

THE RATE OF TREE GROWTH.

How Fast Does a Forest Rebuild Itself?

The rate of growth of trees in the forest is usually exaggerated greatly.

Dr. C. D. Howe, who during the past summer made a study of the reproduction and growth of the pulpwood species after logging, in the St. Maurice Valley, Quebec, on behalf of the Commission of Conservation, produces the following conclusions:

Over 2,000 trees were analyzed to determine their rate of growth in diameter, height and volume. While the results of this study have not yet been tabulated, they have gone far enough to justify the statement that within the forest type under consideration, it takes about 40 years for the little spruce trees to acquire a diameter of one inch; 100 years to make a six-inch tree, and 150 years to reach the minimum diameter limit of 12 inches established by the cutting regulations in Quebec, for white and black spruce. Balsam grows somewhat faster. A one-inch tree is made in about 16 years, and it takes in the neighborhood of 70 years to reach the Quebec diameter limit of seven inches at two feet from the ground.

THE SAFE WAR.

Percentage of Killed is Far Less Than In Battles of Old.

Despite the number of deaths in modern battles, the percentage of killed is far less than in the battles of old. In the 1917 spring drive of the French army 15,000 men were killed out of approximately 200,000 engaged. Compare this figure (one of the bloodiest on the allies' side) with some statistics from ancient and medieval battles.

At Cannæ 40,000 Romans out of 80,000 were killed; at Hastings the Normans, though the victors, lost 10,000 out of 60,000, and at Cressy 12,000 Frenchmen out of 100,000 were, it is asserted, killed, without reckoning the wounded.

When the flintlock reigned the average proportion of killed and wounded in ten battles, beginning with Zorndorff in 1758 and ending with Waterloo, was from one-fourth to one-fifth of the troops present on both sides. The heaviest loss was at Zorndorff, where 32,916 out of 82,000 were killed or wounded. It was also very heavy at Eylau, being 55,000 out of 160,000 men.

In the campaign in Italy in 1859 rifles were used on both sides, and the proportion of casualties to combatants was at Magenta and Solferino one-eleventh. In the Franco-Prussian war, when both sides were armed with breech-loading rifles, the average proportion of killed and wounded at Worth, Spicheren, Mars-la-Tour, Gravelotte and Sedan was one-ninth, the heaviest loss being at Mars-le-Tours, where it was one-sixth, and the smallest at Sedan where it was one-twelfth.

WOUND STATISTICS.

Showing the Percentage of Mortal Injuries on Battlefields.

Statistics of men wounded in trench warfare have just been published for the period between January, 1916, and June, 1916. Seven and eighty-seven hundredths per cent. of wounded men die on the battlefield. Ten and sixteen-hundredths per cent. die later from their injuries or 18.03 succumb, a proportion far less than the 25 per cent. estimated mortality which surgeons drew up when the war began.

Artillery causes 51.71 per cent. of wounds, rifles and revolvers 39.16 per cent., bayonets 0.59 and gas 5.61. Bombs, which have supplanted bayonet work so largely, are classed with artillery.

Percentages for wounds in the head and neck are 21.02, for the trunk they are 21.63, while wounds in the extremities stand at 56.4 per cent.

Twenty-three and sixty-two hundredths per cent. of the wounds are classed as serious, 63.01 as medium and 13.07 as so slight that the victims can return to the lines immediately.

Keep sharp grit, charcoal and green feed before the hen always.

NOW there IS just one WALKER HOUSE In ONE TOWN where I may,

And, say, you ought to see me grin When my trip heads that way.

The only other time I was so happy, Goodness knows,

Was when a kid Dad bought me Red topped boots with copper toes.

When other travellers hit that town,

They, too, don't want to roam.

For they say, "At that WALKER HOUSE

It's just like staying home."

Where is the ONE TOWN where that WALKER HOUSE is? Don't you know?

Why, it's that good old burg spelled T-O-R-O-N-T-O.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Growing Onions and Lettuce.

To get the finest results with green onions, starting this year you should use a good quality of white onion sets. These are not expensive. The best ones have very short tips, and the bulbs are firm and unwrinkled. Avoid those with long sprouts and the bulbs of which are withered and spent.

The soil should be very rich, loose, and with a sandy base. They do not do so well in a stiff limestone-clay soil.

It will pay you to give the onion bed special treatment as to working before it is planted. Dig, chop and rake the soil to the limit, and when in good condition dig under a heavy dressing of rich well-rotted stable manure. Make the top of the bed as fine as for seeds, ready to plant as soon as the soil dries out somewhat, as it should be drier for onion sets than for seed sowing.

The usual way, in ordinary soil, is to set them about three inches apart. This is not necessary when the soil is rich and porous. As the onions will be picked before the bulbs get more than three-quarters of an inch in diameter you can set them with only an inch space between them—and get good results.

A common practice is to make a shallow trench with the hoe or rake, in which process the bottom thereof is more or less compacted, making a solid mass of soil under the small onion-set. This makes it difficult for the fine roots of the onion, when they commence to forage for food and moisture, to penetrate this soil. In many cases the result is that the set is slightly lifted upward, checking its growth, and making a poor onion, of doubtful quality.

This can be overcome by planting them so that the soil under them is not compacted. Mark off the rows with the straight edge or use the garden-line. With an old spoon or the point of a bread knife, lift out enough soil to admit of the onion-set, insert the set, pour the soil around it, and firm the soil slightly around it. DO NOT PRESS ON THE ONION-SET WHILE PLANTING IT. This method is very simple, rapid and effective. It is based on the necessity for quick growth and good green onions.

Shallow Working Required

In order to facilitate growth quickly, onions when grown for eating green should be well and frequently worked. Only shallow working is required, and when planted intensively in the home garden this can best be done with the hand-weeder, working around the rows to keep down the weeds and a crust from forming on the soil, as well as a dust mulch over the top to prevent evaporation of moisture from the soil. When to be used green it is well to plant onion-set deeper than if intended to mature into full-grown onions. This will result in longer white stems, which is the edible portion; the more of this the more food value they have. If the sets have not sprouted when set out, plant them an inch below the tops of the bulbs.

Soil For Lettuce

As lettuce should be a quickly grown crop, it should have a light, rich, warm soil, well filled with humus. This latter quality can hardly be over-emphasized. The best lettuce grown in this country comes from the muck farms, which are almost pure humus. This condition of soil applies to most of the succulent crops.

Lettuce is of two general kinds—the "loose head," or "cutting," which does not make tight heads, and the head lettuce. Each of these kinds has its appropriate place and season in the home garden. The former is planted directly into the garden beds for immediate use as soon as large enough, while the head lettuce is sown in the seed bed to be transplanted later on, separately, in rows for heading-up.

Two Ways in Cutting Lettuce

There are two ways in which the cutting lettuce is generally handled. One is to sow it very thickly, and when it gets to be four inches high, cut it off just above the crowns for using as "snip" lettuce, allowing it to grow again large enough for several more cuttings. This is a wasteful and not very satisfactory way.

A better way is to sow the seeds thinly in drills six inches apart in a warm, well-drained location, dropping the seed from the hand so that they will be about three to the inch. When the plants get to be four inches high, remove every other one and repeat this process as they grow larger. This should insure good, tender lettuce as long as there is any to pick.

Make the top of the soil very fine and mellow for sowing the cutting lettuce. The drills can best be made by the straight-edge and should not be over half an inch deep. Cover the seeds by smoothing with the straight-edge across the drills and press down firmly along the rows.

As moisture is necessary to germinate, do not allow the lettuce bed to dry out until the young plants have come through the soil. However, the watering must be done in such a way as not to invite disaster. Early in the morning of a sunny day is the best time, and it should be done with the fine nozzle of a hose, pointed into the air, or a fine-nozzled watering pot. Usually after the lettuce plants get to a height of an inch at this season of the year they will get enough rain to keep them going—but be sure of it.

Top-Notch Strawberries.

"Nothing succeeds like success" holds true in the growing of strawberries that will sell themselves, says a successful farmer. I have demonstrated to my own satisfaction that after one has grown a plot of strawberries which causes passers-by to stop and wonder how such a crop can be grown, he never needs lack for customers for any subsequent crops so long as he keeps his fruit up to a high standard in quality and appearance and plays fair in selling.

I consider it a shameful neglect that so many farmers and suburban dwellers fail to grow a family supply of high-quality strawberries—the task is so small compared to the satisfaction that this appetizing product furnishes.

For a supply sufficient for a good-sized family and some to sell to local customers, my choice is the "hill system." Here is how I handle my plot of 12 rows, 60 feet long, rowed 30 inches apart, plants set 18 inches between hills:

After setting the plants in May in well-prepared soil, made very rich, I give them intensive and practically level cultivation until fall. No runners are allowed to take root, they being regularly clipped off. A piece of sheet steel, about six inches wide, formed into a hoop about 14 or 15 inches in diameter, and to which is fastened an upright handle, furnishes an excellent tool to clip the runners rapidly. The bottom edge of the hoop is made a little larger than the top, to prevent the soil from sticking in the hoop. The bottom edge of the hoop is also kept filed to a sharp cutting edge. Handled as described, the plants get to be giants in development and vigor, and in the spring following they send out an astonishing number of fruit-bearing stems. Then, if an abundance of plant food is present and conditions are right, the yield is a large quantity of high-quality berries.

I find winter protection has much to do with successful strawberry-raising. I cover my entire berry plot with straw to the depth of about three inches after it settles. In the spring, when the growth commences, I remove most of the straw directly over each hill, and leave the rest undisturbed to act as a mulch to retain moisture and prevent weed growth; also, the heavy clusters of berries rest on the straw, and are kept from the dirt and grit that otherwise injuries the appearance and quality of the fruit.

My little plot of not over one twentieth of an acre yields us from 12 to 15 bushels of fancy berries in an average season, and half of the crop sold to customers who come after them more than pays for all labor and cost of growing them. My recommendation is to get into the strawberry-growing game next spring without fail.

Whole Wheat Crumpets.

Scald one pint of milk and add two tablespoonfuls of oleomargarine and one teaspoonful each of salt and sugar. When it has become lukewarm, add half a cake of compressed yeast dissolved in a few spoonsful of tepid water. Stir in about one and a quarter cupsful of whole wheat flour and one cupful of wheat flour, or enough of the blended flours to make a good drop batter, then cover well and set to rise over night. In the morning stir it down, beat vigorously and pour into hot greased muffin rings that have been set on a hot greased griddle. Fill the rings half full of the batter. It will rise to the top and bake slowly. Cool and toast on both sides, then spread with butter.

A kitchen in good repair inspires the cook to keep it neat.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed questions of general interest it will be answered personally, if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnoses. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Bronchitis.

Bronchitis mean inflammation of the mucous membrane which lines the bronchial tubes.

These are air tubes beginning like the branches of a tree at the end of the windpipe, getting smaller and smaller as they ramify, and ending in the balloon-like air vesicles in which the blood is relieved, in exhalation, of its carbonic acid and which absorb from the inhaled air its oxygen.

In pneumonia the bronchial tubes may be involved, but the trouble is essentially in the tissues in which the tubes are imbedded.

Anybody can have bronchitis, from an infant in arms to a centenarian; the chief sufferers are those who lack good resisting power.

When the large tubes only are involved the condition is not usually very serious, it is worse when the middle sized tubes are attacked and if the disease attacks the fine capillary tubes it is very apt to have a fatal issue.

Infants and young children are frequently victims of capillary bronchitis. The inflamed mucous membrane becomes swollen and obstructs the entrance and egress of air in this disease and in the fine tubes the passage is almost obliterated. It also secretes more material than it does in health and this secretion in the mild cases is plain mucous, in the cases which are severe and in which decomposition takes place it is purulent, and in those in which gangrene of the tissues occurs it is fetid and offensive.

Cough, expectoration and difficult breathing are therefore the characteristic symptoms of bronchitis.

The acute form of the disease lasts from a few days to a few weeks, the chronic for months or years, getting better and worse, being especially troublesome in winter.

The cough is worse in the morning after the secretions have accumulated during the night.

The disease is due to inhalation through the nose or mouth of some kind of irritant, either dust, gas or infectious germs. Hence the need of respirators in mining, laboratory work, fighting Germans, etc., and the importance of destroying the over-present germs in the nose and mouth by routine spraying or irrigation with antiseptics like carbolic or boric acid menthol or eucalyptol.

Those who live in bad hygienic conditions, those whose habits are bad, and those who are physically weak from any cause, may get bronchitis.

It may be tuberculous in character, hence that must be determined.

In order to prevent it, breathe deeply, sleep and live and work in well ventilated rooms and keep the body protected with warm clothing.

Keep the bowels open, use hot drinks to promote perspiration, a hot poultice on the chest to facilitate breathing, and a hot water bag at the feet.

A suitable dose of quinine at the beginning of an attack may arrest it. Let the food be abundant, but simple and depend more upon nature for relief, than upon drugs, if you can.

QUESTIONS AND ANSWERS.

M. G. S.—1. Should one who has had a stone removed from the kidney drink only boiled water? 2. Is a tripoli stone water filter advisable? 3. Will it remove lime from the water?

Answer—1. That would, of course, be the safest plan, but with reasonable care, I do not think it essential. 2. It is well thought-of by some with whom I am acquainted. 3. Not that which is in solution, but that which is precipitated.

CO-OPERATION IN CUTTING ICE

By Earl W. Gage.

We have a splendid system of team-work in ice harvest down this way. One farmer helps the other, and all have plenty of ice and do not feel the labor shortage or the "high cost of ice."

But a few tools are needed to cut the ice. A steel scraper is useful; some types of small road scrapers may be used for this, or a very good home-made scraper may be fashioned of wood and faced with a strip of steel, such as the back of an old cross-cut saw. An ice plow is almost essential if any quantity of ice is to be harvested, though for small jobs it is not necessary. This aids in removing the porous surface ice and simplifies cutting into block. Half a dozen ice rikes poles, bearing vertical points and horizontal hooks, are necessary in floating the ice to the loading platform. An ice saw may be useful or an ordinary cross-cut, one handle removed, may be substituted.

Dividing the Work.

Three squads of men have been found best in this section, each with as team. The first squad removes the snow or spongy ice from the surface of the field and plows, saws and cuts the ice into blocks of a size most convenient to handle and for the purpose for which the ice is intended. Larger cakes are best if they can be used, since the waste will not be as great. If the ice is more than twelve inches thick blocks two feet square on the surface are more convenient to handle; if it is thinner than a foot thick three feet square can be packed well.

The second squad of the community co-operative ice party cuts loose the blocks and floats them to the side of the open water, where they are ready to be loaded on sleighs. Here a tramway with a pair of ice hooks attached to a rope will make loading a relatively easy matter. Let the rope extend across the sled-box from the tramway; hitch one horse to it and drag the blocks from the water to be loaded. This saves heavy lifting and keeps the men from becoming unnecessarily wet. Ordinary ice tongs may be attached to the cakes.

The third gang of men work in the ice-house. They place each load into position in the house, pack sawdust as rapidly as the ice is delivered. Eight men and three teams can work most rapidly in harvesting a crop of ice by this method.

January and February are the best months for the ice harvest, although in this section some very good ice, the best of the season, was put in during March. It is best to start cutting ice the afternoon before storing it, so that a good supply will be on hand to complete storing in one day with two teams hauling to the ice house. In case the weather is clear when beginning to cut, it is best to leave the cakes in the water until evening, when they should be drawn out to prevent freezing in, and to permit the water to freeze again.

Packing the Ice

In conveying the ice from the sled to the house two chutes may be used to advantage; one about twelve feet long for low work and another about twenty feet long to be used above eight or nine-foot doors. The smaller chute may be made of two-by-four's for sides, with one-inch stuff nailed lengthwise of the chute. The long chute had better be made of two-by-six for the sides, with cross braces nailed about every four feet. Make the chutes strong to prevent breaking and injuring the workmen. Fasten with a two-by-four nailed across the top underneath to hold it against the door. Place the other end on the rear of the sled gate so that the ice may be placed on the other end on the rear of the sled gate. It is much easier to handle the ice this way than over the sides of the sled.

The best method is to pull the ice into the house by hand. Use about thirty-five feet of three-quarter-inch rope, the end at the house being hitched to a rafter so it will be handy and not slip. An ice tong should be tied to the other end, and with this arrangement one man can pull up large-sized cakes to a height of twelve feet on a twenty-foot chute. The tongs must be good and sharp to prevent slipping, as handling ice is dangerous work, and light tongs are preferable to heavy ones. It is well to have an assortment of sizes on hand.

Some farmers think it is too expensive to cut ice, yet ice is the only crop we may say truthfully that may be secured on the farm or near it at cost of taking it away. And ice increases the value of farm products many times, and is especially useful in handling milk, cream and fruits, to say nothing of aiding the farm family in supplying their table with delicious ice cream and cool drinks in summer.

The Amount Required

The dairy farmer should put up about 1,000 pounds of ice for each cow, if used to cool cream. For a twenty-cow herd, ten tons of ice will be needed. If whole milk is cooled, considerably more ice will be needed. Under average conditions it will take from two to two and a half tons per cow for milk cooling. As from forty to fifty cubic feet are required for a ton of packed ice, for ten tons 500 cubic feet of space must be filled.

The sides of the ice house should be well insulated to protect the ice from summer heat. Sawdust is good for this purpose. About a foot should be allowed for the two outside walls, which are filled between with sawdust.

When filling the house, keep the top level, and with a light stick tamp a liberal quantity of broken, chipped, and shaved ice into the joints. An adz is handy for shaving and leveling the ice. Square cakes are used in the middle and uneven ones are trimmed for the edge. Good tight joints are necessary. As the ice is laid and swept with a broom plenty of water is thrown over the ice to freeze the cakes into a solid mass.

Caring for the Product

Not more than twelve to fourteen inches should be left between the walls and the ice, the intervening space being filled with sawdust or clover chaff; straw is too loose and will not pack tight enough. Sawdust is preferable to chaff, and both are better than straw. Tar paper tacked on the walls provides further insulation against the heat.

When the ice house has been filled, if the weather continues cold, it is well not to cover the top for two or three days; but before the weather moderates the top should be covered with two feet of sawdust or clover chaff. This covering should be redistributed and packed into the sides about once a month until the house is opened for summer ice.

Ventilation is an important provision in an ice house owing to the presence of warm air which is certain to accumulate on top of the ice. In the newer ice houses it is necessary to place a small ventilator in the center of the roof which carries off this warm air. An opening of this sort will not melt the ice, as an opening in the end would, yet provides space for the warm air to pass out. Cold air is heavier than warm air and because of this fact the cold air which tends to keep the contents of the building from melting, sinks to the floor and from there adjusts itself around the sides of the ice. The warm air, on the other hand, rises to the top and escapes through the ventilator.

Poultry

In every household there is a certain amount of table scraps and kitchen waste which finds its way into the garbage pail.

Poultry is the only class of domestic animals suitable for converting this waste into wholesome food in the form of eggs and poultry meat.

Each hen in her pullet year should produce ten dozen eggs. The average size of the back yard flock is ten hens. Each flock should produce 100 dozen eggs, which at 50 cents a dozen, a fair average price, would be worth $50, and give the family eggs of a quantity and freshness difficult to obtain.

Two-year-old hens had better be sent to the market. They seldom pay for their feed if kept over a third season.

Grit and oyster shell should be included in the ration for both young and old. To neglect this would be poor economy.

Supplement the regular feeds with a wet mash—fed crumbly. Feed all the chickens will clean up before going to roost, but none should be left in the trough for it will sour.

The dust bath should be where the sun will shine on it in order that it may be kept dry and warm as may be. On almost all sunny days, one or more hens will be seen filling their plumage with the soft earth, and that will do much toward keeping down lice and assuring the health of the flock. A high-sided box should be used to prevent the fowls from throwing the dirt out when using the bath. The loam should be changed occasionally so that it will not become filthy.

If potatoes that are to be baked are boiled first in salt water for ten minutes they will bake in considerably less time than is the rule.

The British will soon fix it so that a man can go from Jerusalem to Jericho without falling among thieves. Even honest Turks will not regret the change.

Gunns Shur-Gain Fertilizer

The Dairy

The really big question is how to raise the heifer calves, for old dairymen know upon the treatment accorded these youngsters will depend in no small measure their usefulness when they mature, as dairy cows. A few suggestions culled from the experience of some leading milk producers, may accordingly be helpful

First. The dairy calf should be given its mother's milk for the first ten days, and if it is a weak individual, for at least three or four weeks.

Second. The calf should not be overfed. About two quarts at a feed is sufficient.

Third. Feed three times daily for the first three weeks.

Fourth. The change from whole milk to skim-milk should be made gradually, during a period of ten days. At the same time the number of feeds given daily should be reduced from three to two.

Fifth. Increase gradually the feed allowance until the calf is receiving from four to five quarts per feed.

Sixth. Replace the fat lacking in the swim-milk by feeding such things as ground oats and corn, with a little bran.

Seven. Teach the calf to eat grain by placing dry grain in the bottom of the pail, or directly in its mouth.

Eighth. Food bright, clean hay.

Ninth. Prevent scours by regular feeding, feeding in clean pails, avoiding over-feeding, providing clean, dry stables; allowing plenty of sunlight to enter, and by keeping the manger free from sour feed.

If skim-milk is not available, calf meal can be used. The following homemixed calf meal, first tried by the Purdue Experiment Station, has been found to give good results: Hominy or corn meal, oil meal O. P., blood flour and red dog flour or flour middlings, in equal parts, at the rate of one pound of mixture to one gallon of water. This should be fed like skim-milk, though not in excess of one gallon at a feed.

Most birds eat more than twice their own weight of food every day.

Oil of citronella will restore the color to most shades of tan or brown leather.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES.

Hurray! We're going to the park
And take our supper—what a lark!
But Willie's such an appetite,
I doubt if he can wait till night.

Horse Sense

A good grooming costs no money, and is equal to two quarts of oats.

Keep your horse's feet soft, and have him shod often. More feet are ruined in the stable than on the road.

Humanely destroy the worn-out, incurably lame horse. If you sell him, the money that you receive is blood money.

Punctuality in feeding and watering the horses is very important. They will worry and lose flesh if kept waiting beyond the regular time.

If the hoof is kept supple and elastic by soaking, there will be much less trouble from foot lameness, which starts because of a dry, contracted hoof that has no elasticity.

When a horse is disposed to cough in the stable, have his teeth put in order by a veterinarian, as irregularities sometimes cause a cough. Keep the stable clean and well ventilated to prevent inhalation of irritating gases. Wet all feed. If the cough persists give half an ounce of glyco-heroin three times a day, and if necessary increase to one-ounce doses.

Table of Food Groups.

No. 1—Body regulating substances. Fruits: Pears, peaches, plums, apples, strawberries, oranges, melons, etc. And vegetables: Celery, lettuce, greens, potatoes and root vegetables, peas, beans, tomatoes, squash, etc.

No. 2 — Muscle-building: Milk, cheese, nuts, eggs, meat, poultry, fish, etc.

No. 3—Foods which furnish starch: Breakfast foods, cereals, rice, macaroni, cakes, cookies, pastes, starchy desserts, puddings, potatoes, etc.

No. 4—Foods depended on for sugar: Honey, syrup, sugar, candies, jams, jellies, sweet cakes, icing, and other sweet desserts.

No. 5.—Foods which produce fat: Butter, cream, lard, suet, salad and other oils, pork, etc.

If it is true—and we believe it is—that the war will be won not only in the trenches, but in our kitchens and dining-rooms, then the more we know about food values the better we will be able to "carry on."

When to Cut Trees.

Trees should be cut in winter, as timber dries more slowly at this time of year and there is little danger of damage from season checking. Logs can be handled most economically in the winter months, as four times as many logs can be hauled on sleds as on wheels. If the logs or posts are cut in winter they become well seasoned before they are set, and proper seasoning is the most economical preservative treatment one can give to posts or poles.

All the great industrial organizations, such as railroads, telegraph, and telephone companies, that use enormous quantities of timber specify that it must be cut between October 1st and March 1st. Experience has shown that best results have been obtained by cutting the trees at this time.

The cost of living in Great Britain has risen 106 per cent. since the war, according to official figures presented in the House of Commons.

GLAMIS

The old saying that troubles never come singly proved only too true in Mrs Nesbitt's case. A few weeks ago she passed through great sorrow in the loss of her husband. Last Friday morning a message came informing her that her mother Mrs Jackson had passed away very suddenly during the night. Much sympathy is felt for Mrs Nesbitt in her trouble and especially for Mr Jackson, the bereaved husband, who since the death of Mr Nesbitt, his son-in-law, has been staying with his daughter here and was absent when his wife passed away. Both left on Friday for Holland Centre.

Mr Neil MacIntyre who spent some time with his mother and sisters here left on Thursday for the return trip to Edmonton.

Nursing Sister McKinnon left on Wednesday for the return trip overseas, accompanied by her sister Miss Kate as far as Toronto on her way to Chicago.

Mr Hugh McKinnon and son Mack of Minto, Man, who is visiting friends on the tenth, is spending some time with friends in Port Elgin.

Mrs McDermid who was seriously ill and under the doctor's care, is improving and we hope to see her around again. Her daughters, Misses Jean and Kate of London, were sent for and are with her at present.

Mr Alex McSween left on Saturday for Edmonton where he expects to find employment with McIntyre Brothers.

We are pleased to report that Mrs Thompson, who has been ill and under the doctor's care, is able to be around again.

Letters from the Soldiers

Remembrance Appreciated

The writer of the following letter received by the Paisley Women's Patriotic League is a son of the pastor of the Methodist church, Paisley. Although he has never been in our town, he was treated as a Paisley boy, being furnished with a Christmas box prepared by the League:

France, Jan 3rd, 1918

DEAR FRIENDS—The excitement caused by the Christmas season having subsided, we are now able to sit down to write letters of appreciation to our friends—I may call you that, though I have not had the honor and pleasure of meeting you—who remembered us so kindly.

Happily for us, it was our turn to be out of the line. The day was thus much more pleasant than it might have been had we spent Christmas in the trenches. The principal thing we did on "la jour de la fete Noel," as the Frenchman calls Christmas, was to eat. At this time we were fairly successful, the rations being extra good that day; there being among other things, plum pudding and a certain amount of fowl of one kind and another. Most of us smaller details of the battalion added to the rations with extras bought out of our pay, so that altogether we had a splendid feast—not the best way to celebrate the "day of days," but perhaps the best and only way possible to us. All day long our thoughts wandered across the sea, as we imagined how the day was being spent in Canada. I hope there was snow for the day. Christmas seems so much more real when the fields, trees and everything else are covered with snow. With us the day was bright and clear, there being only a very little snow in the fields. Towards night, however, there was quite a heavy fall, covering everything with a beautiful white mantle. But while our thoughts turned lovingly to Canada, yet we had pleasure in knowing that our people were thinking of us that day; and more than that, that they had done their best to make our Christmas a happy one. It surely is satisfying for us to know that any little sacrifice we may be making is appreciated by you people back home. There do come times when we get terribly "fed up" and hardly care whether school keeps or not; but I really doubt if there is one of the boys out here at "Somewhere" who is not glad that he is doing his bit. In the days to come the "one time boys at 'Somewhere'" will look back with a thrill of pride that they had their share in beating the Huns. They'll proudly show old scars, and their faces will light up with joy at the mention of such names as Ypres, Festubert, Courcelette, Givenchy, Vimy, Hill 70, Passchendale and other places, where the best blood of Canada has been spilled, and which will always make the name Canadian a proud one. As for the fellow that shirked his responsibilities, he may be having a great deal more comfortable time back home just now; but when those days come he'll certainly not be very happy, and I think that he'll surely wish he'd done his bit. Whatever the cost of victory, the gain will more than compensate for the loss. Nearly every week I learn of another companion or friend who has made the supreme sacrifice. "A life lived in vain," some may say; but thank God, no! a thousand times, no! but rather another brick placed in the wall that dams back the power of Prussianism, of brutality, of barbarity, of murder. As I write I think of the terrible desolation of ruined homes, of slaughtered babes, of outraged women, of crucified soldiers, of murdered old men, of maimed children, and all the thousand and one horrors that have been perpetrated in Belgium and France by the contemptible Hun; and my mind pictures such scenes being wrought in the land I hold most dear. Can any sacrifice be too great to stop such a tragedy? Can you wonder that we are glad to do our bit; that we would count it as cowardice should we fail? Is it surprising that we are filled with joy when our people are standing shoulder to shoulder with us? We do appreciate the way the ladies of Canada have done, and continue to do their share. It gives us courage and strength to do ours, and helps us to feel that we as Canadians have something really worth fighting for. The evening is nearly gone, so I must stop. Please accept my hearty thanks for the very fine parcel you so kindly sent me. I would be pleased if you would express my thanks to the men of Paisley for their enclosure of tobacco. I greatly gladdened the heart of one of my comrades when I handed him a packet of Meerschaum and one of Senator. Wishing you all a prosperous and happy New Year, and hoping that before long I shall have the honor and pleasure of meeting you each one personally.

Sincerely yours,
FRANK A CREIGHTON

—Sergt Fin Hepburn, in writing to his mother here, says (in part): "I have just received word of Jack Hamilton's death, and I certainly feel lost when I think that he is gone. He was one of my best friends, always cheerful under the most trying conditions. His battery will certainly miss him, but life is the price that must be paid in war. I must drop a few lines to his people." Sgt Hepburn has been in France since last March. It is a sore trial to the boys to see their comrades fall.

BRUCE PATRIOTIC ASS'N

The Bruce County Patriotic Fund Association held its annual meeting at the County Buildings on Wednesday, Jan. 23rd, and organized for the coming year.

The report of the Sec.-Treas., Mr H M Lay showed that $78,362.57 had been received by him and forwarded to Ottawa which included $75,000 from the County Council, $100 from Carrick Tp. Association; $302 from Tara Patriotic Fund; $100 from Senator Donnelly; $500 from John Joynt of Lucknow; $25 from Joseph Thompson of Chesley. The amounts requestioned from Ottawa totalled $47,017.60. Administration expenses for the year were the small sum of $95.76 of which $65.15 was postage.

Officers for the coming year were elected as follows:

Hon. Pres.—Warden Kastner
Pres.—A. E. McNab
Sec-Treas.—H. M. Lay
Vice-Pres.—L. C. Benton
Executive Coun.—Reeve of township of Brant, Carrick, Culross and Greenock, Deputy Reeve of Brant, N Robertson and the aforementioned officers.

Allowances for children which heretofore have been a flat rate of $2 per month were amended as follows: Children under five, $3; children five to ten, $4; children ten to fifteen, $5. The maximum payment to any one beneficiary was fixed at $35 a month.

A resolution was passed asking the county council to grant $75,- for 1918, which is the amount apportioned to the citizens of Bruce County by the central organization to be raised here for the needs of the coming year.

GENERAL CURRIE SPEAKS.

Says Passchendaele Was Canadians Hardest Job.

Lieut.-General Sir Arthur Currie gave an interesting story to the Paris representative of The Montreal Star in a special interview at the opening of the new year. General Currie said that the corps had had an exceedingly busy year, and since their formation had never been out of the line. The men had had a long series of successes, and that was the biggest factor in keeping up their morale. The situation at Passchendaele was such a critical one that the Commander-in-Chief had to make absolutely sure that it would be taken. Two attempts had already failed, and it had been pronounced impregnable; but the taking of the ridge was absolutely essential to ensure the success of future operations.

It was a great tribute to the Canadians that the Commander-in-Chief had confidence that Canada would be successful in accomplishing this task. They were sent there to do the definite job, and they did it with the knowledge that they would not be left to spend the winter in the Flanders mud. It was by far the hardest job the Canadians had ever tackled. It came on the tail of a battle which meant lack of communications and great, in fact almost insurmountable, difficulties in getting up guns and ammunition. The gunners worked night and day. All the ammunition was carried up on pack mules, and trails had to be made for these mules, otherwise they would have sunk up to their heads in mud. The trails were made of brush wood and plank boarding, all the work of laying these down was carried on under direct observation from the enemy and constant shell-fire. Four miles of double-planking and four miles of light railway were constructed with a total disregard of the danger and the number of casualties which were recognized as the necessary sacrifice which must be made to avoid still greater ones.

"We paid a price," said General Currie, "but it had to be done. We have had a wonderful year—Vimy, Avion, Fresnoy, Lens, Hill 70. The last the most successful fighting we ever did from the point of view of the German casualty list as compared to ours, which was only a third of the enemy's. Now the men are resting and enjoying to the full their comfortable billets, and all the arrangements made for their amusement, full of good humor and satisfaction and courage."

Where God Is Real.

The last letter of Lieut. Clifford Almon Wells, B.A., Johns Hopkins, '14; of the 8th Battalion, Canadians, C. E. F.; killed in action in France April 28, 1917, follows:

"My darling Mother,—

"I am sending this note to George for him to give you if I am killed. It is just a last message of love to you, Molly, for I do love you more than any one else in the world. You have been the best mother I ever knew or heard of, and my greatest grief is the sorrow which my death will cause you. Please do not grieve too much, mother dear. Remember that I died doing my duty—the very best I could do for the cause which we all believe is right—and that we shall be together again in heaven, where God will wipe away every tear from our eyes. God and heaven seem more real here in the presence of suffering and death than they ever did before.

"Give my love to dear father. He has been all that a father could be to me for many years, and I am deeply grateful to him. If I had lived, I should have strived to be a credit and a comfort to him always.

"Emma and George and Ned and Rae and Croy—I think very tenderly of all of them, and feel that I have not deserved all the love which they have manifested toward me. I pray every night for their welfare and happiness.

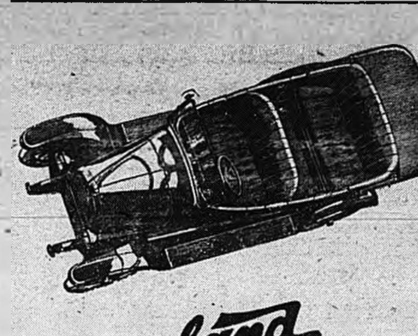
"Molly dear, there is nothing more I can say. This is just a message of love and gratitude, and, I trust, of comfort. Do not grieve, mother dear. All is well with me, and we shall meet again never to part.

"I pray that you and father may be very happy together. May God bless you both in your work and in your home life.

"Good-bye, my own darling mother. Clifford."

Patriotism Appreciated.

Sweaters and scarfs which are distributed to our soldiers through official channels generally reach the men who need them. That is, they are distributed impartially, but when it comes to individual giving the popularity of the young hero alone governs the giving. And what a harvest of knitted apparel the young "lady-killers" are reaping. Take the case of one young Hamilton man attached to the artillery whose looks and personality ensured him any number of feminine admirers before the war. He is being exceedingly well taken care of. No less than seven khaki sweaters and seven scarfs have arrived for him at his home here, the product of the diligent labor of dear girls who want to be nice to him. In this case the knitted stuff serves a double purpose. The soldier himself can only wear one sweater and one scarf at a time; but pending the day when these are frazzled out and the supplies must be requisitioned, a practical dad has been making use of them these zero mornings. "He will probably need them all after a while," confides pater to the office staff. "Meanwhile, I am merely seeing that the patriotic work of ——'s young lady friends does not go to waste, when there is an opportunity for it to be a real use staving off pneumonia or influenza."



Sparing Him.

"Butter is high, dearie," ventured the economical husband.

"I know it is. So shut your eyes."

"Eh?"

"And then you won't see how much I have to put on your toast."

DANGER TO SYSTEM UNLESS ACTION IS TAKEN

Ignorance alone can excuse neglect of the health when all indications point to Kidney trouble. Everyone should know that from the hour the Kidneys fail to remove the poisons from the blood stream, these poisons are accumulating ready to cause sickness, pain and suffering.

How are you to know that the system is in danger from poisoning? One or more of the following symptoms should leave no doubt in your mind. If you are the victim of backache, pains in the back or sides, or Lumbago, be sure nature is calling for better Kidney action. Take Gin Pills.

At the first twinges of Rheumatism, swollen ankles and joints, or any other manifestation of uric acid poisoning, take Gin Pills. Dozens of Testimonials prove Gin Pills to be the sovereign remedy.

Take the warning given by constant headaches, restless nights, dizziness when you stoop, frequent chills, bladder urinary trouble, or constipation, and turn to the remedy which is so sure that it is sold on the money-back guarantee—Gin Pills.

Gin Pills are sold by all dealers—50c. a box or 6 boxes for $2.50. A free sample will be sent if you address your request to the National Drug & Chemical Co. of Canada, Limited, Toronto; or to the U. S. address, Na-Dru-Co Inc., 202 Main St., Buffalo, N.Y.

The People's Popular Store

Stock-taking Specials

Ladies' Up-to-date Mantles

WHILE stock-taking is going on we are offering special values in all lines of heavy winter goods, but before an inventory of our stock is taken we find that we have a few lines of now seasonable, up-to-date goods that we must clear at a still greater sacrifice. Below are a few of the specials into the prices of which the knife will now go deep for a few days:

Just a few left. Regular price $25 to clear at $17, regular $20 to clear at $14 98, regular $15 75 to clear at $8 98, regular $10 to clear at $7 25, regular $8 to clear at $5 49.

Ladies' Furs

They must go. See them if you want a snap. 1 only Black Wolf Set, reg price $20, to clear at $66 95; 2 only Opposum Set, reg price $21 75, to clear at $16 95; 1 only, Red Fox Set, reg price $27, to clear at $20 95; 1 only, natural Lynx Set, reg price $31 75, to clear at $23 75; 1 only, Girls' White Thibet Set, reg price $10, to clear at $7 50. Also a few stoles and Muffs to clear at half price.

Ladies' Sweater Coats—Only a few left. See them. Reg price $5 to clear at $3 98, reg price $3 50 to clear at $2 75, reg price $3 to clear at $2 19, reg price $2 50 to clear at $1 98. Girls' and Misses' Sweater Coats to clear at 98c up to $2 79.

Men's and Boys' Overcoats—We have a few of each and they also must go. 1 only, Men's Black Beaver Cloth with good quilted lining and fur collar, one sold reg $37 50 to clear at $21 98, and the other reg at $25 reduced to $19 49. We have also a few good Ulsters left. Note the price—Reg $17 50 reduced to $13 98, and reg $15 reduced to $11 98. Also a few Boys Overcoats to clear at $3 98 to $6 89

Men's and Boys' Sweater Coats—In this line we have yet a good assortment and are clearing them at a big reduction. See our men's, special $4 50 reduced to clear at $3 59

Horse Blankets and Robes—We find that we have only five Horse Blankets left, and will clear at $2 19 and $2 59 each. 1 only, Saskatchewan Robe, reg $16 50 reduced to $13 25 to clear.

Men's Tweed Suits—Very special value, odd price. reg $16 50 to clear at $12 98, reg $14 to clear at $10 98, reg $10 75 to clear at $8 69.

Look over the above list and you will think in the face of a big advance in prices it will pay you to buy now. Prices will be much higher next winter. These special prices quoted are cash or produce when sold. Our books show that some of last year's accounts are not settled. These must be attended to at once, as we must have oldbooks out of safe.

THE PAISLEY MERCANTILE CO.

THE CITY BAKERY

MRS. WILLIAM SEVERIN, Chairman of the National Advisory Council Women's Association of Commerce of U.S.A., says in part: If in each home in this country there is saved one ounce of meat a day, in one year we save 565,000,000 pounds. One slice of bread saved daily saves 365,000,000 loaves annually. One part butter less a day means 114,000,000 pounds a year saved. A half cup milk less a day saves 962,000,000 quarts of milk, or the product of 400,000 cows.

These figures prove that it becomes us to conserve. We are asked to conserve wheatless days. Let us carry it farther. Let us discover the real waste of wheat in homes. The home baked loaf of bread, "time hallowed though it may be," is our worst offender. The women of France no longer bake their own bread. We must adopt similar measures here.

BUY MacLACHLAN'S BREAD

F. S. MacLachlan

Died at Gore Bay

Rev James Steele, formerly of Paisley, passed away on Feb 3rd, at the home of his son-in-law, Mr B F Matchmore, Gore Bay. The deceased was in his 86th year, and for the last few years had been failing in health. Mr Steele was a son of the late Hugh Steele of Paisley, and for many years carried on a blacksmithing business in Paisley. Thirty-years ago he went to Gore Bay as a missionary. He was stationed at Providence Bay, and later at Richard's Landing and Thessalon. Since the death of his wife he has lived with his daughters. There was a family of six, but only two are left to mourn his death, Mrs Alex Matchmore of Allanford, and Mrs B F Matchmore of Gore Bay. The remains were taken to Berkley, Ont., where the late Mrs Steele and their son John were laid to rest.

Good Work at the Wood Bee

Twenty-five men representing nearly all classes, from the clergy to the woolleg man, mustered to the home forestry company that went out to help Hugh Watt cut up a stock of fuel at his wood lot. Equipped with nine cross-cut saws, axes and other hand implements, they prepared a lot of logs which the big steam buz-saw outfit cut into stove-length. There were no laggards. Though some lacked experience, they did their best at whatever their hand and muscles could be applied. The pile of fuel produced will measure between fifty and sixty cords. With this start Mr Watt expects to be able to keep up with the demands of those who need wood in moderate quantities for the balance of the winter. Mr Watt desires to thank all those who lent their assistance so willingly and effectively. This is a fair example of what citizens can do towards furthering the production campaign in our locality.

Mooney-Moffatt

The home of Mr and Mrs W H Moffatt of Pinkerton was the scene of a very happy and pretty event on Tuesday afternoon Feb 12th, when their eldest daughter, Agnes, was united in marriage to Mr Peter Mooney, only son of Mr Henry Mooney of near Paisley, the ceremony being performed by Rev R M Gale of Pinkerton. The bride, who was given away by her father, was daintily gowned in mistress of cream satin and carried a bouquet of bridal roses. Miss Alexia Moffatt, sister of the bride, played the wedding march. The happy young couple left Wednesday on a short honeymoon to Fergus and other points and on their return will take up residence on the 200m's farm on the 16th con Greenock.

Prospering at Lethbridge

In a personal letter to The Advocate editor, Dr G T Marrs gives us a few lines about the growing western coal city. They have had a very nice winter out there, with the exception of a couple of cold snaps. In January they were playing golf, also again on Feb 10th, when it was just like spring. Business is good there, with every business place and house occupied, and about a hundred new houses needed very badly. "If we get a good crop this year the city will grow," he says. "It has increased over a thousand in the last two years. A great many people are coming in to buy land, which is selling as high at $75 an acre in good locations, $60 being a common price for unimproved land. One could have made a fortune by buying land three years ago as it has trebled in value. We have lots of fuel here in coal and gas. Our practice is good here, and I am glad I made the move. The farmers here have lots of money and spend it freely. Mrs Marrs and family are fine. Four of the children going to school."

—Auction sale of farm stock and implements, on lot 17, con 7, Elderslie, on Tuesday, Feb 26th. List includes 1 fresh cow, 2 cows with calves at foot, and 5 cows due to calve March and April, 2 heifers in calf, 9 pigs, 200 bus oats, 50 bus barley, and a full list of implements. R J Walpole, prop; R C Pearce, auct.

To Investors

Trust and Loan Company Debentures in sums of $100 and upwards bearing 5% per cent interest, payable half-yearly. Authorized by law for the investment of trust funds. Apply to D FORRESTER, Barrister.

Illustrated Lecture

Col T H Race, the Field Secretary of the National Sanitarium Association, will give a lecture in the town hall, Paisley, on Wednesday evening, Feb'y 27th, at 8 30, on the subject of tuberculosis, its nature, treatment and prevention, illustrated with instructive lantern views. Col Race is an old Journalist, a traveller of world wide experience, and a speaker of unusual ability. It is worth while hearing him on this scourge, known as the "great white plague," besides his side lights on the present war situation. Only a collection taken for the Muskoka Free Hospital for Consumptives.

CARD OF THANKS

The family of the late Mrs Matthew McCallum desire to thank the neighbors and friends for the kindness and sympathy extended them in their recent bereavement.

—Mrs H S Petrie is visiting friends in Durham.

—Miss Skelley, of Toronto, was a visitor at Mr F C Wilkins' for a few days.

—Dr Houston was in Toronto last week, and represented the Paisley Agricultural Society at a session of the Fairs Association.

—Mr James Watson, formerly of townline Saugeen and Bruce, died at his home at Kincardine on Sunday while sitting in his chair. Further particulars are not to hand this week.

—Mr John Webb and two children, of Whitebeach, Sask., have been visiting friends in Greenock and Paisley for a month. Mr Webb was over to Detroit visiting his brother for a couple of weeks.

—Mr Robt Brown, of lot 24, con 14, Bruce Tp, is holding a clearing sale on March 5th, having disposed of his farm to Mr Alex J Lamont, of con 2, Saugeen. Mr and Mrs Brown are coming to live in Paisley.

—Mr Wm Allen is down from Moosejaw on a business trip, also visiting friends in Paisley and Port Elgin. Mr Allen informs us that although the western winter is a cold one, there is no scarcity of fuel in the Moosejaw region.

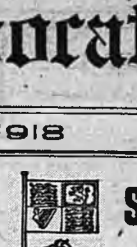
—The Paisley auxiliary of the W.M.S. of the Methodist church wish to acknowledge a bequest of $25 from the estate of the late Mrs Isha Allan. The W.C.T.U. were bequeathed $25 also, receipt of which is acknowledged by Mrs Cann.

—Mr John F McKechnie, of Portage la Prairie, took a couple of days off while on a business trip to Ontario last week and came up to call on his old Paisley friends. He spent a busy afternoon Saturday shaking hands and chatting to all he could find.

—Puck-chasers Albert Stanley and Donnie Elves, of the Paisley hockey club, are signed up with the Chesley team for the balance of the O H A season. They played in a match against Harriston on Friday and were the big push in a win, scoring nearly all the goals taken by Chesley.

—Stock men and farmers should see in this issue of The Advocate the advertisement of Mr Abe Stringer's clearing sale of pure bred Clydesdale horses, Shorthorn cattle, and implements on Tuesday, March 5th, at 35 con 5, Kinnardine Tp., near Kinloss. The stock is of the class that it will beat pay any wide awake farmer to buy right now, and where it can be obtained near home, so much the better.

Death of Mrs. Malloch



Most of those who have been residents of this community for a sufficient length of time during the past half century to become acquainted with the late Mrs Malloch will realize that in the passing away of this lady Paisley has lost one of its most outstanding characters, and one that exerted a strong influence on various most respectable circles. The deceased was the second daughter of the late Allen Goode, who came from Ireland to establish the first branch of the Bank of British North America in Montreal. In the troublous times around 1837 Mr Goode decided to resign his position and come west to the then new settlement at Brantford and entered upon agricultural life at "Myrtleville," as the old homestead is still known. There the subject of this sketch was born on March 26th, 1837, and there also nineteen years later she was married, her husband then being a young legal practitioner in Brantford. Mr Malloch died over twenty-four years ago. Of their two daughters one survives, Mrs A B J Simons. During all her life in Paisley, Mrs Malloch was one of the most devoted members and faithful workers in connection with the Church of the Ascension. She was a very regular attendant at the services as long as health permitted, was a life member of the Missionary Society, and for many years its president. In the welfare of every old and new friend or acquaintance Mrs Malloch took a deep and sincere interest, and her quiet philanthropy was extended in relieving distress wherever known, and filling the place of a friend to the friendless and poor. Even in her advanced age she had been notably busy with her hands, having knitted nearly a hundred pairs of socks for the soldiers. She had been failing in health for some time and had suffered from rheumatic troubles for years. The funeral took place on Saturday afternoon, the remains being conveyed by G.T.R. to Brockville for interment in the family plot. Services at the home were conducted by Rev L W Diehl, assisted by Rev A J Creighton. Friends from out of town present were Mrs F P Ballachey of Brantford, Mr W C Goode, of the same place (who accompanied the remains to Brockville), and Miss Mary Sinclair, B A, of Walkerton.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

Handling the Good Ones

Irwin Bros shipped a car load of high-class registered mares to LaBiche, Sask., via C P R on Tuesday. Earlier in the week they received a consignment of ten pure bred Percheron stallions and three mares from Ohio. Five of the stallions will be shipped to Saskatoon Canada in a few days. The Irwins are specializing on the high-grade stock and are making some big turnovers these days.—Walkerton Telescope.

Known in Paisley

Many Paisleyites will learn with deep regret of the death of Cadet W C (Billy) Tanner, who for a number of years spent summer vacation at the Sutherland family's camp at Crescent Vale farm and became quite well acquainted here. The deceased was an architect by profession, with a promising career before him in his native city of Guelph, but he left it to do his bit with the Royal Flying Corps. He was training at Camp Hartley when he took a heavy cold, followed by scarlet fever and complications which caused his death. The friends he made in Paisley will sympathize with the parents in the loss they have suffered by the death of their only son.

Union Sunday Services

The assembling of all the church-goers of this village at one congregation at the services in Knox church on Sunday provided an inspiring occasion in which the exhorters of the day did full justice, and there is not a doubt but that the auditors derived special profit from attending. Rev Mr Little preached in the morning and Rev Mr Diehl in the evening. While more or less comment favorable to church union is always brought out publicly and privately by such gatherings as these, this fact must not be accepted as any indication that church union is to reach consummation at an early date in such complete form as to be a wiping out of denominationalism in the community. Sentiment is changing and ever growing towards that end, but apparently there is no immediate prospect of a real movement. Some time, perhaps, the present day excuses for sectarian waste of money, energy and talent may become so apparent to an actual majority that plans may be set afoot whereby one church will fill the place of four in this village, or at least a reduction of one or two made in the number of open sanctuaries. In the meantime the temporal object of conserving fuel acts as an incentive to unionism and in the end may influence the spiritual side of the subject to the same practical point. In Sunday school work the unified idea is also being carried out, some of the classes being held in private houses on those Sundays the church building is not heated. Mid-week services are being dispensed with or united in various ways.

Died at Parkland, Alta.

Death came peacefully to end the sufferings of Mrs Martha McKelvey, Tuesday, Jan 22nd. Martha Hagerman was born in Caledon, county of Peel, Ont., Oct 26, 1841. She was one of a family of six—three of whom preceded her in death; the two youngest surviving, Mrs Sheply of Havana, Cuba, and Frederick Hagerman of Parkland. Fifty-two years ago she was united in marriage to Robert Wilkinson of Cheltenham, Peel county, Ont., who died two years later. In 1875 she was again united in marriage to Robt. McKelvey of Elderslie, Bruce county, Ont. Mrs McKelvey became a widow again in January, 1909. In 1912 she came to Parkland with her brother and family, with whom she was making her home, as her health had failed, she being a victim of paralysis. The splendid care which she had been given by her brother and wife is too well known to need rehearsing. Their self-sacrifice and devotion to the needs of the invalid for seven years has been an object lesson to all who have known of it. Mrs McKelvey's life had been one of Christian sweetness and self-sacrificing. Many noble deeds of love have been performed by her for people in need, when her health permitted. She was a close student of the Bible, and in her declining years of ill health found comfort in reading her Bible. She was buried in Stavely cemetery, the funeral taking place from the home of Mr and Mrs Fred Hagerman, Thursday, Jan 24th. The out of town relatives and friends were: Mr and Mrs Clement of Champion; Rev J F Hunter and two sons of Claimore; Tom Hagerman of Edmonton; Miss Martha Hagerman of Calgary, and Messrs Geo. and Alex Greig of Nanton.

Sign and Carriage Painting, House-Decorating and Wall Papering

The undersigned is prepared to do all classes of work in the most stylish, neat and satisfactory manner. Orders executed promptly. Will be glad to receive your patronage, whether in town or country.

W. H. BAKER, Paisley

Keep a Smart Appearance

You can be smartly dressed without being extravagant if you will leave your next order with us. We have a good assortment of the very newest patterns in fancy suitings. Look them over before buying. Also in Ladies' Suitings we have a full line to choose from of the newest patterns and styles.

I. S. CRUICKSHANK, the Tailor

Farm for Sale

LOT 1, con 7, Elderslie—160 acres, all cleared, in first-class state of cultivation, tile drained, 25 acres ploughed, 5 acres fall wheat, remainder in grass. Barn 64 x 86 on stone foundation with cement stables, drive shed 30 x 50, smart brick house with kitchen and wood shed, hard and soft water, drilled well with windmill fastened to stables. Three miles from Paisley, 24 miles from Chesley, 4 mile from school. Will sell on easy terms, as possession in spring. For particulars apply to HOFF BURNS, R R No 2, Paisley. Bell phone.

The Last Lesson

An Incident of the Franco-German War of 1870, Translated from the French of Alphonse Daudet.

This morning I was very late for school, and I had a great fear of being scolded, especially as Mr. Hamel had told us that he would examine us on participles, and I knew not the first word about the subject. For a moment the idea came to me to play truant and to run away over the fields.

The weather was warm, but clear. One could hear the blackbirds chirping shrilly at the edge of the woods, and Rippert's meadow, back of the sawmill, the Prussians were drilling. Everything tempted me, more than the rules of participles, but I had strength of mind sufficient to resist, and ran quickly to school.

In passing by the Mayor's office I saw that some people had stopped before the little frame where placards are posted.

For two years it had been from there that all our bad news had come, battles lost, requisitions, new laws, and I thought, without stopping: "What more do they demand?"

Then as I ran along, Wachter, the blacksmith, who with his apprentice was standing before the placard, cried to me: "Don't hasten, youngster, you will get to your school soon enough."

I thought he was mocking me, and I entered all out of breath the little court surrounding Mr. Hamel.

Ordinarily at the beginning of classes there was a great noise that could be heard even in the street, opening and closing of desks, lessons recited very loud, every one stopping up their ears, the better to understand himself, the big ruler of the master tapping and demanding "Silence."

I counted on all this disturbance to gain my seat without being seen, but to-day all was as quiet as a Sunday morning.

Through the open window I saw my comrades ranged at their places, and Mr. Hamel passing back and forth with the terrible iron ruler under his arm. I had to open the door and enter amid this awful calm. But no, Mr. Hamel looked at me without anger and said very gently:

"Go to your seat quickly, Frantz, we were going to commence without you."

I strode forward and sat down immediately at my desk. Then only, a little of my fright having passed, I noticed that the master had on his best green frock coat, his plaited stock and his embroidered black silk skull cap, which he wore only on inspection days or at the distribution of prizes. In addition to that the whole class had something extraordinary and solemn about it. But what surprised me most was the light of many villagers at the lower end of the hall seated on benches which were usually empty, all as silent as ourselves, and among them was the former Mayor, old Mr. Hauser, wearing his three-cornered hat.

Everybody seemed sad. Hauser was holding an old dog-eared spelling book open on his knees, his big spectacles resting on the open page. While I was wondering at all this Mr. Hamel had mounted the platform, and with the same mild and gentle voice with which he received me said:

"Children, this is the last time that I am going to hold class. The order has come from Berlin to teach only in German in the schools of Alsace and Lorraine. . . . The master arrives to-morrow. To-day is your last lesson taught in the French language. I pray you be attentive."

These words overwhelmed me. Oh, the wretches! So this was the placard on the Mayor's wall! My last lesson in French. And I, who hardly knew how to write! And I would never have another chance to learn! I must stop there!

Oh, how I regretted the lost time, the classes skipped, to go bird-nesting in the spring-time or to go skating on the Saar in the winter.

My books, which a moment before seemed so irksome, so heavy to carry, my grammar, even my church history, now seemed like old friends whom it would be very hard to leave, and like them was Mr. Hamel. The idea that he was going to leave, that I should never see him again, made me forget the punishings and the raps over the knuckles from the ruler. Poor man!

It was then in honor of this last class that he had donned his best Sunday clothes; and now I understood why the old villagers were sitting at the end of the room. They seemed to say that they were sorry they had not come more often to visit the school. It was also a way of thanking the master for his forty years of hard service, and the duties so well performed to the country he was now leaving. These thoughts were running in my head when suddenly I heard my name called. It was my turn to recite. Oh, what would I not have given to be able to recite, from beginning to end, that famous rule about participles, in a loud, clear voice, without a mistake.

Alas, I got tangled up at the first words and remained standing, balancing myself first on one foot and then on the other, not daring to raise my head. Soon I heard Mr. Hamel say:

"I shall not scold you, my dear Frantz. You are sufficiently punished, already. Every day you have been saying, I have plenty of time, I shall learn it to-morrow, and now you see what has happened. Ah, that is the great fault with our dear Alsace, to always put off till to-morrow. Now these people have a right to say to you, What! You pretend to be French and you can neither read nor write your language. But in all this, my dear Frantz, you are not the one who is most to blame. We can all take to ourselves a part of the reproach. Your parents have not kept you strictly enough to your studies.

"They have preferred to set you to work in the fields or in the spinning mills for a few sous more or less. And myself, have I nothing with which to reproach myself? How often have I allowed you to send my garden instead of studying? And if I wished to go trout fishing, did I bother myself about giving you a holiday?"

Then, after some other things, Mr. Hamel started to speak of the French language, saying that it was the most beautiful language in the world, the clearest and the strongest. "Keep guard over it and never forget it, because when a people becomes enslaved, if they still retain their own language, they have a key which will unlock their chains and deliver them from servitude."

Then he took a grammar and read us our lesson. I was astonished to see how well I understood. Everything he said seemed easy, very easy, I believe, also, that I never listened so attentively, and that he was never so patient in his explanations. One might have said that before going away the poor man wished to give us all his learning to drive it into our heads with a single blow.

The lesson finished, we passed to the writing lesson. For to-day Mr. Hamel had prepared new copies, written in a beautiful, round hand: France, Alsace, France, Alsace. These were made like little flags distributed all around the class, and fastened to the front of each desk.

You should have seen how each one applied himself, and what a silence! You could hear the scratching of the pens on the paper. Once some June bugs came in through the windows, but nobody paid any attention to them, not even the smallest children, who busied themselves drawing simple figures, conscientiously and earnestly, as if they, too, were written in French.

On the roof of the school house doves were moaning gently and I said to myself as I heard them: "Are they going to make them sing in German, these also?"

From time to time, as I raised my eyes from my paper, I saw Mr. Hamel, motionless in his chair, fixing the various objects about him in his mind's eye, as if he wished to carry away with that look everything in the little school house. Just to think, for forty years he had been in the same place every school day, in that room and just such a class in front of him. Only the benches and desks had become shiny and polished by much use. The walnut trees in the yard had grown tall, and the hop vines which he himself had planted had encircled the windows and reached even to the roof. How heartbroken must he the poor man, to quit all these things and to hear his sister in the room above, passing back and forth, packing up their furniture, for they had to go on the morrow and go away from the country forever—and yet, he was brave enough to keep up his classes to the very end.

After the writing lesson we had history and after that the little ones sang the alphabet. Down at the end of the room the ancient Hauser had put on his spectacles and, taking his spelling book in both hands, he said the letters with them. One could see how earnest he was and how his voice trembled with emotion.

It was so droll and touching a sight you knew not whether to laugh or cry. Oh, I shall always remember that last class!

Suddenly the clock in the church steeple sounded noon, and then the angelus. At the same instant the trumpets of the Prussians, who were coming back from drill, blared under our windows. Mr. Hamel arose from his chair very pale. Never had he looked so noble. "My friends," he said, "I—I—"

But something choked him. He could not finish the sentence. Then he turned to the blackboard, took a piece of chalk, and pressing with all his force, he wrote in letters, very large and clear, "Vive la France!"

Then he stayed against the wall, and without speaking, he made the sign with his hands, "C'est fini—You are dismissed."

Bird Mimics.

We are accustomed to talk of the parrot as a wonderful mimic; but almost every bird is a born imitator. A ample opportunity of proving this.

Our men in the firing line have had

A case of a hen imitator is given in the "Times." The writer says that his son was sitting in a yard just behind the firing line on the Western Front when he thought he heard a shell coming. Just as it sounded as though it was about to burst the noise stopped. Two minutes later the same noise was repeated, and the soldier saw that the noise was made by a hen. The sound was then taken up by a cock, and was an exact imitation of a falling shell. From inquiries the soldier made, he found that along the front birds have learnt to make this noise since war began.

An artillery officer tells a similar story. The starlings out there have caught the trick of giving three shrill taxi-whistles, in imitation of the warning of approaching enemy aeroplanes.

"It is great fun to see everyone diving for cover," says this officer. "I was nearly taken in myself the other day."

White cabbage crisped and mixed with French salad dressing is always wholesome and easy to make.

A bushel of seed wheat out in the ground is worth fifty shut up in the bin to mold and spoil waiting for a better market.

Coal-dust should never be wasted. Have a special scuttle and mix sufficient water with it to make it quite moist. When a fire is nice and clear, bank it up with this coal-dust and it will last for hours.

THE KAISER IN BELGIUM.

Closely Guarded When He Travels Through Captured Country."

How closely the German Emperor is guarded when he travels through Belgium is told as follows by a correspondent of the London Daily Chronicle, who several times has witnessed the Kaiser's arrival.

"Whenever the passage of the imperial train is to take place the fact is not known to the chief railway official until the same day and to his subordinates not until a quarter of an hour before the arrival. In the station the lines are all kept free.

"All workmen on this occasion, whether Belgian or German, were despatched outside, and access to the station was forbidden. This applied to all passengers as well. The military guards occupying parts of the station and the environs were ordered to leave their posts and pile their arms. The only persons allowed on the platform were the station master, his employes appointed to work the signals and the military chief. There was no guard of honor, no manifestation whatever.

"This clearing of the station takes place at every station through which the train passes, which it does at the maximum regulation speed. At Brussels the detraining took place opposite the Place Regier, which is a military zone of the occupation.

"During the presence of the Kaiser the officials always display the utmost nervousness, in fear of anything taking place, and they always breathe a sigh of relief when their master has gone. The fact that even the military are obliged to retire and pile their arms seems to suggest a distrust of his own army."

Providence has given us a goodly heritage. Let us worthily care for it.

ADVENTURES OF A SKY PILOT

BRITISH AVIATOR TELLS OF RAID ON SUB. BASE.

Travelling a Lane of Light From Rockets Suspended in the Air, Makes His Escape.

"Well," yawned the blond pilot, "as I remarked before, I got over the Ostend. That's the pier thing at Zeebrugge, you know. It showed up black—yes, black—and the water looked like darkened quicksilver. It was a pretty good night, and I must have been up 2,500 feet, dodging and ducking, so to speak, waiting for a good chance to drop an egg or two, but hoping not to waste any. I thought it would be a fine sight to see a red glare to tell me that the German air base below was blazing. What had delayed their reception of me and my little 'bus I don't know, but soon, very soon, they were right there with the 'How do y' do?' business.

"From the illuminations below it was plain that while I remained there a hot time was in store for me. First the blighters sent up the searchlights and the heavens around me were punctured with shafts of whitish blue or bluish white, and I dropped a bomb, showing that I was there all right, and I realized that they knew something was wrong.

Through a Fiery Lane.

"Flames and flashes came from below, and the Boche appeared to be extremely industrious. I casually dropped an egg or two more on the sore spots, and apparently my efforts were not as bad as they might have been, for below, as I looked over the machine, I saw quite a lot of substantial glare, blood red, in the temporary darkness. They must have thought there was a squadron of me, for soon they did a dirty trick. They shot up two rows of rockets, lights that rested at a certain distance in the air and made a lane of light. The infernal things parachuted, you see, when they reached a certain height, and the fire hung from them stationary in a devilish sort of way. And the worst part of it was that they sent them up so that I was practically imprisoned in a lane of fire up in the heavens except for one exit.

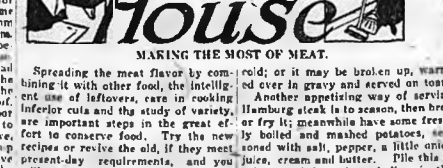
"If I had run the machine into the rockets it would have been ablaze in no time, for these fireworks stay awake for two minutes, which seems like a day and a half when you are up there. And at the end of the avenue you are not neglected, for it is on that spot that the Hun focussed to-night, a number of his 'Archies.' But what could I do? Just plunge on ahead and trust to luck in getting out of the said lights, showed up perhaps even more distinctly than I would have in the daytime.

"My machine was struck several times by the shrapnel, and, as ill-luck would have it, the patent point of my magneto fell out just when I reached the spot where the fire was thickest.

On a Scouting Expedition.

"The chances of getting home then seemed pretty slim—engines out of whack—lighted up by fireworks—twenty-five hundred feet in the air—a target as plain as a pikestaff! It seems easy to keep out of the way of the guns, but of course there's no denying that they have a demoralizing effect on a man in the air, but not so much at night as in the day. I managed to slide in the direction of the ship, gratified with the glare below caused by the bombs I had left. The shrapnel followed, and I turned and slid, and now here I am, glad to get back."

"Tell us about what happened to you yesterday," said one of the listeners. The seaplane artist picked up his log from a desk and read:—



"Had a run-in with two German machines, wind blowing about thirty knots. I was merely out scouting and therefore did not carry a gun. The two hostile planes were joined by a third, and then they courageously came close to me. They shot away my aileron control, and we were in a very bad way. For twenty minutes we were continually under fire, and below there was a heavy swell. It was really only through knowing what a funk the enemy flier was in that I dared go for them. I let the enemy planes come nearer and nearer, and the time they were ready for firing I dived at one of them. This so upset the poise of the three machines that they at first turned tail and then swung around to come at me, making huge circles to get on my flanks again.

"Prussian Politeness."

"But all that took time, and meanwhile I was nearing my base. Sometimes the enemy machines were like too many cooks and the broth, nearly crashing into one another, which, of course, upset their nerves. Only one of us seemed to be moving, for a layman should understand that when you are in the air only the other machine appears to be moving, while you seem still. I was glad, I tell you, when I saw one of our fighting planes. A German does not like them, and when they saw this fighting Briton they took to their heels. They probably knew, too, who was the flyer, as a man's style in the air is characteristic and this happened to be a chap who had been very successful at air fighting. When a German train turns tail at the sight of one British plane we call it 'the Prussian code of politeness.' We admire the respect they show for our fighting machines, which, you can imagine, does not detract from the confidence we have in our own superiority.

"I have had a string of luck in the last week, for it was only four days ago that I sighted a Boche submarine and dropped a bomb on or near it. Can't say whether the U-boat was done in or not, though. After that I was lonely, but I saw a torpedo boat near Zeebrugge and headed a little something at her, raced back and let our fellows know about the German warship sneaking out."

Have dry, well ventilated poultry houses with plenty of sunlight. Use clean, dry litter and clean feed. Scrub the houses with hot water and soap and spray with a good coal tar disinfectant.

MAKING THE MOST OF MEAT.

Spreading the meat flavor by combining it with other food, the intelligent use of leftovers, care in cooking inferior cuts and the study of variety, are important steps in the great effort to conserve food. Try the new recipes or revive the old, if they meet your requirements, and you will scarcely realize that we, like all the rest of the world, are on rations.

Hungarian goulash will provide a good dish for a large family. It requires two pounds of chuck steak, three onions, three large tomatoes or one-quarter of a can, two green peppers or a red pepper-pod, one-half pound or more of spaghetti, salt and pepper to taste. Cut the meat into small pieces and brown in a pan. Add three pints of boiling water. Cut all vegetables into small pieces, add them to the meat and cook slowly until the meat is tender—four hours, perhaps.

Baked lamb with barley is a wholesome dish. To make it use one cupful of barley cooked slowly in just as much water or gravy as it will take up. When tender add butter and salt and two or more cupfuls of chopped meat. (The mixture should be moist but not too wet.) Put in a casserole or baking dish, cover with buttered breadcrumbs and bake until brown. Beef can be used instead of lamb.

To be at its best, meat for Hamburg steak should be ground at home. While it is made of inferior cuts of beef, it is delicious if properly prepared. Work the seasoning in thoroughly so that it is equally distributed, and form the meat into little cakes, or one large flat one. The latter can be broiled over clear fire and, when done, transferred to a hot platter, brushed over with melted butter, and served at once. Leftover Hamburg steak may be sliced cold; or it may be broken up, warmed over in gravy and served on toast.

Another appetizing way of serving Hamburg steak is to season, then broil or fry it; meanwhile have some freshly boiled and mashed potatoes, seasoned with salt, pepper, a little onion juice, cream and butter. Pile this in a baking dish, make a hollow in the middle, fill with the steak and reheat in the oven.

Instead of fried meat cakes, serve leftover and unsightly pieces in a pie. They go further, are more wholesome and reduce the use of fat. Fury pie is made as follows: Arrange in a baking dish a layer of mashed and seasoned potatoes, then a layer of cold chopped meat; repeat until the dish is full, with a layer of potatoes on top. Pour over this a cupful of milk, stock, or gravy, dot with butter and bake until brown.

Shepherd's pie is just as good. For this, fill a baking dish with chopped meat, well seasoned. Moisten with gravy, cover with mashed potatoes, dot with butter and brown in the oven.

A small meat loaf is made as follows: Three-quarters of a cupful of cold minced meat, one-half cupful of white sauce, one-half cupful of breadcrumbs, one teaspoonful of grated onion, one teaspoonful of chopped parsley, seasoning, a little gravy. Season the chopped meat; add the breadcrumbs, the white sauce and the other ingredients. Mix well and put in a greased mold; brush on top with gravy and sprinkle with bread-crumbs. Cover with buttered paper and bake for twenty minutes; take off paper and bake ten minutes longer; turn out and serve either hot or cold. White sauce, requires two tablespoonfuls each of flour and butter, a cupful of milk, and salt to taste.

DISHES FOR MEATLESS DAYS.

Macaroni Salmon.—Mash one-half can of salmon with a fork. To one-half cupful of rich milk add four tablespoonfuls of fine bread crumbs, heat hot, and add one tablespoonful of butter, two beaten eggs, a dash of pepper, and a little salt. Mix well. Have cups well buttered, and lined with cooked macaroni, and fill them with the salmon. Set cups in a pan of hot water, and bake twenty minutes. Serve.

Farina With Milk.—Have one pint of boiling milk in a small enameled pan on the fire. Gradually add two gills of farina, sharply mixing with the milk while adding it. Add two tablespoonfuls of granulated sugar. Mix well, and let cook fifteen minutes, stirring once in a while. Stir in one raw egg yolk and serve with cold milk.

Vegetable Sausages.—Three carrots, four onions, two parsnips, one-half pint of split red lentils, two eggs, one-half pound of stale bread crumbs, sago, parsley, garlic, salt, and pepper. Boil the vegetables, and mash fine; cook the lentils until soft, pound them well; add to the mashed vegetables, together with a little boiled sago, chopped parsley, a small portion of finely chopped garlic, salt, and pepper. Mix the eggs and bread crumbs, add a portion to the other ingredients. Make up into pieces about the size of ordinary sausages, roll in egg and bread crumbs. Fry in boiling oil until brown.

Stewed Fish.—Cut a fish across in slices one and a half inches thick and sprinkle with salt. Boil two sliced onions until done. Pour off the water, season with pepper, add two cupfuls of hot water, and a little parsley; in this simmer the fish until done. Thicken the liquid left in the pan with a little flour and pour over fish.

Scalloped Macaroni. — Put some plain boiled macaroni in a dish and season with pepper, salt, and a little catsup. Fill a deep dish half full, add a very little finely chopped onion and a layer of sliced tomatoes, having previously covered the macaroni with some melted butter. Make a thick crust of mashed potato, and bake in a not too hot oven until brown.

Salted Codfish, Epicurean Style.—Let the fish simmer over the fire till tender, and then strip it up very finely. Mince three medium-sized onions, and fry them slowly in four ounces of butter until they are done and quite brown. Then add to them the stripped fish. Toss it all to get well heated, and add at last minute a few drops of lemon juice. Put the fish in the center of a hot dish and surround it with very small potato balls.

Macaroni Favorite.—Break one-fourth package of macaroni, and boil with salt to taste, one-half hour. Put a layer of macaroni in earthen dish, then layer of soft bread crumbs, layer of grated cheese and butter. Repeat, and pour over top one egg well beaten and mixed with a cupful of milk. Bake slowly until a nice brown. This is a popular supper dish.

Food Control Corner

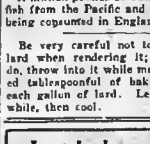
An Order-in-Council has been passed upon the recommendation of the Food Controller to prevent unnecessary delay in the reloading or re-shipment of food or food products in freight cars. It provides that no freight car containing such products shall be allowed to remain under load at its destination for more than four days after notice of its arrival has been given by the Railway Company to the consignee. When any such car is detained for a longer period the Railway Company is required to notify the Food Controller.

Similarly the Food Controller must be notified if any freight car containing food is held at any railway point for a furtherance order for more than one day after the arrival of the car.

If a car remains under load at its destination for more than four days or has been held more than one day for a furtherance order, the Food Controller is authorized to give written notice requiring the unloading or issuance of a furtherance order within two days. At the expiration of this period the food, if not unloaded or reshipped, will be sold by the Food Controller.

The Food Controller is also authorized to forbid the acceptance by the Railway Companies, without his written permission, of food from any shipper whose goods have been seized and sold. For failure to comply with the provisions of the order a penalty is provided of a fine of up to $500 or imprisonment for a term not exceeding six months, or both fine and imprisonment.

The Food Controller, through the Fish Committee of his office, is starting a campaign to increase the use in Canada of frozen fish. This effort will be part of the larger campaign to increase consumption of all kinds of fish in order to release beef, bacon and other meats for export to the Allies.



A member of the Fish Committee is of the opinion that an increased demand for frozen fish should result in the decrease in market price as an abundant supply was available. Many people have a prejudice against frozen fish simply because they do not understand the proper method of handling it. Whatever have been the practice in the past, the present method of freezing fish shortly after they are caught prevents deterioration and the fish is delivered to the consumer in ideal condition.

To prepare frozen fish for cooking it should be put in cold water and left there for several hours in order that frost may be entirely thawed from it. It will then be in practically the same condition as before it was frozen. Many people make the mistake of pouring hot, or even boiling water, on frozen fish in order to thaw it. This has the result of breaking down the tissues and leaving the fish in a flabby condition which makes it undesirable for cooking. This practice is responsible in a large measure for the prejudice among Canadian housewives against frozen fish of any kind.

A million pounds of Canadian frozen fish from the Pacific and Atlantic are being consumed in England weekly.

Be very careful not to scorch the lard when rendering it; but if you do, throw into it while it is melted a heaped tablespoonful of baking soda for each gallon of lard. Let it cook a while, then cool.

I wish there was a Walker House in every little town

I wish there was a WALKER HOUSE
In every little town;
Then I could travel cheerfully,
And always sit me down
At night in peace and comfort,
Happier than king with crown,
If there was just one Walker House
In every little town.

I wish there was a WALKER HOUSE
In each place where I go.
The comforts of my dear old home
While on the road I'd know.
The meals—thy Cheerful Service, too,
Would leave no cause to frown.
If there was just one Walker House
In every little town.

Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

The Garden Seed Bed.

A noted garden writer has said that the greatest pleasure in gardening is "the joy of seeing things grow," and in no way can this pleasure be had in the same measure as in the raising of small plants from seed for your own garden.

It does not require a very large space to grow a large number of young plants. For the home garden, 50 by 100 feet in size, a plot three feet wide by fifteen feet long will be amply sufficient. This for the start, but in following years, when you become more expert in handling of the seed bed, you will cut this down and get just as good results.

It is an advantage to have the seed bed long and narrow, so that it can be easily reached from the path, making the work more pleasant and getting better results. A short person will get better results with one thirty inches wide.

The location of the seed bed is very important; in fact, there is but one good location in every garden, and that is along the north fence, so that it will be exposed to the sunshine all day and be protected from cold winds. If the fence is an open one, such as palings or wire, it will be well to cover it along the seed bed with building paper, fastened on, to make it tight from the wind.

Good Drainage Necessary

The seed bed should be specially prepared. The soil should be deep and well drained. If necessary to get it so, excavate it to a depth of two feet, fill in four to six inches of drainage materials, such as stones the size of railroad ballasts, bats, coarse cinders or other similar mineral rubbish.

On this put the soil, which should be specially prepared. Use the loam removed from the excavation, with as much in addition as may be needed to take the place of the subsoil removed. Give it a heavy dusting with powdered lime, and one of a good chemical fertilizer. Work all well together.

On top of the drainage put four to six inches of the richest well-rotted manure you have available, and on this the soil, which should then be worked as fine and smooth as possible.

However, the soil is not just thrown in. It is an advantage in earliness to plant seeds on a bed which slopes to the south. This you can accomplish when putting the soil in the seed bed by making it six inches higher at the back than the front, using a board in front to retain it. This makes a warmer bed, and produces a better growing condition for continuous seed and plant growth.

In the seed-bed are planted the main crop or late varieties of vegetables, and a small space should be reserved for the transplanting of a few of the early ones when it is safe to plant them out, but before setting them in the garden proper.

Sow Seeds Compactly

Do not plant the different kinds of seeds promiscuously, or in long ribbon rows. Try the newer and better way. Mark off the seed-bed into as many squares as may be needed, each of a size to suit the quantity of seeds to be planted. Plot these on a paper, and mark the names of the seeds on them, as a matter of reference and record. You will find it very convenient to be able to work with all the plants of one kind right under your hand in a compact square, instead of having to walk along a long row.

Take sufficient time to plant the seeds in the seed-bed thinly; by which is meant do not crowd them in the rows. When planted carelessly they are likely to be bunched in some place and thinly set in others. Practice a few times dropping small seeds from the thumb and two fingers on a paper until you can do it evenly, and you then are ready to sow them in the soil.

One of the things desired to be attained in transplanting plants is to increase the root-mass before there is much top-growth. When a plant is taken from the seed-bed and transplanted it loses most of its rootlairs, which are reproduced in greater number in its new location before the top gets additional growth. This makes for a vigorous plant.

The vegetables usually sown in the seed-bed are: Cabbage, onions, beets, cauliflower, parsley; peppers, celery, lettuce, tomatoes, chard.

Hogs

Two or three pigs are enough to a pen during cold weather for the animals crowd and when many are together they become very sweaty. Exposure while in this condition makes them unhealthy.

Little pigs are happy in a snugly built, warm, movable hog house, and he is their mother. Such a house is splendid in providing warmth, dryness, abundant direct and indirect sunlight, ventilation, sanitation, safety, comfort, convenience, serviceability, durability, low first cost, low maintenance, and pleasing appearance.

These movable sunlit houses are easily cleaned because they have solid wooden floors and plenty of space inside in which to work. That they are durable is proved by the fact that several such houses built at the Iowa Experiment Station in 1907 look as if they would stand ten years more service.

Such a house is good for the brood sow, the little pig, the fattening hogs, and the herd boar. All are contented within its walls; and it costs not more than one half the present value of a 250-pound hog.

The Dairy

Finding The "Boarder" Cows.

I have been in the dairy business for fifteen years with varied success, says a dairyman. According to my experience it takes about five years for a cow to develop. Up to that age I am not positive whether she is going to be a "boarder" cow or not. Now if there could be some means provided to aid one in determining exactly whether a yearling is going to grow into a good cow or not, such means would prove very valuable to dairymen. Many of the heifers would be fattened and sold for meat while, on the other hand, not a few that go directly to the shambles without a trial at the pail would be given a chance to show their value as dairy animals. The scales and the Babcock test are the only accurate means we have of knowing what a cow can do, but these can be used only when the animals are producing, and as a heifer may prove to be a good cow after an unprofitable season or two, we cannot see where the practical dairymen are going to avoid the heavy expense involved in weeding out the "boarder" cow and at the same time not waste valuable potential dairy cow material.

Artificial coloring of gold fish by keeping them in water containing certain chemicals is extensively carried on in Sicily.

Poultry

Selecting a Receiver.

In selling eggs in case lots, or live poultry by the crate, locate good trustworthy receivers and stick to them. The writer met a poultry-keeper the other day who had shipped eggs to the same city concern for twenty-five years. He seldom had cause for complaint about returns, and when he did complain, errors were quickly rectified. Between him and the commission firm there was more than an ordinary business relationship; there was friendship. The steady, dependable shipper gets twice the attention at the hands of a receiving firm that the producer does who ships first to one house, then to another.

Business standing and reputation should be considered in selecting a receiver. Some egg receivers deduct no commission, others deduct one or two cents a dozen, and still others charge a percentage. Some concerns buy either by case count, or loss off (for breakage, bad eggs, etc.), and others by case count only. Simultaneous trial shipments and a comparison of returns from different firms is the best way of getting at facts. The concern which charges no commission may really be the costliest one to ship to. It will pay the producer of well-graded eggs to ship loss off where that is possible. On numerous markets there are no loss-off buyers.

Beware of the agent who calls at your farm and solicits shipments, promising better than market prices.

A Fan-Bag Obstacle Race.

To prepare the "race course" for this amusing contest, form a zigzag passageway about three feet wide by arranging two lines of chairs, tables, benches, and other articles of furniture. The more it winds the better it will serve the purpose.

Blow up a medium-sized paper bag and tie it at the top with string. Place the bag at the beginning of the course; then get a palm-leaf fan and, while one of the company times you with a watch, fan the bag along the passageway to the end.

You must take care not to allow the bag to strike at any time the sides of the course or any part of your person. Neither should you allow the fan to touch the bag during the entire effort. Should you commit either of these errors, you lose your turn. The player who covers the course in the shortest space of time without violating any of the rules of the game wins the contest.

"Observation is the most enduring of the pleasures of life."—George Meredith.

Eat More Poultry and Eggs.

"We are short of red meat. Our soldiers and our allies require more than ever before. We are advocating in every household, every hotel and restaurant in this country the substitution of poultry for red meat. Increased production of poultry can be effected much faster than beef, pork and mutton. While we want increase in all the latter, we must have a quick response in poultry and poultry products. There is a great waste of poultry feeds from every household and farm. It requires little labor. Cannot the poultry raisers of the country help us by providing the increased supply we need?"

These are the words of Herbert Hoover in an appeal directed to the American Poultry Association and producers of poultry and egg- in the United States. The words are just as applicable to Canadian Poultry Producers. More meat must be provided for the fighting men. Less of the meats that can be shipped must be eaten at home. Something else must be substituted for the red meat. Poultry and eggs make the best and cheapest substitute at the present time and should be used more than they are for that purpose.

The prices asked for these are reasonable when compared with the prices of other meats. At present rates poultry, either fresh or stored, is one of the cheapest meats on the market. Though new-laids are high, the stored eggs are reasonable in price and quite palatable. Fresh poultry is selling on many markets at from 15c. to 24c. per lb., and good stored eggs from 40c. to 50c. per dozen. These prices are practically the same as before the war but when compared with the present prices of other meats prove conclusively that they are no longer a luxury.

The prices of eggs and poultry were formerly comparatively high, and consumers, to a certain extent, discontinued eating poultry produce, now, when the relative prices have changed the impression remains that poultry and eggs are still a luxury. As a result the consumption of these is not as large as it usually is.

There are several good reasons why poultry and eggs should be used more than they are as a substitute for beef and bacon:—The soldiers and the Allies must have meat and we cannot send them poultry and eggs. We have a good supply of poultry products in Canada at present. They make a palatable and a cheap substitute for the red meat required by the soldiers: Poultry are more easily grown and can be produced in less time than other live stock: The young and the old can supply all the labor necessary for this work.

Take-It-Back Day.

Be quick to take it back again,
The article you borrow;
And don't postpone that duty plain
To some remote to-morrow.

I fear it sounds a little stern,
And yet I have the feeling
That borrowing without return
Is most the same as stealing.

Our neighbors good our needs supply
Without a word of fretting.
'Tis wrong to pass such kindness by
And pay it by forgetting.

Then take it back, whate'er you owe,
Till neighbors all are sunny;
For friendly hearts, of course you know,
Are worth far more than money.

Oh, all who labor, all who strive,
Ye yield a lofty power!
Do with your might, do with your strength,
Fill every golden hour—
The glorious privilege to do
Is woman's noblest dower.
Then to your country, to yourself, to your own God be true!
A weary wretched life is theirs
Who have no work to do.

When making cakes with dripping if a few drops of lemon juice are beaten up with the dripping the cake will taste as well as if butter had been used

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not it will be answered personally, if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnoses. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Who would not be covetous, and with reason, if health could be purchased with gold.—Temple.

Cancer.

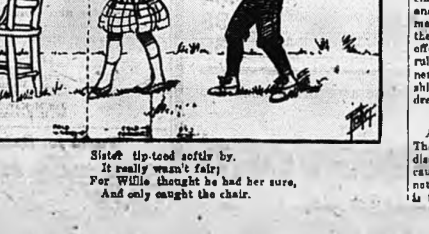
Cancer is always a tumor, a swelling, a "lump," as many people say, and they are apt to think of a tumor as being necessarily a cancer. But to the doctor any kind of a swelling means a tumor; and there are at least a score of them—bone, cartilage, fat, fibroid and the like. Also there are several kinds of cancer differing in the degree of their malignancy (their life-endangering effects) and in their development. Most benign tumors, however innocent to begin with, may by reason of constant irritation become cancers; therefore whenever possible they should be removed. Thus may not only definite and sure cure be vouchsafed, but also such a relatively slight and shockless operation will result in the least disfigurement or mutilation. Certain kinds of moles and birth marks may take on malignancy. For their removal, only the experient advice and skill must be sought. An unskillful operator (many a beauty doctor is such) may leave some microscopic portion of the growth, which may become the seat or focus of a future cancer. Superficial cancers, as those of the face and lips, are reasonably recognizable by professional sight and touch and by microscopic examination. Deep seated cancers are much more difficult to detect. Oftentimes the only indication of them is a functional disturbance of the organ involved in the growth and perhaps also of other and associated organs. Therefore those after forty, especially women, who find their health not as it should be, had best without delay go to their family physicians for examination. I will mail further information about cancer to all who send me a stamped and self-addressed envelope.

QUESTIONS AND ANSWER.

Take No Chances.

About a month ago a swelling formed under the left side of my tongue bluish black in color. About in the center of this is a little pus pocket. Although I have been using a mouth wash prescribed by a druggist I don't seem to notice the swelling go down. It is about the same size as at first. It troubles me mostly when I eat.

Answer—I have no desire to frighten you; but this may be cancer, as any growth in the mouth that does not get well within a week or at most a fortnight. Go to a capable physician and get thoroughly examined. Yours is no case for over-the-counter prescribing. Read the above. I am mailing you further information.



Bronchitis.

I am 20 years old. This fall I broke down with my nerves. I have chronic bronchitis, and have had a bad set of boils and carbuncles. I have now no desire to keep up my physical being.

Answer—Are you sure the ailment is bronchitis; better get thoroughly examined. Am mailing you information regarding boils, which are most weakening.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Sister tip-toed softly by.
It really wasn't fair;
For Willie thought he had her sure,
And only caught the chair.

MOTHER WISDOM

By Fisticuffs and Quarrels the Child Works Out Ideals of Right and Justice

By Helen Johnson Keyes and John M. Keyes, M.D.

There are many ways in which children receive education; many ways outside of school, even outside of the direct influences of home. These are forms of self-education—education through the instincts.

Quarrelling is one of these educational instincts. It is exceedingly disagreeable to grown-ups; it is noisy, vulgar and selfish. Yet, undoubtedly, it is a means by which children learn for themselves the meaning and need of fair play, peaceableness and co-operation.

We may preach these virtues to our young people year after year without really gaining their attention but when Sam learns from Bill's fisticuffs that the social organization does not tolerate a bully; and when Julia finds out from Mary's bitterness that friendship will not endure pugilishness, these children are beginning to become citizens.

Most of our moral progress since first we tasted of the knowledge of good and evil, has been along the line of yielding to other men the same privileges we claim for ourselves.

It has been a strangely slow progress. Truly it is curious that it should have taken our race hundreds and hundreds of years to learn the joy of being just to the human creatures with whom we share this earth!

Curious that we are learning so, slowly that law and order make for happiness! Even into the midst of an age confident of its humanitarianism has broken the great European war. In view of all this we should be patient with our children who, like us, learn the golden rule very slowly and who, after having seemed to learn it, like ourselves, break it over and over again.

Fight For An Ideal

When men go to war, we look beyond the horror and brutishness and the atrocities and find the courage, the loyalty, the idealism of the fighters. Do not you believe that children when they quarrel and fight also have an ideal for which they are struggling? Surely they have! Beyond the coarse struggle for a sack of candy or for the front seat at the "show," there is a principle in their minds and they are working out a problem of right and justice even stronger than their greed.

I believe it is dangerous to make a habit of settling children's quarrels for them, to separate them in their encounters. I believe this for the reason that I think the education of experience and the punishment of consequences are the strongest corrective forces we have. When we settle a quarrel we shield our children from the consequences of their acts and thereby, perhaps, make cowards of them or else headstrong men and women who will rush into experiences without counting the cost because they have never had to pay that cost.

I said it was dangerous to make it a habit to settle children's quarrels. Of course, there are occasions when they must be stopped abruptly. I do not believe that children should be allowed to disturb the quiet of the home and the work and rest of older

Your Child's Time.

Friendship is one of heaven's most supreme gifts, and certainly our friends should be cherished. But for the very reason that our friends are so dear and close to us, and have so great an influence upon us, hardly any other element outside the home touches the lives of our children so intimately and so frequently. Our friends are a great possible influence for good or harm in the lives of our children; and the extent to which we shall allow them to influence us in handling our children and the extent to which they shall directly influence our children constitute one of our gravest problems and concerns.

The facing of this problem requires that we must know our friends—must study them from the standpoint of the best interest of our children.

First, we must rid ourselves of the conventional idea of what is due one's friends—of that fear of "what will Mrs. Blank think?" and for them we must substitute, as our foremost consideration, the happiness and well-being of our children.

If this be our first consideration, if we know our children, and if we have tact, many of the harmful ways in which our friends thoughtlessly touch our children's lives can easily be avoided. Even so seemingly trivial a situation as a friend calling at a time that interferes with a child's eager expectations can easily be met in a manner so that no one is hurt or disappointed. "This is my afternoon with John, and we have planned a very special party"—this said graciously, with some light elaboration or emphasis appropriate to the project, and with the manner of continuing immediately, will save the situation for the child, and can not possibly give offense to any sensible friend. As a rule, if we proceed in the right manner, we will suffer no loss in friendship. But consideration for our children must always come first.

A garden is troublesome at times. There are troublesome insects and diseases and unfavorable weather that cause anxiety and loss, but there is nothing worth having in this life that is to be had without trouble.

people. There is no necessity for it, and the effect of such license is their selfishness.

On the other hand, they must have the freedom of outdoors, space and privacy to wage their wars. Children will quarrel. Boys will fight. Fortunately, we can not help it. Their honor is involved and it should make us feel more trustful of humanity to observe that when a child's sense of honor demands a certain act, he performs it even though some grown-up may tell him his sense of honor is all wrong.

So then in quarrelling and fighting, a child has an idea of justice to fight for and a law of honor to fight with. These are his moral inspirations. Physically, in the fight, he must be strong, quick-witted and decent, all qualities deserving respect and exercise. Moreover, a boy's fights do not destroy friendships; they often make them stronger.

Quarrels Are Educational

Girls usually remain "huffy" after their quarrels, probably because these are only intellectual and do not have the exhilaration of physical exertion! Even so, I believe their quarrels are educational. They make girls less sensitive to disapproval and criticism, which is a hardening they need when they go out into the world; and these encounters teach them to take care of themselves and express themselves outspokenly, which power is a real defense to a girl in many perilous situations.

Teasing has not any nobility. It is an employment where one person has all the fun and the other person all the torture. The habit should be broken. Its effect sometimes is to ruin a disposition. Of course there is such a thing as good-natured bantering but it is seldom seen among children, who are too personal to receive the attack without temper.

A child grows into a responsible man or woman through his increasing powers of working and playing fairly with other human beings. He does not learn this until he has found out the penalties of being unfair and ungenerous. What he learns from experience, he believes in thoroughly; what he is merely told he must believe in, he always feels doubtful about.

Moreover, what he learns for himself he likes; what is taught him by commands from other people, he often dislikes. The men and women who like goodness are really good people and we should give children every chance to find out the happiness and the advantages of virtue.

I do not say that children need no guidance and no checks. But in the case of quarrelling and fighting, I believe their comes of interference at the moment when they are taking place (unless they are disturbing the peace of the household) and that parents can best guide their children away from the quarrelsome habit by the influences of a home where every member has his or her own rights and is taught to yield the same rights to his family and neighbors fairly and generously.

A Gymnasium "Bee"

By M. B. McNutt.

The spirit of the old-time "bee" which led people to do things together is not entirely dead. You have heard of spelling bees, husking bees, and many other kinds of bees, but did you ever hear of a gymnasium bee?

In Fayette, Ohio, and surrounding community needed a place for indoor recreation. So the class in manual training, inspired by the principal of the high school, began the construction of a gymnasium as a part of the regular public-school work. But as the winter weather was approaching, all the boys in the school turned out one day with hammers and saws and helped finish the work. The girls of the domestic science class prepared a dinner for thirty-five workmen, planning and serving the meal themselves.

The structure cost $900 besides the work. One third of this amount was contributed by the school board, one third raised by popular subscription, and the remaining third is to be raised by school entertainments.

There are many uses to which a building like this, in a country community, may be put. Aside from basket ball, indoor baseball, and all sorts of gymnastic exercises, it may be used for musical and literary entertainments, dramas, singing schools, institutes, fairs, poultry shows, school exhibits, political and patriotic meetings, lyceum course, moving-picture shows, stereopticon lectures, union church services, and all public meetings. It may be made the social center of the whole community.

This institution is managed by a board of three directors.

What enterprising La Fayette did, any community can do. Young people become interested and are developed by engaging in worthy projects.

Apples and dates make a good combination requiring no sugar. To prepare them, steam until tender in a covered pan, one and one-half quarts of sliced apples and the grated pool of one lemon with one-half cupful of water. Add one-half cupful of chopped dates, simmer the fruits together for six minutes and serve cold.

PAISLEY, FEB. 20th, 1918

—Mr Wm McDonald, M P P, our member of the Legislature, is going to be a busy man this session, if he carries on all the work that is thrown upon his shoulders by being appointed on five Committees—Railways, Private Bills, Municipal Law, Agriculture and Colonization, and Printing. As the people's William was brought up on a farm and has spent a few years managing a country newspaper office, he knows real well what work means and will no doubt do his bit in speeding up the legislative wheels of his province in this year of the war.

—Commenting on the opinion that from this time forward girls will continue to be employed in banks, the Kingston Standard thinks men should vacate the occupations women are equal to. It says: "It scarcely seems a man's work to be measuring out ribbons, selling dress goods and so on. The time has come when men should do men's work now and in the future. Farming, engineering and occupations such as these call for men. Canada is full of opportunities for men to engage in these and it is to be hoped that one lesson taught by the war will be that men should go into these, both in their own interest and those of the country. If women make use of their chances at the present juncture this may be brought about to an extent little thought of at the present time."

—More big projects were discussed at the Hydro Radial Electric Association. To run our railroads by electricity instead of steam was one of the subjects discussed, and strongly favored by the delegates. If carried out this plan would not only effect a saving of 3,500,000 tons of coal per year, but would also remove the necessity of adding to our already costly net work of railways a proposed system of hydro-radials that could not be built for less than $25,000,000, but which is now desired as a competition to the steam roads. We see it stated that the steam locomotive to-day is outclassed in power, flexibility, reliability, ease of control, economy, comfort, and in every feature by the electric locomotive. A resolution was adopted favoring the nationalization of the Grand Trunk Railway.

—It would not be hard to make a rule that so much bread should be used by each person at a meal, but, the Food Controller says, how many million police would be wanted to attend to the execution of the order? One might prescribe the use of beef and wheat in Canada by decree but its incidence would be unequal from the first. There is, however, one way in which the food saving could be made which is the whole end and object of rationing. It is by a voluntary pledge of each home. In few words this is nothing else than by unremitting patriotic saving of the food-stuffs that are known to be wanted by the Allies. No amount of talking can make up for this. It is not a legal question at all but a moral one, which must be left to the conscience of each household head. There is no better way for the present in which those who cannot go to the trenches can actually help in the fight in Europe for moral uprightness and pure ideals of life than in practising in each home at all times of the day that honest carefulness to avoid waste which would have to be done under a compulsory rationing scheme. In a way this is a new factor which hitherto it has not been possible to utilize. The Canadian woman is here especially indicated to aid. So far woman's work in the Dominion has had to do with Red Cross and similar works of mercy. This opens out the field most enormously. Every woman who saves bread, beef and pork products is in fact and deed wielding an unseen weapon in the war as truly as her sisters behind the trenches are in caring for the broken and the maimed.

—Concerned only in our own provincial fuel problem, the people of Ontario sometimes are inclined to shiver at the thought of how cold we might be if the United States should decline to furnish our province with coal. It seems there is no need for us fearing any such step being taken by our republican neighbors, as they actually import from Canada more coal than they export. The Maritime Provinces of this dominion do more to keep Uncle Sam's industries going by supplying soft coal than the Pittsburg region does for Ontario in sending us best and steam coal. So as long as we can keep the account overbalanced as at present, we are not likely to have our comfort cut down for lack of coal from across the border.

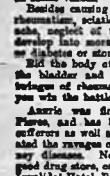
F. CARTER & SON



"WHO WILL WIN THIS BATTLE?"

Your kidneys are the filters of the body. If they become inactive and fail to eliminate the waste matter, they are apt to throw the whole mechanism of the body out of order, these toxic poisons can accumulate in the system and be as deadly as snake venom.

Besides causing the minor ailments of rheumatism, sciatica, lumbago and backache, neglect of the kidneys is apt to develop into more serious diseases, such as Diabetes or stone in the bladder.

Rid the body of toxic poisons—clean the bladder and kidneys and cure the twinges of rheumatism with Anuric and you win the battle of life.

Anuric was first discovered by Dr. Pierce, and has benefited thousands of sufferers as well as appeased and stimulated the ravages of the more serious kidney diseases. Now procurable at any good drug store, or send Dr. V. M. Pierce, Invalids' Hotel, Buffalo, N. Y., or branch office, Bridgeburg, Ont., 20 cents for trial package.

Thorold, Ont.—"I was wonderfully helped by taking 'Anuric.' For about three years I had kidney trouble and rheumatism. I also had backache. My limbs would swell and I had rheumatism in my arms and hands. My hands would swell and joints would be so sore and stiff I could scarcely do my work. They would pain me something awful. I doctored but without relief. At last I saw 'Anuric' advertised. I began its use and two bottles completely cured me of all my rheumatism, and I think it was permanent for that was a year ago and I have never had any return of this ailment. I have never found a medicine so good as 'Anuric'."—MRS. E. H. HUTTY.

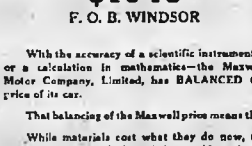
Letters from the Soldiers

Been on Leave from France

Pte Lawrence Putnam, who has been at the front in France for some time, wrote home on Jan 20th telling of the way he enjoyed a fourteen days' leave in England and Scotland. In London he saw many of the notable sights of the city, which have already been described in other soldiers' letters. "On Jan 3rd," he says, "I went out to see the 160th boys at Witley Camp. The sergeants made me stay with them. They gave me a big chair in the mess room and were all greatly interested when I told my experiences at the front. I have never missed a trip in the line since last April. . . At Glasgow I received a hearty welcome at the home of Mr Geo Matthews, a brother of my comrade stretcher-bearer. They sure gave me a good time. . . I enjoyed every minute of my fourteen days' leave. When I returned to France I found fourteen letters and two parcels, which made a lovely surprise after receiving no mail at Christmas. I am very thankful to my many friends for their kind remembrances. Included were eight pairs of socks and two Advocates. My french boots are the best I have seen and fit perfectly. (Many thanks). No, I could not send a cablegram after a battle because we are in the line and too far from telegraph office. Yes, the mud is awful, especially in Belgium. I feel very deeply the loss of my comrades, Emerson and the boys, but that is what we have to expect out here. I have not seen their battalion since. My comrade Thorne was killed beside me, on duty as stretcher bearer. I have not seen Rev John McNeill for some time. Yes, I voted for Union Government."

With the Artillery Section at the Front

Gnr S S McKenzie, writing home Jan 21st, thus relates his initial experience at the front in France: . . "I think I told you in my last letter of 17th that I would not likely be going up to the gun pits for some time. But late that same night the sergeant told me that he and others, including myself, would be going up the line to get the gun pits ready for the guns. So next morning about 9 o'clock we left the wagon lines and reached here, a distance of some miles, before noon, and have been digging, carpentering and stealing material for some ever since. It is just like a holiday to get away from the horses, mules and stables for a while, especially as the weather has been fine, almost like late spring in Canada, most of the time since we came up (though, of course, it seems impossible to get away from the mud, but I am seasoned to that now). This being my first trip "up the line," it seems rather queer to be writing this letter between 25 and 30 feet under the ground. We have a fine big dug-out for our home while here . . It was formerly a German dug-out, and he sure knew how to build them. It is perfectly dry, the walls and ceilings being of heavy planks, with board floors. The stairway and walls of same are also of wood. The three rooms which five of us occupy are a little more than high enough to allow a man to stand up. Two of the rooms we use as sleeping quarters, and the third (which adjoins another dug-out like our own) we have turned into a writing or sitting room, and have fixed up benches, table etc. Each of these rooms is about 6 or 7 feet by 9 feet and about 6½ feet high. At the foot of the stairway a few feet from the entrance to each room, we have rigged up a first-class stove, made from a large, heavy can, about 20 inches high and a foot in diameter. This old tin can will throw more heat than most ordinary stoves, and serves the double purpose of keeping the place warm and dry (though it is never really very cool in a deep dug-out like this, even in cold weather), and for heating water for cocoa, tea, chocolate, etc. For stovepipes we have long 3½ inch water pipes. At present we have such a fine coal fire in it that the stove is partly red hot. The first night we were here we were so anxious to experiment with the stove that we started a wood fire in it without any pipes connected, trusting that the smoke would all go up the stairway and out by the entrance. At first it worked fine, but later the wind changed, and as a result both ourselves and several fellows of B sub, who are in the adjoining dug-out to ours, were nearly smoked out. So next day we got busy and rustled the pipes which serve the purpose nicely. So you see, our quarters are pretty nearly what you might call "jig"—in other words fine. As Fritz apparently is unaware of our presence in this locality he hasn't dropped any of his shells anywhere near us, though he continually shells a ruined town about half a mile or more away. Several of us on a plank salvaging party could see the shells landing four or five hundred yards away, but we were not anxious to go any nearer (a case he decided to switch his fire. Unless you have actually seen with your own eyes a village or town (or rather what once was such) ruined by shell fire, it is impossible to form the least conception of what it really means. There are, or were, several towns about here within a radius of a couple of miles, one of them being about the size of Wiarton, but at present there isn't even so much as a single brick wall left standing in some of them. They are absolutely and completely wiped off the map. Many of the cellars, which is all that is left, are used by troops as dug-outs or the entrance to same, but otherwise there is no sign of life about the places at all. A short distance away there is an old coal mine and buildings, but the whole place has been so badly demolished by both sides in the fighting around here nearly a year ago that it is not safe to go near the buildings for fear of the remains of the brick walls or machinery falling. The ground all about the place is full of old shell holes, which are now full of water, and old trenches run in all directions. I have seen several small air fights and to-day one in which at least a dozen machines were engaged, but in no case were the engagements fought to a finish. Heinie's machines generally go as high that it is impossible to tell with the naked eye whether it is British, French or German, until suddenly a battery of anti-aircraft guns (which till that moment you didn't know was in the vicinity at all) opens up—bang, bang, bang—and several seconds later you see the shells bursting around the plane high up in the air. Then you know for sure it is a German machine. Some of the fellows seem able to tell by the sound of the engines whether the machine is our own or the enemy's, but I am not quite experienced enough for that yet."



—Printing Invitations is part of THE ADVOCATE'S business.

—Walkerton Council has appointed Mayor Johnston as fuel controller for the town.

—"Advertising is the education of the public as to what you are, where you are, and what you have to offer in the way of skill, talent and commodities. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service." Elbert Hubbard.

MAXWELL

Most Miles per Gallon — Most Miles on Tires

$1045

F. O. B. WINDSOR

With the accuracy of a scientific instrument—or a calculation in mathematics—the Maxwell Motor Company, Limited, has BALANCED the price of its car.

That balancing of the Maxwell price means this:

While materials cost what they do now, the Maxwell Company finds, it is impossible to build, and sell for less than $1045, any motor car in which efficiency, durability, economy, comfort, beauty and standard equipment are all present, as they are present in Maxwell.

On the other hand, these being co-ordinated in the Maxwell, all you could get by paying more money for a motor car would be either larger size or greater luxury of furnishings.

In other words, the Maxwell is built and sold on the MIDDLE LINE of real value.

This finding of the Maxwell builders is based on the lessons learned in many years of production on a vast scale.

We believe it to be scientifically—absolutely—correct.

D. A. LYON, Dealer, Paisley

AN EFFICIENT LEADER

WORK DONE BY GENERAL LOGIE IN THE WAR.

If Every Military District Had Done as Well as the One Over Which the Former Hamilton Lawyer Presides There Would Not Have Been Any Necessity for the Military Service Act.

It is now well known that Sir Arthur Currie was a professional real estate agent, and only an amateur soldier, before the outbreak of war in August, 1914. After upward of three years of war, it is not surprising how far that characteristic has run the ranks of the Canadian army; in fact, it characterised the Dominion's military forces from the outset. Apparently, every trade, profession, or means of obtaining a livelihood, outside of a military career, is represented. Further, some of the types of men ordinarily expected to join the "officer" class have been found in the ranks, and vice versa. The story is told of a professor from a Western university who went overseas as batman to an officer who, in civilian life, was a plumber.

The same "condition of affairs" applies to the army at home. While the permanent forces have been distinguished by men like Major-Generals L. J. Lipsett, C.M.G., and H. E. Burstall, C.B., and Brig.-Generals J. H. MacBrien, D.S.O., J. E. Ernatin, and P. E. Thacker, C.M.G., the majority of men occupying high fighting and administrative positions are from civilian life. Major-General E. W. Wilson of the Montreal command was an insurance agent in Belleville before hostilities commenced. Major-General W. A. Logie, who has made a name for himself in the work entailed by the mustering of the troops in Military District No. 2, was, and still is, a Hamilton lawyer.

One hundred and thirty thousand men is the contribution of Military District No. 2 to the Canadian army in Europe, an accomplishment that this district, which is half agricultural and half industrial and therefore needs so many of its young manhood at home, might well be proud of. It is away above the district's quota of the half million promised from Canada by Sir Robert Borden, and if all other districts had equally lived up to the letter of Sir Robert's promise, conscription would never have been considered by the Premier.

But the provision of 130,000 men—civilians—is not the alpha and omega of military organization; it is only the beginning. The end of organization is when the men are finally despatched overseas, and they come under the "fighting commands."

Few people realize the immense amount of detail connected with the enlistments and making of an infantryman, or the responsibility that is upon those made responsible for his training. But the work and responsibility imposed upon the one man in charge of this really great task is increased manifold. If is one thing to train an established army, where a large proportion of the personnel, officers and N. C. O.'s, have been previously organized and completed their military training at different military institutes, such as the Royal Military College, Kingston, and Sandhurst, England, and consisting of men who enlist in an army, etc., but it is another thing to take charge, and train men who, until the call came, never entertained the idea of training for war work, and to whom military life is at first unpleasant and irksome.

Under these circumstances, the results that have accrued during the past three years, or to be exact, since December, 1914, are a fitting tribute to Major-General William Alexander Logie, who has had charge of this difficult and exacting work for the greater part of that time, and has succeeded in making a reputation for himself that few men have made, even in the war zone. Being attracted by the events and happenings afar off, people are prone to overlook the events at home. The work of such men as Major-General Logie is perhaps too close, too familiar, too much a matter of daily report, to be really and fully comprehended and appreciated.

General Logie has made repeated requests to be permitted to go to the front on active service, but it was soon realized that his services were of more value at home. The organization of forces in Military District No. 2, the training of the men for work in the trenches, required competent men to remain in Canada despite their inclinations to be overseas. The work of fashioning the Canadian ploughshare into the sword was no easy task, especially when environment worked against it.

Assisted by no elation of the actual battlefield, impeded by difficulties far greater to contend with than are to be found outside of Canada, with no honors such as those given men in the zone of active operations, Maj.-General Logie has been patient, persevering, and indeed, long-suffering. He has had to play the part of a soldier and stern disciplinarian, a diplomat and a dictator. He has had to be fearless and determined. His greatest enemy for two years was the politician. "Pull" and "influence" were resorted to by all the sundry who wanted to pick their positions. The politicians who would "do" themselves with the "boys" criticised his work and his decisions. But his critics are silenced, and his work is a monument to a loyal service to his country in time of need.

These thousands of men were enlisted from their homes and thanked almost next door. At one time platoons were seen drilling on many of the city's side streets. This was not through lack of organization, but through lack of sufficient facilities for training the hosts of men who then flocked to the colors. Influenced by home environment, discipline was hard to maintain, as the men were under direct military rule only when on the parade ground. The few outbreaks that did occur when the camps were full of men speak eloquently of General Logie's ability to handle his work. At times it needed but a spark to set the train alight. General Logie and his staff sat upon a virtual volcano for months, but they prevented its eruption. The Camp Borden episode was forced upon them by the failures and weaknesses of others, yet the officers managed to keep the embers of revolt from breaking into a dangerous conflagration. It required determination and fearlessness to assume responsibilities like this where Major-General Logie succeeded. The Logie-Mewburn-Bickford combination was a powerful one, and Canadian arms has derived a great benefit in this, Canada's hour of military distress, from their forethought and sagacity.

The selection of men to command the battalions that grew so thick was no easy task; it was one fraught with big responsibilities. The commanders had to be soldiers and leaders. The lives and welfare of upwards of 1,200 men would depend upon their leadership and ability to cope with sudden emergency. True, the department at Ottawa made the final appointment, but the selections fell upon General Logie. He had no confidential reports to refer to as to a man's qualifications, etc., before making his selection. It was a difficult task, but the wisdom of those selections has stood the test at the front.

Major-General W. A. Logie is the son of a Wentworth County judge. He graduated from Queen's University with the B.A. and gold medal in classics in 1887. His post-graduate course was the M. A. degree a year later. In 1890 he took the LL.B., in his law course, and finally entered the legal profession in his native city of Hamilton, with the firm of Chisholm & Logie. There is no need to run through Major-General Logie's career as a lawyer; suffice it to say that he was enjoying a large practice at the outbreak of war.

It is the custom, as much as it is the fruit, for many prominent Canadian militia officers to say that they joined the militia as a private, and rose through the ranks to take out their commission. Major-General Logie did this, and, good, thoroughgoing Scot as he is, he preferred the Highlanders. At the end of 1903 General Logie, then Lieut.-Col. Logie, was head and mainstay of the 91st Highlanders of Hamilton, but was later placed in command of the 16th Brigade. Besides being a first-rate infantry officer, General Logie also qualified as a full Colonel of artillery, the result of his course at the Kingston Military College.

As Col. Logie, he took over the command of the Second Military District when General Lessard was made Inspector-General of Forces in Eastern Canada. From that time on he has been "sawing wood" vigorously, sometimes striking a few hard knots, but always going on, and in his sawing he built up a force that has reflected credit and made history for Canadian arms.—E. ONLY MEDICINE MADE FROM FRUIT

Extraordinary Success which "Fruit-a-tives" Has Achieved

One reason why "Fruit-a-tives" is so extraordinarily successful in giving relief to those suffering with *Constipation, Torpid Liver, Indigestion, Chronic Headaches, Neuralgia, Kidney and Bladder Troubles, Rheumatism, Pain in the Back, Eczema* and other Skin Affections, because it is the only medicine in the world made from fruit juices.

It is composed of the medicinal principles found in apples, oranges, figs and prunes, together with the nerve tonics and antiseptics of proven repute.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

Brantite and New York.

An honest old burgher of Brantford was enabled by some strange chance to visit New York, and was questioned when he came back as to the character of that city, to which, it is said, he answered that "New York, a' thing considered, was a wonderful place; but still Brantford for pleasure!"

For the BOYS & GIRLS

Ray Coon And The Birthday Basket

"Do you know what morning this is?" asked Mother Coon one crisp morning in the early part of the winter. When she asked the question, Ray Coon was just taking his sled to go coasting.

"Oh, yes, indeed!" answered Ray Coon promptly. "It is Saturday."

Mother Coon laughed and laughed until her glasses fell off her nose and the tears rolled down her cheeks.

"Trust you to know that!" said Mother Coon at last, wiping her eyes with a corner of her apron. "Especially when school is keeping. But this is a very special Saturday. It is the birthday of your dear grandfather, and I've filled a basket with good things for you to take to him. Can you start right away?"

Of course Ray Coon could start right away, and very gladly, too, for he was always happy to do any kind of errand for his mother; and there was no place that he liked better to go to than Grandfather Coon's home in Oak Hollow.

He put the basket of good things on his sled. Then Mother Coon buttoned his coat tight and told him not to stop and play on the road, and he set off through the woods, whistling cheerily as he trudged along.

Ray Coon had not gone far when he heard the sound of a trumpet beyond a hill, not far from the pond where he some times went skating.

"That's Reddy Fox," said Ray Coon to himself, "or may be it is Rusty Fox. They blow that trumpet so much that sometimes I am almost sorry that I gave it to them."

Pretty soon Ray Coon met Reddy Fox. He did not see Rusty Fox, and he did not know that Rusty was hiding behind a big tree when he and Reddy stopped to say "Goodmorning!"

"Where are you going?" asked Reddy Fox politely.

"Over to Grandfather Coon's," said Ray Coon. "It is his birthday, you know, and Mother Coon is sending over some good things for him to eat."

"I hope that he will like them," said Reddy Fox, and he chuckled in a way that Ray Coon did not understand. Then he put his trumpet to his lips again and went on down the road.

Ray Coon did not know that while he and Reddy Fox were talking Rusty Fox had crouched from behind a tree with a crooked stick and had taken the basket of good things from the sled. That was a little joke that the Fox boys had planned to play on Ray Coon when they saw him coming through the forest.

Ray Coon had not gone far, however, before he looked to see whether the basket was safe. The sled was bare! The basket was gone!

"My!" cried Ray Coon. "The basket must have fallen off! I'll run back and find it!"

Just at that moment he heard a cry from the pool beyond the hill. "Help! Help!" came the cry; and Ray Coon knew that it was the voice of Rusty Fox.

Ray Coon at once forgot all about the lost basket and ran through the woods to the shore of the pond as fast as he could go. There he saw Rusty Fox struggling in the water. He had fallen in not far from the shore.

"I'm coming, Rusty!" panted Ray Coon as he ran. "Hold tight a minute longer!"

He took his new Christmas knife from his pocket and cut one end of the long rope on his sled. With the help of that he quickly pulled Rusty Fox to the safety of the shore. Not until then did he see the basket of birthday good things on the shore of the pond. Rusty Fox had left it there when he stepped out on the ice to see whether it were strong enough to bear him.

"Why!" cried Ray Coon. "There's my basket! Did you find it when it fell from the sled?"

Rusty Fox was shivering from the icy water, and he looked very wretched and unhappy as he answered. "It did not fall from the sled, Ray. I took it off when you and Reddy were talking. We wanted to play a joke on you. I am ashamed of it now."

"Well, well!" chuckled Ray Coon. "You got the worst of that joke. It's lucky that I heard you call for help. Run home now and get dry. I'll come over to see you this afternoon."

And Ray Coon put the basket of good things back on his sled and went off through the woods toward Grandfather Coon's, whistling cheerily as he trudged along the snowy road.—Youth's Companion.

A WALL and A FIRING SQUAD

GRIM RECITAL OF A COWARD'S FATE

Many Vivid and Varying Experiences Make Up the Life of a Fighting Man.

It is unlikely that you have ever heard of Arthur Guy Empey, sometime a United States citizen, now a machine-gunner in the British Army. Yet in America he has made known the British fighting-man and his methods to a wider public than perhaps any other writer. Some half a million copies of his book, "From the Fire Step," have already been sold, and there is no slackening in the demand.

Mr. Empey, like many thousand others of his race, was not too proud to fight when the Huns sunk the Lusitania. He tells of many vivid and varied experiences in his book.

There is the story of the spy in the trenches, for instance. For days rumor had been rife that a German, dressed as a staff officer—red hatband and all—was prying round the British lines. It was whispered that an order had been issued to place anyone answering the description under arrest.

The Irishman's Capture.

So it happened that Empey and a friend—Atwell—on special intelligence duty, happened to be in a communication-trench when "we were horrified to see our brigadier-general, Old Pepper, being brought down it by a big private of the Royal Irish Rifles. The general was walking in front, and the private, with fixed bayonet, was following him in the rear.

"We saluted as the general passed us. The Irishman had a broad grin on his face, and we could scarcely believe our eyes. After passing a few feet beyond us the general turned, and said in a wrathful voice to Atwell:

"'Tell this d—n fool who I am. He arrested me as a spy.'

"Atwell was speechless. The sentry burred in with:

"'None o' that gassin' out o' it! Back to headquarters, you goss, Mr. Fritz. Open that face o' yours again, an' I'll deal in your napper with the butt o' me rifle.'

"The general's face was a sight to behold. He was boiling over with rage, but he shut up.

Bayonet Stops Argument.

"Atwell tried to get in front of the sentry to explain to him that it was really the general he had under arrest, but the sentry threatened to run his bayonet through him, and would have done it, too. So Atwell stepped aside and remained silent. I was nearly bursting with suppressed laughter. One word and I would have exploded. It is not exactly diplomatic to laugh at your general in such a predicament.

"The sentry and his prisoner arrived at Brigade Headquarters, with disastrous results to the sentry.

"The joke was that the general had personally issued the order for the spy's arrest."

A much more grim story finds its place in the book. About two one morning Empey was awakened. "Opening my eyes, I saw a regimental sergeant major bending over me. He whispered:

"'Get on your equipment, and, without any noise, come with me.'

Sealed Orders

"This greatly mystified me, but I obeyed the order.

Outside of the billet I asked him what was up. But he shut me up with:

"'Don't ask any questions. It's against orders. I don't know myself.'

"It was raining like the mischief. We splashed along a muddy road, finally stopping at the entrance of what must have been an old barn."

An officer took particulars of Empey's name and rank.

"When he had finished writing he whispered: 'Go into that billet and await orders. No talking. Understand?'

"I stumbled in the barn and sat on the floor in the darkness. I could see no one, but could hear men breathing and moving.

"During my wait three other men entered. Then the officer poked his head in the door and ordered: 'Fall in, outside the billet in single rank.'

"We fell in, standing at ease. Then he commanded: 'Squad—Shun! Number!'

"There were twelve of us.

"'Right—Turn! Left—Wheel! Quick—March. And away we went.

In the Grey Dawn

"With the officer leading, we must have marched over an hour, when suddenly the officer made a left wheel, and we found ourselves in a sort of enclosed courtyard.

"The dawn was breaking, and the rain had ceased.

"In front of us were four stacks of rifles, three to a stack.

"The officer brought us to attention and gave us the order to unpile arms. We each took a rifle. Giving us 'Stand at ease!' in a nervous and shaky voice he informed:

"'Men, you are here on a very solemn duty. You have been selected as a firing squad for the execution of a soldier who, having been found guilty of a serious crime against King and country, has been regularly and duly tried and sentenced to be shot at 3.29 a.m. this date.' This sentence has been approved by the reviewing authority, and ordered to be carried out. It is our duty to carry on with the sentence of the Court.

"'There are twelve rifles, one of which contains a blank cartridge, the other eleven containing ball cartridges. Every man is expected to do his duty and fire to kill. Take your orders from me. Squad—Shun!'

A Human Target.

"We came to attention. Then he left. My heart was of lead and my knees shook.

"After standing at 'Attention' for what seemed a week, though in reality it could not have been over five minutes, we heard a low whispering in our rear and footsteps on the stone flagging of the courtyard.

"Our officer reappeared, and in a low but firm voice ordered: 'About—Turn!'

"We turned about. In the grey light of dawn, a few yards in front of me, I could make out a brick wall. Against this wall was a dark form with a white square pinned on its breast. We were supposed to aim at this square. To the right of the form I noticed a white spot on the wall. This would be my target.

"'Ready! Aim! Fire!'

"The dark form sank into a huddled heap. My bullet sped on its way, and hit the whitish spot on the wall; I could see the splinters fly. Someone else had riddled the rifle containing the blank cartridge. But my mind was at ease, there was no blood of a Tommy on my hands.

Dismissed.

"'Order—Arms! About—Turn! Pile—Arms! Stand—Clear.'

The stacks were re-formed.

"'Quick—March! Right—Wheel!' and we left the scene of execution behind us.

"It was now daylight. After marching about five minutes we were dismissed with the following instructions from the officer in command:

"'Return, alone, to your respective companies, and remember, no talking about this affair, or else it will go hard with the guilty ones.'

"We needed no urging to get away. I did not recognize any of the men on the firing squad, even the officer was a stranger to me."

The writer learnt later that the man had been shot for cowardice.

WASTAGE IN LOGGING CAMPS.

Food Conservation in Canada's Lumber Camps Urged at Congress.

At the Pacific Logging Congress held recently, Mr. W. B. W. Armstrong of the British Columbia Loggers' Association made some very pointed remarks in connection with the present wastage of foodstuffs in logging and lumber camps. Something like a competition has developed among the several companies in providing luxurious food for their employees, with the definite object of attracting men to their employ. It was stated that: "now the foods served in our logging camps are more expensive and more varied than those used in our own homes or in the average hotel." Mr. Armstrong attributed the present "great waste of food" in the camps to the general and lavish use of canned fruits and vegetables. This waste he classified as follows:

1. The labor cost of canning fruits and vegetables is greater than that of drying or evaporating.

2. The heavy syrup in which fruits are put up is very expensive—and this class of fruit is used almost exclusively in the camps.

3. The material of which the containers is made is expensive and scarce, and is, moreover, very necessary for the conduct of the war.

4. It has been demonstrated that the food values of evaporated fruits are equal, if not superior, to those of the same materials put up in a heavy syrup.

No class of men, he pointed out, requires better food than the logger if he is to be efficient, "but, of late years, the selection of his food has been wrong in theory and wasteful in practice." As a remedy, Mr. Armstrong urged that this mistaken competition should be stopped by the companies co-operating [illegible] working out a standard diet of [illegible]le, body-building foods for their employees. He urged that legislation be had enforcing such standardization, at least for the period of the war.

It is most desirable that the men should be given plenty of wholesome food prepared in sanitary kitchens and served in clean, bright dining rooms, but this may be done without "the tremendous waste that now prevails."

Music During Air Raids.

To the folk of London town air raids have ceased to be a novelty. Londoners are meeting the trying circumstances with fortitude. During the raids music is frequently called into commission to enable the people to keep cool, be cheery, and stand the strain. One evening it is related that when the raid was on, a street organ in a sheltered corner of a busy thoroughfare ground out Leslie Stuart's "Soldiers of the King" with an air of defiance that is typical of the British spirit. In the days of the South African war that same number, which was then "Soldiers of the Queen," nerved many a heart.

A little later the same evening there was heard in a home some voices accompanied by a piano singing the old hymn "Hold the Fort." These represent the spirit that will not down.

Never forget that rye flour is a good substitute for wheat.

THE WAYS OF THE SPIES

ESPIONAGE NATIONAL UNDERTAKING OF GERMANY.

Incidents Which Throw Light on Methods Used by Prussians to Obtain Information.

A comprehensive account of the system of espionage in peace and in war would need something resembling the dimensions of a general encyclopaedia, but incidents which have come under my observation during the last few years throw white side lights on the whole of the game, says Capt. D. Fallon, of the Australian Army.

The Germans, before the war, as everyone knows today, made of espionage a great national undertaking. Spying is a very essential ingredient of Prussian character. The German has a natural tendency to spy not only upon his acquaintance but upon every one and every thing. Their military spying is as perfect as such work can be, marred occasionally by the contempt they feel for other nations in military masses.

In the course of my travels about the world I have met many Germans of high rank who have sunk their social distinction and taken up the most menial work. They served as hotel workers and porters, stewards on board passenger steamships; anywhere, in fact, they could come in close contact with people of the outside world, from whom they could glean a little information for their government.

Spies Shot on Sight.

The public in general believe that all spies are shot at sunrise, but you can take it from me that they are shot on sight. It might happen that they are caught in some action at four o'clock in the afternoon and at ten minutes after four they are dead. But does that deter them? Not in the least. They just keep on coming.

They come at morning, at noon and in the evening, and even at night they are to be found. They come dressed as our own people, as peasant girls, as natives of a country whom one is fighting and even the church is desecrated by these spies, who hold nothing in reverence.

The first regular spy with whom I came in contact was on board the good ship Thenie Koches as we were going from Australia to Egypt. A Boche had signed on as a stoker and had been caught in the act of attempting to destroy the engines with bombs. He was taken and summarily disposed of. The other ships of our convoys were not so fortunate, for six of them had to return to Australia. Their engines had been tampered with. The natives of Egypt used to do most of the menial work in our camps, clean the linen, look after the tents and tidy up where necessary.

Posed as a Native.

One of these natives, who had received a billet to clean up headquarters, was found one day looking over correspondence which was marked secret. He was just handed to an escort and shot.

During our stay in Egypt spies were at work in all disguises. Bazaars were plentiful and many a good Anzac met his death in them, until we found arms in one of them and burnt it about the heads of the occupants.

Other spies were caught while asking information about the numbers of battalions and brigades, the divisions and how many men Australia could send if they were all sent. On one occasion one of the men was asked if he would sell his rifle for £100. He reported that to his officer, and they trapped this native as he came along with the money for the rifle. He was found to be a German in disguise and was taken away and shot.

In the Dardanelles we had these spies about us constantly. Even after we had surmounted the impossible heights of Gallipoli we were not free of them. The day following the night of the first attack, as the sun rose over the hills to the east, the order was passed down the lines to fix bayonets. Soon as the order reached me I shouted along the line, "Who gave that order? Unfix bayonets!" But the harm was done. We were simply hurled under Turkish shrapnel. And even to this day I do not know who gave that command.

Spies in British Army.

Later on, during our advance on Lone Pine, after a bloody hand-to-hand combat where we had wrested the position from the Turks and were consolidating it, the order came from the left to retire on the first line. I knew when this order reached me that it was given either by a spy or by a fool. So I sent my platoon sergeant over to find out whence the order came.

He shouted along the line, "Who gave the order to retire?"

The reply came, "From Lieutenant Wilhelm."

But the sergeant, knowing that there was no officer in the battalion with that name, suspected one chap in khaki to be a German spy. The sergeant went right up to him, found he had a square head and blue eyes and light hair, and drove his bayonet right through him. On examining the spy we discovered in his pockets a code of signals which had been arranged between the spy and his friends in the Turkish lines.

When resting in Belgium, just behind the lines, a young peasant girl who daily supplied us with the European edition of the Herald and other newspapers and occasionally with food, was noticed by one of the boys to jot down something on a piece of paper. He at once reported the matter to me, and I watched her until she had sold all her newspapers and supplies and followed her into a disused house which had been partly destroyed by shells.

Father and Daughter.

I lurked around for about a quarter of an hour, expecting something to happen, and I noticed a pigeon making its way out of the tumbled down cottage and flying toward the enemy lines. Drawing my revolver I entered the house and made my way to where I heard bits of conversation. I surprised a man and this young peasant girl talking rapidly and excitedly. While moving toward them I tripped over a piece of stone and made a noise which turned their attention to me. The man was in the act of pulling a revolver out of his pocket when I fired. And caught him full. I then frightened the girl by telling her that I would do likewise with her if she didn't hand over all the documents and maps and any information she had of our lines. From her I received rough sketches of our trenches, ammunition stores, food dump and the whereabouts of our rest billets.

Getting the information, I marched her back to battalion headquarters and handed her over, with the documents I had obtained. The court sentenced her to imprisonment for life. She proved to be the daughter of the man who was with her.

When we were occupying Helbeturne before the Somme drive we noticed that though all the buildings of the town had been destroyed the church tower had escaped any material damage. The Germans were heavily straffing Helbeturne at that time, and somehow or other they would commence their fire just as our convoys and reinforcements were coming up with supplies and food, ammunition and mail.

Cloak of Religion.

We were nonplussed at this regular straffing of our convoys, and though we had changed the times of sending up men and supplies the shell still found them. One night one of the sentries during his tour of duty noticed a lamp flashing from the tower of the church and reported the matter immediately. An officer and a few men were detailed to enter the church and make themselves safe to the cause of the unusual incident. They met the curate leaving the church, and asked him if he had noticed any lights flashing from the tower.

Without looking into the officer's eyes he said "No," but the officer was suspicious, placed him under arrest and searched the tower. There he found a heliograph and a flash lamp. The curate, or spy, hiding under the cloak of religion, was shot at dawn.

YOU WILL WIN IF YOU STICK.

Wherever's a will there's a way, my lady,
If the will have the strength to serve;
But the goal is not reached in a day, my lad,
And the winning takes patience and nerve.
It's a long, long way and a hard, hard road,
And a lifetime is hardly enough
But you'll win if you stick
To the roadway you pick
And your heart is the right kind of stuff.

Oh, a bit of a song will help, my lad,
And a grin will ease many a pain.
The coward goes down with a yelp, my lad,
Get up and go at them again.
It's a long, long way and a hard, hard road,
To the thing that you're longing to do,
And the key to the game,
Is to stick to your aim,
And courage will carry you through.

Aye, many a path leads out, my lad,
From the road to the thing you want,
And they're pleasant to travel, no doubt, my lad,
And it's hard to know that you can't.
It's a long, long way and a hard, hard road,
And you haven't the time to rest;
So pick up your load
And stick to your road;
You will win; if you give it your best.

—Edgar A. Guest.

WEARS HAT BEFORE KING

Lord Kingsale May Remain Covered in Royal Presence.

There is but one other peer beside the holder of the Forester barony who enjoys the privilege of wearing his hat in the Royal presence. This is Lord Kingsale, an ancestor of whom, having in the reign of King John been champion of England in a dispute with France, was granted, and his successors in perpetuity, the privilege of remaining covered in the presence of the Sovereign. The privilege is, of course, never exercised at the present day, but in the time of King William III. the then Lord Kingsale appeared before the Sovereign covered.

Delicious muffins can be made from dried bread crumbs.

NATURE OF INSURANCE.

Combination of Interests Distributes Individual Losses.

Experience may show that, of 10,000 dwellings having an aggregate value of $50,000,000, fifty are damaged by fire every year and a loss of $250,000 entailed. Experience does not indicate, however, which 50 of the 10,000 will be burned next year nor the proportion of damage that will be done in any one. Consequently, each individual owner, where there is no system of insurance, is liable at any time to the total loss of his investment. But, assuming that these 10,000 property owners combine into one group, it is clear that they substitute for individual uncertainty a definite knowledge. Upon the basis of past experience, the annual loss upon the whole group will amount to $250,000, and it, therefore, follows that an assessment of one-half of one per cent. upon the valuation of each individual's property will provide sufficient funds to reimburse the loss of the entire group. The element of probability, when distributed over a group, becomes a certainty, and the larger the group the greater the certainty.

In its commercial aspect, fire insurance is an accumulation of funds to meet future eventualities by applying the law of average to losses by fire. Damage, to any given building, in any given location, within any given space of time, is a matter of uncertainty. With the combination of a number of separate buildings into a group, the element of probability is introduced. It is in the application of this principle that a distinct gain to society is apparent in the institution of insurance.

CONVALESCENTS AT HALIFAX.

Returned Heroes Are Undaunted by Big Handicap.

The indomitable spirit of the Canadian men who return from the front disabled for further military service, subject, according to the extent of their wounds for further medical treatment or vocational re-education under the Military Hospitals Commission, is glimpsed in the following story told by the Y.M.C.A. officer at the Halifax receiving depot.

Concerts are held every night in the recreation room of the depot while the men are detained there, and the talented citizens of Halifax have been very generous in giving their services. For the last load to land before the big disaster there was the customary programme on the night of their arrival. The battered heroes lined the big room. In the back a row of wheel chairs drew up as a rear guard, and in the front on the floor sat a row of lads cross-legged.

The artist was a young woman, a visitor in Halifax, unaccustomed to the maimed back-wash of war as Halifax has seen it since the first transport of disabled pulled into port. The expectant faces before her were a stimulus she never had known before; and when she stopped the room rang with a clamor of approval.

In the front row were two lads each of whom had lost an arm. They were boyish men carried away with enthusiasm. They just had to applaud somehow and so they got together on it. One lad held out his one hand and the other laid his into it with resounding whacks.

The young woman sang every song she knew at that, and when after the encores a friend said, "You never sang so well before," she replied, "And I never expect to sing so well again. I'll never again have those two wonderful lads to inspire me."

MOTOR FROM RURAL CHILDREN.

Country Schools Give Second Bus For Convalescent Soldiers.

The rural school children of Ontario have given a second motor bus to the Military Hospitals Commission to be used in transferring soldiers under treatment in the various convalescent hospitals in "D" Unit.

The presentation was made by Premier Sir William Hearst in front of the Parliament Buildings in Toronto and it was a proud day for the youngsters who had sacrificed many little pleasures to make their patriotic contributions.

The first motor bus was presented in the fall and came from the contributions made last year. It was a fine bus and has seen very active service in getting the men from the hospitals to their vocational training classes and the theatres. The second is a similar car.

These same children are purchasing a moving picture machine for the soldier settler colony at Kapuskasing.

A Child's Thought of God.

They say that God lives very high;
But if you look above the pines
You cannot see our God; and why?

And if you dig down in the mines
You never see Him in the gold;
Though from Him all that's glory shines.

God is so good. He wears a fold
Of heaven and earth across His face—
Like secrets kept, for love, untold.

But still I feel that His embrace
Slides down by thrills, through all things made,
Through sight and sound of every place;

As if my tender mother laid
On my shut lips her kisses' pressure,
Half waking me at night, and said,
"Who kissed you through the dark, dear treasure?"
—Elizabeth Barrett Browning.

Models for the Week

Sailor suits are always appreciated by the boy, and this is a particularly good model of one. McCall Pattern No. 7776, Boy's Middy or Sailor Suit. In 4 sizes, 2 to 8 years. Price, 16 cents.

This is a practical design for the cold-weather leggings. There is a choice of lengths. McCall Pattern No. 6810, Child's Leggings and Legging Drawers. Pattern in 7 sizes, 1 to 12 years. Price, 10 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

A DISLIKE FOR FOOD

Victims of Indigestion Often Dislike the Sight and Smell of Food.

Every healthy man and woman should have a natural desire for food at meal times. This means that the digestion is in working order and that the blood is in good condition. But if you feel a dislike for food—if the sight and smell of wholesome food repels you—then you may be sure that all is not well. If after a night's rest you have no appetite for breakfast, your digestion requires attention. If your food is distasteful, or if you feel that it is a trouble to eat, your stomach is rebelling. You do not digest properly the food you are taking and therefore not hungry.

All these symptoms of a disordered digestion mean that the blood is not absorbing proper nourishment from food, for the work of the blood is to collect proper nourishment from food and impart it to the system. The stomach tries to refuse food the nutriment from which the blood cannot absorb, and this causes the lack of appetite. If you force yourself to eat the undigested food becomes a clog to the system. Nature is warning you. Dr. Williams' Pink Pills alone give the blood the richness and purity that it requires to perform its natural function. That is why Dr. Williams' Pink Pills cure the most obstinate cases of indigestion—why they will cure any trouble due to poor blood. Miss Lizzie Ashton, Thamesville, Ont., says:—"I suffered for years with stomach trouble. At times the distress was so great that vomiting would follow, and there was always severe pain after eating. I tried several remedies but they did not help me. On the contrary the trouble was growing worse, and got so bad at last that I could not keep anything on my stomach. Finally I began using Dr. Williams' Pink Pills, and gradually the trouble began to leave me, and I regained in all respects my customary good health, and enjoyment of food. I make this statement voluntarily so that others may know of the wonderful results that follow the use of this medicine."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Jack Frost Failed.

I like to hang my washing out of doors in winter as well as in summer, but the clothes freeze, and so frequently by the clothes pins freeze to the clothes so tightly that they tear when taken off the line. I have found that by adding salt to the Bluing water the clothes pins will not stick fast even in the coldest weather.

Cleanliness is a matter of tremendous importance in everything that pertains to food.

How Kidney Trouble Struck Uxbridge Man

Mr. R. J. Thompson Was Seized With Convulsions.

Her Life Was Despaired of, But After Using Dodd's Kidney Pills He Feels Himself Again.

Uxbridge, Ont., Jan. 21st (Special.)—Mr. R. J. Thompson, who lives on R.R. No 2, near here, is loud in his praises of Dodd's Kidney Pills.

"I am delighted with Dodd's Kidney Pills," he says. "The doctors said I could not live, and if I did I would never be able to do anything again, as I had chronic Bright's Disease. But, thank God, I am doing my own work again.

"My trouble came on very suddenly. I had just finished my dinner, and was taking a man home when I was taken with a convulsion fit. I had fourteen that afternoon, and the third day I had nine more.

"I have taken only eleven boxes of Dodd's Kidney Pills, and I feel like myself again."

Mr. Thompson is only one of many in this neighborhood who look on Dodd's Kidney Pills as the standard remedy for kidney ills. They are purely a kidney remedy, and are used for all kidney troubles from backache to Bright's disease.

CHINA'S PAPER SCARCITY.

Is Now Importing Old Newspapers From United States.

The scarcity of paper has become so acute that China is now importing over issue and old newspapers from the United States in large quantities. One Hongkong house alone reports that so far this year it has imported such paper to the value of over $225,000 gold.

The papers are imported to be used for wrapping purposes, and to meet the needs of the market it is necessary that they be whole and of good standard to large size. In some recent consignments bales have been found to contain old magazines and even old clothing, shoes and other waste. A shipment to Saigon through Hongkong and for the account of a Hongkong firm was found to be so badly mixed with all sorts of waste that the Chinese concerns for which the paper had been imported refused to accept it.

In some cases material mixed with the paper would have as much value for paper stock as the over issue newspapers, but it is not wanted and does not meet the purpose for which the newspapers are purchased. The Hongkong General Chamber of Commerce now has on hand an arbitration of claims growing out of the shipment of paper not up to contract, and Hongkong importers at present are accepting deliveries only after examination.

There is a steady demand for these over issue and old newspapers throughout the Far East, which can be maintained as a profitable trade (at least so long as the price of paper remains where it is) provided exporters will realize the special purpose for which the paper is bought and ship only such stock as will probably fulfil requirements.

ORIGINATORS OF SEA KULTUR.

Bluefish Resembles the Prussians in Its Barbarous Habit.

Bluefish is the leading Mediterranean exponent of kultur now that the U-boat has begun to subside. Not even the shark is proportionately so vicious as this small game fish. He kills for the fun of killing, without reason or excuse, slaughtering anything that crosses his path, and not hesitating to attack any large creature of the deep that goes sailing by.

Scarcely ever weighing more than five pounds, he consumes at least seven ounces of food a day, and this weight does not take into account the amount of food he swallows, for the bluefish has the most barbarous habit of all fish.

As he attacks he bites off large pieces of flesh from his victim, and without taking time to cast the mouthfuls aside he swallows the quivering meat and snaps again with his powerful "chopping machine" jaws. He keeps this up until the fish he has swallowed makes him slow, in which case he darts away and vomits the accumulated mouthfuls. After this he sweeps back to the attack again. When attacking a giant fish the bluefish assault in force.

Kultur with them is scientific, as it is with the Prussians. They move in perfect order and discipline, sweeping round and round the fleeing monster in circles, each fish darting out of the circle, tearing away a piece of flesh and falling back into the line.

Keep Baby Warm.

When the baby creeps around the cold floors in winter he should have something warm on. I made a warm petticoat out of three pairs of white stockings which he had outgrown. I cut off the feet, cut them lengthwise and put them together, stitching on each side of seams. The top of the stockings were used for the bottom of the petticoat. I put a little waist on of canton flannel.—J. P. H.

The worst thing about many machine sheds is chickens.

King Honors C.P.R. Official

Sir Arthur H. Harris, Director of Overseas Transport.

Sir Arthur H. Harris, who has been made a Knight Commander of the British Empire for his services in Canada as Director of Overseas Transport, is a son of the late Henry Vinton Harris of Devonport, Devonshire, England.

Educated at the Devonport and Stoke Grammar School he came to this country in the seventies, entering the services of the Grand Trunk Railway, and rising to the position of General Freight Agent Through Traffic.

In 1902 he joined the Canadian Pacific Railway since which date to August, 1914, he was actively engaged in initiating traffic for the Company's rail and ocean services.

On the outbreak of the war, the President of the Canadian Pacific offered Mr. Harris' services to the Imperial and Canadian Governments for the purpose of organizing and directing an Overseas Transport Department, the successful administration of which is now recognized by His Majesty.

He is a member of St. James' Club, Montreal; Rideau Club, Ottawa; and the Montreal Royal Golf Club.

In 1898 he married a daughter of the late William B. Lambe, B.C.L., of Montreal, granddaughter of the late Hon. Wm. Morris, at one time Receiver-General of Canada, and niece of the late Hon. Alexander Morris, First Governor of Manitoba and the North West Territories.

WHEN BABY IS ILL

"Mother, when your baby is ill, when his little stomach and bowels are out of order; when he is troubled with constipation, colic, colds or his teething is painful give him Baby's Own Tablets—the perfect medicine for little ones. Concerning them Mrs. Alphonse Pelletier, St. Damase, Que., says:—"Baby's Own Tablets are a grand remedy for little ones. I used them on my baby with wonderful results." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

FOOD AND THE WAR.

Relative Position of the Entente and the Central Powers.

Britain has been slow to realize and slower to admit, but it is now beginning to make the confession, that in the matter of food and some other things much less important supplies, time is now beginning to fight on the side of Germany and against the Entente; whereas formerly time was always accounted the ally of the Entente. The Germans are preparing to make the most of the Italian agricultural areas which they have conquered to produce more food for Austria and Germany. By the 1918 crop season they will be able to produce very largely from the conquered areas of Old Poland, Rumania, France and Belgium.

Further their human power for the purposes of this production will be increased not only by the release of hundreds of thousands of prisoners useful enough for agricultural purposes if not for further military service, but also by the privilege of drawing upon the labor capacity of the conquered areas. The moment that peace or even a long armistice is arranged with Russia, Germany will resume with all the zeal which its spectacular necessities dictate, the programme of penetrating Russia and making Russian resources available for the support of Germany.

So that Britain, France and Italy, none of them now able to produce nearly all their food requirements, confront a future in which their food necessities will tend to face an increasing deficit of supplies, in proportion as the cumulative effects of submarine warfare become more serious. Germany on the other hand, will tend to escape from the effects of the food blockade and to increase its supplies.

RECEIVING DEPOT REPAIRED.

Halifax Hospital Ready for Disabled Men From the Front.

The Receiving Depot of the Military Hospitals Commission on Pier No. 2 at Halifax, which was badly damaged in the great explosion, has been repaired and is now ready to receive the ships from overseas bearing the invalids and disabled men back to Canada.

Immediately on receipt of the news of the disaster, Lt.-Col. J. J. Sharples, C.O. of the Military Hospitals Commission Command, left Ottawa for the scene to offer all the aid which the military hospitals could afford in the care of the injured. On his arrival arrangements were immediately made to restore the big depot which has received thousands of men in the past year, and the work has been completed.

In the interim the men returning were landed in New York and train service handicapped by lack of coal delayed their homecoming considerably. The value of the Military Hospitals Commission in the splendid facilities and organization of Halifax for the care of returning soldiers has gained a new appreciation in this one experience.

Minard's Liniment Cures Colds, Etc.

Forest Associations of Quebec.

The co-operative forest protective associations in the province of Quebec have been remarkably successful in reducing the damage by forest fires throughout large areas of that province. The pioneer in this movement was the St. Maurice Forest Protective association, organized in 1912. The success with which it met resulted in the organization of other associations until now there are four such, protecting a total of nearly 70,000 square miles of forest land. These associations are maintained and administered primarily by timber owners, although the provincial government contributes to their support in consideration of the protection afforded unlicensed Crown lands. Approximately 80 per cent. of the licensed Crown timber lands of the province are now under this form of forest fire protection. Each association has a manager, staff of inspectors, and force of fire-rangers, all selected on the sole basis of fitness for the work in hand.

Money Orders.

Send a Dominion Express Money Order. They are payable everywhere.

The City of Lyons has opened a professional training school for the higher technical and scientific development of French women.

Minard's Liniment Cures Diphtheria.

The popularity of the easily accessible wrist watch was doubtless what inspired the production by Parisian jewelry designers of a ring watch. It consists of a tiny timepiece mounted on a finger ring, and, if desired, embellished with precious stones.

Minard's Liniment Co., Limited.

Sirs,—I have used your MINARD'S LINIMENT for the past 25 years and whilst I have occasionally used other liniments [illegible] that I have never used any equal to yours.

I rubbed between the hands and inhaled frequently, it will never fail to cure cold in the head in 24 hours. It is also the Best for bruises, sprains, etc.

Yours truly,
J. G. LESLIE.

Dartmouth.

Canoes of Mahogany.

Major John S. Leitch, one of the five rangers of the Dominion Forestry Branch in Manitoba, who has been overseas from the beginning of the war with the Royal Fusiliers in British East Africa, writes as follows:

"Out in the tropics the majority of rivers can be crossed by a standing jump as it were. Rivers such as Canada has are a great surprise to the tropical man. What canoes are here are dugouts made by natives out of solid mahogany or teak trees. They take months to make and are very heavy. I have yet to see the first African making a portage with his canoe on his back. Some of these canoes are big enough to take 60 men or 3½ tons of stores."

GIRLS! WHITEN SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter-pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, redness, and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

Diamond Cutting For Heroes.

When peace is restored and England's disabled soldiers return to civil life they will not be without resources. Bernard Oppenheimer, who fought for England in the Boer War, realizes the lot of an ex-soldier who has to face life with the handicap of an amputated leg or arm.

In the London Technical College about 100 limbless soldiers are being taught diamond cutting. The scheme has been so successful that Oppenheimer has started building a block of factories in Brighton, where more than 1,000 will be able to learn the trade. Six months is the period of training allotted the soldier workman. On completion of the training Oppenheimer offers them a guaranteed minimum of three years employment if they care to stay in the factory and a minimum wage of $10 a week.

YOUR EYES Murine Eye Remedy At Your Druggist's or by Mail. In Tubes 50c. Paint Book of the Eye free. Write Murine Eye Remedy Co., Chicago

It is hardly possible to realize the lack of knowledge of proper gardening methods which exists among the farming population of certain portions of the country.

Minard's Liniment Cures Garget in Cows

In taking out subsoil for feeding remove an equal depth of the material from the whole surface daily; this exposes the smallest possible quantity of the silage to the air, and so prevents excess spoiling.

IF FOOD DISAGREES DRINK HOT WATER

When food lies like lead in the stomach and you have that uncomfortable, distended feeling, it is because of insufficient blood supply to the stomach, combined with cold and food fermentation. It is such cases my plan now followed in many hospitals and advised by many eminent physicians of taking a teaspoonful of pure bisurated magnesia in half a glass of water, as hot as you can comfortably drink it. The hot water draws the blood to the stomach and the bisurated magnesia, as any physician will tell you, instantly neutralizes the acid and stops the food fermentation. Try this simple plan and you will be astonished at the immediate feeling of relief and comfort that always follows the neutralization of the normal process of digestion. People who find it inconvenient at times to secure pure water and bisurated magnesia can use Bo-grain tablets or what are now frequently called for in this hasty meals pearly prepared should always take two Bo-grain tablets instead of Bisurated Magnesia after meals to prevent fermentation and neutralize the acid in their stomach.

When buying your Piano insist on having an "OTTO HIGEL" PIANO ACTION

WITH THE FINGERS! SAYS CORNS LIFT OUT WITHOUT ANY PAIN

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness of the slanger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding tissue. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.

Doctors Recommend Bon-Opto for the Eyes

Physicians and eye specialists prescribe Bon-Opto as a safe home remedy in the treatment of eye troubles and to strengthen eyesight. Sold under money refund guarantee by all druggists.

A Quick Relief for Headache

A headache is frequently caused by badly digested food; the gases and acids resulting therefrom are absorbed by the blood which in turn irritates the nerves and causes painful symptoms called headache, neuralgia, rheumatism, etc. In 30 drops of Mother Seigel's Syrup will correct faulty digestion and afford relief.

SELDOM SEE a big knee like this, but your horse may have a bunch or bruise on his ankle, hock, stifle, knee or throat.

ABSORBINE will clean it off without laying up the horse. No blister, no hair gone. Concentrated—only a few drops required at an application. $2 per bottle delivered. Describe your case for special instructions and Book 3 M free. ABSORBINE, JR., the antiseptic liniment for mankind, reduces Painful Swollen Veins, Wens, Bruises, Varicose Veins, allays Pain and Inflammation. $1 and $2 a bottle at druggists or delivered.

CUTICURA HEALS PAINFUL ECZEMA

Itched and Burned. Wanted to Scratch All the Time. Scarcely Any Sleep.

"When I was fifteen years old, eczema came in a rash, first on my head, then on my arms and afterwards on my body. It was very painful and was itching and burning so I wanted to scratch all the time. I scarcely had any sleep.

"After I used four cakes of Cuticura Soap and six boxes of Ointment I was healed." (Signed) Mrs. R. H. Carlton, County Steep Creek, Sask., Feb. 6, '17.

Clear the pores of impurities by daily use of Cuticura Soap and occasional touches of Cuticura Ointment.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

MOTHERHOOD WOMAN'S JOY

Suggestions to Childless Women.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is the ability to correct sterility in the cases of many women. This fact is well established as evidenced by the following letter and hundreds of others we have published in these columns.

Poplar Bluff, Mo.—"I want other women to know what a blessing Lydia E. Pinkham's Vegetable Compound has been to me. We had always wanted a baby in our home but I was in poor health and not able to do my work. My mother and husband both urged me to try Lydia E. Pinkham's Vegetable Compound. I did so, my health improved and I am now the mother of a fine baby girl and do all my own house work."—Mrs. ALLIA B. TIMMONS, 216 Almond St., Poplar Bluff, Mo.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential and helpful.

PINKERTON

Miss Alma Reid returned home from Paisley where she has been nursing the late Mrs Malloch.

Miss Mary McKee of Stratford had the misfortune to fall and hurt her arm. She is recuperating at her home here.

Miss Sylvia Reid of Toronto is visiting at her home here.

On Friday evening of last week, two sleigh-loads of youth and beauty of the village, piloted by Tom Richardson and Bert Elphick made their way to the Valentine social at the home of Mr Andrew Bain on the 18th con. As host and hostess Mr and Mrs Bain are to be congratulated as everyone of the crowd there thoroughly enjoyed themselves. A short and varied, but excellent program was followed by the playing of all kinds of games A special feature of the evening was an art competition. Tickets for a cushion were sold, the lucky ticket holder being Miss Mary McKee. A dainty lunch was then served and here again Mrs Bain is to be congratulated. The proceeds of the evening which amounted to about $65 goes to the Red Cross Society.

Owing to Anniversary services in the Presbyterian church in Cargill Sunday there will be no services in the Pinkerton church.

Mr and Mrs Jos Anstead and family spent a few days with friends in Carlsruhe.

The local Red Cross wish to thank Mrs H McAfee for her kind donation of $5.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of Chas. H. Fletcher

—The citizens of Milldmay have arrangements well under way for the incorporation of the place as a village. Heretofore the majority have not been favorable to that step, and Milldmay is yet a part of Carrick Tp.

—The men of Teeswater Methodist church utilized the heatless days in providing heating material for the church for next winter. They were offered trees by a farmer on the cord for cord plan and spent two days cutting, and their bee was a great success.

SECOND CON ELDERSLIE

Jas Vancise has returned from Manitoulin Island, where he was visiting his sister, Mrs T Allen, who is somewhat improved in health.

Mrs Geo Addison and children are visiting her father in Owen Sound.

Mrs W Anderson, who has spent the winter here with her parents, Mr and Mrs J Ward, leaves for her home in the west this week.

Henry Priebe has leased John A McDonald's 50-acre farm.

Mrs Balston, of Blythe, came up to attend the funeral of her sister, the late Mrs Rich Jefkins. Messrs Jas Hope of Paisley, Ed Maxwell and Mrs John Maxwell of Ellengowan also were among friends from a distance.

Died—On Feb 11th, Mary Ann Hope, beloved wife of Richard Jefkins, aged 51 years, 10 months.

A feeling of sorrow and regret passed over this community when it became known that Mrs Richard Jefkins had passed away after a brief illness on Monday evening, Feb 11th. Deceased had not been enjoying the best of health for a couple of years, but previous to a few days before her death was able to attend to her household duties. Diabetes was the immediate cause of her death. The deceased was a daughter of Mr and Mrs Ed Hope of Chesley. She was born and raised on this con and also spent all of her married life here. Besides her sorrowing husband she leaves to mourn her loss a family of two sons, Edward and Frank. The funeral service on Wednesday was conducted by her pastor, Rev W E Phillips Rector of Holy Trinity Church. Interment was made in Chesley cemetery. The friends and relations have the heart felt sympathy of this community in their time of sorrow.

SUCCESSFUL SOCIAL IN GREENOCK

The St Valentine's Social which was given by Mr and Mrs Andrew Bain, Greenock, at their home on Friday night, February the 15th, was a decided success. The weather man favored the occasion with a beautiful evening and the spacious rooms were filled with a jolly crowd each bent on 'doing his bit' to make things pleasant. Under the direction of the chairman, Mr Harvey Clarke, a short but very enjoyable program occupied the early part of the evening. Rev Mr Gale and Senator J J Donnelly of Pinkerton referred in a few words to the good work being done by the Red Cross Society of Pinkerton. Violin selections by Rev Mr Gale and Miss Kathleen Pinkerton, piano duet by the Misses Pinkerton, vocal solos by Mr Arthur Pfaff, vocal duet by Rev Mr Gale and Mrs George Gilchrist were much appreciated by all. After the program, games of various kinds were participated in until the hour for luncheon. The proceeds of the evening are gratifying to all, the splendid sum of sixty four dollars being realized.

Saugeen Council Decides to Commute Statute Labor

At the regular meeting of Saugeen council on Feb 4th the statute labor question was fully discussed.

As a result of the adoption of the good roads system by the county a large number of the road divisions in the township had very little and in some cases no roads on which to perform their statute labor. Three methods of dealing with the matter were discussed.

1st—The method adopted, commutation.

2nd—Commutation on all lands adjoining the county roads, and readjustment of the remainder.

3rd—A general readjustment of the road divisions and continuing all the statute labor.

Of the 1800 or 1900 days' labor in the township over 600 days was assessed on lands that border on the county roads. In view of this fact that one-third of the work would either have to be performed on roads other than those on the county system or commuted, it was thought advisable to treat all parties alike, and as a result there will be no road work in June this year, but $1 will be collected next fall for each day's labor.

The council also decided on a different method of arriving at the amount of labor to be assessed against each lot, which will result in less days for small assessments and slightly greater amounts for large landholders. Several men were appointed to keep the roads in passable condition until the system is in force.

Con 1—Donald Currie
Con 2—Chas Kettles
Con 4—Josiah Bell
Blind line and 18th sideroad—Isaac Thiele
Con 6—D H Chappell
River road from Bell's bridge to Elora road—Chris Bell
Gowanlock road—Walter Gowanlock, Jr.
Con 10 east and Pierson road—W J Pierson
Con 10 west and R R A to con 12—Ed Chappell
Con 14, High street and R R A from con 12 north—Ed Doll

Any other necessary work will be under the supervision of the members of council from the division.

At the same meeting of council Jas Cizek was appointed assessor.

Two tenders were received for cedar—W Anderson at $31, and E Chappell at $30, the latter being accepted.

The auditors' report was presented, showing balance on hand Jan 1st, 1918, $2800.73. The report was accepted and their remuneration paid.

Send THE ADVOCATE to the absent member of the family or to the distant friend. It is as good as a letter from home and is a weekly visitor. You can better imagine how the home paper is appreciated when you are absent yourself and a copy is forwarded to you.

Deering binder nearly new, Deering mowers, Deering hay rake, hay loader nearly new, land roller, disc harrow, set iron harrows, plow, 2-furrow plow, fanning mill, turnip pulper, Gurney scales, 2000 lbs, Adams wagon nearly new, low wagon, seed drill, hay rack, stock rack, grass seed sower, gravel box, buggy pole, hay fork, De Laval cream separator, ropes and allegs, set team harness, set plow harness, Daisy churn, a quantity of 2¼ and 3 inch tile, whiffletrees, neckyokes, forks, spades, shovels, tile scoop and other articles too numerous to mention.

Terms—From one to ten month's credit on furnishing approved joint notes at 6 per cent per annum.

For further particulars and catalogue write Abe Stringer, R.R. No. 2, Kincardine.

JOHN PURVIS, Auct.

Necessary Farm Equipment

MORE and more the Ford car is looked upon by progressive farmers as necessary farm equipment, the same as the plow, the hay-rake, the drill, the mower, the harrow and other labor and time-saving machinery.

A farmer with a Ford car can dispense with one or two of his horses and make the trips to town, railway station, creamery, or to the neighbours in one-third the time. In fact there is no farm machine made that will save the busy farmer and his busy wife so much valuable time as a Ford. And it's so easy to take care of—far easier than a horse. No bed to make, or hay and oats to get, no harnessing and unharnessing, and no stables to clean. The Ford practically takes care of itself.

Ask any farmer who owns a Ford if he would ever again try to get along without it. His answer will hasten your decision to own one.

—The baby is coming in for a larger share of attention from the health authorities and medical specialists. The conservation of life pivots on the rearing of the infant through its helpless period of existence. The mothers are also more generally posted as to caring for their offspring. A baby welfare clinic was held at London, Ont., last week, which was attended by many mothers who went considerable distances, taking their infants with them, to learn what more they could for the little ones' good. Addresses were given by specialists on numerous phases of child welfare and health. We quote one report which is referred to as a combination of the most advanced ideas in regard to the causes and treatment of nervous diseases in children, and the most pronounced pre-feminist views of the offices and duties of the mother:

Emphasizing the great responsibility devolving on the mother, apparently to the elimination of responsibility of the father, so far as could be gained from the lecture, Dr. McCallum said: "I put all nervousness in children back on the mother. There are four things which shape and determine life—heredity, environment, nutrition and training—and the last two in a large measure can offset the first two. We don't look on heredity as the baneful thing that we formerly considered it. The children bear with them the history of their ancestors, but it is up to every mother to amplify in her child the forces to overcome heredity. The mother is the biggest factor in environment. She is the lighthouse-keeper of the spirit. Nutrition stands at the base of most of nervous troubles." An arraignment was made against the "society butterfly," who neglects her children. "A woman should stay at home with her children and do it in a happy, cheerful spirit that will keep it from being a bondage. No woman can take care of her child ren and be a society butterfly. A woman's place is in the home," he said.

The audience was made up largely of women that evening, but what the men present lacked in numbers they made up in enthusiasm in applauding the "society butterfly" statement.

Farm to Rent

TRY TO ELIMINATE THE OVERLAPPING

Alliston Herald—An important meeting looking towards the union of struggling churches was held in Orangeville on Thursday of last week. The meeting was a conference between representatives of the Methodist Districts and the Presbyteries involved. The mission secretaries of the 10 Churches, Rev. G. B. Heyd and Rev. F. L. Brown, representing Presbyterian and Methodist missions respectively, were also present. Rev. Wm. Morris of Orangeville presided and among the clergymen present was Rev. Dr. Harrison of Alliston. The object was to make a survey of the localities where the two denominations are overlapping with a view to one or other withdrawing and leaving the field to the other. Recommendations will be made to the Methodist Districts and the Presbyterian Presbyteries which if approved will be passed on to the Conferences and Synods and if endorsed by these unions will be effected. The plan under which it will be worked will be for the union congregations to select a minister. The congregation will pay the salary and the general church funds raised will be equally divided between the two churches. The fields under consideration at Orangeville were Alton, Everett, Rosemont, Caledon, Caledon East Nicholston, Elm Grove, Baxter, Banning's Mills and Mono Mills. A meeting to deal with overlapping fields in the Owen Sound Presbytery will be held in Owen Sound in the near future and next week in Barrie, representatives of Barrie Presbytery and the Barrie, Bradford and Alliston Districts will confer on the advisability of uniting a number of charges in this territory. War conditions have made this action imperative.

WOULD YOUR ABSENCE ALARM?

Over in Ripley a certain man was such a regular attendant at church that the sight of his seat vacant caused an alarm, and knowing that he lived alone the pastor and the sexton hurried to his home and found him lying on the floor unconscious from coal gas. He was rescued in the nick of time, which shows that constant attendance at worship does save a man, for had he not been called to the services the coal gas would have got him. How many men in Walkerton would have been rescued under similar circumstances? Not over a thousand, we presume. In the first place half of them wouldn't be suspected of having coal, so the preacher would not be alarmed on that score, while of the other half so few go to church regularly they wouldn't ring the fire alarm if they failed to report. If there is one man, however, in Walker ton that

We have a very superior line of both kinds, and will guarantee them to give you satisfaction.

F. S. MacLachlan

Had an Operation

Mr. Wm. Mooney, of Long Lake, Sask., is at the Central Hotel this week, where he underwent an operation by which a part of the bone in his nose was removed. Drs. Houston and Laird performed the operation. Mr. Mooney went to the west from here about 15 years ago, and came down on a visit to his brother, Mr. H. Mooney of Greenock, and other friends.

Bruce Battalion the Best Trained in England

"The 160th is the finest trained battalion in England. There is scarcely any branch of training they have not taken up and become proficient in." This is what Lieut R A James tells the Walkerton Telescope. Lieut James had charge of the Pioneer section of the 160th, but owing to the age rule was obliged to relinquish his command and return home.

Now a Training Officer

Lieut A E Babcock is now anti-gas training officer with the 4th Reserve Battalion at Bramshott camp. This is one of the most important branches of training for the men before going into active service. In acknowledging receipt of a parcel from Paisley, Lieut Babcock writes to the sender: "I cannot express in words how much I appreciate your kind thoughtfulness, or how cheering and encouraging it is to the boys in England and France to know that they are still remembered by the folks at home, no matter how long they have been away, and I assure you that it is a pleasure for us to make little sacrifices for such people as we have in dear old Paisley. I was very sorry to hear of the death of Jack Hamilton and Emerson Pearce. How they will miss them at home. My deepest sympathy goes out to their parents and the rest at home. I receive The Advocate very regularly and enjoy it very much."

Cerson—Reid

A quiet wedding took place at the home of Messrs Wm and Elmer Reid, at Pinkerton, on February 16th, when their sister, Miss Agnes, was united in marriage to Mr Earl Cerson of Kingarf. The ceremony was performed by Rev R H Gain, pastor of Pinkerton Presbyterian Church. Quite a large number of guests were present at the wedding reception. The happy couple will live on Mr Cerson's farm near Kingarf.

Autos Running All Winter

Mr J S Elves, of Penhold, Alta, says: We would not like to be without your paper. It is like a letter from home. I think by all reports you are having plenty of snow for sleighing. We have had a very fine winter in this part of Alberta. Pretty cold at times, but there hasn't been a day this winter when autos haven't been running. We haven't had six inches of snow at any time so far. I am sorry to hear of so many of the boys who will not return from France.

Willow Creek Backed Up

The waters of the turbulent Willow Creek took a sudden rise after last week's thaw, and threatened a serious inundation in spite of the hard freeze-up that followed. The stream had apparently become so frozen up that the extra flow could not find an outlet, and backed up so that it rose to the floor of the Cambridge St bridge. Some of the residents in that locality were unable to get out of their houses for a day or so, but by Saturday the water had receded, and they were free to come and go again. Monday's rain caused another rise of the creek. By Tuesday evening Queen Street was overflowed at the north of the bridge, and some families had to leave their homes to escape being marooned.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpariel line for first insertion, 5c per line for each subsequent insertion.

—Miss Tena McKinnon, of Toronto, is visiting her sister, Mrs Neil McArthur, Water St.

—Patriotic Carnival in Paisley Rink on or about Friday, March 8th. Watch for further announcements.

—Apprentice wanted for dressmaking. Apply to Miss E McArtney, first door south of Hanna House.

—Mr and Mrs Herman Boettger have got moved from Paisley to their farm home in Goderich Road, Saugeen.

—Mrs. Stauffer went to Toronto on Thursday last, and is attending the temperance convention in the city this week.

—Miss Reta McDonald, 10th Bruce, returned home on Saturday after spending a couple of weeks in Walkerton with her friend Miss Hazel Irwin.

—Union services will be held in the Methodist church Sunday. Rev Mr Crighton preaches at the morning service, and Rev Mr Nellans at the evening service.

—Mr. Fred A. Elves, of Vulcan, Alta., was visiting here for a few days last week, at the home of his aunt, Mrs. Buchanan, Goldie St. He is a son of Mr. and Mrs. David Elves, formerly of Lockerby. The whole family are now in the west, and all doing well.

Honorably Discharged

Pte Thos R Foster, son of Mr and Mrs Wm Foster of 8th Bruce, who went overseas as a member of the 160th Bruce Batt, has been discharged as unfit for service, his trouble being a bad knee. He arrived home last week.

Union Service Overflowed

A considerable number could not find even standing room in the Church of the Ascension for the union service on Sunday morning, and the evening meeting was held in the town hall, which was well filled. Rev Mr Diehl officiated in the church and Rev Mr Nellans preached in the hall.

Clearing Off Church Debt

A special meeting of Knox church congregation was held on Wednesday afternoon of last week to consider financial affairs. The outcome of the deliberations was the opening of a subscription list, by which over $65 was raised at the meeting, and it is expected this will be considerably added to by subscriptions from members and adherents who were not present.

Y.M.C.A. Collection, $147.15

The Rev. I. W. Diehl and the Boy Scouts are to be congratulated upon their successful Y.M.C.A. campaign. They collected $122.15 for free drinkables for the soldiers at the front. The boys proved to be very efficient helpers. The contributors did nobly. At the close of the campaign the Scouts were invited to take supper at the Rectory. The full amount will be sent to headquarters, including a contribution of $5 from Knox Church Young People and $20 from the Women's Christian Temperance Union, which organization pays all expenses, and they wish to express their thanks and appreciation to all who have contributed in cash or to the Trinket Fund.

AUCTION SALE

Farmers interested in good stock will find it to their interest to attend the auction sale at D McRae's, lot 19, con 4, Saugeen, on Friday, March 8th, at which will be offered for sale 12 head of horses, five of which are pure bred Clydesdales, and two of these are imported mares; 20 head of good cattle, six of which are milch cows in calf; 53 first-class ewes and 2 yearling rams. Sale to commence at 1 p m. Eight months' credit on approved joint notes, 5 per cent discount for cash.
R C PEARCE, Auct.

Illustrated Lecture

Col. T. H. Race, the Field Secretary of the National Sanitarium Association, will give a lecture in the town hall, Paisley, on Wednesday evening, Feb'y 27th, at 8.30, on the subject of tuberculosis, its nature, treatment and prevention, illustrated with instructive lantern views. Col Race is an old journalist, a traveller of world wide experience, and a speaker of unusual ability. It is worth while hearing him on this scourge, known as the "great white plague," besides his side lights on the present war situation. Only a collection taken for the Muskoka Free Hospital for Consumptives.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Growing Radishes and Peas.

In no other way can you show your skill as a gardener so well as in the growing of perfect, crisp radishes in the minimum number of days. There are many crops which require to be "hustled," but none of them requires more hustle than the radish.

The composition of the radish is mostly water—the more water you get into it, and the less cellulose (which is the vegetable fibre residue) the better and more crisp it will be, and to accomplish this requires that they be kept growing constantly from the time the seeds are planted until they are ready to pick.

On the other hand, crisp radishes cannot be grown in a heavy soil, nor one which is not kept to the proper degree of moisture. They require what we call a "cool" soil. It should be rich to repletion, and composed very largely of decomposed vegetable matter. Experiments have shown that good radishes can be grown in coal ashes, as a base, with plenty of good well rotted manure, and the addition of commercial fertilizers.

But it is better to grow them in a light, mellow, rich soil. No green or unfermented manure should be used. Arrange for one pound of muriate of potash for a plot ten feet square, for use when the young plants show through the ground. This should be dissolved in water sufficient to give the soil along the drills a good soaking.

How to Plant Radish

Summer radishes naturally fall into two classes; the turnip shaped, and the slender. In the former class we have two divisions, the small "olive" or "button" radishes, which are the very earliest, and the true turnip-shaped which come later on in the season. The slender or, as they are sometimes called, "finger" radishes also come in early and late.

Radish seeds are planted in two general ways. One is broadcast, which is a very wasteful and inefficient way, and the other in drills.

Radish seeds are not too small to plant them single. With a little care this can be done, and an occasional one dropped in error, can be pulled out when they show through the ground. Make the drills by pulling the dibble along the straight edge, lightly, so as to make a drill not more than half an inch deep, just a trifle less will be better. Make the drills a foot apart for easy working, although if you make them in a double row to be worked by hand, six inches will do for the early ones.

Soil for Garden Peas

Then let us have a goodly row of garden peas; the dwarf ones for first early, the half dwarf for second and the tall ones for main crop. These with succession planting will give peas to eat from the time the first ones are ready to pick in sixty to sixty-five days until the heat of midsummer makes their growth impracticable.

To get the fine results we desire with garden peas they must have a mellow, loamy soil, well filled with humus and enriched with well-rotted manure dug in the trench, and the situation must be one which will drain well, so no peas of any kind known to our gardens will do well in soggy or swampy soil, even though they require a large supply of water. As one gardener put it, "They will not stand wet feet."

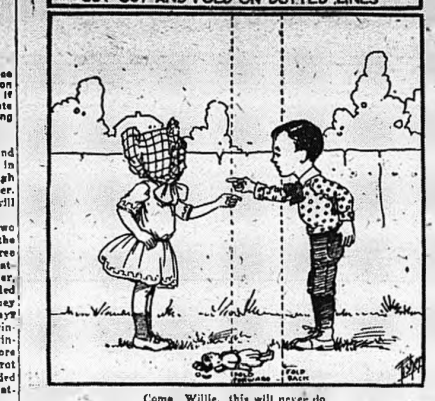
Of the early peas we have two classes—the round-seeded and the wrinkled. The former are from three days to a week earlier than the latter, and are more hardy. However, most persons consider the wrinkled ones so much finer in flavor that they are willing to await the few days necessary to get them. The wrinkled peas (those which have a wrinkled seed) are sweeter, have more sugar in their composition and rot more easily than the hard-seeded round ones, on which account the latter may be planted first.

Plant in Prepared Drills

I would advise the beginner to await until the soil is well drained, mellow and easily worked, and then plant the wrinkled peas for first early unless his space is large and he desires to try both kinds.

Garden peas should be planted in prepared drills. As the early peas are either dwarf or half dwarf, there will be no need of supports to hold them. A good plan is to plant them three drills together, allowing the vines to mat together. This will prevent the stalks of the dwarf ones falling down, which, especially in wet weather, may cause many of the pods to rot.

The early peas, not having the large mass of roots that the later ones have, may be planted closer together. If you set three rows together make them six inches apart and the seeds two inches apart in the row. The half-dwarf, which may reach a height of thirty inches, may be planted in a double row, the same distance apart, and the vines matted together as soon as they throw out tendacles. This will obviate the necessity for supports.



The aim should be in growing peas to get them all cleared off the vines in not more than two pickings. Most of the seed offered for sale to-day is of strains which have developed this quality under selection. This makes the space occupied by the early peas available for the use of later crops.

Support the Vines

Garden peas should have frequent cultivation and be kept free from weeds. The late ones will do best if mulched when the days get warm, in order to keep the roots cool. Any straw y litter will do for the mulching. Put it on and between the rows and water freely. It will also keep down the weeds.

There are a number of materials used for supporting pea vines. The original one was "brush," the twiggy branches of young trees. This is still by far the best. The use of strings, rye from poles and brackets, is a rather poor way to support the vines.

When brush is used the rows can not be so close together as when netting is used. With brush a good way is to plant the rows eighteen inches apart and set the brush between them, making a double row. The next row should be set three feet from the first, and another double row formed, and continue thus.

Come, Willie, this will never do,
We'll have no quarrel here with Sue;
You say you're very sorry, then
Go kiss her and be friends again.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not it will be answered personally, if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnoses. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Diseases and Hygiene of the Mouth.

This subject includes many important diseases, particularly such as are common in children, and notably diphtheria, influenza, tonsilitis, adenoids and all varieties of sore throat, also diseases of the tongue, teeth, lips, gums, tonsils and salivary glands.

Mouth diseases of adults are less numerous than those of children but are often of grave significance.

Cancer of the lip, tongue or tonsil, is not infrequent; sores of the mucous membrance are the common characteristic of syphilis; suppuration, bleeding gums and loosened teeth, are the marks of Riggs' disease; and many victims of auto-intoxication have abscesses of the roots of their teeth upon which great stress has been laid in recent times.

Repulsive odor of the breath is familiar enough evidence of diseased teeth and gums, of decomposing food in the mouth or of imperfect mastication and disordered digestion.

Some of these diseases originate in the mouth, and others are symptomatic of disease elsewhere in the body.

Cancer of the lip, tongue, or tonsil originates there, but fever blisters on the tongue or lips may be one of the accompaniments of indigestion or grippe or scarlet or typhoid fever.

If we know the cause of a disease, we may be able to treat it successfully, or, better still, prevent it. Because we do not with certainty know the cause of cancer, is one reason why we do not treat it more successfully.

Bad hygiene of the home, poor nutrition, neglect of the teeth, indigestion and many other causes will result in decay of the teeth and diseases of the gums and other tissues of the mouth.

There are many bacteria in the mouth, some are harmful, others are not. In the presence of decayed teeth and decomposed and fermenting food, they are always waiting to jump in and produce disease.

The watery secretion and mucus in the nost and throat furnish splendid media for their multiplication and it is by this means that grippe, tonsilitis, laryngitis, diphtheria, pneumonia and many other diseases are caused, the bacteria extending as they multiply and finally producing the disease peculiar to the dominant variety.

The hygiene of the mouth from infancy to old age is a matter of the greatest importance. The baby's mouth must be kept clean and sweet with a soft rag and boric acid solution, from the day of his birth.

Children should be taught the use of the tooth-brush and the mouth-wash as soon as the teeth appear.

Simple powdered chalk as a dentifrice, and boric-acid solution as a mouth-wash, are all that is needed and they are inexpensive.

Adults should not only use the tooth-brush, but an antiseptic paste or powder and an antiseptic solution for rinsing and gargling.

This will mean better teeth, better health and an absence of offensive breath.

QUESTIONS AND ANSWERS

Mrs. E. S.—1. Can one have gallstones without fever or loss of weight? 2. Will it help to take a bottle of fruitola on the chance that one has gallstones? Please don't tell me to see my doctor, for I have no funds.

Answer—1. Yes, it is entirely possible. 2. I should say it would not. Why load yourself up with medicine of problematic value and for a condition which may not exist.

O. R. K.—What is the cause of low blood pressure with sunken eyes, and what will improve the situation?

Answer—Many causes are possible, perhaps it is anaemia. If that is the case, you might be benefitted by an abundance of food, especially milk, out of door exercise, and perhaps by a good preparation of iron.

HOMER-WARREN CO., DEPT. 38, TORONTO

MOTHER-WISDOM

Shall Our Children Play with the Neighbors' Children?

By Helen Johnson Keyes.

Some mothers are gravely afraid of child-companionship for their children. Their fears are reasonable. The contagious diseases, measles, scarlet fever, whooping cough and others, which we have learned to understand as harmful and dangerous are spread through the contact of child with child. Also, children are especially quick to imitate the slang and the rough habits which mark young people of less careful bringing up.

What can we do about it? Do you remember Tennyson's poem of the man who built a lordly palace for his soul? After he had dwelt in it for a time, his soul began to dwindle so that in order to keep any soul at all, he had to leave his lordly palace and come out among the world of men.

So it is with our children. They must live in the world. In order to have sympathies, powers of adjusting their ways to other persons' ways, powers of standing up for their rights as well as to develop the sense of justice and generosity often to yield their pleasure for the benefit of their friends, they must have companionship with children of their own ages.

This can scarcely begin too young. The gain will be greater than any gain which could result from the cowardly policy of isolation.

Mothers also need the education of seeing their children with other children! It teaches us that our youngsters are neither better nor worse than most of our neighbors' children, and that if we have cause to complain to Mrs. Adams of the behavior of her boy, Mrs. Burns has equal reason to complain to us of the manners of our girl!

As the good training of families depends largely on the education of parents, this side of the question is really important. The mother of an only child frequently regards her pet as superior to other children. In truth, an only child often is more developed and more mannerly than members of large households, who, necessarily, receive less individual care. But it is not good for this only darling to become aware of the fact.

It is equally true and equally injurious, that every busy mothers often regard their boys and girls as more unruly and unmannerly than those of other families. This may be unjust; it may give the children a feeling that they are not loved, that they are unfairly criticised and consequently implant in them a resolve to overtide authority and assert independence.

Children have an exceedingly correct sense of justice and they resent fiercely and righteously any betrayal of it. Parents need to keep this in mind. If these impatient mothers will watch their neighbors' children, they will probably find, repeated in them, the behavior of their own.

They will then understand that these traits are common to childhood and must be controlled by gentle measures and by an example of courtesy, patience and reasonableness in the home life.

Children learn most quickly by imitation. They reflect the manners and morals of their homes whereas they may be very little influenced by commands, scoldings and rules which are conveyed merely by word of mouth and not reinforced by example.

So, for the sake of the moral development of the children and for the sake of our education as parents, let us open our gates to the healthy, normal children of the neighborhood.

You will notice the limitation: to the healthy, normal child. The strictest quarantine against illness is not too strict. Country teachers and country parents have much to think about in this direction.

The common cold in the head is often the beginning of a contagious disease, and children suffering from it should not play with other children. Sharing towels and drinking cups is a means of spreading infectious of a most serious nature.

Let us make companionship, which is of such great importance morally, as nearly safe as possible by insisting on quarantine against the first indications of illness and by avoiding the use in common of eating and drinking utensils and toilet articles. Only ignorance and careless selfishness can consider such precautions discourteous.

The normal child! There are, unfortunately, children with perverted minds and evil habits against whom a mother must very carefully guard her children.

One such child will sometimes corrupt the young people of an entire neighborhood. There are also many of these children than it is pleasant to believe and for this reason every mother should know her children's playmates. This she can do by inviting them to her house or on picnics.

The child who is absent-minded, inattentive, unobservant, slow in play, who considers himself different from other children and badly treated by them, should be held under suspicion till proved innocent. The fact that his people are among the best in the community, does not alter probabilities, for this evil creeps in everywhere.

The fact that he is still almost a baby, five or six years old, does not make our fear unreasonable, for bad habits may begin in infancy; and if the suspected one is not a he at all but a girl, the evidence against her is equally strong, for this evil is even more frequent among little girls than little boys. The hardest possibility to face is the chance that it is our boy or our girl, but this should not make us less careful and honest in our observations or less truthful and brave in facing the findings.

It will be easier to bear if we remember that the sins which children commit are often scarcely sins to them. Their results, if we allow them to continue, may be ruin but that does not mean that the children themselves understand their acts to be evil with anything like the clearness with which they appear evil to us.

Many ruinous habits are started innocently and our attitude toward our little transgressors should not be one of punishment for what has already occurred but an unceasing watchfulness and quiet patience in setting them on the right path for the future.

The first step should be to consult a doctor, for a slight surgical operation will sometimes accomplish a cure although in most cases it must be supplemented by a long and constant watchfulness and days full of moderately hard physical work and out-of-door play.

These boys and girls must be kept apart from other children, and parents should train themselves to recognize their manners and appearance.

We should certainly not consider that mother wise who denied her children milk because some milk is not fresh and some herds are tubercular. She must find a way of securing a clean supply. This is equally the case with companionship. It is not enough to keep away from our children things which are harmful; we must give them also what is good and nourishing to their characters.

There are some mothers, I confess, who stem to me very conceited and foolishly sentimental—who feel that only they are pure and wise enough to watch over the unfolding of their child-en's characters. Of course a mother is the sacred guardian of her children but there are many persons in the world besides herself who may do them good, many hopes besides hers from which they may derive benefit. One of the duties of her guardianship is to bring them into contact with these persons and these homes.

Every woman with children of her own has responsibilities toward other children. Motherhood is larger than our own families and it is our duty to unlock the pleasures and blessings which surround us and to gather in the children of other women, too, for our children play with children.

Finely chopped suet in puddings or "scrapple" will often be eaten by children who need fat, but who cannot be persuaded to touch fat meat.

The Dairy

A high-producing dairy animal is a delicate and well balanced piece of machinery, and consequently she cannot continue normal production if she is exposed to severe winter weather. It is therefore essential that the discomforts incident to cold weather be eliminated if possible. The comfortable cow will repay in milk the necessary labor for her protection. Dairymen as a rule are more careful with their cows than the average farmer who merely produces the milk for family use.

Cows frequently refuse to drink the water in an icy trough. A cow must be thirsty, indeed, before she will fill herself with freezing water. It is necessary, in view of the fact that milk contains about eighty-seven per cent. water, to warm the drinking water for dairy cows if the highest possible production is to be maintained.

Unless the cow drinks a sufficient quantity of water her milk production will diminish, and she will not drink enough unless it is warm. Suitable shelter from cold rains and raw winds is another comfort which the cow will repay in milk.

A sufficient quantity of nourishing feed is, of course, a prime requisite if cows are expected to continue to produce milk after freezing weather has killed pastures. Corn stover and oat straw will hardly supply sufficient nutrients to maintain average production.

Sleet and freezing rains cause insecure footing, and care should be used in turning cows out of the barn. Ice at the doorway should be covered with cinders to prevent slipping. Do not hurry the animals and cause undue crowding. A slip and fall on the ice can readily result in injury to or loss of a valuable cow.

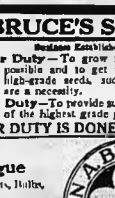
These things have been said often, but they bear repetition when the cold weather comes with accompanying discomforts. While they apply more specifically to the dairyman, it is well for all farmers to heed these suggestions and endeavor to keep all cows in milk to help increase the food supply for this winter.

Gunns Shur-Gain Fertilizer

Poultry

Healthy hens are not only on the job when there is something to eat, but they produce the eggs. To get maximum results from the laying flock, it is necessary to keep a constant lookout for the health of the hens. If one gets sick, it had better be removed entirely from the flock. Over-crowding is one of the evils to be guarded against. Each hen should not only have plenty of yard space, but their roosting room should not be crowded. If the hens get over-heated upon the roosts then rush out into the cold for their feed, evil results will undoubtedly follow. The poultry house should afford ample shelter and protection from the elements, but must not be too warm. They require plenty of fresh air, and should have clean surroundings.

The feed yard and roosting rooms should be kept clean and sanitary. Fresh straw should be put in the nests. Give them clean water, and wholesome feeds, together with fresh dust baths and feed litter, then their good health will be assured and the egg baskets well filled.



Merely Suggestive.

Figures giving the food supplies of the world tell us that in 1918 America will more and more be called on to share with a hungry world what she can spare from her own board. This can be done by substituting other foods not needed for shipping. Sometimes it is hard to think of that substitute. Why not prepare a list to hang on the kitchen cabinet to be used for ready reference when in doubt. Let the list below grow with your experiments.

Meat substitutes.—Poultry, rabbit, fish, eggs, cheese dishes, baked beans, bean loaf, nut loaf, bean soup, milk soup, chowders, milk.

Wheat bread substitutes.—Corn bread, brown bread, oatcakes, buckwheat cakes, hominy, potato biscuit, rye bread, potatoes, rice.

FREE TO BOYS

MODEL STEAM ENGINE

Runs like a city, spurting steam and making as much fuss as though it were running the electric light plant in your town. Has brass tarnished boiler with safety valve, tilted steel fire box, with quick burners, and tilted steel chimney. All running parts of best quality metal.

Send us your name and we will send you 40 packages of our beautiful embossed Easter Post Cards to sell at 10 cents a package. When sold send us the money and we will send you the engine charges prepaid.

BIG DOLL AND DOLL CARRIAGE

This Big Doll is 16 inches high, has jointed legs and arms and natural hands and feet. The Doll Carriage has steel frame and wheels and the seat, back and hood are made of leatherette. It is 24 inches high and is just the right size for the Big Doll.

Just send us your name and address and we will send you 10 packages of our fine quality Easter postcards to sell at 10 cents a package (8 lovely cards in each package). When they are sold send us the money (three dollars) and we will send you the Big Doll, with all charges prepaid, and we will also send you the Carriage without any charge. If you will show your Doll to your friends and get just three of them to sell our cards and earn prizes too, send us your name and address to-day and get your Doll and Doll Carriage quickly.

Address—

Homer - Warren Company
Dept. 36
TORONTO.

THE STARTING POINT OF CONSUMPTION

Lies In Weak, Watery Blood—Dr. Williams' Pink Pills Make the Blood Rich, Red and Pure.

Weak, watery blood is the starting point of consumption. When your blood is in this condition your whole health declines. Your face becomes pale or sallow, your appetite fails, your heart jumps and flutters at the least exertion or excitement. You are always weak and wretched and you lose interest in both work and amusement. This is the point from which you may easily step into that hopeless decline that leads to consumption and the grave. What is needed to bring back health, strength and energy is the new, rich red blood Dr. Williams' Pink Pills actually make. In all the world of medicine there is no other tonic and blood builder like them, and all who feel weak, run-down or easily tired should lose no time in giving these pills a fair trial. They have transformed thousands of weak, hopeless men and women, boys and girls into strong, robust people. In proof of these statements may be given the experience of Mrs. T. Brennan, Charlton, Ont., who says:—"Not only myself, but my friends think that had it not been for Dr. Williams' Pink Pills I would have filled a consumptive's grave. My condition was most serious; my blood seemed literally to have turned water; I was as pale as a sheet and became utterly unable to do any housework or go about. I doctored steadily for a long time but was growing weaker, and finally the doctor held out but little hope for my recovery. It was thought that a trip might help me and I was taken to New Ontario. Those who saw me while on my way did not think I would reach my journey's end alive. After I reached my destination a friend strongly urged me to try Dr. Williams' Pink Pills, and as of course I was anxious to regain health I did so. The pills were the first medicine I had taken which seemed to help me at all, and it was not long until I felt they were doing me good. I continued their use gladly, and began to feel hungry and soon after was able to move about the house. Next I was able to go out of doors and to help in the housework, and from that time on my progress was rapid, and in the end I was enjoying better health than I had ever done before. There are many people who can testify to the absolute truth of these statements, and I feel I would not be doing justice to your wonderful medicine if I did not make these facts known."

You can get these pills through any dealer in medicine or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

WHO ARE THE BEST FIGHTERS?

The Canadians Are Generally Admitted to Carry the Palm.

Early in the war the British War Office found it expedient to enter objections to the tartan kilt on the battlefield on account of its conspicuous colors affording too distinct a target for the enemy. An order was issued requiring the "Kilties" to wear a kilt made exclusively of khaki. To this the Highland regiments, with their devotion to the tartan, objected, and substituted for the all-khaki kilt a khaki apron which hid the conspicuous tartan colors in front.

The War Department again complained that their orders were not being complied with, and to this the Highlanders quickly replied, asserting that requirements had been fully met by the wearing of the khaki apron in front, for no Highlander ever turned his back to the enemy. Hence it had become generally accepted that the Highland regiments were the best fighters.

But now the New York Times claims that it is generally admitted in Europe, by French and British alike, that the Canadians are the best fighting men in the trenches, and aids in support of the claim "they are never subject to periods of high elation, which give them great élan in attack, and later periods of great depression, which seriously affects their morale, as are the British. Nor the lack of brilliancy individually or the absence of the great enthusiastic action of the French in attack, both of which in a general way characterize the British. The Canadians possess almost all of the brilliance and enthusiasm of the French, combined with the steadiness and absolute dependability of the British to get what they go after if it is humanly possible. It is purely a question of temperament, and of the environment of their youth. In both, the American and the Canadian are alike, and their action in battle will be the same."

We illustrate realize how children cherish their gardens. No flower ever cost more than a little pansy that was brought me by a generous, sweet little seven-year-old girl last autumn: "You will put it right in water, won't you, and keep it? It is the very last flower from my pansy bed this year."

TRAINING CANADIAN YOUTH.

The Demand for Technically Trained Workers is Imperative.

Probably 100,000 boys and girls from 14 to 18 years of age annually leave school in Canada to engage in some occupation connected with manufacturing, agriculture, mining or transportation. The present general plan of education does not provide sufficiently for these young people. They are stepping out into the world to find their way, with an almost entirely literary education. The apprentice system in our industries is almost a thing of the past, and the youth in our factories and other business organizations is left to pick up a smattering of his future occupation as best he may. Notwithstanding this, every manufacturer will agree that properly trained help is the best investment. Germany, in the past few years, has amply demonstrated the value of technical training.

Canada has very important natural resources requiring capacity to develop them. What are we doing to produce this capacity? How many of our farmers' children know the qualities of soil and the proper fertilizers to use for best results? Mgr. Choquette has told us of the Belgian farmer's knowledge of his land and his scientific use of it. Can we hope to meet him on even terms? How many metal workers know the composition and working qualities of their raw materials. Do our carpenters, textile workers, employees in our ceramic and other industries know why they perform certain operations and why they secure the results they do?

We are not doing justice to the rising generation. At the close of the war, Canada will no doubt see an influx of immigrants from the European countries. Their system of industrial training has put them in a position to understand the theoretical as well as the practical side of their means of livelihood. Canada will have to meet these European countries in competition for trade, and, to do so successfully, her manufacturing and other lines of activity must utilize all trained help available; to secure this result it will be necessary to give the most important positions to our foreign-born residents. We may then realize, too late, that we have been unfair to our own children. Industrial training schools with night classes should be a part, and an important part, of all educational work, and attendance of pupils, up to at least 18 years of age, should be compulsory.

A Tribute to a War Dog.

I turn the crimson page of war,
And here I find your name,
A comrade, shell and shrapnel scarred,
And plumed in battle fame.

A friend of man, a friend of God,
Of royal blood and true,
Who met the hell-hounds, breast to breast,
A soldier, through and through.

Ye trumpets sound a requiem,
Ye red, red waters cry
Your lamentations, coast to coast,
And darkness hide the sky;

Kneel, kneel, ye slaves of high estate,
O blue-flower-bow your head!
A dog that shames an emperor,
Somewhere, somewhere lies dead.

—Herbert Randall.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out on the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Victors Overseas.

The other day a laconic British official statement announced the completion of the campaign in German East Africa. Its significance was little appreciated by a world whose attention was fixed upon Cambrai and the Russian revolution. And yet it marks the passing of one of the great colonial empires of modern times. When the war broke out German colonies occupied more than a million square miles of African territory, an empire in area larger than that lost by France under the old monarchy in the wars with Britain which preceded the Napoleonic era.

Baghdad, Jerusalem, German Africa—these are measures of the present struggle between the Briton and the German. We are now in the fourth winter of the war, a war which German statesmen and German scholars quite as much as German soldiers proclaimed was to be a contest between a modern Rome and a contemporary Carthage, a contest in which the German should play the Roman role. And after four campaigns no German ship sails the seas, every German colony is in British hands, save for those portions occupied by Britain's French and Japanese allies; Germany's Turkish ally has lost Mesopotamia and the Holy Land; British armies occupy the roads to Suez and the Persian gulf, and no single foot of British territory has now a German master.

OLD GENERAL HUNGER.

Allied Europe Needs 200,000,000 Bushels of Wheat.

The Food Controller says Allied Europe is short of 500,000,000 bushels of wheat. On Dec. 1 last, Canada had 110,000,000 bushels for export. On the same date, the United States, after allowing for the normal consumption of her own people, had not a single bushel, although Mr. Hoover thinks that, by economy and substitution, they will be able to export about 100,000,000 bushels. Where will Allied Europe procure the balance of 200,000,000 bushels to keep her from starving?

On account of the shipping situation it must come from America and Canada, as the granary of the Empire, must put forth a supreme effort, says Conservation. The farmer must have additional labor. He is doing his best now, and no amount of talking at him will induce him to put in a larger crop this spring. Provide him with extra help in seeding if you will, but as will not increase his crop acreage unless he is assured of enough help in harvest. Even in old-settled Ontario there has been for years a large acreage unercropped for lack of help. It is equally true that there are in our cities and towns many farm-trained men at work not as essential as farming, who would assist in the crucial periods of seed-time and harvest. If the law protected them in their positions and possibly made up a part of the difference between their ordinary earnings and what they would receive as farm laborers. We have conscripted men for overseas; what are we going to do to feed our Allies?

Man-power is needed for fighting, for munition working and for food production, and whichever is the most urgent should have the most men allotted to it. In such times as these, it is given only to those in high authority to know conditions fully, but, if the food administrations of Canada and the United States portray things as they are, the food situation is the most serious we have yet had to face. It is only when the ordinary citizen realizes this that the problem can be solved.

LEMONS WHITEN AND BEAUTIFY THE SKIN

Make this beauty lotion cheaply for your face, neck, arms and hands.

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and mix up a quarter pint of this simply fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

CAMOUFLAGE TRAPS U-BOAT.

Trick by Which British Seamen Destroyed a Submarine.

Camouflage by the gun crew of a British steamer tricked a German U-boat commander into the belief that he was attacking an unarmed merchant vessel and caused him to manoeuvre his boat so that the gunners of the merchant vessel were able to send him and all on board to the bottom. The story was told by an officer of a British ship which recently arrived at an American port.

The steamer was nearing a French port with a cargo of foodstuffs and ammunition when the U-boat appeared.

"The German was some distance away when we first saw him," said the British officer, "and at the same time he was watching us through the periscope. The gun crew was all ready. Our big gun was hidden behind a screen, which covered the entire stern and which had been painted, both at starboard and port, to look like lifeboats. The U-boat came on. When about ten yards off, the commander, evidently having satisfied himself that we were unarmed, ordered the vessel sunk by bombs.

"Several men clambered from the forward hatch, dragging one of their collapsible boats after them. Officers stood on deck, leaning against the conning tower, as they waited for our finish. Meanwhile, the gunners had been working behind our lifeboat screen, and while the Germans were preparing their boat the gun pointer signalled the range.

"The screen was dropped, and before the Germans were aware of the trap they had fallen into, the big gun roared. We saw the shell tear into the hull at the water line and directly at the base of the conning tower. The submarine sunk in less than four minutes, with all its crew."

Skimmed milk furnishes protein at about half the outlay for which this essential can be purchased as milk; it is also a valuable source of carbohydrates and mineral water. The deficiency of fat in skimmed milk is counterbalanced by the fat of the ordinary mixed diet.

Minard's Liniment Cures Diphtheria.

The Doctor Did Not Do Her Lasting Good

So Mrs. Jos. Roger Used Dodd's Kidney Pills.

Popular New Brunswick Teacher Tells What Splendid Results She Got From Dodd's Kidney Pills.

Elm Tree, Gloucester Co., N.B., Feb. 11th—(special)—When the doctor I consulted failed to do me any lasting good I decided that my kidneys were the root of my troubles, and made up my mind to try Dodd's Kidney Pills.

"You may judge of the results when I tell you that I have not lost a day's work as teacher during the past year."

That is the statement of Mrs. Jos. Roger, the well-known and popular teacher here. Just how ill she was before using Dodd's Kidney Pills is best told in her own words.

"My trouble came from a strain," she says, "and I suffered for thirteen months.

Backache, heart fluttering, sciatica, neuralgia, nervousness, dizziness, and failing memory were among my symptoms.

"I took 12 boxes of Dodd's Kidney Pills in all, and I can say for them that they have done me all that was claimed for them."

If you have any of the symptoms that troubled Mrs. Roger, ask your neighbors if Dodd's Pills are not the remedy you are looking for.

Use For Old Sheets.

Being of an economical turn of mind, it has always bothered me to know what to do with the sides of worn out sheets, which are many times perfectly good when the center will be thoroughly worn. This summer I conceived the idea of making them into pillow cases and, as I always make the two hems in my sheets the same width, it was a very simple thing to do.

Fatrville, Sept. 30, 1902.

Minard's Liniment Co., Limited.

Dear Sirs,—We wish to inform you that we consider your MINARD'S LINIMENT a very superior article, and we use it as a sure relief for sore throat and colds. When I tell you I would not be without it if the price was one dollar a bottle, I mean it.

Yours truly,
CHAS. E. TILTON

The Perfect Day.

What a day that will be when the tidings are flashed over sea and land that the Allies have won and peace has been declared! From ten thousand times ten thousand steeples what bells will ring out, as if they were human things, their wild delight at the long hoped for event! Never in the history of the world will there have been such a day of universal joy.

Minard's Liniment Cures Distemper.

Drying Sweaters.

After washing sweaters do not hang them up to dry, but place them on a steam radiator or in an open oven, so that the weight does not pull them out of shape.

ACID STOMACH IS DANGEROUS MOST FREQUENT CAUSE OF CHRONIC DYSPEPSIA.

You must neutralise the acid in your stomach, says Doctor, or give up eating sweets, meats, potatoes and salads and quit drinking tea, coffee or liquor.

Alarming increase in dyspepsia and stomach disorders is largely due to too much rich food, and the widespread use of so-called digestive tablets and pills which give only temporary relief at the expense of ruining the stomach later on.

The best way is to consult a reliable stomach specialist or take a little ordinary bisurated magnesia—nothing else—to neutralize stomach acidity and thereby remove the cause of your stomach distress.

Put a teaspoonful of hydrochloric acid in your mouth, hold it there five minutes and all the tissues will be burned and inflamed. Yet you go around with a glassful or more of this same powerful acid in your stomach and then wonder why your stomach burns and hurts and your food will not digest. And when you put food into an acid stomach, the acid simply combines with the sweets, meats and potatoes you eat and the tea, coffee and liquors you drink, and makes a lot more acid.

Next, the acid may eat into your stomach walls, producing a stomach ulcer or cancer, and only half the cases of stomach ulcer ever get well under the most skillful treatment; the others, sooner or later, all die, and stomach cancer practically always means death in a year at most. But this is not all. The acid in your stomach passes on into the intestines, upsets them and disarranges your liver, so that you may soon require a serious operation with the surgeon's knife for gall stones or appendicitis.

Generally when people have sour or acid belching or eructations, heartburn, or a burning sensation at the pit of the stomach or other symptoms which indicate stomach acidity, they take some advertised digestive pills or buy a box of tablets from the nearest druggist. Such remedies may give temporary relief, but if you go on filling your stomach with a lot of drugs you may get to the point after a while when no food of any kind will stay on your stomach, and you will have an incurable case of stomach trouble. Therefore be very careful what you take. The best way is to consult a reliable stomach specialist or take a little ordinary bisurated magnesia—nothing else—to correct the stomach acidity, and thereby remove the cause of your complaint.

If you have an acid stomach, you must confine yourself to a diet of milk and eggs, or if you wish to eat such articles of food as meat, potatoes, salads, sweets or rich foods or gravies, or drink beer, wines, liquors, tea or coffee, you must take a teaspoonful of bisurated magnesia immediately after eating to neutralize the acidity. Statistics show that 90 per cent. of the people who have dyspepsia and indigestion have an excess of acid, and that this is the real cause of their trouble.

Keep the acid neutralized at all times by the free use of bisurated magnesia so that it no longer inflames the stomach walls, eat slowly and masticate your food thoroughly, and your stomach will soon get well of its own accord.

Bisurated magnesia is absolutely harmless. It is generally prescribed by physicians to be taken in teaspoonful doses immediately after eating or whenever you have any distress from excess acid; but it may be used in much larger quantities and much more frequently with perfect safety.

Be sure to obtain bisurated magnesia and not some other form of magnesia, as other forms are used as laxatives and as mouth washes, but they have not the same power for neutralizing stomach acidity, which is possessed by bisurated magnesia, which is inexpensive and can easily be obtained from any reliable drug store.

Tank Possibilities.

Tanks (says a correspondent of the Evening Standard) are the popular subject of the moment, and every kind of rumor is abroad regarding their development. It can be safely said that the type goes on improving. Colonel Stern, who has been responsible for the production of the Tank, has always been most insistent in their possibilities. It will be remembered that he recently changed his job from Director of Tanks Production for similar work in the Overseas and Allied Department. It is understood that the United States has been greatly impressed with Tank possibilities. A concerted movement of production by England and America might have great results.

Minard's Liniment Cures Colds, Etc.

Fresh Air Without Draught.

As storm windows interfere with ventilation in sleeping-rooms tack the cheapest grade of unbleached muslin on the outside of the screens. This protects the wire from the weather and the windows may be open day and night, thus keeping the air fresh without a suggestion of cold draught.

MONEY ORDERS

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Rabbit Wool.

Rabbit hair is supplanting wool in the felt hat making industry of Australia, where there are thirty factories in operation at present making use of rabbit fur for this purpose. It is said to be superior to the finest merino, and millions of rabbit skins are made use of annually.

MURINE Granulated Eyelids, Sore Eyes, Eyes Inflamed by Exposure to Sun, Wind, Dust, relieved by Murine. You'll like Murine Eye Remedy YOUR EYES No Smarting, Just Eye Comfort
Murine Eye Remedy At Your Druggist's or by Mail. Write for Free Eye Book. Murine Eye Remedy Co., Chicago

The demand for fruit will be great or greater than ever because prosperity will prevail, and that means that people will want good things to eat. Good things to eat means fruit.

YES! LIFT A CORN OFF WITHOUT PAIN

Cincinnati man tells how to dry up a corn or callus so it lifts off with fingers.

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender aching call or callus, stops soreness at once and soon the corn or hardened callus loosens so it can be lifted off, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.

EATS DIRT
GILLETT'S LYE

We ought to be as cheerful as we can, if only because to be happy ourselves is a most effective contribution to the happiness of others.—Sir John Lubbock.

Minard's Liniment Cures Garget in Cows

Quebec's forest lands cover an area of over 100 million acres.

Doctors Recommend Bon-Opto for the Eyes

Physicians and eye specialists prescribe Bon-Opto as a safe home Remedy in the treatment of eye troubles and to strengthen eyesight. Sold under money refund guaranty by all druggists.

Rheumatic Pains

Are relieved in a few days by taking 30 drops of Mother Seigel's Syrup after meals and on retiring. It dissolves the lime and acid accumulation in the muscles and joints so these deposits can be expelled, thus relieving pain and soreness. Seigel's Syrup, also known as "Extract of Roots," contains no dope nor other strong drugs to kill or mask the pain of rheumatism or lumbago, it removes the cause. 50c. a bottle at all druggists.

FIERY RED FACES and HANDS

Quickly Soothed and Healed by Cuticura

Trial Free

Bathe freely with Cuticura Soap and hot water, dry and gently apply Cuticura Ointment. Use night and morning.

For pimples, redness, roughness, itching and irritation, dandruff, itching scalp and falling hair, red, rough hands and baby rashes, itchings and chafings, the so fragrant, super-creamy emollients are wonderfully effective.

Sample Each Free by Mail. Address post-card: "Cuticura, Dept. N, Boston, U. S. A." Sold throughout the world.

TO ALL WOMEN WHO ARE ILL

This Woman Recommends Lydia E. Pinkham's Vegetable Compound—Her Personal Experience.

McLean, Neb.—"I want to recommend Lydia E. Pinkham's Vegetable Compound to all women who suffer from any functional disturbance, as it has done me more good than all the doctor's medicine. Since taking it I have a fine healthy baby girl and have gained in health and strength. My husband and I both praise your medicine to all suffering women."—Mrs. JOHN KOPPELMANN, R. No. 1, McLean, Nebraska.

This famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, has been restoring women of America to health for more than forty years and it will well pay any woman who suffers from displacements, inflammation, ulceration, irregularities, backache, headaches, nervousness or "the blues" to give this successful remedy a trial.

For special suggestions in regard to your ailment write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its long experience is at your service.

The Ubiter Advocate

PAISLEY, FEB. 28th, 1918

—It is reported from Ottawa that there is no doubt whatever but the Government intends to take over the whole of the Grand Trunk Railway, along with the Canadian Northern, the Intercolonial and the Transcontinental, and combine them into one system, also that the C P R will be included in the scheme sooner or later. It is a colossal undertaking, but one that would be in the future interests of the Dominion.

—Those who dreamed that a municipal telephone system could be established and managed so that after cost of construction had been met the service would be carried on at cost to nothing are due for a disappointment. The Bruce System paid nearly $5,000 in salaries alone, and the operating expense account reached in all about $8,000 for 1917. The system will require to be exceedingly well managed to be able to ever give subscribers phones at less than $10 a year. A good service at that figure will be cheap, however.

—A debating club last week decided that women who hold jobs should not be married. Whether the fair holders of jobs would rather work than get married is another question. If most of men were to express their minds openly, they would undoubtedly agree that without a woman to work for, a job would be a very unsatisfying thing to the male member of the human race. Neither men nor women, if they have their choice feel their lives properly rounded out by following the bachelor existence. When normal conditions are restored after the war it will be found that hundreds of thousands of women will desert industrial occupations to take up domestic life when an acceptable partnership is offered.

—We are promised, both by the Union Government at Ottawa and the Hearst Government at Toronto, that the patronage system is to be dispensed with, and all appointments to positions in the public service are to be made on the merits of the applicants, without regard to party pull or influence. The claiming of the spoils of office by the supporters of the political party elected to power has so long been a part of our governmental system that a great many who would be pleased to see a change are skeptical as to the sincerity of the Dominion and Ontario cabinets in their new proposals. However, both houses should be given a little time to demonstrate the workability of their plans. It is to be hoped that the new fabric will prove to be all wool and a yard wide, won't fray out at the edges, nor turn out to be shoddy. A genuine reform of the public service by present-day legislators will be a new broom to sweep some of the cobwebs from our political rafters.

A NEW CALL FOR VOLUNTEERS

Official forecast of the plans of the Government to secure necessary workers for essential industries indicates that the recent conference between representatives of the Administration and representatives of organized Labor has been productive of practical results. It is proposed to conduct a registration and compile an inventory of the entire manpower of the nation. This registration is to include all men and women over sixteen years of age. Concurrently it is planned to prepare an official classification of industries, based upon their respective value to the nation and the Allies in the stress of war.

Controversial propositions await the results. The question of the importation and employment of coolie labor stands over, and it is announced that no decision has been reached regarding the conscription of alien labor. The Government intimates its intention to open the national campaign of production by an initial appeal to the manhood and womanhood of the Dominion. It will conduct a thoroughly organized propaganda to secure, by voluntary enlistment, the necessary men and women to assist in the campaign for greater food production, as well as to secure the labor required for other essential industries."

To this call for recruits there should be an overwhelming response. The nation should transform itself into a great and busy hive of productive war industry. There should be no drones and no parasites. There is an abundance of work for all—work that needs to be done. The spectacle of stay-at-home Canadians tumbling over one another in tens of thousands to volunteer their services would be an inspiring one for the Allies and a disheartening one for the enemies of liberty and democracy. Two supreme purposes are necessary to ultimate triumph: the massing of forces to fight and the massing of forces to produce. Let Canada consecrate herself to both—Globe.

—Mr Elden Nicholson, son of Mr Thos Nicholson 4th con Arran, was a contestant in the Plaid Cow Competition last summer, and was successful in taking first prize for this district. This entitled him to a two weeks' course at the Guelph Agricultural College, which he recently took advantage of.—Leader.

Appeal Court Decides Against Crooks

TORONTO, Feb. 25.—Appelate Division at Osgoode Hall to-day sustained the conviction registered against Claude Forbes, alias J. W. Thornton, and Chas. Taylor for conspiracy to defraud J. E. Thompson a young farmer of Paisley, Ont., who alleged that these men did him out of $2,000 while visiting Toronto. The two defendants are now awaiting sentence.

Aviator Coming Home

—Lieut Willis McConnell, of the Royal Flying Corps, who was injured while on the Italian front, is on the way to his home at Owen Sound on three months' leave. Lieut McConnell was recruiting officer at Paisley for a few months. He was the first Canadian on the Italian front to bring down two Hun planes in a single flight. He is suffering from neurasthenia as well as the effects of an injury to his shoulder which resulted from a clash with a Hun plane in mid-air.

Farms Changing Hands

Numerous real estate transactions have been put through in this locality within the past couple of weeks. Mr Robt Bell of Kildersille, has sold his farm, lot 7, con 7 to Mr Albert J Lowes for $6,000. Mr Wm Johnson, of lot 10, con 8, Greenock, sold to Mr McLagnan from Sullivan Tp. Mr Ed Smith, of 8th Bruce has bought the property of his neighbor, Duncan Morrison. Mr Robt Campbell, of 4th Bruce, purchased Mr Jas McEwen's 200 acre farm on con 3, one of the best in the Tp., and Mr John Bennett bought Mr McEwen's other 100 acre farm. Mr Geo Potter, bought the John Smith farm, lot N, con 8.

Church Union at Harriston

A meeting of representatives of the four churches of Harriston was called by Mayor J J Pritchard, resulting in harmonious arrangements being made for union services for a period of six weeks, commencing Feb 10th, to be held in the Methodist church, which had the largest supply of fuel. One of the Presbyterian churches there is without a regular pastor, and the congregation is not likely to call one. An arrangement for a local union of the Presbyterian and Methodist churches is likely to be made, the two pastors taking alternate services and continuing this during the war. All the Sunday school services were held in the one church and the attendance on Feb 10th was 333.

Finances of Bruce Telephone System

By the financial statement of the Bruce Telephone System we note that a total revenue of $14,793.12 was derived from the operation of the lines during 1917. The operating expenses amounted to $7,801.61 (of which $4,879 was for salaries), there was paid on debenture account $3,580.81, and there is a balance of $3,427.71 carried to surplus account. The assets of the system are valued at $102,189.46—made up of cost of construction $94,934.44, real estate $2,490.14, cash $1,330.78, accounts receivable $1,232.55, material on hand $1,601.55. Liabilities are $89,486.07, of which $64,681 is debenture debt, and $10,000 payable to Royal Bank. The surplus account to date is $22,692.49.

Died at Sault Ste. Marie, Mich.

The late Wm. T. MacLachlan, brother of our townsman, Mr. F. S. MacLachlan, who died at his home in Sault Ste. Marie, Mich., on Feb. 9th, was, the Soo Times says, an enterprising and successful business man, and among the Soo's most substantial and highly respected citizens. It is conceded by all that in his death the city loses one of her best citizens and one who measured up to the highest standard in every respect. He had been engaged first as a building contractor, later in partnership with his brother Joseph as flour, feed and grain dealers, also as manufacturers of drain tile and cement blocks. The deceased was born at Burgoyne, and went to the Soo first in 1886. That year he was united in marriage to Miss Flora daughter of Mr. and Mrs. D. Munn, of Goldie St., Paisley, who survives him, with their four children.

Our Train Service Cut In Two

Beginning Monday next there will be only one passenger train run each way on this line. The morning and night trains will be cancelled. Our sole travelling and mail communication with the outside world will be kept up by the noon train from the south, which returns in the afternoon, at about same time as on the present schedule. At first glance this seems a hardship, but under prevailing conditions it is as much as we can expect, and as travelling has been cut down to the minimum by most of people, it will not affect all cases such a great inconvenience to the travelling public. An unfailing and prompt service with one train each way may fill our requirements for the time being as well as the old, and will give the railway company more men and power to handle the freight traffic, which has become badly congested. Our great loss by the change will be in the mail service, which will certainly be felt generally.

After the Wolfish Dogs

While the raising of sheep is considered one of the most advantageous lines of live stock production, for the average farmer, particularly so where the land is rolling and dry, the protection of lambs and sheep from destruction in many cases is a difficulty that cannot be overcome, and is the principal reason there are not more flocks in our own section. We know of one farmer who has made good profits for a number of years, but this season is going out of sheep because the foxes would get his lambs where he has to put them. A great move in favor of the sheep industry that is being made this year is that with regard to the dog nuisance. County councils throughout the Province of Ontario have decided very strongly in favor of stricter legislation for regulating dogs, and the sheep-breeders' associations have unanimously adopted similar resolutions. An increased tax on dogs in general would go a long way toward doing away with the wandering mongrels that at present destroy so many sheep and ruin the flocks that they attack, and if the owner of any dog is forced to tie the animal up at night, then the chance of the dog doing damage will be very much lessened. A tag on each and every dog would help further in the good work because if the owner were easily traced in each case of sheep-worrying there would be little likelihood of further trouble from the same quarter.

Boys and Girls Can Help

Seventy-one thousand boys and girls of school age last year increased the agricultural output of Ontario to the value of $125,000. Every farm boy and girl this year should be encouraged to rear a pig, a calf, a batch of chickens, or to grow a plot of potatoes, beans, corn or vegetables.

B. C. Has Big Snowfall

Mr. John McKinnon, of Vernon, B. C., in renewing his subscription to The Advocate, says: "I see by The Advocate that you are getting some winter, and very cold. We have had a very nice, mild winter, except a few days a little frosty. But the snow was and is very deep. There has been about five feet this winter, all told."

Bruce Boy With Edison

Mr. Andrew Thomson, son of Mr. Wm. Thomson, of Tara, a graduate of Toronto and Harvard Universities, and specialist in physics and mathematics, has been sent by the Science Department of Washington to Keywest to co-operate with Thos. A. Edison in working out the problem of defense to overcome the submarine menace. Mr. Andrew Thomson is only 23 years of age and his selection for this important work speaks eloquently of his ability.

Up to the Merchants

Recently a merchant in a rural town happened to see a farmer receive a box at the depot and noticed it was from a mail order house. He also noticed that the goods were right his line, and the same he had carried for years. He immediately approached the farmer and said: "I could have sold you the goods you have here for less money than the mail order house and saved you the freight." Then why don't you do so?" said the farmer. "I have taken the local paper for a year and have not seen a line about you selling these or any other goods. This mail order house sends advertising matter for my trade and they get it. If you have any bargains, why don't put them in the paper so we can see what they are?"

Death of Andrew Watt

After a short illness, Andrew Watt, who had been a resident of Wiarton for the past twenty years, passed away Tuesday at the age of 71 years. The deceased was born in Glasgow, Scotland, and came to Canada when only nine years old. He lived first near Hamilton, then moved to Eldersliefand settled in that township when the nearest neighbor was five miles distant, then moved to Paisley and afterwards to Wiarton. Before this he had made a trip to California. About forty years ago he was married to Elizabeth McPhail, at Paisley, who survives him, as well as one son, Frank, in Wiarton, and one daughter, Mrs. Dickson, in Toronto. It would be well nigh impossible to pay to high a tribute to the deceased gentleman. Quiet, unassuming, charitable, a friend to all, a man respected by everybody, was the man who will be interred in Bayview Cemetery to-morrow.—Wiarton Canadian-Echo.

The Late James D. Watson

The death of James D. Watson, aged 69 years, came with startling suddenness on Sunday morning last. He had risen as usual and while talking to his wife, passed away. Mr. Watson had been a severe sufferer from rheumatism, which gradually wore down his splendid physique and sapped his vitality. His death, however, was most unexpected by the family. Deceased was an Irishman, and was born in Hope Township, near Port Hope. He followed farming all his life. For many years he resided in the Township of Murris. Here he married Miss Flora Sheridan, who with two sons, Thos. and Robert, both at home, survive him. Thirty-five years ago he moved from Morris to concession 1, Saugeen, near Paisley. About ten years ago he bought lot 1, concession 5, Kincardine Township, where he has resided ever since. He was a man of quiet, unassuming disposition, a good neighbor and a true friend. Throughout his entire life he had been noted for his honesty and uprightness with his fellow man, and his word was all that was required to carry out any obligation he entered into. A host of friends will regret his passing away. He was a lifelong member of the Methodist church, and always attended it regularly until his illness. In politics he was a Conservative. The funeral took place to Kincardine cemetery on Tuesday afternoon.—Reporter.

Grade "A" Exemptions Must be Reduced

The military authorities are combing out the exemption lists as made by the tribunals, to find whether any have been improperly freed from service. All men previously allowed exemption to whom exemption is now taken will be notified that their case must again come up before the Appeal Courts.

—The Dominion Finance Department is preparing to gather in the new income tax, in accordance with the bill passed last session. War taxes are levied on incomes of single persons, widows and widowers without dependent children earning over $1,500 a year, and married persons, widows and widowers with dependent children earning over $2,000. As in the case of municipal income taxation, employers will have to certify to the wages paid each employe. But the great majority of these formal declarations will have to be made out by the people themselves. For instance, every farmer will have to fill in and sign a form. The onus of securing these forms and returning them to the proper officials lies with the persons paying the tax. Heavy penalties will be imposed upon those found making false statements regarding their incomes. Farmers, it is expected, will not be heavily hit by the taxes, as very few of them in Ontario have an income exceeding $3,000.

—A number of farmers in the vicinity of Dorham have realized handsomely from their sweet clover seed of last season. Mr D McNab sold three loads for $2,700 and another Glenelg farmer received a cheque for over $5,000.

BALLACHEY, LAIDLAW & CO.

The Store with the Stock

Wash Goods for Spring Sewing

Shirtings--The same kind you have always bought

Denims--Black and striped, for overalls, etc.

Prints--Light and dark colors, as good as we can get

Preaches in a Union Church

The following letter from Rev. R. C. Scott, a well known Goldie St. boy, now a pastor at New Hazelton, B. C., came to our desk recently: "First of all, 'enclosed please find' the amount of my subscription to The Advocate for another year. I believe that will be until next September, the time of the good old Fair, when the hearts of all Paisleyites turn naturally homeward. Indeed our thoughts turn that way very often these days, when I see from time to time the faces and letters of those who were mere boys when I was home last, but who are now men and at men's work for the defence of the Empire and the good of the world. You will be interested to know that Will has been called under the selective draft. He was exempt as a clergyman, but thought it rather a poor thing to take shelter under that privilege when so many of his congregation were being called. He went up for examination, and being placed in class 'A,' he at once signed the service card and waived the exemption clause. We expect to have him with us before he leaves for Vancouver to report for duty. These are trying times, but they are times that are helping men to 'see straight' to a degree impossible before. It leaves the church very short of men on this line, but better that than to fail in a very common duty. It will add To the desire for union, too, as, for instance, the other churches will have to do more for those who have lost their pastors to their mutual good, I imagine. By the way, you will be interested to know that I am in a Union church here. The Methodists and Presbyterians have divided the ground along the G.T.R., whereby the former withdrew from all points east of Rose Lake and the latter withdrew from all points between Pacific and Rose Lake. Thus I am living in a Manse, and begin the service with 'Psalm Selection number so-and-so,' and to tell the truth it comes quite naturally for me to do so. I also work Hazleton and a couple of the largest mines near by." The writer goes on to pay the Advocate editorial department some high compliments, which our modesty forbids publishing.

A Woman's Burdens

are lightened when she turns to the right medicine. If her existence is made gloomy by the chronic weaknesses, delicate derangements, and painful disorders that afflict womankind she will find relief and emancipation from her troubles in **Dr. Pierce's Favorite Prescription.** If she's overworked, nervous, or "run-down," she finds new life and strength. It's a powerful, invigorating tonic and nervine which was discovered and used by an eminent physician for many years, in his large medical practice among women. For young girls just entering womanhood; for women in middle life, the "Favorite Prescription" is the only medicine put up without alcohol, and can be had in tablet as well as liquid form. It's not a secret prescription for its ingredients are printed on wrapper. Send 10c for trial package to Dr. V. M. Pierce, Invalids' Hotel, Surgical Institute, Buffalo, N. Y., or branch in Bridgeburg, Ont.

Hamilton, Ont. — "When passing through middle life, as in most cases of this kind, I began to fail in health. I had severe pains in my head, dizzy spells, my back ached and I had pains in my side. I became very weak and nervous. I took medicine without getting relief until I took Dr. Pierce's Favorite Prescription and this medicine built me up in health and strength and I came through this critical period in a good healthy state. Women will find Dr. Pierce's Favorite Prescription very helpful during this trying time."—Mrs. Sarah Clapp, 100 Robins Ave.

FRIENDS THOUGHT HE WOULD DIE

"FRUIT-A-TIVES" Conquered Dyspepsia and Restored His Health.

MR. ROBERT NEWTON.

Little Bras d'Or, C. B.

"I was a terrible sufferer from *Dyspepsia and Constipation for years.* I had pain after eating, belching gas, constant headaches, and did not sleep well at night. I lost so much weight —going from 185 pounds to 146 pounds—that I became alarmed and saw several doctors who, however, did me no good. Finally, a friend told me to try '*Fruit-a-tives*'.

In a week, there was improvement. The constipation was corrected; and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

BRUCE TP. COUNCIL

Bruce Tp Council met in the Tp Hall on the above date, pursuant to adjournment. Members all present. Minutes of previous meeting read, adopted and signed. A number of communications were then read and disposed of.

Only one tender was received for cedar, that of Mr W J Farrell, which was accepted.

Applications for assessor received from D M Cameron, A G Montgomery, Kenneth Smith, D H McDonald and Eastwood Clayton.

Tenders for tile received from C S Wood and J S Dewar. As there was not much difference in the tenders, for convenience to each side of the township the council decided to order some tile from each.

A resolution was passed granting each Red Cross Society in the township $50 as required upon a satisfactory report being received for the past.

The auditors' report was received and adopted.

Mr D M Cameron was appointed assessor for 1918.

Committees were appointed as follows: S W—Johnson and McNeill; S E—Baker and McKenzie; N W—Dobson and McNeill; N E—McKenzie and Dobson; Tp Hall—Johnson and Baker.

Accounts to the amount of $186 17 were passed, some routine business disposed of, and council adjourned to meet on Saturday, March 2, when pathmasters, pound-keepers and fenceviewers will be appointed.

J. G. McKAY, Clerk.

Railway Board Order

Revolutionary changes in local freight arrangements in Ontario will go into effect very shortly by order of the Canadian Railway Board. The idea will be to move freight cars by the shortest route from point to point, no matter what lines it covers. In some cases short connections between railroads will have to be built, and this will be done as soon as the frost is out of the ground. The change will mean quicker local service. It would seem probable that under this ruling freight between here and Toronto may be brought by C P R to Harriston instead of coming around by Guelph on the C P R.

FIGHTING KING FROST

HOW THE LAKE FLEET MADE ITS LAST TRIP.

The Most Powerful Fleet of Ice-breakers Ever Gathered in This Country Helped the Vessels Containing Grain and Ore to Reach Lake Erie in Safety When Winter Arrived Prematurely.

WHEN marine historians set about chronicling the close of navigation on the Great Lakes for 1917 there will be no controversy regarding its position among similar events during the last 20 years, at least. Every man who was aboard the 100 or more vessels in commission when winter settled down almost over night, and in a few hours forged ice barriers that threatened to tie up every boat on the lakes, freely acknowledges that it was the most strenuous finish within his memory. Whether a novice rounding out his first season afloat, or a grizzled master accustomed for a score or more of years to battling with the elements at their worst, there was a striking unanimity of opinion regarding the summary manner in which the weatherman dealt with the crews and the boats putting forth their best efforts to bring down every possible ton of ore and bushel of grain from the head of the lakes, and to transport coal to the northland that the threatened suffering might be averted.

How the ice king stretched forth his hand and in an incredibly short period coated the harbors of the upper and lower lakes, and filled St. Mary's and St. Clair and the Detroit rivers with ice in such quantities as would ordinarily have been considered insurmountable, and how in turn he was cheated out of his anticipated prey and his efforts brought to naught by a small army of indomitable men who marshaled ingenuity and force on a scale never before attempted, provides one of the most interesting narratives in the annals of the Great Lakes, one chapter of which was written when an argosy of 23 vessels, carrying cargoes worth many millions, tied up abreast in the river off Detroit one afternoon after having battled for hours with the ice in Lake Erie, and getting through only with the assistance of the powerful ice-crushers that had been sent to aid them.

For many years the passing of the last boat down the Detroit river in the early winter has been an event of great importance in marine circles and to the public generally. There was more than a suggestion of romance and daring associated with the vessel and crew who had braved the elements in adding another trip to the season's record, something inspiriting about the sight of the steamer as it plowed its way silently downstream, its upperworks and much of the hull hidden beneath an icy coating, and faded away into the haze as eerily as it had come.

But the last boat down this year was stripped of much of the accustomed glamour by the fact that it had gone before, fighting foot by foot, battling with snow and ice in zero weather, picking their way warily through the tortuous channels from which the customary guides had long since been removed.

There have been other seasons when navigation proved as dangerous as it was in the one just closed —perhaps more so in some respects. The terrific gales that in past years have swept the lakes, leaving death and desolation in their wake, piling giant vessels high on rocky shores or sending the fleet and their brave crews to a watery grave, and inflicting heavy losses on shipping interests, were not so much in evidence this year. The damage resulting from this cause was comparatively slight, but in purely spectacular effects 1917 had few, if any, equals.

It is doubtful if there ever was seen such a strange flotilla as limped into the Detroit river on that memorable afternoon when, following in the wake of the steamer Britannia, of the Detroit & Windsor Ferry Co., 23 of the biggest freighters on the inland seas, which had been imprisoned in the ice in Lake St. Clair, rounded the fool of Belle Isle and came to anchor abreast of each other along the Detroit waterfront.

Not a vessel in the fleet but bore ample evidence of the battle it had waged coming down the lakes. Decks were covered to a depth of several inches with ice formed when the water swept over them. Pilot houses and cabins were an icy shroud of frozen spray, and great hazel icicles, often several feet in length, clung to the steel hulls, giving effects such as are popularly associated only with polar expeditions.

However, the only part of the story—the least important. Behind the icy sheathing that gave the vessels a ghost-like appearance there was hidden a narrative of daring such as only the exigencies of War and the crying need for the supplies being transported could produce. As related by the men aboard the argosy, in the matter-of-fact manner of those accustomed to doing rather than recounting, their exploits, the adventure was shorn of much of its picturesqueness. But by piecing together the fragments some interesting glimpses were obtained of the incidents marking that memorable cruise.

It is all very well in midsummer to loll back in a hammock and with half-closed eyes live over again the never-to-be-forgotten delights of a trip up the lakes on one of the splendid boats that traverse these waterways. If you were ever fortunate enough to make the cruise aboard a modern freighter your sum total of the joy of living was appreciably increased.

But coming down the lakes in a howling December blizzard, with the wind sweeping the ice-coated decks with such force as to imperil the life of anyone who ventured to travel the length of the vessel even with the assistance of the heavy cable that is stretched from end to end, with the snow blowing in such clouds as to make it impossible to see more than a ship's length, is a vastly different proposition than sitting under an awning whiling the hours lazily away, waving an occasional greeting to a passing freighter, and waiting for the ever-welcome summons from the commissary department. The man who could distort such a journey into a picnic certainly would possess queer ideas on what constitutes enjoyment.

From Duluth and Port William and the other ports on Superior to the end of the trip down on Lake Erie the final cruise for every vessel engaged in keeping navigation open to the last moment was a memorable event.

Ordinarily marine insurance on the Great Lakes is limited to November 30, although there is usually a voluntary extension of four or five days beyond that date to accommodate the final rush. This year the expiration date was moved ahead to December 15, with the further privilege of going out as late as the twenty-second. This was largely a war measure, put into effect by the companies interested because of the vast quantities of coal and ore and grain to be moved, the railroad congestion, and the desire to lend the Government all possible aid.

As a result the early part of December found scores of boats still in commission that ordinarily would have been laid up long before that date, with every prospect that they could continue uninterruptedly for some time.

Then came the quickest shutdown in twenty years, according to veteran marine men. St. Mary's river was clogged, floating ice drifted into the St. Clair river at Port Huron, with a temperature below zero to aid in forming a barrier. Lake St. Clair, which up to that time had been an open sheet of water, became a sea of loose ice that speedily piled high and congealed into masses at some points several feet in depth.

With the channel kept open between Detroit and Windsor by the passenger and car ferries, the loose ice congested down stream, piled up in the vicinity of the Livingstone channel and Amherstburg, and put an effectual stop to navigation either up or downbound in that vicinity, except as a channel might be broken through by powerful tugs and carferries acting as pathfinders.

As a result, almost over night 100 or more vessels, valued at many millions, and carrying cargoes in many instances representing more than a half million dollars each, were confronted by the prospect of tying up for from their intended destination, and even spending its winter in midlake, hemmed in by an unbreakable barrier of ice.

It was a time for strenuous action, and the men who were accustomed to doing things on a big scale rose to the occasion with a promptness that turned seeming disaster into victory after one of the most thrilling fights ever waged on the lakes.

Grand Trunk and Pere Marquette car ferries, powerful ice-breaking steamers of the Detroit & Windsor fleet, tugs of the Great Lakes Towing company and others were brought into play, but it took their combined efforts and many hours of unremitting battering at the ice jam before the boats held fast at the head of Lake Erie and in the lower river were enabled to move.

Backing ice is not the sort of pastime a normal person would select as his favorite form of pleasure. Time and again it seemed that the giant ferries must give up the unequal struggle, while the staunch tugs pulled and snorted and shoved their noses into the mass for a few yards again, only to find that further headway was impossible for a bit, while the channel they had made promptly filled up almost before the vessels that followed could reach the open water.

Yard by yard, rod by rod, mile by mile, the most powerful fleet of ice-breakers ever assembled for such a task kept at work, and always behind it came the heavily-laden freighters, doing their bit as best they could, moving almost imperceptibly, it seemed to the watchers on shore, but ever gaining a little.

It required long hours that proved dreary in spite of the attendant thrills before the first of the ice-breakers succeeded in cutting a channel down past Bois Blanc and out into the open waters of Lake Erie.

Eventually all the ships reached port, and when the coal stove league holds its sessions in the marine headquarters around the lakes this winter there will be a fresh crop of stories regarding the most spectacular cruise of two decades. And it is a safe gamble that with all the thrills with which these narratives may be embellished the half will not have been told.—Detroit Free Press.

Reforestation in Quebec.

Reforestation of denuded lands in Quebec continues to make progress, though on a small scale. The provincial forest nursery at Berthierville is to be materially extended. The reforestation work of the Laurentide Company is particularly active. Planting also has been done by the Riordan Company and the Pejepscot Company.

So far, practically all of the forest planting has been done on privately-owned lands, but the provincial government has now under consideration the question of systematic reforestation of denuded Crown lands. Obviously, the question is one of the highest possible importance.

Vine-robbed Statutes.

Chinese gardeners sometimes plant statuttes of clay men firmly in pots, just like real plants, and then drain five evergreens to grow up over these statuttes. The vines thus form a kind of robe for the statuttes men, their white faces and hands protruding from the green leaves.

Spring Wheat Seed for Ontario

The world demand for wheat for 1918 justifies the greatest possible effort towards increased production. The small acreages of fall wheat put in last fall will mean increased acreage in Ontario available for spring ahead. The Ontario Government is co-operating with the farmers in order to provide seed. It has purchased 50,000 bushels of No 1 Marquis Spring Wheat seed through the Seed Branch, of the Federal Department of Agriculture. More will be purchased if necessary to fill needs.

Distribution—Seed is sold only in 2-bushel bags. Carloads will be placed at certain points in the province where less than carload orders can be filled, the purchaser paying local freight from such distributing point to his own station. Where Farmers' Clubs or other organizations bring in carload lots, the price at their local stations will be the same as at distributing points.

Where to Buy—Purchases may be made either in the warehouse at the distributing points, or orders may be placed with the nearest District Representative of the Provincial Department of Agriculture, or they may be sent direct by mail to the Markets Branch, Department of Agriculture, Parliament Buildings, Toronto.

Payment in Cash—Price is $2.74 per bushel at distributing points. In all cases, without exception, Cash must accompany order. Send remittance by marked check, postal note, post office or express money order made payable to Ontario Department of Agriculture, Markets Branch.

Order Early—In the event of the requirements of the province being underestimated, there may not be enough seed to go around. It is advisable in order to insure having their orders filled that purchasers should place orders as soon as possible. All orders are subject to confirmation and will be filled in the order received. As seed is delivered in 2-bushel bags, orders should be for even number of bushels, and no order for less than two bushels can be accepted.

Names of Distributors at local points will be announced later. Distributing points at present decided are: Chatham, London, Woodstock, Hamilton, Brampton, St Marys, Oshawa, Toronto, Port Hope, Port Perry, Peterboro, Lindsay, Barrie, Orillia, Newmarket, Listowel, Orangeville, Alliston, Durham, Simcoe, Welland, Palgrave, Kemptville, Brantford.

ARRAN COUNCIL

Council met February the 16th; all present. Applications for position of Collectors were received from Walter Barber, J C Hills and Wm Bain. On motion of Miller and Thomas Walter Barber and Alfred George were appointed. Robt Neil interviewed the Council urging the enforcement of the law as to cutting the weeds on the highways; The Clerk was ordered to notify each pathmaster at the time when he has to do statute labor that the law would be vigilantly enforced. Samuel Crowe drew the attention of the Council to the necessity of putting a snow-fence at bill on 15th side road, Con 4. The clerk submitted statement from the Registrar General of Ontario showing the number of births, marriages and deaths in Arran during 1917 as follows: Births 31, marriages 5, deaths 16, total 52. Communication from Miss Sang thanking the Council for gift to Red Cross. On motion of Thomson and George, the Reeve and Councillor Scarrow were instructed to purchase two snow plows. The Auditors' report was then taken up and received and adopted and ordered to be printed as usual. On motion of Miller and George the following orders were issued namely: W J Underwood, stationary for his duty as Assessor, $1 50; A G Hepler, stationary for Auditors, 50c; E Boyd, gift from Arran when he cut his leg, $5; Neil Dow, breaking road after storm, Con 2, Lots 34, 35, 36, $6; James Fletcher, breaking C S R after storm, Co to refund, $2 40; James A Crawford, services as Auditor, $8; Alex Vance, services as Auditor, $8; Joe Johnston, telephoning, 75; Wm McKeen, breaking road from Tara to Co line, Co refund, $5; Fred Sperle, breaking road 30 S R, Co to refund, $4; Oliver Stewart, breaking Con 12, Lot 33 to 36, after storm, $6; Cecil Barber, breaking con 10, 30 S R to co line, $3; J H Wismer, grant to Board of Agriculture W B $10; Chas McLean, drawing tile and putting in culvert east of Burgoyne on O S R Co to refund, $6. Council adjourned until March 9th next.

H T POTTS, Clerk.

The School Board Refused

In 1848 some of the public-spirited citizens of the town of Lancaster, O., requested the use of the school to discuss the question, "Are Railroads Practical or Not?" The board entered these remarks upon its minutes: "You are welcome to use the schoolhouse to discuss all proper questions in, but such things as railroads and telegraphs are impossible and rank infidelity. There is nothing in the word God about them. If God had designed that his intelligent creatures should travel at the frightful speed of fifteen miles an hour, He would have clearly foretold through His holy prophets. It is the view of Satan to lead immortal souls to hell." The school board refused to let the party to any such enterprise.

A GRANDMOTHER IN SCARLET

The Old-Lady Proves She Is Not a Bit of Rare China to Be Guarded from Breakage.

By Rose Willis Johnson.

"You are sure you will not be lonesome, Mother? Cook isn't going out until evening and of course, should you be ill or need anything, you have the telephone. Still, if you feel the least bit like—"

Grandmother Weber made a gesture of impatience. Was she a bit of delicate old china, to be guarded from breakage?

"I shall be all right, Ruth. Run on! The day will be like all other days. I shall read and doze and potter among my flowers when it gets cooler. Don't worry about me!"

"Well, be careful of yourself!" Young Mrs. Weber still spoke doubtfully. "Take your nap and don't eat anything that will upset your digestion. And be careful of draughts. I suspect we'll have to hurry or the boat will leave us. I wish you were able to go with us but of course the trip would be too trying. Good-by. We'll have lots to tell you when we get back!"

Mother and daughter hurried away, eager to join the gay exodusionists on the deck of the Fairy Queen where hundreds of little flags fluttered and patriotic music set young blood dancing. They were going to Hamlet's Hill, to feast and frolic. There would be a reunion of friends and neighbors, a big celebration, speaking and dancing.

The music came in gay drifts to Grandmother Weber. It was ghost music of dead days. A ghost-girl in white was one of the flitting crowd. The girl was the centre of the joy and laughter. The youth beside her was—ah, he was asleep on Cemetery Hill to-day!

She walked restlessly to a mirror, looking long and earnestly at the reflection there. Was this the girl whom Gabriel Weber had asked in marriage that Dominion Day so long ago?

A spark of the old fire flamed in gray ashes. Why was she time's castaway—she who longed for the stir and surge of life, who listened for the first bird note in spring?

With a sob she jerked hairpins loose and shook down in cascading waves the silver which once had been gold. Looking hungrily into the eyes of her changed self, the hint of a resurrection glory touched her. She was not old! She was not Grandmother Weber! She was Kitty Cable, the girl in the white dress, the girl Gabriel loved and married!

Her hand quivered as she drew the comb through her hair. For years she had worn it like a silver crown. Now she shaped its crinkling abundance in the way granddaughter Bobby was following. People had always exclaimed over the beauty of her hair. It was none the less beautiful because of its touch of snow!

She studied her wardrobe discontentedly. There were house gowns, pretty dressing sacks and a rich satin, primly and elegantly correct and glaringly new.

With chin well up and shoulders squared she crossed to Bobby's room. She and Bobby were nearly of one stature. She could borrow from the child! Lying on the bed were garments, soft and white, a skirt and a middy, one of those gay little blouses with collar, belt and lacing of scarlet. There were undergarments, too, lacy and inconsequent. Kitty Cable felt lacy and inconsequent. She shrugged into the pretty things, dabbed powder on her nose and stuck a rose in her hair.

The person in the mirror smiled at her most audaciously. With light step she went out on the rose-shaded veranda and found its easiest chair. The street was quiet now. The crowd had gone its way and the band was still. The canary swung in its cage above her, now and then venturing a longing, calling note. From an alley came the secretive, jubilant snap of a fire-cracker. Farther off sounded the hum of an approaching automobile.

As the car swung into sight and came careening to the curb, Kitty Cable leaned out and waved her hand. Some youth, grandson Kennerly, answering her salute, was the pride of her heart. He ran up the verandah steps and joined her.

"Did you miss the boat, Bobby?" he cooed anxiously. "What are you doing here by your lonesome? Didn't you travel well, for the love of Mike! Grandmother!" His astonishment was a thrilling tribute.

"Hush, Ken!" she cried, her eyes dancing with excitement. "Don't give me away. I'm not your grandmother today. I'm your father's relative, Kitty Cable, come to visit you. I'm just as light-headed and impossible as yourself. Don't go after the doctor. I'm not insane! I've just gone young!"

There came a wistful tremble to her lips, pleading in the glance playing his understanding. He did understand. Swift, keen, the feeling of what it might be like to stand at the edge of the world, done with joy, done with responsibility, facing the plunge into darkness, swept over him. He dropped down beside her, gathering her into his young protecting arms.

"Dear Kitty Cable!" he loyed. "They'd never have left you behind with the canary had they thought about it. Maybe your presence here is not known? You arrived after the boat left? Sure! Well, see here, Miss Cable, I didn't intend to go to this celebration, but I am experiencing a change of heart. Let me take you to join the family. They'll be so surprised! There are oceans of time. Let me take you out in the car! Are you game, Dad's Relative?"

Dad's Relative considered. Habit held up a horrified, warning finger but the spirit of Dominion Day tossed its head. She stood proudly erect. "If I can find Bobby's hat and motor-veil and a pair of gloves, I'll go."

The little lady of dreams hurried. It was but a moment before she came out, smilingly ready to be assisted into the handsome new car she had admired but scarcely hoped to enjoy. Motoring is a reckless, draughty pastime for the infirm and aged!

"Kennerly," she jumbled breathlessly as the machine sprang into speed, "Kennerly—aren't you a—rather a—fine hand—with a high-mettled—horse—like this one?"

Kennerly's laugh was distributed down the road. "Oh, she knows her pace, Miss Cable! Isn't she gorgeous? Isn't this the life?"

The landscape was reeling by in a splendid blur of color, the wind singing in her ears. Her blood raced the wind. Freshness she drew through all her being, drinking as the thirsty drink.

"Ken!" she gulped. "I smell pennyroyal—not done up in—sacks—from the dear stores! And there's a farmhouse—like where mother—made butter—"

"Miss Cable," the chauffeur suggested, "shall we try out for a glass of buttermilk at the said farmhouse? I don't see any dog—nothing worse than that kiddy yonder. Hey, little girl, is your mammy to hum?"

The little girl inserted a finger into her pretty mouth and blinked at him shyly. The big, chugging machine was a novelty which left her speechless.

"Oh, very well!" Kennerly capitulated, assisting his father's relative to the ground and offering a gallant arm. "We still can find out. My lady of the shadow trusses, dont go near that thing while we are doing it! It might run you down. It bites like a bull dog—takes an axe to break its hold once it gets you."

"Kennerly!" remonstrated Miss Cable.

Kennerly led the way along a neat path bordered with delicate clove pinks. He took off his cap to the woman who answered his knock, making his want known in the engaging way which opened hearts to him.

"Come around with me to the kitchen," the woman invited.

It was very cool and clean there. The housewife uncovered a pat of golden butter and brought from the house a loaf of wholewheat bread.

"I was born on a farm," the rejuvenated grandmother confided softly. "This is the first real food I have had for a long time! I'm so glad we found you at home. I thought the whole world would be at the celebration to-day."

"I guess pretty nigh everybody did go," the housewife answered. "Me and Elsie intended to—fixed for it all week—but one of the horses went lame so Pa rode the mare and went by himself."

A sullen little shadow touched her smile. Kennerly looked his understanding of the shadow.

"There is room in the car and I know Grandmother will be glad to have you!" he said. "Want to go?"

The little girl whirled and looked at him with shining eyes. Then she looked at her mother. "Let's!" she breathed, her soul's desire in the pleading whisper.

"Well!" the woman said quietly. "The dog has gone and the hired man has gone—maybe the cat, too, for I don't see him anywhere. I thank you kindly. We won't keep you waiting but a minute. Come on, Elsie!"

"Old Liberty Carl"—softly apostrophized the youth. "How's this for another jail-delivery. Miss Cable? Why, I'm getting to be an expert on this line! I shall probably write a magazine special, showing a way to enlarge the eye of the needle so that, after all, the poor rich guy may have a show at getting into the Kingdom!"

Miss Cable laid an admonishing hand on the shoulder of her best beloved. "The word was not spoken against the rich in heart, Kennerly," she explained softly.

The youth flushed under her look. "Here they come!" he grinned. "All dressed up in their Sunday clothes! Now watch your grandson hand them out little chunks of bliss as we ramble!"

"Ken," she said fondly, "where did you learn to use so much slang? Do they have special courses at college?"

Miss Cable quietly accepted her own little chunk of bliss as they swept onward toward Hamlet's Hill. They were within a mile of the place when they became aware a car was giving chase. After a backward look Kennerly allowed the pursuer to gain on them. He thought he recognized the machine and its occupant. "It is young Norris," he whispered. "He thinks you are Bobby—the Bobby of his dreams. Bow to him, like a dear girl."

The dear girl's pretty old-fashioned courtesy sent a look to an eager smiling face which swept Kennerly into silent convulsions. "He thinks he is seeing things," he gasped. "That frozen smile! Here we are. For the love of Mike, what a crowd!"

Kennerly was assisting the little girl and her mother from the car when a man advanced from a group of roadside smokers and stared at them unbelievingly.

"O daddy, we've comed!" little Elsie shrilled, springing to her father's hand. "So much funny times, Daddy! Won't you buy us a car like Mr. Weber's so we can do it all the time our own selves? Won't you, Daddy? Ma says you can afford it easy and we want you to Daddy!"

"Jolted!" Kennerly giggled, under his breath, politely relinquishing his charge. "If she says her cards—you, who knows? Look yonder by the ropes! There they are, Bobby and the mater! Shades of our country's heroes, look at their eyes!"

Young Mrs. Weber was hurrying forward but Bobby, looking bewildered at her fluttering robes and Ken's naughty dimples, outstepped her. She slipped a caressing arm about her grandmother's waist.

"I know now why I am ale ys proud when people tell me I look like my grandmother!" she whispered. "You are lovely, dearest! Why have we muffled you in black and hidden you? Look at her Mamma!"

"How could you do such a reckless thing, Mother?" Mrs. Ruth wondered. "It may kill you! What will you and Kennerly do next?"

"Eat chowder and roast beef," retorted Kennerly. "Then while we watch the dancers, its quite likely we'll finish working out our receipt for eternal youth. And then—"

"And then go back by moonlight in the Liberty Car!" placidly concluded the grandmother in scarlet.

SOUP BY INSPIRATION.

I was once accused of making soup by inspiration. It is my conviction that good soup is a dish which must be more the result of good taste and judgment in combining ingredients, than of any closely followed receipt. Indeed, soup ought to appear frequently on all dinner tables and it is something that any housewife, whether rich or poor, ought to be able to make for herself, without a cook book, which may list a number of ingredients that are not on hand.

For instance, on my morning visit to the ice box, I found these left-overs: one small cupful of stewed tomatoes, half a cupful of cooked cabbage, two fried sausages, some scraps of beefsteak with a good sized steak bone, and some outer stalks of a bunch of celery.

I cut the sausages and celery into pieces and placed them with the other ingredients in the soup kettle. To them I added two onions sliced, four small potatoes sliced, salt and pepper to taste, a pinch of poultry seasoning and about two quarts of cold water, according to conditions.

I covered the kettle closely, let the soup come to a boil and placed it to simmer gently for six hours. A fireless cooker is ideal for preparing these inexpensive soups.

When sufficiently cooked, I put the soup through a rather coarse colander, using a fork to press through some of the very tender vegetables for thickening. The soup was then set away in a cold place so that the fat that would harden on top could be removed. The basis of the soup was then ready and might be finished and served in several ways. Cooked rice, macaroni or noodles could be added, or a small teacupful of tomato catsup to make a variety of tomato soup, or it might be merely reheated and served with crisp crackers.

Any housekeeper will have other left-overs as good or better than those I used. If there had been no tomato on hand, a little chili sauce might have been substituted, after the straining and skimming. When celery fails, there is always celery salt, seed or the dried and pulverized leaves. If there is no meat, a tablespoonful of beef extract added after skimming) or a scant tablespoonful of melted fat can take its place.

This is the true secret of the famous French soups, a secret worth its weight in gold to all housewives. It all lies in knowing how to combine the minute bits of good food that otherwise might be thrown away and seasoning them so lightly that the flavor is delicate rather than pronounced. Too strong seasoning spoils soup for most persons.

Still another secret in making inspiration soup is a discreet use of vinegar, lemon juice and even a pinch of sugar. By the wise addition of one or another of these valuable aids, the flat taste often noticed in homemade soups is lost. One needs to be very careful in the use and be sure of one's own tasting power for a very small amount of any of them goes a long way. Soup to be good must be tasted again and again and seasoned to taste until just right.

For the proper seasoning of all soups these supplies should be kept on hand: Herbs such as celery (the home-dried leaves rubbed to a power and kept in a covered tin) thyme, sage, savory, sweet marjoram, bay leaves and parsley; spices such as whole cloves, allspice, mustard seeds, celery seed, nutmeg, red pepper and stick cinnamon; tomato catsup, walnut catsup and any commercial flavoring. Rice, barley, macaroni, split peas, navy beans and other cereals and lentils are all useful.

Here is a roughly prepared list of ingredients which have appeared or rather disappeared in soups of mine that have received high praise.

Bakes! apples, lemon peel, cooked oatmeal and various cereals, scraps of bread, crackers and toast, mashed turnips, gravies (either thick or thin), left-over portions of hash, stew, cold meat, ham bones, sausage, bacon or salt pork, cooked vegetables, potatoes prepared in any form, liquor left from cooking meat, vegetables or poultry.

In short, with a little practice, almost anything that is clean and wholesome may be added to the soup pot, with benefit to the family health and great saving to the family purse.

Wartime Recipes.

Golden-Corn Tea Rolls.—Sift together one cupful of cornmeal with one cupful of white flour, four teaspoonfuls of baking powder and one teaspoon of salt. Work in three tablespoons of lard or vegetable shortening with the finger tips. Add enough milk and water in equal parts—from three-quarters of a cupful to one cupful—to make a biscuit dough. Turn out on a floured board, make into rolls, lay on greased tins and let stand for fifteen minutes in a cool place. Brush over with milk or melted butter and bake in a hot oven for twenty minutes.

War Cake.—2 cups brown sugar, 1 teaspoon ground cinnamon, 2 cups hot water, 1 teaspoon ground cloves, 4 tablespoons lard, 1 cup raisins, 1 teaspoon salt. Boil together for five minutes. Then cool and add 3 cups of flour, and 2 teaspoons soda dissolved in 1 teaspoon of hot water. Bake in two loaves in slow oven an hour and a quarter.

Boiled Haddock.—Wash and scale thoroughly, wipe the inside, and fasten the tail in the mouth with a skewer. Put 2 oz. salt into ½ gal. water, and when it is dissolved, put in the fish. Bring the water to a boil, remove the scum, then simmer gently (about ½ hour), until the flesh leaves the bones easily. Take it up as soon as it is sufficiently cooked or it will be hard and tasteless. Garnish with parsley, and serve with melted butter.

Barley Scones.—1 cup barley meal, 1 cup wholewheat flour, ½ teaspoon salt, 2 teaspoons baking powder 2 tablespoons fat, ¾ cup sour milk, 1-3 teaspoon soda. Sift flour, barley meal, salt, baking powder and soda together and work in fat with tips of fingers or two knives. Combine flour mixture and sour milk to form a soft dough. Turn out on a well-floured board, knead slightly, roll to one half inch thickness; cut in diamond shapes and bake in a hot oven.

Rice and Cornmeal Griddle Cakes.—1 cup cold soft-boiled rice, 1 cup cornmeal, 1 cup of milk, ½ cup flour, 1 egg, 4 teaspoons baking powder, 1 teaspoon salt, 2 tablespoons brown sugar. Put the rice and milk into a bowl and mix well; add the rest of ingredients and the well-beaten egg. If it is too thick, add a little more milk; last of all add the baking powder and mix well. Bake very brown on a hot griddle.

Lima Bean Roast.—2 cups dried Lima beans, 1 cup peanuts, 1 cup stale bread crumbs, 1 teaspoon onion juice, 1 teaspoon salt, pepper. Soak beans twelve hours. Cover with water and boil until tender. Press through a colander. Put peanuts through a meat grinder. Mix with bean pulp. Add onion juice, salt, pepper and bread crumbs.

Cottage Cheese.

When the curds of cottage cheese refuse to be anything but tough and lumpy after they have been drained through a cheesecloth bag, try running them through the food chopper and see how light and delicate they become. If you want to add piquancy to cottage cheese, either purchased at the store or made at home, add a few chopped-up cherries. Another way of varying the flavor is to mix in it tiny chopped onions or caraway seed.

Wood in Coal Furnaces.

Where wood is to be burned in a furnace intended for coal it will be found desirable to partly cover the grate with iron or firebrick, in order to reduce the draft. If this is not done the wood is wasted by being consumed too fast and makes a very hot fire which, in a furnace, may damage the firebox.

Potato seed should be purchased without delay, to be delivered as soon as safe to ship without freezing.

Shopping in a Big City

Scarcely anything pleases a woman more than to come to the city to shop. There are so many big stores with such endless variety and choice of everything.

Still there is just that little drawback about where to stay. The Walker House solves that problem. It is a home for you while in the city, and you can have all your purchases sent direct there, where there are special facilities for looking after your parcels.

Come to the city to shop and stay at

For Those Broad Acres

This Book will help you

Stop the Leaks

in your Farm Profits

WE'VE called it "What the Farmer can do with Concrete"—a title that exactly describes it, but does not give any idea of how vital it is to you.

To realize this you've got to understand that Concrete is a big factor in successful farming. Just consider the common leaks your farm is subject to, and how Concrete *stops* these leaks:

Wooden Buildings rot under the stress of time and weather. Repairs cost money. Concrete won't rot.

Rats are another source of leakage—they gnaw their way through all kinds of buildings—except Concrete, which is rat proof.

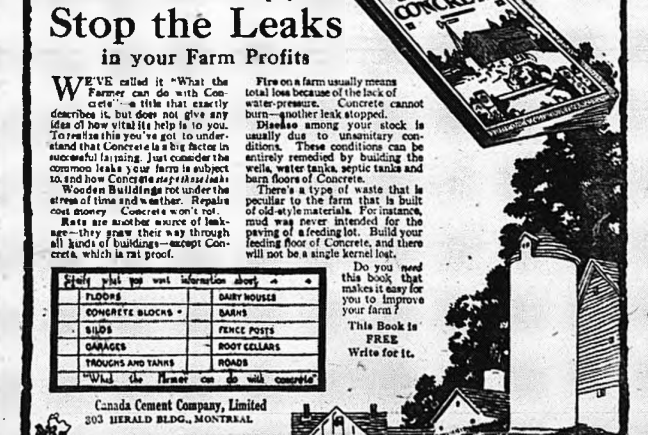
"What the Farmer can do with Concrete"

Fire on a farm usually means total loss because of the lack of water-pressure. Concrete cannot burn—another leak stopped.

Disease among your stock is usually due to unsanitary conditions. These conditions can be entirely remedied by building the wells, water tanks, septic tanks and barn floors of Concrete.



There's a type of waste that is peculiar to the farm that is built of old-style materials. For instance, mud was never intended for the paving of a feeding lot. Build your feeding floor of Concrete, and there will not be a single kernel lost.

Do you *need* this book that makes it easy for you to improve your farm?

The AUTOMOBILE

Death in the Garage.

Every now and then the morning newspaper tells of some one who was found dead in a small, private garage; very recently two well-known persons, one an actor and the other an educator, were killed by poisonous gases released by the working of their automobile engines in a small, closed garage. In very cold weather it is necessary to let the engine run for a few minutes so as to warm it up before the car is brought out into the open air, and because the weather is so cold there is a temptation to keep the garage door closed the while. But among the gases that the engine produces is one that is a deadly poison. That gas is carbon monoxide, and it amounts to about seven per cent. of the exhaust gases.

It has been shown that so little as one per cent. of carbon monoxide in the air that is breathed in can be fatal, and it is easy to see that the atmosphere in a small, closed garage, while the engine is working, must soon become dangerous. It is carbon monoxide that kills when anyone breathes the fumes from a charcoal stove in a small room, or inhales illuminating gas. Death results from the poisonous action of the gas on the blood; the carbonmonoxide combines with the haemoglobin—the oxygen-carrying substance in the red corpuscles—and makes it incapable of absorbing the oxygen from the air in the lungs.

But carbon monoxide can do great harm even when it is not present in sufficient quantities to kill. The symptoms of this sort of gas poisoning are headache, dizziness, nausea, bronchial irritation and sometimes convulsions. The irritation to the air passages may cause a severe bronchitis or even prepare the way for pneumonia.

In treating poisoning by carbon monoxide try to stimulate respiration, dash cold water on the chest, carry the patient into the open air and, if other measures fail, practice artificial respiration. Hot black coffee may be given as a stimulant, but alcohol is best avoided, or given in small amounts. In severe cases a copious bleeding followed at once by transfusion of blood, in order to replace the poisoned red corpuscles by healthy ones, sometimes has saved life. The accidents mentioned at the beginning of this article can be prevented if the automobile owner will remember that the exhaust gases of internal-combustion engines are poisonous and is careful never to start the engine when the garage door is closed unless he has first attached a rubber or metal tube to the exhaust pipe and passed it out through a hole in the door. In that case the tube should fit closely over the end of the exhaust pipe so that none of the deadly gas can leak out.

Test Brakes Before Trip.

"Safety, convenience, economy, all are dependent more or less upon the efficiency of a car's braking apparatus," says an expert. "Tire economy, especially on hardened or slippery roads, can be governed by braking efficiency.

"Make sure both brakes take hold with equal effectiveness, keep your brake linings clean and dry, and use moderation in applying your brakes. Never apply them so suddenly that your wheels become locked, causing the car to actually slide over the road by its own momentum.

"I have seen tires with a section the size of a man's hand gouged out of the tread when uneven brake tension caused one wheel to lock and slide while the other rolled. Let the wheels keep turning, but under the slacking pressure of the brake, and your car will be brought to a standstill more quickly, in greater safety and without detriment to tires."

FISH WASTED IN WAR TIME.

Several Excellent Varieties Thrown Away.

Paradoxically enough, war is compelling economy. If the conflict continues, it will be difficult to avoid world hunger. Food conservation is especially essential. This implies greater production, the prevention of waste in every form, and the substitution of hitherto unused products for those that were formerly staples.

In the fishing industry there is room for considerable substitution. Many varieties of excellent food fish are not only not fished for, but, if caught with other fish, are thrown away and wasted. Prof. Prince stated recently before the commission investigating the salmon fisheries of British Columbia that "there must be forty or fifty varieties of edible fish in British Columbia waters that could be put on the market . . . but, of those forty or fifty excellent fish, at the outside limits, only eight or nine are utilized . . . and five or six of those belong to the salmon family." Many "flat" fishes, as well as varieties of the cod family, have not been utilized at all, and, as they abound in our Pacific waters, they could be turned to excellent account in relieving the food shortage. In like manner, the herring fishery is capable of great expansion.

Concerning the fisheries of the Atlantic coast, Prof. Prince has drawn attention to the waste of such fish as the tuna or horse-mackerel, a fish greatly prized on the French markets, but which is merely thrown away by Canadian fishermen for lack of a home market, and the failure to cultivate a foreign one. One species of this fish has been marketed to some extent in the United States. The wolf-fish or sea-cat is another fish of the Atlantic that is caught in large numbers, and thrown away as useless. The British market, always a fastidious one, has had a demand for these fish for a number of years.

In brief, the Canadian market has confined itself to a few of the well-known varieties—not always the best—and the greater number have been neglected or wasted. The result has been a steady depletion and the consequent need for artificial propagation of the oyster and lobster and such fish as the whitefish, shad and salmon. By using more varieties of fish the strain on the older fisheries would be relieved and, at the same time, great quantities of excellent food, at present neglected and wasted, would be turned to good account at a time of national and international need.

JAPANESE LIKE FAT MEN.

Weight and Girth Help to Make Oriental Wrestlers Champions.

In this country when a man of average height takes on girth until his weight runs up to 300 pounds or so, his friends have grave doubts about his condition and advise him to diet in order to bring back a slim elegance of figure. In Japan the contrary is true. If a man can carry 300 pounds of flesh with any agility he is of the material from which heroes are manufactured, and if he can work up to 400 or 450 a special notch, and becomes a wrestler, he is in the running for the championship.

Wrestling is to the Japanese what boxing is to us, and more. The populace goes crazy over it, and the magnates of the big game handle great sums in the way of gate receipts. The Tokio Wrestling Association controls the flower of Japan's heavyweights, and at its head is a 250-pound veteran, T. Dewanoumi, the holder of the championship for eleven years in succession—a record feat.

To Cut Stove Pipe

It was necessary for us to cut a piece of stove pipe, and as we were in a hurry to have the job done and a long way from the tinsmith, we had to devise a means whereby we could cut the pipe ourselves, evenly. With a piece of white chalk a line was marked where the cutting was to be done, then a can opener gently driven into the pipe, directly on the line. By proceeding carefully and slowly an ideal job was done.

Nurture your minds with great thoughts. To believe in the heroic makes heroes. —Disraeli.

Reading that does not create and foster a taste for good literature is of doubtful value.

HOW GERMANY BUILD'S U-BOATS

EXPERT DISCUSSES METHODS IN DETAIL.

Every Nerve is Being Strained by Huns to Intensify the Production of Submarines.

Quite recently Mr. Lloyd George told us the heartening news that our fleet had destroyed five German submarines in one day, says a naval expert. We know that, although this success was exceptional, it was by no means the only one that the British Navy has scored in its fight against the U-boats. One does not exaggerate when saying that in the past three years a larger number of these ruthless craft than Germany possessed when she started the war have been sent to the bottom. How, then, does she manage to continue her submarine campaign against our shipping?

Result of Concentration.

In the answer to this question lies matter for serious reflection for us at the moment. Germany manages to continue her under-water offensive vigorously because she has concentrated all her shipbuilding and engineering resources upon the production of U-boats in quantities.

She soon saw that it would be hopeless to compete against us in the construction of surface ships. Although her building facilities were considerable, they did not equal our own. So she concentrated upon submarines. For this purpose the whole of her thirty-odd shipyards, hundreds of engineering shops, and the shin-constructing power of Austria as well, were mobilized to keep the campaign of piracy going. She first designed certain standardized types, and then organized the production of them on an extensive plan.

The Ocean-Going Type.

Under this she turns out U-boats in the same wholesale way that American factories do cheap motor-cars. So far as can be ascertained, her output of these craft averages three or four per week. They are not all supersubmarines. One class is used for minelaying, another for coastal operations; but the most important is the ocean-going type, displacing about fifteen hundred tons.

The latter craft are about three hundred feet in length, carry some sixty men, and leave port equipped for a voyage of three months. They have sufficient radius of action to carry them practically anywhere about the Atlantic or the Mediterranean.

It is upon this sort of undersea boat that Germany applies most of her constructive energy. Possibly she may have built "diving cruisers" of larger displacement; but, if so, she has not yet risked them at sea.

An Efficient System.

This is how her system of building U-boats rapidly is worked. The various parts required are divided out amongst factories all over the Central Empires. One firm makes a given section of the hull, another firm a particular part of the engine, yet another has one of the instruments required for navigating allotted to it. Whatever part may be allocated to a factory, that factory does nothing else but manufacture. Its work may be merely a piece of plating with so many holes punched in it, or it may be a part of a periscope-fitting requiring the most skilled workmanship. Whatever it be, every bit of time goes to the turning out of that article as quickly as possible.

As a result of this specializing, the workmen employed upon the single job become very expert at it, and their output reaches the maximum in quantity, coupled with accuracy in finish. As they are completed, the different parts are sent to one of the shipyards at Kiel, Wilhelmshaven, Dantzig, or Trieste, and there bolted together. In a manner of speaking, a truckload of sections goes in at one end of a shop and a submarine comes out at the other. By this practice of standardizing output is raised to the maximum, since a boat thus "assembled" can be turned out all ready for sea in a mere fraction of the time that would be required to build one from the keel up.

Practice Makes Perfect.

Really, the mechanics in the yards do not build at all in the accepted sense of the word; they simply sew together a garment that has been cut out elsewhere. But long practice at the job enables them to do it very quickly. That is another advantage of the German system of intensive construction. Everyone employed under it, whatever his part may be, acquires such deftness from doing the same thing overfand over again that he accomplishes it in the minimum number of minutes, or hours, as the case may be, allowed for the work; and all these operations are carefully timed. In fact, timing so that there shall be no waste of minutes is one of the essential features of the system.

The submarines turned out by these methods are not, perhaps, so perfect as they would be if ordinary ways of construction were adopted for producing them. They are roughly finished in so far as the hull goes. Inside, they may be compared to a new house with unplastered walls. But the periscopes, compasses, and the various other instruments required for working them are carefully made, so that rawness in the mere shell of the craft does not matter. There is nothing shoddy in the more important parts of her equipment.

Training as Pirates.

From the enemy's point of view the system has been a great success, as it gives him numbers, and that is the object he most desires to attain. So long as he can keep up an output of three or four new submarines per week, so long will his U-boat campaign remain a very grave menace to us.

Numbers is not the only advantage which Germany reaps from her methods of standardizing submarine output. By them she gains time in training crews, and is thus able to send her U-boats straight from the building yard into blue water.

At Kiel and in the Elbe she has established submarine training schools, where, budding "pirates" serve their apprenticeship in the navigation of U-boats, and are taught the other elements of the "skull and cross-bones" trade. As the boats are all alike, crews trained in one can be put aboard another, and handle it competently without needing a long period of experience in her before they get used to their training vessel.

Of the crews thus licked into shape, the best that can be said is that they match the boats. By means of them Germany achieves her purpose of keeping a submarine campaign going.

A Formidable Foe.

Having more space in them, the latter type of U-boats provide better accommodation for their crews than the earlier ones did. Apparently, as much is made of this as possible, but even so the "pirates" have but a rough time of it at the best. Although this may not concern the kaiser and his Grand Admirals, greatly, the crews whom they hustle to sea in raw-edged submarines feel the discomforts of their incompletely finished craft pretty acutely.

As fighting machines these new U-boats are formidable. They are fitted with a sharp bow, which enables them to cut through such obstructions as nets. They carry four-inch guns, placed on a disappearing mounting, the hood of which forms a protecting shield over the crew when the weapon is lifted for action, and their torpedoes hold a charge of about one hundredweight of high explosive, which means that anything they hit will almost certainly be destroyed. They can move very rapidly on the surface, and are double-hulled, so as the better to resist attack.

Where Ostriches Waltz.

One of the oddest sights on the sandy stretches of plain in Southern Africa is a party of waltzing ostriches. A writer thus describes their queer antics:

"When there are a number of them they will start off, and running a few hundred yards, will stop, and, with raised wings, whirl rapidly round till they are stupefied, or perhaps break a leg. The males pose also before fighting. They kneel on their ankles, opening their wings, and balancing themselves alternately forward and backward, or to one side or the other, while the neck is stretched on a level with the back and the head strikes the sides, now on the right, now on the left, while the feathers are bristling. Then the bird appears at this time so absorbed in its occupation as to forget all that is going on around him, and can be approached and caught. The male utters a cry which sounds much like an effort to speak with the mouth shut tight."

THE END OF THE AIR RAID

A REMARKABLE PERSONAL EXPERIENCE STORY.

Told by Second Lieutenant F. de Marmier of the French Flying Corps.

Dunkirk, April, 1916.—Magnificent day; sky, clear; wind, west. The bomb dropping group, G. B. 104, has set up its hangars and offices on the beach, and since January every fine day we fly over the enemy to destroy his fighting forces.

On the 9th all hands, pilots and observers, were lounging about the offices, some playing bridge, others engaged in lively discussions, still others studying their maps or, with the aid of their mechanicians, putting their airplanes in readiness.

Ten o'clock.—The commander calls us all together. An order has come from headquarters to bombard the submarine station at Ostend, where two submersibles are resting. Each one, in accordance with the instructions of the commander, marks upon his map the designated point on the canal, between the outer and inner harbor, where are located the hangars which protect the submarines.

Lined Up For the Start.

Instructions are as follows: "Start in a bunch at two o'clock, spread out, arrive at Ostend from the sea and return any way you can."

As soon as finished every one hastens. The pilots and mechanicians run to their airplanes, fasten the bombs in place, fill the gasoline tanks, see that everything is ready and perfectly adjusted. Each observer lays out his route and determines his land marks for firing.

After a good breakfast, partaken of with subdued gayety, every one is on the field. The commander squeezes the hand of each one and the machines are lined up for the start.

Now comes my turn. Maillefert, sergeant observer, my passenger. He climbs on board, takes his seat, inspects his sight and bombs and fastens his map in place. I make a final inspection of my engine, of the whole machine (the condition of success). Then, at a signal from the commander, I start and climb swiftly into the sky. There I observe to see if all is well. I listen to the purring of my engine, whose regular rhymth strengthens my confidence. I look at Maillefert, who likewise gives me a last glance, and we exchange a confident smile.

Over the Enemy Lines.

Off Nieuport, at a height of 2,100 metres, we cross the lines. The guns of the enemy now begin to sow the air with puffs of white and black. Those are the explosions of the shells.

We are almost the last and already our foremost comrades have reached Ostend, for the cannonade, which has increased in intensity, is now sowing the sky with thousands of puffs at all altitudes.

We are now off Ostend, at a height of 2,400 metres. The defensive barrage fire which covers the city is adjusted to our altitude. It is impossible to pass. I veer off, climb a little higher, then, after having exchanged a last glance with my observer, I dive straight for Ostend.

We are at the barrage. The moment is critical. Shells are bursting above and below us, to the right and to the left. Through the noise of the engine the sounds of three or four explosions reach our ears. Pretty close shots, those! Not more than 100 or 150 metres away.

At last we are past. Quickly I bring into my sight the line of the canal and head to the wind. With engine at low speed I await the firing of my observer. It is done. He slaps me on the shoulder, and cries "Let us go." I open the throttle and start off, but the barrage fire increases in intensity and the Boches have got our range.

Hit by a Hun Bullet.

Suddenly I feel the airplane lifted. There is an enormous hole in front, a deafening noise, blood. We are hit. Parts of the airplane, the compass, have fallen. My blood is flowing. My foot has been cut off. I do not move. I am so stupefied. Six shots from the battery, adjusted like the first, burst within fifty metres.

We are lost! No, the airplane keeps on. The engine is running. I have the intuition that we are going to escape. Then I collect myself. A sharp tack to the right, another to the left, but without avail. The shot which cut off my foot also broke the left rudder bar.

I try the ailerons. They fail to respond. We are diving downward, falling. This false move saves us. I let the machine dive. The Boches, seeing us fall, stop firing.

After falling two hundred metres I suddenly right the machine and make off. The terrible cannonade breaks out anew and follows us with ferocity.

Finally, after about twelve kilometres of flight, it is over. The Boches no longer reach us. We forget the sea —the possible breakdown. The cannonade is over. My observer is standing talking to me.

The wind rushing through the airplane covers me with blood, which drips everywhere. The airplane is covered with it, too, and on its white wings there is something tragic about this blood.

A Beautiful Landing.

Maillefert asks if I am all right. Forward! To pilot, also, he does not know how, and the airplane is so badly damaged that in his hands it could only be the fall and death. I have the conviction that I can save us. I refuse his aid.

He sits down and writes a farewell to his mother.

I collect my senses, bind up my left leg (with the foot cut off) to lessen the flow of blood and take account of conditions. A dark mass, by the vibrations, is approaching the opening and is in danger of falling into the propeller. I gather it up and pass it to Maillefert. It is my foot that I pass him without knowing it!

The ignition connection is broken. The throttle also cut, so that, with it clear down, the engine still runs at 540 revolutions a minute, with no way to stop it further. The front wheels of the airplane swing before my eyes, the axle broken. I must land, which means a crash and fire.

Thirty-seven minutes after the blood is gan to flow, the cold is taking hold of me and I feel very weak. Then, near Furnes, an airdrome—French. Time to land. Guiding with a single foot, I arrive over the airdrome and am about to land when I perceive that we are not facing the wind. Although completely exhausted, I make a last turn, before the astounded eyes of my comrades below, and, face to the wind, accomplish the most beautiful and difficult landing of my life.

Cross of the Legion of Honor.

My observer stands up and kisses me. *He is not hurt.* A piece from the bursting shell had pierced his helmet and lodged in his hair, while the airplane itself was riddled. Maillefert tells me that he saw the shell strike.

We are satisfied. My enthusiastic comrades lift me from the airplane and carry me to the hospital, where my chief, in bringing me his felicitations, announces that I have won the Cross of the Legion of Honor.

Although very low, the surgeons succeed in saving me and seven months later I returned in a fighting plane to see this excellent man.

My passenger has received the army medal and became pilot.

One of Many Heroes.

Individual incidents of bravery at the front are so numerous that only occasional mention is made of them in the newspapers. Many a gallant Tommy or poilu has risked his life and very likely lost a leg or arm, only to find that, while he has earned a medal, few persons know of his heroism. Recently eight Albert medals were granted by the King of England to men whose deeds of valor stood out above the others. Sergeant Healy, in France during bomb practice, grabbed a live bomb which threatened to explode and kill several men, and ran with it to a point where the explosion could injure only himself. He was killed. All the others whose lives had been endangered were saved. The medal was presented to his relatives. And on it are mentioned other deeds just as gallant which he did for the welfare of others. He was a hardy Irishman.

Chicken fat is often wasted. The French housewife thinks it is the finest shortening for cakes.

Nearly 20,000 British South African natives have been recruited for service behind the lines in France and Flanders.

The Doings of the Duffs.

PRESENTATION AT WILLOW CREEK

On Monday evening, Feb 18th, a surprise party comprised of a large number of friends and neighbors of Mr and Mrs Wm Wrightson invaded their home on the 4th of Grece to pay their best respects to this estimable couple before they left the farm to live in Paisley. Rev Mr Hallman, pastor of the U d church, was appointed chairman, and soon a good programme was under way. Short speeches were made by Messrs Geo Baker, Jos W Hyde, John Hyde and Fred Schnitker. Some young ladies sang a quartette, and a recitation was given by Mr Wm Moir, from the west. Then Mr and Mrs Wrightson were made the recipients of a very tangible token of good will, a handsome couch. The accompanying address was read by the chairman, the presentation being made by Messrs Geo Baker and J W Hyde. Following Mr Wrightson's appropriate reply the ladies served lunch. The balance of the evening was given over to the enjoyment of dancing, games and music. Mr and Mrs Wrightson removed to Paisley on Friday, and they have the best wishes of all for the future. Below is the address:

To Mr and Mrs Wm Wrightson:

Being aware of your early departure from our community, we as your friends and neighbors have gathered ourselves together to spend another social evening with you, and above all to express our regret to you of your removal from us. Mr Wrightson, being reared and spent the major part of his life in the community, has always had the respect and confidence of all classes. Mrs Wrightson, since her coming to the community, has also won the esteem and goodwill of the neighbors and friends. Your removal from us will be a distinct loss, yet we feel grateful to know that what will be our loss will be the gain of the town of your new abode. We kindly ask you to accept this couch, not for its monetary value, but to express to you in a slight and tangible way our esteem towards you, and trust that in the years to come it may often bring bodily comfort to you, and also recall many pleasant memories of happy associations spent in your former community. For the future we wish that Providence may be kind to you, that you and your family may be blessed with health and temporal prosperity, and that you may have grace (spiritual) to live a life that is pleasing to Him from whom all blessings flow. Signed on behalf of your neighbors and friends, G H Baker, J W Hyde.

WALKERTON

A young man was brought in to the County Goal from Lucknow on Tuesday to serve sixty days for vagrancy. He states that he is a "dope" fiend and he begged the magistrate to send him down until he could break himself of the morphine habit. At present he is so used to the drug that he can take a dose big enough to kill several people. He is 27 years of age and has been quite a bright young chap before the "dope" got him. He has clerked in drug stores in Toronto for about seven years.

The case of the Village of Teeswater vs. Trench came up for trial at County Court on Tuesday before Judge Thos Dixon. It is an action brought by the Village of Teeswater to recover moneys held, it is claimed illegally, by Constable Bolt. Trench, who is the well known ligetning rod contractor and race horse owner, took the job of Constable under local option in 1915. the agreement being that he was to retain half the fines as his fees. He secured conviction of two parties who paid $1250. After paying out the legal and other expenses and retaining $625 as his own fee, he paid the sum of $519.75 to the village. He claims that he made an agreement with the corporation's solicitor that this amount would be accepted as payment in full. The village sued him for the difference between $625 and the amount paid in ($519.65) or $105.25 plus interest to date. After hearing a number of witnesses the Judge reserved judgment.

A Walkerton soldier's wife is in a dilemma to know whether or not he has been fleeced of $50. Last week she received a cable signed by her husband asking her to send that amount of money by cable to a certain address in England. She sent along the money. Shortly afterwards she heard of a woman in Stratford who received a cable something like hers who afterwards found she had been fleeced. As the Walkerton woman's husband has been 14 months in France, she wired, on the advice of friends, to Ottawa to ascertain if he was on leave in England, and got a reply that her husband is in France with his unit. This would appear to confirm the theory that she was the victim of a swindle. But on the other hand it is learned that other soldiers have sent cablegrams from private addresses in England lately and received the money O.K. As the soldier's wife gets letters from her husband on every British mail she will likely discover very soon whether the cable was bona fide or whether she was the victim of a flim-flam game and is out an amount she can ill afford to lose.—Telescope.

TENTH CON. BRUCE

The pleasant weather of the past week has been a welcome visitor, after such a long, cold hard winter.

Quite a number of the young folks of this line took in the box social and dance at Underwood on Friday evening and report a good time.

Mrs George Thompson of Owen Sound was visiting friends here last week.

The ratepayers of No 15 school are preparing for the erection of a new up-to-date institution. With the high cost of material and labor at the present time it is no small undertaking.

Mr McKay, agricultural expert, is holding a meeting in McGillivary's school house on Monday evening for the purpose of forming a farmers' union or club. Particulars later.

Our old friend Charlie McDonald says we are going to have an early spring. If Charlie has been studying astronomy and weather conditions this winter and was wise to this good piece of news all along, we think it was a mean trick of him that he did not let us hear of it before.

Mr John Thompson's clover threshing outfit is making the rounds once more. He reports a very slim turnout and not of very good quality.

Miss Reta McDonald has returned from a two weeks' visit in Walkerton with her friend Miss Hazel Irwin.

TWELFTH CON. ELDERSLIE

Death again entered our midst and removed one of our oldest and most respected residents, when Mrs Martha McCallum was called home. She had been enjoying splendid health until within a short time of her death, when she contracted a severe cold, to which she succumbed in spite of all that medical aid and loving care could do. The deceased, whose maiden name was Martha Leonard, was born in County Cavan, Ireland, in 1835. While young she came to Canada, settling in the township of Darlington, Durham county, where she lived till five years after her marriage, when she and her husband moved to lot 11, con 11, where she has ever since resided. Her husband predeceased her, having passed away on Jan 12th, 1910. She is survived by a family of three sons and two daughters, all of whom live on the 10th con. Though of an unassuming disposition she was a true friend and a kind neighbor who's presence will long be missed by all who knew her. Much sympathy is extended to the bereaved family, and may they feel that "One above, in perfect wisdom, perfect love, is working for the best."

CLAMIS

(Intended for last week)

Mr. Dan C. McKinnon, of the 10th of Kincardine, has sold his place to a Mr. Johnston, and bought another one in Huron, and will move in the spring.

Mr. and Mrs. Allen McKinnon, of North Bruce, spent Thursday afternoon with Mr. Joseph Cunningham and family.

Mrs. Neskitt returned on Thursday from Holland Centre, where she attended the funeral of her mother, the late Mrs. Jackson. Her brother-in-law, Mr. Rolston, of Owen Sound, accompanied her and remained a few days.

The ordinance of the Lord's Supper was administered in the Presbyterian church on Sunday last.

A box social will be held in the Oddfellows' Hall on Tuesday, Feb. 27th, proceeds to go to replenishing the library.

Miss Winie Wrightson who has been bedfast for the past week, is improving.

Mrs. Dougald Gilchrist, of Detroit, is home on account of the illness of her father, Mr. McLeod on the 2nd of Bruce.

—Rev J A Hills, of Geneva Presbyterian church, Chesley, has received a call from Davenport Road Church, Toronto.

DON'T WORRY THE "BOYS."

Letters to the Front Should Contain No Troubles.

"Write to the boys in the training camps and at the front," is the exhortation that comes to us from those who are most closely in touch with the whole situation, thus emphasizing as a patriotic duty what is to us a personal privilege of love. Write to them often. Do not allow them to think for a moment that you have forgotten them or are getting so used to their absence as to be indifferent to it. Write to them minutely, touching on all matters of the life they have left behind them. Do not let them feel that they have "dropped out" of everything back there. Help them to keep in touch with whatever is going on. Try to make them realize that in your understanding of the matter the separation is only temporary, and that you are expecting them to come back and pick up the threads just where they dropped them when the call came. Nothing will more hearten them than the consciousness that they still "belong."

But do not write anything that will tend to discourage them or to make their task harder. It will be hard enough at the best. Do not add to the load by detailing your own troubles and fears and distresses and loneliness. Touch lightly on the fact that the baby is not very well, or that the business is not running smoothly, or that it is becoming increasingly difficult to get along with all prices so high. He cannot help these things, and it will only add to his uneasiness to have them continually thrust upon his attention. Of course they belong to the budget of home news that you are expected to send him, but they need not be too strongly accentuated. Use the soft pedal for some things, and beat down hard upon the loud pedal on the cheerier, brighter, funnier side of life. Put in the children's comical sayings. Tell of the growing patriotic sentiment in the village or town, and how it expresses itself. Quote the last joke you have heard. Tuck in a funny picture clipped from the newspaper—if you can draw one yourself so much the better. Make your letter of such a nature that he will have to shout with laughter when he reads it, and do it even though your hand trembles so that you can scarcely write, and you can hardly see through the tears the words you are trying to form on the paper. That is your part of a hard job. He has his. Do not make it any harder by emphasizing how hard yours is. Tell him that you love him and miss him—of course you will tell him that; you could not well help it. But do not forget to tell him, too, and to tell him again and again, that you are proud of him, and are glad to the very depths of your soul that he is a man big enough and brave enough, and self-sacrificing enough to dare everything in defense of his country's life and honor. Such a letter as that will put new heart in him. When you write it you will be "doing your bit" with him for the country. The first line must be held by the valor and courage of the men who have gone or who shall go to the front. The second line must be held no less strongly by the love of those who must stay at home—a love that will be cheerful and considerate and, unselfish, a love that will be sacrificial, choosing to suffer in silence rather than that its natural expression in sighs and groans should unnerve the arms of the Nation's defenders.

Champlain Book Sold.

A volume written by Samuel De Champlain in 1603 on his exploration in Canada, entitled "Des Sauvages," which was bought several years ago in a book store in Paris, France, for thirty cents, was sold for $3,500 at a book sale in New York. A few years after it was published the explorer discovered Lake Champlain.

Send THE ADVOCATE to the absent member of the family or to the distant friend. It is as welcome as a letter from home and is a weekly visitor. You can better imagine how the home paper is appreciated when you are absent yourself and a copy is forwarded to you.

We have a very superior line of both kinds, and will guarantee them to give you satisfaction.

F. S. MacLachlan

Paisley Boy in Important Position

Mr T W Quayle, formerly of Paisley, has entered upon his duties as private secretary to the Hon. A. L. Sifton, Minister of Customs, at Ottawa. Mr Quayle had been engaged in journalistic work in the west for a number of years, on Lethbridge and Calgary dailies.

Elected an Alderman

Mr John McDonald, a Bruce Tp. boy, son of Mr Chas McDonald, of the 10th con., is one of the city councillors of Grand Forks, B C, this year. He was asked by some of the leading citizens to stand and was elected by a good vote. The Bruce boys fill a lot of civic positions in B C municipalities.

Red Cross Shipments

Contents of bales of Red Cross supplies in January shipment: 123 pairs socks, 18 flannel shirts with collars, 8 suits pyjamas, 6 sheets, 60 Turkish towels, 7 trench towels, 24 cheesecloth handkerchiefs, old flannel and old linen. Sent to Nurse Jessie Ross—23 flannel shirts, 9 suits pyjamas, 12 prs socks, 1 muffler. Donated by 12th Bruce, per Miss N McGillivray—19 flannel shirts, 9 suits pyjamas. Donated by Lockerby W P L—10 pairs socks, made by Williscroft ladies—24 prs socks, 7 flannel shirts, 3 suits pyjamas.

—Dr John McGillivray, who died in Denver on Feb 9th, had numerous relatives and friends in this section. Deceased was born in Bentinck Tp. and was 58 years of age. He taught school in Grey and Bruce and then went to the United States and studied medicine. He located at Denver, where he remained up to the time of his death. Deceased was a very prominent personality. Besides his large practice, he held the position of police surgeon in the city.

Has Diphtheria in France

Mrs N D McLeod has received word that her son Pte Wilbert McLeod, of the A. M. C., is ill with diphtheria at the hospital where he has been stationed in France.

Curlers at Walkerton

Two rinks of Paisley curlers went to Walkerton on Friday afternoon and had a friendly little tout with the county town manipulators of the besom and stanes. The score for the day's playing came out a tie with the score at 30 shots each. The Paisley rinks were: J D Glover (sk), Rev Mr Diehl, F S Ballachey, L C Spofford, Thos Muir (sk), W Rae, Jas McGill, D McGregor.

Red Cross Report

The report of the Red Cross workers of U S S No 10, Bruce and Greenock, for the year ending January, 1918, is as follows: Balance on hand from last year, $205 25. grants from Bruce Tp Council, $135; grants from Greenock Council, $60; donations and collections, $61 01 — total $461 26. Expenditures—$383 47. Balance on hand, $77 79. Work shipped—235 pairs socks, 171 flannel shirts, 2 quilts, 1 sheet and 1 pr of pillow slips. Mabel Nelson, Sec'y.

Public Not Interested

The advertised lecture on "Tuberculosis and Its Prevention," by Col T H Race, was attended by only a handful of women and one man on Wednesday evening of last week. It is rather a deplorable thing that the people are so indifferent to the efforts being made to eradicate a disease which is a menace to human life in our midst. However, Col Race was more successful in his canvass for funds, his subscription list being supported by contributions from numerous citizens.

ADVERTISING RATES

Subscription Price—$1.50 per annum in advance. To United States subscribers $2.00 per year in advance.

Advertising Rates—Legal and other casual advertisements 10c per nonpareil line for first insertion, 3c per line for each subsequent insertion.

AUCTION SALE

Farmers interested in good stock will find it to their interest to attend the auction sale at D McRae's, lot 19, con 4, Saugeen, on Friday, March 8th, at which will be offered for sale 12 head of horses, five of which are pure bred Clydesdales, and two of these are imported mares; 20 head of good cattle, six of which are milch cows in call; 54 first-class ewes and 3 yearling rams. Sale to commence at 1 p m. Eight months' credit on approved joint notes, 5 per cent discount for cash. R C Pearce, Auct.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

The AUTOMOBILE

Choosing a Car.

Choose a car with the same care as you employ a man. When you employ a person you ask for recommendations, for evidence that will help to identify him, to be able to judge his worth to you. You cautiously investigate his record, his reputation with former employers, his reliability in past performance of duty. You are particular about his appearance. If he gives you a bad impression at first he may never have another chance. You are anxious to secure the best available for your need.

Your car should be selected with the same care. In the beginning, however, keep in mind that no single car is the only good car. No car is the best in the world. There are many cars of acknowledged reliability in make and performance, and hence you should judge a car by the known reliability of its maker. Seek a car built by a company of acknowledged financial standing, inquire of the extent of its equipment, of the number and size of its plants, of its reputation. It is safe to assume that only a successful car can create a large and sustained demand from the public.

Make up your mind to the fact that a motor car presents the ideals of the manufacturer—and its worth will be in proportion to that ideal. You should seek a car that has been sincerely built—in which there is incorporated a high mechanical standard. There is wisdom in the public taste. Find out how the average owner regards the car you intend buying. You should buy a car that your wife and children will be proud of—a car with a good name. You cannot be too scrupulous in your choice, when you purchase an automobile you make an important investment.

Like Buying a Horse

Let us compare buying an automobile with buying a house. In buying a house, you would make certain of the strength of the foundation. You would inspect it inside and out. You would go over it from every view. You would weigh each item. You would consider the purchase from the angle of sturdiness, its method of construction and material used. It would be the same from an artistic standpoint. You would consider the harmony, the finish, the detail, comfort and beauty.

Cover these points in buying an automobile. Be just and careful. Be thorough. It pays, for your thoroughness will help you to gain a good idea of automobile construction. And you need this knowledge. For once an automobile owner, always an owner. And with increased knowledge you will be better able to judge values in the future.

Buy a well balanced car—a car in which equal attention has been given to mechanical dependability and good looks. But in judging let mechanical dependability come first, for without it you will be helpless.

A beautiful exterior is something to feel proud of. But it will not help you in case your car breaks down on the road. It is good business sense to buy a car that is right mechanically as well as artistically.

Learning to Drive

After you have made your purchase be careful how you start. In the beginning read minutely the instructions furnished with the car. They are given you for the purpose of acquainting you fully with the various mechanical operations. Know every rule, every definition, every instruction. Have confidence in yourself and your ability to master the knowledge of driving. Learn in the beginning the functions of the motor, clutch and transmission. Know how the power is delivered to the rear wheels.

Know what each lever will do. Study the use of each instrument on the dashboard. Learn thoroughly the principles of motoring. These will be found simple. Take your first lessons when there is little traffic and as you increase in knowledge and practice venture in busy streets.

Keep your eyes in front of you. Do not endeavor to speed. Go slowly. Forget everything but the car, in learning to drive, exercise care. Do not get nervous. That leads to confusion. It is comparatively easy to go through the motions of starting, steering and stopping before you drive your first mile—if you concentrate!

Hold your feet ready on the clutch and brake pedals. This adds confidence. Hold the steering wheel lightly. Steer easily. Start and stop gradually. Practice makes perfect. Use good common sense all the time and do not lose your head.

You should see a service man when you notice an unusual noise or a grinding or binding, or when your car does not seem free in running. A good driver is a good listener. The adage, "A stitch in time saves nine," holds especially true here.

Little neglects bring big troubles. If a brake band needs tightening have it done. Delay might prove disastrous. You may want to stop suddenly and be unable.

Select for your work men who know your car. Do not take it to strange places. When your car is injured have it attended to promptly.

TRAINING WAR WIDOWS.

Scheme Under Preparation by British Ministry of Pensions.

The British Ministry of Pensions is preparing a scheme under which widows of soldiers and sailors can receive training in some occupation whereby they may become self-supporting. These occupations have not yet been designated, but there are certain callings for which women are well adapted. The scheme will be worked under the Local War Pensions Committee and consideration will be given different local conditions.

After the war there will undoubtedly be an oversupply of stenographers, as many temporary government officers will be no longer needed with their clerical staffs, and the same will apply to many private businesses. In this and similar occupations training would be restricted to those who have possessed knowledge of the work before marriage and could regain former proficiency. Determining factors will also be her age, education, previous occupation and apparent adaptability and her prospects of success in augmenting her income. A course of training will not be considered advisable where there are children under 16 years of age, unless adequate provision is made for their care.

The fee for the training, exclusive of cost of maintenance if living in the institution in which the training is given, will be paid by the Ministry and will not ordinarily exceed $1.80 a week. The Ministry may also make a maintenance allowance at a maximum of $5 per week. A normal training period of three months is contemplated, but in more skilled or semi-professional occupations a longer time will be necessary.

The Saskatchewan Department of Agriculture has sent a circular letter to officials of all urban municipalities in the Province urging backyard and vacant lot cultivation.

FREE to Boys or Girls

SIMPLEX LITTLE GIANT TYPEWRITER

Has all letters, figures, period and comma. Rubber type, strong and durable, iron body, and a perfect feed roller. Can be used for writing letters, addressing envelopes, bill-heads, tags, etc.

Send us your name and address and we will send you 20 packages of our lovely embossed Easter postcards to sell at 10 cents a package (6 lovely cards in each package). When sold send us the money (three dollars) and we will send you the typewriter, all charges prepaid.

HOMER-WARREN, Dept. 39, TORONTO

THIS WATCH FREE

TO ANY BOY

This "Railroad King" watch is an absolutely guaranteed timekeeper. It is stem wind and stem set, double dustproof back, nickel case. Regular man's size. Send us your name and address and we will send you 25 Packages of our lovely embossed Easter post cards to sell at 10 cents a set (six beautiful cards in each set). When sold send us the money, and we will send you the watch, all charges prepaid.

CONSERVATION IN GREAT BRITAIN

KEROSENE NO LONGER USED FOR CLEANSING PURPOSES.

London General Omnibus Company Utilizes Grease Removed From Motor Vehicles.

Grease removed in the cleaning of wheels, axles, and other parts of motor buses, trucks, and other motor vehicles is now utilized in England by the London General Omnibus Company.

Before the war kerosene was largely employed for the cleansing of engines and other parts of vehicles, but now its consumption is restricted to the barest minimum, the net effect being the saving of five-sixths of the former consumption. Kerosene, as a matter of fact, is now employed only on certain parts of the mechanism for the cleaning of which there is no practical substitute. For the cleansing of wheels, axle casings and front axles, a weak solution of hot caustic soda is employed.

When the engines, gear boxes, back axles or other parts are stripped for overhauling, a very great saving is effected over the former practice.

The unit is dismantled and the parts are placed in a cradle and dumped into a tank of water into which a jet of steam is turned so as to bring the water to boiling point. Caustic soda is added to the water until a solution of about 3 per cent. strength is obtained.

Removed by Boiling.

All the grease is removed from the parts in the process of boiling and comes to the top of the water. Before the contents are removed the grease is drawn off the top. This is done through an overflow pipe of large diameter which leads into a barrel.

The cradle of parts is then transferred to a second tank of clean boiling water, which finishes the cleansing and as the parts are drawn out quite hot they drain perfectly dry and absolutely clean.

The result so far as cleanliness of parts is concerned is considerably better than if kerosene had been used. All minute parts of metal, dirt and grit go to the bottom of the first cleansing tank, where there is a large drain cock, the tank occasionally being washed out and all the sediment drawn away.

The London General Omnibus Company has a central depot for reclaiming oil and washing rags, and to this depot the barrels of waste oil, as they are obtained from the various garages, and the rags are sent.

At this depot there is a battery of three tanks erected over a furnace, each of which is filled to about two-thirds with water which is brought up to the boiling point. The barrels of oil as they come in are drawn off into the first boiling tank, a little being added at a time.

Process of Cleansing.

The oil is thoroughly boiled, and when it overflows into the second tank (by adding more oil to the first) it has become almost fit for use again, but it passes into a second tank and is given a second boiling, and then on to the third tank, where it goes through its final stage of cleansing, and from the last tank it is drawn off and run into barrels.

As to rags, their price to-day is much higher than before the war, when they were thrown away after being used. At present every rag is collected in each garage and sent once a week to the central cleaning depot.

The first process through which they go is the extraction of all grease and oil in a centrifugal steam heated chest. All oil, by the rotary action of this chest, is expressed from the rags, whence it runs into barrels for the reclaiming process already described. The rags are then put into a washing machine and later into a rotary drying machine.

The oil gained by the reclaiming process is not entirely suitable for use again as a lubricator, but as much of it comes from solid grease it is of a far better quality than cleansed engine oil. It still has a value as a fuel, as can be gathered from the fact that at the North Road coach factory of the London General Omnibus Company two 80 horse-power Diesel engines are run from the output of the oil reclaiming depot, leaving a certain quantity in excess available for sale.

Has Paid For Itself.

The cleansing plant of the London General Omnibus Company has paid for itself in a very short time, because oil reclaimed may easily be sold for blending or fuel. A small plant can be easily put up in any garage, fuel for the furnace being rubbish and shop sweepings, or if the raw material is too small in quantity for economical handling on the spot, it can be collected and dealt with in larger bulk at some central collecting plant.

CANADA'S FORESTERS ABROAD.

A Splendid Record of National Service By Youngest Profession.

Forestry, the youngest of all the engineering professions in Canada, has given liberally of its manhood to the overseas forces of the Dominion. Numerically, the ranks of Foresters or Foresters-in-training have not yet reached beyond a few hundred.

According to lists compiled for the Canadian Forestry Journal, and which at best cannot be free from some omissions and inaccuracies, there are 112 foresters or forestry services or tached to Canadian forest services or colleges who have donned the uniform and gone overseas. Of this number at least 17 already have been killed, while many others have been wounded in action, some repeatedly. Most of these men enlisted before Forestry Battalions were organized. A few have been transferred so as to utilize their technical abilities, but it is a striking fact that the greater number of Foresters and students were at the front early in the campaign and chose to take their place as fighting men. Some have fought in Mesopotamia, others across the sands of Egypt and most of them in France and Belgium.

Of the relatively small group of graduates and students of Toronto University Forest School, under Dean Fernow, twelve men have made the supreme sacrifice, while twelve others have been either wounded victims of shell shock. From the Toronto school alone, there went forth 4 captains, 28 lieutenants, 8 N.C.O.'s, and 24 privates. Indeed, the only men who did not go were those debarred by physical defects. The profession of forestry in the degree to which the graduates and students promptly placed themselves at the service of their country and cheerfully accepted a tragic record of casualties surely stands in the forefront of all callings. Many have given their lives whose services were sadly needed by Canada. Letters from the wounded and from men in desolate corners of the field of war, thoroughly homesick and tired of the business of fighting, nevertheless refuse to complain against conditions or express regret that they were called to a perilous and exhausting task.

WORST FOE OF THE SUBMARINE

CYLINDER SHAPED BOMB OF INGENIOUS MECHANISM.

The "Depth Charge" is Best Remedy Yet Found For the U-Boat Menace.

The so-called "depth charges," which have proved the most efficient weapon against the submarine to date, are now being manufactured in great numbers by the U.S. Bureau of Ordnance of the navy, and of larger size than any hitherto used. The latter point means, of course, that they hold a greater quantity of high explosive and have a wider "radius of action." In other words, one of these bigger depth-bombs is capable of destroying a U-boat at a further distance.

Bombs of this description have the shape of a cylinder. They are steel cases of size sufficient to hold several hundred pounds of explosive. For setting them off reliance is had upon hydrostatic pressure.

How the Bomb Works.

The depth-charge is set to go off at fifty feet beneath the surface, at 100 feet, or further down, if desired. It is simply dropped overboard. Of course, the water pressure (reckoned in pounds to the square foot) varies directly with the depth, and is known so accurately as to furnish a mathematical formula.

When the bomb reaches the level at which it is set to explode the pressure actuates a sort of trigger arrangement and it goes off automatically. Nothing could be more simple, though the details of the ingenious mechanism are a carefully kept secret.

A submarine does not ordinarily venture to descend more than 200 feet below the surface for fear lest its steel shell be crushed by the pressure. Usually it travels at a depth of about fifty feet. But in any case the revolution of its propeller makes a sort of wake that is easily discernible from an airplane or "blimp," or even, as often happens, from a destroyer or patrol boat.

In the meantime, of course, the U-boat has no notion that it has been discovered, and it is an easy matter (watching its course) to get ahead of it and drop a few depth-bombs. To make an actual hit is not necessary inasmuch as the explosion of one of these depth-charges within some hundreds of feet of the submarine will either smash it or else bring it to the surface, an easy target for guns, and probably with its delicate machinery deranged.

The Useful Microphone.

Destroyers, in their search for submarines, are greatly aided nowadays by an arrangement of microphones that constitute a most sensitive listening apparatus, adjusted to the keel. By this means they are enabled to hear the U-boat's propeller at a long distance, to determine the direction of the sound, and even to know how far away the submarine is.

Thus one can understand why so many U-boats are being successfully attacked and destroyed. The depth-bomb is the nearest thing that has been found to a remedy for the submarine mischief.

ANZACS LIKE WINTER SPORTS.

Australians Learn to Skate During Convalescence in Canada.

The Australian soldiers, like the Canadians, have seen a bit of the world in their military service, but according to the men from the southern Commonwealth they have seen nothing in the way of sport that appealed to them more than the hockey matches they have watched on the Canadian rinks.

At Cobourg, where a number of these men are under treatment in the Ontario Military Convalescent hospital they have enjoyed the open air rink in connection with the institutions, and learned to cut a few curves themselves. The fine expanses of skating surface in Canada are a novelty to them.

FREE TO GIRLS

ROLLED GOLD LOCKET AND CHAIN

We will give this beautiful rolled gold locket and chain free of all charge to any girl who will sell 25 Packages of our lovely embossed Easter Postcards at 10 cents a package.

Send us your name and we will send you the cards to sell. When sold send us the money and we will send you the locket and chain. Address

2,000 MILES THROUGH ICE.

Stars Were the Only Guide to Ice-encircled "Endurance."

Although Sir Ernest Shackleton's ship, the Endurance, made a perilous voyage of 2,000 miles through pack ice in the Weddell Sea, scientific work never ceased. After three days' gale the ship was held fast, and then she drifted slowly on the ice to the northward. Finally she had to be abandoned.

Work of the scientific instruments, said Lieutenant J. M. Wordie, who had charge of the oceanographic work, at the Royal Geographical Society, was considerably hampered by four inches of frost rime, and the position of the ship was tested by the stars.

When the ship was abandoned amid the pack ice, said Lieutenant Wordie, the crew took to the boats, but it was some months before they could find a passage through the ice, and it was not until April, 1916, that, after many adventures, they were able to land on Elephant Island.

Lieutenant Wordie spoke of two points of land in the Weddell Sea which had been named by their German discoverers, "Luitpold Barrier" and "Wilhelm Barrier." He thought the names ought to be changed to their English equivalents, "Leopold" and "William" Barriers, but the Admiralty insisted upon the first names being retained.

Jewels as Medicine.

Certain precious stones are still regarded as talismans, the believers in destiny and the influence of mascots pinning a good deal of faith to them. But even these people would be surprised if their family doctor were to prescribe amber for a sore throat, or garnet for scarlet fever or influenza, whilst if one of our surgeons at the Front were to try to stop bleeding with a bloodstone, instead of a tourniquet, he would be regarded as a fair case for Bedlam.

Yet it is not long since these qualities of healing were attributed commonly to precious stones. The moonstone, generally regarded as rather uncanny, according to this belief would be invaluable in our county asylums, especially if associated with the sapphire, for the first cures epilepsy, and the second insanity.

Anyone wearing a ruby might venture into the most pestilential haunts, for it was a sure disinfectant, whilst the pain of a burn or scald was stopped by the topaz, of toothache by the tourmaline, and cuts found a panacea in the turquoise.

Begin at the top in pruning a tree to secure a low, broad-spreading branching system, with open centre, to admit sunlight and air from above. Do not remove strong lower limbs if they can be given sufficient light from above. Aim to secure bearing branches throughout the main body of the tree. If the tree is shaded by too much growth at the top the inner and lower twigs will weaken and die instead of bearing fruit.

Free to Girls

We will give this Bracelet free of all charge to any girl or young lady who will sell 40 sets of Easter Postcards at 10 cents a set.

The Extension Bracelet is of rolled gold plate and fits any size.

Send us your name and we will send you the cards. When sold, send us the money and we will send you the bracelet. Address

The Doings of the Duffs.

THE AFTER EFFECTS OF LAGRIPPE

Often Worse Than the Disease Itself—Victims Left Weak, Nervous and Worn Out.

La Grippe—the name by which Influenza is most generally known—is a disease prevalent throughout Canada during the winter and spring months. Anyone who has felt its pangs is not likely to forget the trouble. La grippe starts with a slight cold—and ends with a complication of troubles. It lays a strong man on his back; it tortures him with fevers and chills, headaches and backaches. It leaves him a prey to pneumonia, bronchitis, consumption and other deadly diseases. In fact its after effects are more serious than the trouble itself. You can avoid la grippe and winter colds by keeping your blood rich and red by the occasional use of Dr. Williams' Pink Pills. If you have not done this and the disease lays you low, you can banish all its evil after effects by this same great blood-building, nerve restoring medicine. This has been proved in thousands of cases throughout Canada by la grippe victims who have been made well and strong through the use of Dr. Williams' Pink Pills. Among the cured is Miss Irene Bootes, Portsmouth, Ont., who writes: —"I take much pleasure in recommending Dr. Williams' Pink Pills, because I have proved their worth in my own case. Last winter I had a severe attack of la grippe and it left me weak and all run down. I had severe pains in the chest and under the arms, palpitation of the heart and attacks of neuralgia which left me with the feeling that life was scarcely worth living. I was taking doctor's medicine, but it did not help me and I was much discouraged. I was advised to try Dr. Williams' Pink Pills and began their use only on the principle that I would try anything that might better my condition. I had only been using the pills a couple of weeks when the pains began to leave me. Gradually my strength returned, my appetite improved, and in a little more than a month I felt all my old time vigor had returned. I am sincerely glad I was persuaded to try Dr. Williams' Pink Pills, and I shall always have a good word to say for them."

Dr. Williams' Pink Pills not only cure the disastrous after effects of la grippe, but are also a specific for all these troubles due to poor blood, such as anaemia, rheumatism, indigestion, women's ailments, and the generally worn out feeling that affects so many people. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

BRITISH USE HORSE FLESH.

People Pay As High As Sixty Cents a Pound For Steaks.

Horse steaks are in demand in Great Britain. The effect of the meat shortage is to break down the insular prejudice of the Britisher against foods to which he has not been accustomed. In a number of districts horse meat shops have been established. Quite a number have sprung up in the Soho district, but until lately their patrons have been Belgians or the proprietors of the cheaper little French restaurants.

During the past few weeks, however, there has been quite a rush of Englishwomen for horse steak and chops, and in consequence the prices have risen enormously, and people have been paying up to 60 cents a pound for horse steak.

Horseflesh does not come under the meat price order of the Food Ministry at present, but if the English people continue to add it to their menu it will shortly.

In the provinces the prices are far lower than they are in the London districts. A story is told of a woman who failing to receive from the family butcher the supply of meat for her favorite dog visited a Liverpool horsemeat butcher and obtained for a small sum more than one appetizing meal for her collie.

One day, so attractive was her purchase—it could hardly be distinguished from a fillet steak—that she was tempted to cook it, but after it was served her insular prejudice proved the stronger. Still she remarked, "One might do worse in these hard times."

Retain All Breeding Sows.

The demand from overseas for bacon and other pork products is such as to ensure a profitable market for many months and farmers are urged to retain all breeding sows. The keep-a-pig campaign is meeting with a large measure of success. The response indicates not only that the farmers are preparing to keep more pigs but that many people living in suburban areas are also planning to buy one or more and feed them on household garbage. It is certain, therefore, that young pigs will be in strong demand in the spring. To kill sows under present conditions, is, therefore, not only unpatriotic but is likely to prove distinctly unprofitable.

Gunns Shur-Gain Fertilizer

TENNYSON'S KNOWLEDGE.

The Gifted Poet Possessed a Store of Scientific Learning.

Of the poet Tennyson's wide knowledge in scientific matters Sir Norman Lockyer speaks entertainingly in Tennyson and His Friends.

About the year 1866, he says, we used to devote Monday evenings to our friends who came informally to talk and to smoke. One night it happened that many travellers—Baker, Baines and Winwood Reade among them—were present, and the question of a certain kind of dust storm came up. Tennyson listened for some time, and then remarked how difficult it was for a student to gain certain knowledge on such subjects, and astonished the company by giving the names of eight authors, four of whom had declared that they had seen such dust storms, although the other four insisted that they simply could not be produced under any known meteorological conditions.

In many of our talks I came upon similar evidences of minute knowledge in various fields; nothing in the natural world was trivial to him, or to be neglected. This great grasp was associated with a minute accuracy, and it was his double habit of mind that made Tennyson such a splendid observer, and therefore such a poet; for the whole field of nature from which to cull the most appropriate epithets was always present to his mind.

WORTHLESS DOGS.

A Menace to the Sheep-Growing Industry of Canada.

Everyone loves a useful, gentlemanly dog. Such a dog is invaluable. But, one dog eats as much as a man and more than a sheep. Two dogs will eat as much as a hog on alfalfa and more than a dozen chickens. And there are thousands of dogs in the country, one for eight sheep. Sheep furnish wool and mutton, hogs make pork, and chickens produce meat and eggs.

More than 5,000,000 hogs are needed to relieve the present meat shortage, and many sheep furnish wool and mutton. Hill farms are ideal for sheep raising, and almost every prairie farm is adapted for keeping a small farm flock without much extra expense for buildings or added use of grain.

No single thing has done more to throttle the sheep industry in this country than the cure which are allowed to run at large. Besides killing and worrying sheep, they kill poultry, attack cattle and carry hog cholera.

Fences will not solve the problem, for that added expense will keep many farmers who already have hog-tight fences from starting a farm flock. Keeping the dogs chained at night will not do, for dogs often attack sheep in daylight. Paying for the animals killed helps some, but it does not encourage those whose flocks have been destroyed to start again.

GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and good-natured. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Home Letters.

Write a sunny, funny letter
To the boy somewhere in France,
Happier it is the better,
Make it cheer him at first glance.
Tell him of the latest winning
Of the team from Homeville High,
All the little home jokes spinning
Leave out every doleful sigh.

We must keep the home fires burning,
Bright within each khaki breast,
If we frown our fears and yearnings
His courage will do the rest.
His to fight the nation's battle
Ours to work and wait and pray
Then when guns have ceased to rattle
Freedom shall have come to stay.

LEMON JUICE IS A FRECKLE REMOVER

Girls! Make this cheap beauty lotion to clear and whiten your skin.

Squeeze the juice of two lemons into a bottle containing three ounces of orchard white, shake well, and you have a quarter pint of the best freckle and tan lotion, and complexion beautifier, at very, very small cost.

Your grocer has the lemons and any drug store or toilet counter will supply three ounces of orchard white for a few cents. Massage this sweetly fragrant lotion into the face, neck, arms and hands each day and see how freckles and blemishes disappear and how clear, soft and white the skin becomes. Yes! It is harmless.

A good cooking fat may be made by taking two pounds of kidney suet running it through the meat grinder and rendering out the fat. This is strained, and just before it hardens one cup of vegetable oil is added. This keeps the suet from hardening and gives it a delightful flavor so that it may be used in any kind of cookery.

She Often Had to Lay Off For a Day

Mrs. Mantle Tells Why She Used Dodd's Kidney Pills.

Results She States, Were So Good That She Recommends Them to All Sufferers From Kidney Disease.

St. John, N.B., Feb'y 18th (Special.)—Mrs. Mantle, an estimable lady living at 117 King St. East, this city, is always ready to tell of the benefit she has received from using Dodd's Kidney Pills.

"Yes, Dodd's Kidney Pills have done me a wonderful lot of good," Mrs. Mantle told an interviewer. "For three years I was in a worn-out condition, often having to lay off for a day or two.

"I suffered from drowsiness and sharp pains across my back. I had headaches, and was subject to neuralgia and rheumatism.

"Dodd's Kidney Pills helped me so much that I can highly recommend them to anyone suffering from kidney disease."

Dodd's Kidney Pills are purely a kidney remedy. Making the kidneys healthy enables them to strain all the impurities out of the blood. That means pure blood and good health. Dodd's Kidney Pills are recommended by thousands of women who were once run down and worn out.

GENERAL PETAIN.

Some Characteristics of the Noted French Commander.

A war correspondent recently saw Gen. Petain, the French generalissimo, bestowing war crosses upon some of his soldiers.

My first impression, he says, was tinged with a little disappointment. He might be a business man, a lawyer or a village doctor. I could name half a dozen men who could look the part more acceptably. He has a good, wholesome face. I think it must have been there that I suffered the disappointment. I had pictured him as thin-visaged and frowning, with a downward look. The prominent nose seemed not unlike Gen. Pershing's, but there the resemblance ended. Gen. Petain's chin gave no indication of his character, as chins are supposed to do, and his head seemed of average size and shape. His cheeks have color and his eyes are kindly and brownish.

He means well to you, but no liberties must be taken—a glance tells you that. He wore brown chamois gloves on his hands, which were frequently in action, but there was neither extravagance nor affectation in his gestures.

Gen. Petain does not play to the galleries. You are sure that he is not thinking of himself, even glimmeringly; he gives the impression of being sincere in what he is doing. He is "on his job" every minute. If he is pinning on a medal, he is looking at it and thinking of that particular thing.

Gen. Petain has not a certain mystery and magnetism that characterize Gen. Joffre, nor has he the stature. No one else can speak in that soft monotone of Gen. Joffre's—a tone in which one might read a psalm. But Gen. Petain has fixed his place as a soldier. He took over the command under most extraordinary circumstances of difficulty, and has met the test splendidly.

THERE IS A DIFFERENCE——!

Can anyone who has not seen them imagine what it is like to be a prisoner in this present war? Someone, who saw the first French, English, Russian and Canadian prisoners either returned or escaped, writes of them: "They have an expression of their own, a concentrated, unuttered suffering in their eyes, an unending patience in their voices. There is all the difference in the world between them and the soldiers returned from the front. The latter, even when severely wounded, have a proud, almost satisfied look, as if in making their supreme effort, something of the glory and exaltation of those fearful moments still clung to them. They are warriors hurt in the great game, brought gladly and triumphantly home, where they know well what welcome awaits them.

"How different is the lot of the allied prisoners? The sight of them, of any nation, is an unforgettable recurring nightmare. A voice, weak, but insistent, rings in your ears: 'Won't you help us!'

"They know what it is to do valiantly, without praise, to suffer silently without sympathy, to ache with homesickness, surrounded by the enemy. They are the unseen heroes and we cannot guess at half their pain."

There are at present more than a million and a half Allied prisoners of war in German hands. The Prisoners of War Society, of which Principal Hutton of University College, Toronto, is president, is appealing through the churches of Ontario for money to help provide the bare necessaries of life to these unfortunate heroes. Congregations who have not yet contributed may send their donations to the treasurer of the society, Hugh Fletcher, Esq., 532 Huron St., Toronto.

"Might is right, so it is—the right to bear the burdens of the weak, to cheer the faint, to uplift the fallen." —Napier.

Minard's Liniment Cures Distemper.

February Gardens.

The days of catalogues have come,
the best of all the year,
When every mail its quota brings of
books from far and near,
With gorgeous blossoms on their
fronts and cabbage on their backs,
Their insides filled with fruits and
flowers all tabled neat as wax.
We reckless grow, extravagant—no
cost too high we find
For this February garden we are
planting in our mind. . . .
But, mercy me! while we have dreamed, there is no sign of doubt,
That miserable coal stove has gone
completely out!

Minard's Liniment Cures Diphtheria.

Weight For Gold.

The weight used by goldsmiths in gauging the quality of gold apart from the alloy, i.e., carat, is derived from that of the seed of an Abyssinian carat flower, which, being exceedingly uniform in size, was employed in weighing gold and precious stones.

Monsanville, June 27, '13.
Minard's Liniment Co., Limited.
Yarmouth, N. S.
Gentlemen,—It affords me great pleasure and must be gratifying to you to know that after using 36 bottles of your Liniment on a case of paralysis which my father was afflicted with, I was able to restore him to normal condition. Hoping other sufferers may be benefited by the use of your Liniment, I am,
Sincerely yours,
GEO. H. HOLMES.

Sugar Situation in Europe.

Before the war England received approximately 1,400,000 long tons of sugar per annum from Germany and neighboring sources. France produced about 750,000 long tons of beet sugar and exported 50,000 tons. The French production in 1917 fell to 210,000 long tons. Before the war Italy produced about 210,000 long tons and imported almost none.

PAIN? NOT A BIT!
LIFT YOUR CORNS OR CALLUSES OFF.
No humbug! Apply few drops then just lift them away with fingers.

This new drug is an ether compound discovered by a Cincinnati chemist. It is called freezone, and can now be obtained in tiny bottles as here shown at very little cost from any drug store. Just ask for freezone. Apply a drop or two directly upon a tender corn or callus and instantly the soreness disappears. Shortly you will find the corn or callus so loose that you can lift it off, root and all, with the fingers.

Not a twinge of pain, soreness or irritation; not even the slightest smarting, either when applying freezone or afterwards.

This drug doesn't eat up the corn or callus, but shrivels them so they loosen and come right out. It is no humbug! It works like a charm. For a few cents you can get rid of every hard corn, soft corn or corn between the toes, as well as painful calluses on bottom of your feet. It never disappoints and never burns, bites or inflames. If your druggist hasn't any freezone yet, tell him to get a little bottle for you from his wholesale house.

Dangerous Gas and Acids That Hurt The Stomach—Sour The Food Cause Dyspepsia, Indigestion

Recommends a Safe Way to Treat Stomach Trouble At Home

Many stomach sufferers who are always full of gas and whose stomachs burn with acid after nearly every meal think these things are the RESULT of indigestion when in reality they are the CAUSE.

It is just as foolish to give artificial digestants such as pepsin, etc., to a stomach full of gas and acid as it would be for a man who had stepped on a tack to rub liniment on his foot without removing the tack.

Some stomachs generate too much gas and acid. This distends the stomach walls, causing a full, bloated oppressive feeling while the acid irritates and inflames the linings of the stomach. Naturally the food ferments and sours, digestion is often delayed and stomach misery is the result. Artificial digestants will push this sour, fermenting mass into the intestines and so relieve the stomach pain but the acid still remains in the stomach to generate more gas and produce more trouble at the next meal.

If you are using digestive aids after meals drop them for a while and instead get a few 5-grain tablets of pure bisurated magnesia from any druggist and take one with each meal. Bisurated Magnesia does not digest food but will neutralize the excessive acid in your stomach, keep the food sweet and will drive the gas and bloat right out of your body. As Magnesia is prepared in various forms be sure to get Bisurated Magnesia for this purpose as it is not a laxative and in this refined form will not injure the stomach in any way.

CUTICURA HEALS TERRIBLE ITCHING

On Hands From Salt Rheum At Very Small Cost for Soap and Ointment.

"I was a great sufferer from salt rheum on my hands. It came in small blisters between my thumb and finger and it itched terribly and kept spreading. I could not use my hands at all and the skin would crack and bleed so that I could not bend my fingers. I cannot describe what I have suffered and the sleepless nights I had.

"Then I got the Cuticura Soap and Ointment. I only used one cake of Cuticura Soap and one box of Ointment when my hands were healed." (Signed) Mrs. M. L. Allen, Shoreham, Que.

Keep your skin clear by daily use of Cuticura Soap, with touches of Ointment now and then.

For Free Sample Each by Mail address post-card: "Cuticura, Dept. A, Boston, U. S. A." Sold everywhere.

MOTHERS TO BE

Should Read Mrs. Monyhan's Letter Published by Her Permission.

Mitchell, Ind.—"I wrote to Lydia E. Pinkham's Vegetable Compound helped me so much during the time I was looking forward to the coming of my little one that I am recommending it to other expectant mothers. Before taking it, some days I suffered with neuralgia so badly that I thought I could not live, but after taking three bottles of Lydia E. Pinkham's Vegetable Compound I was entirely relieved of neuralgia, I had gained in strength and was able to go around and do all my housework. My baby when seven months old weighed 19 pounds and I feel better than I have for a long time. I never had any medicine do me so much good."—Mrs. PEARL MONYHAN, Mitchell, Ind.

Good health during maternity is a most important factor to both mother and child, and many letters have been received by the Lydia E. Pinkham Medicine Co., Lynn, Mass., telling of health restored during this trying period by the use of Lydia E. Pinkham's Vegetable Compound.

The Paisley Advocate

PAISLEY, MARCH 13th, 1918

—An extreme political proposition is that of Dr Godfrey, M.P.P., who wants the German language entirely put out of public use in Ontario. He would forbid it being taught in our schools or spoken at church or other public meetings. Such a measure may win some popularity, but it is safe to say that a majority of the people of Canada are not concerned about it. We are fighting against Prussian despotism and Hun savagry, and will fight them to a finish, but with their language we have no quarrel.

—Hon. Adam Beck has suggested that a propaganda should be started to educate the farmers in sidecrafts and industries which would fill their winter months with profitable occupations. In the old days special provision for winter employment on the farm was not needed for the year's supply of wood had to be gotten out, logs cut and hauled to the saw mill. In addition there were the chores. Today conditions are different. The average farmer has little to do in the winter months and his sons and help are likely to go to the cities and work in factories. When spring comes these men are well settled in a factory job and do not care to go back to the farm. And so the movement to the cities goes on. Inside work on the farm for the winter might keep men there the year around to the benefit of themselves and to all concerned.

—Out in Saskatchewan they have a bigger way of doing things than we have here in staid Old Ontario. At the recent School Trustees' Convention held in Saskatoon, between three and four thousand delegates were present and two large churches were crowded to their utmost capacity and questions of the most vital interest and importance were discussed and voted upon. Upon the findings of this association educational legislation is largely moulded by the Saskatchewan legislature and, as a result, Saskatchewan is building up in spite of great difficulties presented by a foreign and mixed population, one of the most versile school systems in Canada. In the great Province of Ontario with its army of 40,000 trustees, the attendance at the Annual Provincial Trustees' Association, does not half fill one of the class rooms of Toronto University. Although they directly represent the people who pay for it all, they are a negligible quality so far as their effect upon legislation is concerned. In fact, when they desire to interview the Minister of Education they are compelled to go cap in hand to secure a hearing. All legislation is moulded according to the idea of professors, high school teachers and inspectors and, as a result, our school system is running to seed. The trustees of our province must take a greater interest in our public school system if reforms are to be effected. Every school section in Bruce Co., should send a delegate to the Provincial Association which meets in Toronto during Easter week.

—There is nothing that can be said in favor of allowing titles to be conferred upon Canadians that are to be handed down from one generation to another. The custom is an old English one, established centuries ago, and is entirely foreign to the spirit of a new age and a new country like Canada. Canadians are almost universally opposed to having the custom thrust upon us by the British Government, but as yet there has been no united protest been made against its continuance. There should be some movement made to have an expression of our sentiment reach the title fountain, and we are glad to see that such a movement is being commenced. At a joint meeting of Farmers' Clubs held in York Township a resolution was passed unanimously in favor of informing the Government at Ottawa that it is their duty forthwith to prohibit all further traffic in such offensive feudal titles as knight, baronet and baron; to cancel such as have not been gratuitously bestowed for conspicuous public or philantropic services; and by statute to decree the extinction of any remaining hereditary titles with the death of the present owner. These titles are termed a menace to our democracy, threatening it with the social cleavages of the old world, as well as with the intolerable evils historically allied with aristocratic insolence, influence and privilege. It is charged that these titles have frequently been sought or purchased by men who have covertly exploited the people of this country, or have openly shown their contempt for public welfare, thereby rendering the said titles doubly ominous and obnoxious. It is pointed out that the Washington government has, with commendable promptitude, in order to render their democracy immune and inviolate, made it illegal for a American citizen to receive any objectionable title. The resolution also affirms that it would materially aid in making the world safe for democracy to decree that all future governor-generals of this Dominion shall be selected from the ranks of untitled statesmen.

THE KAISER'S DOWNFALL

A great many people were interested in the 200 year old prophecy which appeared in The Advocate a few weeks ago. The 19th of February came and went by without any mishap to the Kaiser. We notice a correspondent to a daily paper speaks of the prophecy as follows:

It is a debatable question whether the personality of the Kaiser is prophetically referred to in the Bible, but there can be no doubt that from the beginning to the end of the Word of God, doom is pronounced upon all who have reared themselves against the laws of God and the rights of men. That pride goeth before destruction and a haughty spirit before a fall; that a haughty heart is a prelude to destruction; these the cause of God is upon him who removeth his neighbor's landmarks; and that Pharoah, and Nebuchadnezzar, and Sennacherib, and Herod fell upon the rock of God's eternal justice and were broken. All these things prove that a career that is pre-eminently characterized by egotistic megalomania, tyranny, treachery and cruelty can have only one end. As the stars in their courses fought against Sisera, the laws of God, spiritual, moral and eternal, are ranged against the Kaiser most remorselessly. It is only a question of time: Destiny, unswerving precedent, eternal principles, as fixed as the universe, are involved. The gleams from the Scriptures seem to accentuate this. There is the rider on the red horse, who took peace from the earth (Rev. vi., 4); there is the fierce countenanced king, whose spy system caused treachery to prosper (Dan. viii, 23-25); there is the swiftly invading power who assailed without provocation the unprepared (Ez. xxxviii, 9-11); there is the producer of whirlwind of war, involving all nations (Jer. xxv, 32); there is the king that shall do according to his own will, and shall exalt himself and magnify himself, and in his estate shall honor the god of forces or munitions (was there ever more marvellous definition of the autocrat of modern militarism?) (Dan. xi, 38). And there is one end, and one end only—a fall, and that a mighty one. He shall be broken without hand (Dan. viii, 25). Tidings out of the East and out of the North shall trouble him, and though he go forth with great force to destroy, yet he shall come to his end and none shall help him (Dan. xi, 44-45). O, Kaiser, Kaiser, the stars in their courses are fighting against you! The words of the eternal God, which will outlast heaven and earth, pronounce the verdict of your doom. Your dream of German World-Empire by the power of the mailed fist is the dream of an anti-christ, whom the Lord shall consume with the spirit of His mouth, and destroy with the brightness of His coming.

WONDERFUL YEAR FOR THE STANDARD BANK OF CANADA

Of Vital Assistance to Canada

Legitimate Heads of Business and Agricultural Interests Liberally Served

Special attention is called to the annual statement of the Standard Bank of Canada, which was submitted to its shareholders at the 44th annual meeting held at the Head Office of the Bank in Toronto on the 28th of February last, particulars of which will be found in another part of this issue.

Our Banks are properly regarded as the barometers of trade, and their annual statements may be accepted as a fairly accurate indication of the conditions of the commercial atmosphere. The Standard Bank's statement reflects very strikingly the great prosperity which the Dominion is enjoying, and it may be safely stated that at no period since confederation has such activity in business and substantial financial growth been recorded. This prosperity is shown in the remarkable increase of the Bank's assets during the past twelve months, amounting to over $14,000,000, and now totalling over $73,990,000. Of this substantial increase, deposits, which now amount to $58,080,000, account for some $11,700,000, and may be regarded as an evidence of public confidence in the Bank, which is one of our solid financial institutions.

While the Bank's business has been increasing by leaps and bounds, its cash resources and readily available assets have increased in even greater ratio, as we find that the total readily available assets amount to $32,348,000, which is equal to over 50 per cent of its liability to the public. Of these assets $14,100,000 is represented by cash in hand. During the year the funds of the Bank have been actively and profitably employed, and while generous loans have been made to the Government, the legitimate needs of merchants, manufacturers, farmers and cattle raisers have also been liberally served. The interests also of the shareholders have received due attention, as in addition to paying the usual dividend provision has been made for estimated depreciation in the Bank's securities of $100,000; $10,000 has been contributed to the Officers' Pension Fund, $31,250 to Patriotic Funds, and the Government tax on bank note circulation amounting to $33,891. The balance, $175,515, has been carried forward to the credit of profit and loss account.

During the period the Standard Bank of Canada has been in existence, now some forty-five years, no such progress has been recorded, and the substantial growth of the past twelve months must afford much gratification to the shareholders, and a confirmation of the public confidence in this well conducted institution. The capital has been increased during the year, and now stands at $3,451,390, and the reserve fund and undivided profits at $4,628,503.

—The city of Niagara Falls, Ont., has now only one daily newspaper, instead of two. The Daily Review, of which Mr Frank Leslie, a Canada boy, is managing editor, has bought out the Record.

COULD NOT STOP THE HEADACHES

Until She Tried "Fruit-a-tives" —Made From Fruit Juices

112 Cedrus St., St. John, N.B.

"I feel I must tell you of the great benefit I have received from your wonderful medicine, 'Fruit-a-tives'.

I have been a sufferer for many years from *Violent Headaches*, and could get no permanent relief.

A friend advised me to take 'Fruit-a-tives' and I did so with great success; and now I am entirely free of Headaches, thanks to your splendid medicine".

MRS. ALEXANDER SHAW.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent on receipt of price, postpaid, by Fruit-a-tives Limited, Ottawa.

Clement—Oswald—That this board do now adjourn to meet again the first Monday in April at 1 o'clock p m for general business.—Carried,

R C PEARCE, Clerk

Taxing Dead People's Estates

Of the total revenue of the Province of Ontario for the year ending October 31st, 1917, amounting to a little over eighteen million dollars, one-sixth of this was raised from succession duties or taxing dead people's estates, the percentage increasing according to the amount of property owned by the deceased. In Bruce county the Government obtained $3,601.69 from ten estates of men and women who had wealth sufficient to be taxed after $5,000 is exempt of bachelors' and spinsters' estates and $10,000 of married people's. A few of those in Bruce from whom the Government got a slice of their estates were: Mrs Ellen Cargill, $365.60; Patrick O'Hagen, Elderalle, $714 54; Miss Corinne Sinclair, Walkerton, $391 69; Miss Ella Stark, Paisley, $727 77; Wm Thompson, Chesley, $265 42; and John Tolmie, ex-M P, of Kincardine, $180 78. In Grey county the estate of Mr Fred Harrison of Owen Sound yielded to the Government $6322 52, and Robert Thomson's estate, also in Owen Sound, gave a slice of $1142 60 to the provincial treasury. The estate of Edward S Walker, the rich whiskey man of Walkerville, put up $602,622 19 for the carrying on of the provincial government; the estate of Geo A and H W Cox, of Toronto, $363,134 44, and Robert Davies of pork packing fame, also of Toronto, $85,000. Couldn't and shouldn't the law of the land be so adjusted that a provincial income tax would relieve these millionaires of a portion of their wealth during the lifetime as well as after the death?—Chesley Enterprise.

Skipper Did Not Bite

How the clear-headedness of the skipper of an Irish packet brought to naught a dramatic effort of the Germans to torpedo his craft, is related. When in mid-channel a man suddenly bumped overboard from the packet, and a cry went up from those who saw his struggles in the water. But the skipper saw something else—a periscope. Not only did he refuse to turn back despite the protests of passengers that he was leaving a man to perish, but he crowded on all the speed possible.

—Southampton Beacon: No matter how high the chickens roost there still continues someone able to reach them; and the most likely looking birds continue to disappear from various chicken pens in town. One resident happened in here a good idea who was responsible for the disappearance of four from his pen, and he talked pretty loud on the street about something happening. The result was four were returned, three strangers and one of his own. Some parties are likely to board stock where chicken is never served, and it is about time.

A great many people buy shoes here

Who are of the come again and again kind.

Now, that wouldn't be so if our shoes didn't make it so, would it?

All this talk of ours is only intended to get you to be a tryer of our shoes. That's all.

After that it's up to the shoes to hold you as a steady customer.

They generally do it, but if they shouldn't do it in your case, we want you to tell us about it, because there is a mistake somewhere.

It matters not what your present or future needs in shoes may be, we guarantee you a good service.

Bring us your Butter and Eggs. Cash or Trade.

F. CARTER & SON

OUR BOYS IN EUROPE AND HOME PROTECTION

The men on the firing line represent the pick of our country's youth. Many were rejected because of physical deficiency. Many times the kidneys were to blame.

If we wish to prevent old age coming on too soon, or if we want to increase our chances for a long life, Dr. Pierce of the Surgical Institute, Buffalo, N. Y., says that you should drink plenty of water daily between meals. Then procure at a drug store, Anuric (double strength). This "Anuric" drives the uric acid out and cures backache and rheumatism.

If we wish to keep our kidneys in the best condition a diet of milk and vegetables, with only little meat once a day, is the most suitable. Drink plenty of pure water, take Anuric three times a day for a month.

Send Dr. Pierce 10c for trial pkg. Anuric—many times more potent than lithia, eliminates uric acid as hot water melts sugar. A short trial will convince you.

Preston, Ont.—"I am pleased to express my experience with Anuric. I have been troubled with rheumatism in right hand and hand for several years, and lately in left shoulder. The only way I could tie was on my back. I had great difficulty to sit down and more to get up. Lately I had a very severe pain in my back. I have taken Dr. Pierce's Golden Medical Discovery several times with the most satisfactory results, so I concluded to give his Anuric Tablets a trial. The pain in limb and shoulder has stopped entirely and is right hand it is very slight and getting less all the time. I can now sit or lie in any position I wish without discomfort or pain. I recommended the Anuric Tablets to two parties and they both claim a decided improvement. I certainly will recommend them to any one troubled with the kidneys; there is nothing nearly so good; I tried them all."—Gideon Boos, cor. Duke and Waterloo.

BORN

POTTS—In Arran, on Feb 27th, to Mr and Dolght Potts, a son.

SNOWDON—In Bruce Tp., on Feb 25th, to Mr and Mrs Geo Snowdon, a son.

DIED

DOUGLASS—At Tara, on Feb 27th, Mary Grey Hall, widow of the late Robert Douglass, in her 84th year.

J. B. Bowes' Weather Forecast for the year 1918

Based on purely scientific principles as I know them. They are for the Northern Hemisphere and mostly applicable to regions about the 45th degree of latitude. They do not apply to districts whose temperature is varied or ruled by air or water currents like Britain and British Columbia.

JANUARY—First week and last ten days quite stormy and decidedly cold. FEBRUARY—Very cold for first three weeks, very high winds especially about the tenth. Latter part of month milder. MARCH—Colder than average with extra heavy snow and wind from tenth to fifteenth. APRIL—Average temperature; last week rain and snow. MAY—Average temperature and rain. JUNE—Fore part average temperature, 15th some very heavy frosts and rains; latter portion very warm. JULY—Fore part warmer than average. Latter portion average temperature and rains. Best chances for rain in latter portion. AUGUST—First ten days average temperature, 11th to 19th frost and rains; latter part warmer than average. SEPTEMBER—1st frost and rains; rest of month warmer than average and very dry. OCTOBER—Average temperature and quite dry with rain and frost at 15th. NOVEMBER—Average conditions until about 23rd when there will be a storm of wind, rain, snow and frost. DECEMBER—Milder and drier than average until 18th then snow storm. JANUARY, 1919—First week very heavy snow and wind.

BRUCE TP. COUNCIL

Bruce Tp Council met in the Tp Hall on the above date. Members all present. Minutes of previous regular and special meetings read, adopted and signed.

A number of communications were then read and dealt with.

As the county roads system affects the statute labor divisions on con 1, 8 and 9, east of the Goderich road, a re-adjustment of beats was necessary. A draft of such changes was made, which will be passed at next meeting of council.

Murdoch Ayls was re-appointed as grader operator. All pathmasters interteuding to use grader are to let Mr Ayls know of such intention before May 1st so he can plan the work to best advantage. A grant of $10 was made to Underwood library.

John Nuttall and W J Farrel were re-appointed truant officers for the Tp.

Pathmasters, fenceviewers and pound-keepers for 1918-1919 were appointed, a number of amended by-laws of council adjourned to meet on April 6th next.

J G MacKAY, Clerk.

Keeping 160th for Open Fight

Lieut F B James, who returned to town last week, after training with the 160th in England for about a year, made some thrilling references to "Bruce's Own" at a reception given in his honor by the Brant Preparedness League in the opera house on Thursday evening last, and in which he claimed that the 160th were being especially trained for open battle. The cutting of wire entanglements, the storming and taking of hills, and all the latest methods of bayonet charging and field fighting were being so thoroughly drilled into them that was different from the trench mode of warfare now going on that the lieutenant could hardly but think that they were being held in England for a special purpose, and although attaining all the leads to get into the fray, they would not be loosed on the foe until the big Allied push began on the western front. It had been said that the 160th owned every hill in Hampshire and Surrey, as they had attacked and taken them all from other battalions, so if they can pull off the same stunt against the Germans in Flanders we see where the march on Berlin starts. The 160th, which had won prizes in every military event they engaged in in England were destined to make a great showing at the front, and the lieutenant's eyes moistened as he told of the sorrow he felt that he wouldn't be there to see them. Major Moffat was at present in command of the battalion and was almost idolized by the men.—Herald and Times.

What He Went For

A clergyman who had failed to gain the confidence and esteem of his flock was giving a lifeless sermon. He stuttered: "My dear friends.—It is clear God does not love you, for I have not buried any of you. It is equally clear you do not love one another, for I have not married any of you. It is painfully clear you do not love me for you have not paid me my last quarter's salary. I shall, however, be independent of you in future, as I go to take a position of Chairman in a coal company." He then calmly gave out his text: "I go to prepare a place for you."

Wanted

GENERAL superior for the village of Paisley Duties may be made known on enquiry, by the town clerk. Applications received up to Thursday, 7th March, at 8 p.m. J COLBSON Clerk.

To Clover Seed Growers

HAVING bought a machine for cleaning Beehners or Timothy from clover seed, am prepared to clean it cheaply on my premises. 2 miles from Paisley, on township Bruce Centre. A quantity of good red clover seed for sale, also some timothy seed. D J PORTER.

Farm for Sale

150 ACRE farm for sale. Soil good clay loam, good stone buildings, splendid water and new roofed at back house and barn, on R. R. delivery and telephone line situated on a main travelled road. For further information inquire at this office.

Farm for Sale

ONE 4 miles from Paisley, on the Elora road, 100 acres, 90 under cultivation except about 15 acres of bush. Large frame house, barn 60 x 30 and 16 to sold at a bargain for cash. Apply to J. G. MOORE, Lion's Head, Ont.

THE Standard Bank OF Canada

The 42nd Annual Meeting of the shareholders of the Standard Bank of Canada was held at the Head Office of the Bank, 25 King Street West, Toronto, on Wednesday, the 27th February, 1918, at 12 o'clock noon.

A large number of shareholders were present.

The chair was occupied by the President, Mr. W. F. Cowan, and Mr. E. R. Wood, Chief Inspector, acted as Secretary for the meeting and read the following report:

The Directors beg to present to the shareholders the 43rd Annual Report and Statement of the affairs of the Bank for the year ending the 31st of January, 1918.

The Net Profits, after making provision for bad and doubtful debts, rebate of interest on unmatured bills under discount, exchange, cost of management, etc., amount to $649,544.44. This amount, together with the balance forward from last year and $120,647.86 for premium on new stock issued, makes the sum of $892,197.85.

This has been appropriated as follows:—

Four quarterly dividends at the rate of 12% per annum	$448,782.77
Contributed to Officers' Pension Fund	20,000.00
Contributed to Patriotic Funds	21,250.00
War Tax on Bank Note Circulation to 31st of December, 1917	12,221.42
Transferred to Reserve Fund from Premium on New Stock	120,647.86
Reserved for estimated depreciation in securities	100,000.00
Balance of Profit and Loss Account carried forward	175,215.28

Your Directors deeply regret to record the sudden death, in March last, of our late general manager, Mr. George P. Schofield, who entered the service of the Bank as a Junior Clerk in 1882, becoming general manager in 1906, and a director in 1912, under whose management the Bank made marked progress. Your Directors appointed as his successor, Mr. Charles H. Easson, formerly of the Bank of Nova Scotia.

We also regret having to record the death of Mr. T. H. McMillan, who became a director of this Bank in 1909, when the Western Bank of Canada, of which he had been general manager, was amalgamated with this Bank. The vacancies in the Board have been filled by the appointment of Mr. T. B. Greening and Mr. James Hardy, F.C.A.

During the year, Branches and Sub-Branches of the Bank have been opened at Lethbridge, Alta.; Orion, Alta.; Richles, Sask. (sub. to Esten); and Westerham, Sask. (sub. to Estuary). The Sub-Branch at Cherry Valley and the Branch at Schumacher, Ontario, were closed.

The usual inspection of the Head Office and Branches has been made, and the duties of the staff have been faithfully and efficiently discharged.

The regular audit of the Bank's affairs has also been made by Mr. O. T. Clarkson, F.C.A., whose report is appended herewith. Mr. Clarkson's name will be again submitted at the Annual Meeting for reappointment as Auditor for the ensuing year.

W. F. COWAN,
President.

GENERAL STATEMENT

1st JANUARY, 1918

W. F. COWAN, President.
C. H. EASSON, General Manager.

AUDITOR'S REPORT TO THE SHAREHOLDERS.

I have compared the above Balance Sheet with the books and accounts at the chief office of The Standard Bank of Canada, and with certified returns received from its branches, and after checking the cash and verifying the securities at the chief office and certain of the principal branches on January 31st, 1918, I certify that in my opinion such Balance Sheet exhibits a true and correct view of the state of the Bank's affairs according to the best of my information, the explanations given to me, and as shown by the books of the Bank.

In addition to the examination mentioned, the cash and securities at the chief office and certain of the principal branches were checked and verified by me at another time during the year, and found to be in accord with the books of the Bank.

All the requisite returns required by law have been duly made, and all transactions of the Bank which have come under my notice have, in my opinion, been within the powers of the Bank.

C. C. CLARKSON, F.C.A.,
of CLARKSON, GORDON & DILWORTH, Toronto, Canada.

Toronto, February 18th, 1918.

The President referred to the satisfactory progress made during the year, and the Vice-President, Mr. Wellington Francis, K.C., and the General Manager, Mr. C. H. Easson, also addressed the meeting.

The usual motions were passed and the following Directors were elected for the ensuing year:—W. F. Cowan, W. Francis, K.C., H. Langlois, W. F. Allen, F. W. Cowan, T. H. Wood, T. B. Greening and James Hardy, F.C.A.

At a subsequent meeting of the Directors, W. F. Cowan was elected President and W. Francis, K.C., Vice-President.

C. H. EASSON,
General Manager.

W. A. TOLTON, Pres. Walkerton, R. R. No. 3

N. C. MacKAY, Secretary Walkerton, Ont

—A proposal is being considered to have a change made in the sales and inspection act in regard to the sale of eggs. It is proposed that a dozen eggs should weigh a pound and a half. If a dozen eggs does not weigh this amount the purchaser could demand additional eggs, even fourteen, fifteen or sixteen. Another change proposed is in regard to the sale of wood. A clause may be put on the act fixing a cord of wood at 128 cubic feet and making it an offence to sell less than this amount as a cord.

—A young man who, it was rumored, has come east to claim a bride, on his arrival at Toronto last week, was accosted by another young man, a stranger, but of plausible address. This two grew confidential, with the result that the stranger sold to Tommy from the west a black bottle full of whiskey. The price paid is said to be $2 50. The contents were not sampled until Tommy got among friends at Arthur, when they were discovered to be simply water. Moral—well, there are several.—Mt Forest Confederate.

FACING A CRISIS

How Bank Was Saved in Face of Frantic Mob of Depositors.

By George Elmer Cobb.

Randal Webster, the young and handsome president of the Bank of Greenville, opened the door of his private office. He glanced into the outside room, and beyond it at the swelling crowds in the street outside. Then with a groan he sank to a chair, the picture of despairing misery.

"It has come," he told himself in a harsh, racking whisper—"the worst, the end!"

There came a tap at the door. The young financier sprang to his feet. A brief, vague hope gave him momentary energy. Then his soul seemed to die within him, as his cashier entered the room with a face blanched and fear-crossed as his own.

"Any word?" projected Webster, hoarsely.

"None. Mr. Webster, we must face the crisis, the worst of rumors as to the solvency of the institution have got abroad. A mob of depositors from the mills is in front of the bank. They are wrought up and dangerous. They threaten to smash every window and blow up the bank with dynamite, if their money is not paid them promptly at ten o'clock."

"Impossible!" gasped Webster.

"No one knows that better than myself," responded the cashier in a hollow tone. "There is no promise whatever that your messenger to the city will arrive before night. Then it is too late. The train is just in, and neither man nor money has appeared."

"How much is there in the bank in ready cash?"

"Less than $10,000."

"Pay it out to the last dollar as slowly as you can. If we can tide over for a few hours the expected help may come."

"And if it does not—and when the money gives out?" questioned the cashier, fearsomely.

"Put up a sign and close the bank."

Left to himself, the young banker reviewed the situation. Energetic, impetuous, ambitious, he had gone beyond his depth in an investment sure to turn out profitable in the end. A temporary complication, however, had tied it up. He could not realize in ready cash under a week. A heavy draft came upon the surplus funds, depleting the bank reserve to a dangerously low figure. Somehow a public rumor of all this got out. The report was current that the bank was going to fail. Result: The frantic, desperate mob of frightened depositors now clamoring at the great locked doors.

Webster had sent a trusted employe of the bank to a rich relative in the city. He carried an urgent appeal for succor. The messenger had not reported.

A graver shade of feeling covered the features of the young financier as he thought of the one dearest to him in all the world—Ethel Morris. They were to have been wedded in a month, but if the bank broke—then Webster well knew her proud, exclusive family would scarcely favor a discredited bankrupt. It was a forlorn fight for business preservation and love.

Webster hurried into the counting room as a great outcry arose. He hoped it was his messenger arrived; he feared it was new riot. It lacked just five minutes of ten. A remarkable scene greeted his sight.

A whiskered, farmer-looking man was talking to the excited crowd. He was waving a great bundle of bank notes in one hand. There was a cheer. In his other hand the stranger carried an old battered satchel. With it he now pounded on the door.

"Let me in. I must get in!" the astonished Webster heard him shout out, and then to the people: "Don't get scared. Randal Webster is an honest man, and the Bank of Greenville is solid as a rock!"

Something in the determined manner of the visitor caused the watchman to open the door for him. The stranger helped him reclose it against the eager, crushing crowd.

"Where is Mr. Webster?" he demanded. "Ah there he is," and he approached the counter and nodded to the wondering banker. "Remember me, Mr. Webster?"

"Why, I can't say that I do," was the hesitating reply.

"Never mind. I've changed. Had to, wanted to," rattled on the stranger. "See here," and he began to bring from his pockets bundle after bundle of bank notes. "There's $20,000. Use it."

"But, my dear sir—" began the bewildered cashier.

"Use it, I said, didn't I?" interrupted the stranger, unceremoniously.

"But we have no right; the condition the bank is in—to receive deposits," stammered the cashier.

"Call it a loan, then," said the stranger. "I know all about your worry here. It won't last. Keep the crowd goodnatured Pay them off smiling. I'll guarantee the run will soon stop."

Then he lifted the satchel. As it opened, the startled cashier, used as he was to the sight of money, uttered a great cry. The man piled up bundle after bundle of crisp green bank notes.

"Shove them up against the glass where they will show," ordered the stranger. "Only, don't pay out any of this heap. You won't need to. That pile, the real cash paid out right along, will soon tame that unruly mob."

"Ten o'clock," announced the dumbfounded cashier. "Open up."

The stranger grew to one side, as if enjoying the scene. The astounded Webster was soon too busy to notice him. The eager crowd filed in; everybody was paid promptly. The sight of the great bundles of bills began to have an effect. Some, shamed redeposited their money. Others, catching the infection of restored confidence, did not ask for their money at all. Within an hour the news went all over town that the bank was safe.

With a great sigh of relief Randal Webster beckoned the stranger into his private room.

"Now, then," he said, "what does this all mean?"

The stranger laughed. Then he seized the banker's hand in a friendly grip.

"You don't know me, eh?" he said. "Well, I'm bringing you back some of the bread you cast upon the waters five years ago."

"I don't understand you," murmured the puzzled banker.

"You was a lawyer then, and you defended in the city a member of a gang of counterfeiters. Now do you remember?"

"Why, yes," answered Webster, slowly.

"My name was Dallas—not now; I've changed it. You got me free, you gave me a great lecture. It was my life chance, and I improved it. I went to my folks fifty miles from here. A relative left me a fortune. I have kept track of you. I heard of your trouble."

"And you have saved the bank!" cried the grateful Webster.

"The gang believed a large amount of their counterfeits destroyed. I saved the satchel containing them," went on the man. "I buried it. That show money I took from the satchel is counterfeit. The real money I drew from my bank early to-day to loan to you. We will burn the counterfeits now they have served their purpose."

An hour later the bank messenger came rushing up in an automobile, with plenty of money to safely ride the bank over.

Webster paid back his grateful friend in need. He did not tell even Ethel the story. Down deep in his heart, however, he fervently cherished the gratitude of the reformed criminal who had saved the bank at a critical juncture.

With a Gross He Sank to a Chair.

Their Fathers.

Two little Scotch girls were boasting about their respective soldier fathers. "My father's a scget," said Jeanie. "My father's a soger tae," retorted Jessie. "Ah, but my father's a brave man, a terribly brave man," persisted Jeanie; "he's been in a war an' he's got medals, a terrible lot o' medals; an' he's got the Victory Cross, and the King fastened it on with his own han'!" "But my father's a braver man than yours," said Jessie, sticking up valiantly for the honor of the family, "an' he's got a wudden leg 'at the King nailed on wi' his ain han'!"

Prepare For Next Winter.

Unless all signs fail, the coal shortage next winter will be more acute than this winter, and every effort should be exerted to provide a supply of dry hardwood. Farmers and villagers will be expected to look after themselves, but in cities and towns the responsibility is devolving upon the municipal authorities. These should lose no time in organising to have wood cut, hauled and stored to dry during the summer. If this is not done, the situation next winter promises to be very serious indeed.

Doesn't Seem Fair.

"Mamma," said little Ethel, with a most discouraged appearance, "I'm never, never going to study any more."

"Why, dearie, what's the matter?" inquired mother.

"'Cause it's no use," was the impulsive answer. "It's no use at all. I can't never learn spelling. Teacher keeps changing the words all the time!"

Gunns Shur-Gain Fertilizer

Food Control Corner

Mr. H. B. Thompson, Canada's new Food Controller, in his first personal public statement to the Canadian Press, called for broad-minded, constructive co-operation by all the people of the Dominion. He also paid tribute to the work of the Hon. Mr. Hanna, his predecessor in the Office.

"When the history of Food Control is written, the initial handling of its most difficult and complicated situation will be appreciated. Not till then will the work of the Hon. Mr. Hanna be fully recognized. The people of this country will then come to the conclusion that Canada was truly fortunate in the selection of Mr. Hanna as Food Controller," said Mr. Thompson.

"Now that the full seriousness of the world food situation has been grasped by Canadians, all will devote their energies to helpful and constructive co-operation in this nation-wide work.

"Food Control viewed from the eminence of the 'parish pump' is very simple; but there are no 'parish pumps' in Canada of sufficient altitude to command a view of the forty-ninth parallel from the Atlantic to the Pacific, 3,500 miles.

"The war is not being fought by one man. Canada presents a solid front of some 400,000 men in the trenches. The Victory Loan of $450,000,000 was not raised by a few, but was paid for by one person in every nine throughout Canada. This was all voluntary work under guidance. Now that the whole situation and the pressing necessity of conservation and production have been put before the people, each of the eight millions citizens of Canada should constitute him or herself a Food Controller. It is up to everyone of you to see that there is no break in the line.

"The whole urgency of the case is summed up in two words, THRIFT and INDUSTRY. Get to understand the meaning of both of these words and then 'DO YOUR UTMOST.' Miracles cannot be performed; but enormously greater good can be accomplished if we all pull together."

After conference with General S. T. Mewburn, Minister of Militia, the Food Controller has issued a statement pointing out that it is entirely unnecessary for additional food to be supplied by relatives and friends to Canadian soldiers while in this country, in view of the liberal and varied food ration issued to the troops by the Militia Department.

The statement adds that the aggregate quantity of food thus privately sent to the soldiers is very large and that much of it, having been conveyed long distances in heated express or mail cars, is more or less spoiled and consequently injurious to the health of the men. The public are, therefore, asked to discontinue the practice of sending foodstuffs to the soldiers in Canada.

The waste referred to can be checked only by getting each soldier's family and friends to realize that they individually are the persons who are asked to stop sending food in this way. The situation overseas is so critical that every avenue of food waste must be closed, the statement concludes.

WOUNDED HEROES SERVING.

Needle Becomes War Weapon To Men Eager to Serve.

Sewing is no longer a despised art for men. The needle is now classed among small arms in this war, and the wounded soldiers in the convalescent hospitals are still able to do their bit.

A contented mind is half the battle of convalescence and to have an easy mind, the wounded men must kill time with some occupation. Sewing and embroidery, even crochet and tatting have been brought into service by the vocational training instructors of the Military Hospitals Commission who also direct the occupational work in the hospitals.

The men in the Canadian Hospitals are not yet engaged in practical sewing as are the convalescents in many of the continental convalescent hospitals where the wounded are engaged in making clothes for the war stricken peasants of Syria and Palestine, but they have many art novelties which have been sold to support relief funds for such purposes.

The convalescent soldiers in Europe were given at first the straightforward sewing of children's simple dresses which had been cut out and tacked together. They became so proficient in a short time that they were allowed to cut them out as well, and now they are skilled seamstresses or "seamsters." Sewing machines have been installed through the agency of the Red Cross and the work is going ahead with great speed. The completed garments are going to the refugee ramps.

Go back to the simple life, be contented with simple food, simple pleasures, simple clothes. Work hard, pray hard, play hard. Work, eat, recreate and sleep. Do it all courageously. We have a victory to win.

WHEN I GOT MY "BLIGHTY ONE"

"HOW DOES IT FEEL TO BE WOUNDED?"

A Famous Writer, Who Has Himself Experienced the Sensation, Tells All About It.

First voice: "Where's th' officer?"

Second Voice: "He's buried, pore beggar!"

Third Voice: "No he ain't! He's in the shell-hole yonder!"

People are fond of asking men in hospital what it feels like to be wounded. When I got my "Blighty one," the above conversation was the first intimation I had that I was wounded. At the same time, I was conscious of some warm fluid trickling down the back of my collar. I found myself lying on my back in a deep hole. I wondered dully what had become of the sky. I was making a feeble effort to focus my eyes so as to solve this riddle, when I suddenly discovered myself looking into a dark, sunburnt face.

The Long Sleep.

Then it dawned upon me—I was wounded! I remembered hearing a shell "coming for me," as much experience of the sound of approaching shells has taught men in the trenches to say. Something hit me hard—and I gently went to sleep. I have often thought since that Death must come to men in action like that.

When I came round I was all pain and very frightened. The man with the sunburnt face bandaged my head and found a flask in my pocket. The brandy brought me back to my senses to the extent of my suddenly realizing that war was highly dangerous, and I longed—oh, how I longed!—to be somewhere safe, somewhere soft and warm and clean, where one need not think, but only rest and sleep.

Most men who have been wounded will tell you afterwards that they remember only snatches of their subsequent movements, faint, inconsequential pictures, like impressions of one's early childhood. I have not the slightest recollection of getting out of my shell-hole, but I have a hazy idea of seeing a knot of dishevelled and very meek German prisoners, and of being told that I was to take them down to Battalion Headquarters with me. I don't in the least remember what became of them, but the orderly who escorted me back told me afterwards that he handed them over, with numbers complete.

"Out of the Game."

A wounded officer has always seemed to me like a man in a tennis tournament who drops out early in the contest. Once he is beaten he has no further personal interest in the game, and he likewise ceases to engage the attention of the other competitors who are playing or waiting their turn to play. This sensation of being "out of the game" was, I remember, very strongly on my mind as I made my way down on a sunny autumn afternoon from the front line, past the dead bodies of men who had been "over the top" with me a few hours before.

Somehow I felt neutral. I seemed to be a leisurely spectator who had no business with all these active men, digging trenches, laying lines, bringing up ammunition. I was out of it all, and I knew it, and somehow the knowledge hurt.

Resulsion of Feeling.

I was given a man at Battalion Headquarters to help me along, as walking was very painful. I put my arm around his neck and he put his round mine, and so we hobbled along. In what had been our first objective that morning, a German trench much damaged by shell fire, where the regimental aid-post was reported to be, I came across a man from my own regiment, a machine-gunner. I remember resenting the breezy way in which he greeted me.

"Hallo, you've taken the knock, too, have you?"

I told him rather testily that his surmise was absolutely accurate, and asked him the news.

"Jack's killed," he said, mentioning a man we both knew. "A shell got him and his orderly early this morning."

Now Jack was a particular friend of the speaker, but the latter's voice was steady, and he spoke quite unemotionally. In action one realizes next to nothing, and one may thank God for it.

A Good Samaritan.

The Germans were shelling that trench, fitfully and inaccurately, I expect, as no shells burst near us. But the old feeling of panic came over me again.

Near the aid-post my escort handed me over to a doctor, who was going down to the dressing station. That doctor was a Good Samaritan. He led me very gently through the barrage and on to a road where our ways parted. There we fell in with an officer who had been shot through the knee, who was hobbling along, using a rifle as a crutch. With a pat on the back the doctor left me. I never saw him again, and I never knew his name, but I hope the Recording Angel booked what he did for me on the credit side of his account.

The next stake of my journey that I recall is the dressing station, a great jumble of stretchers and muddy walking wounded, and horse ambulances stuck up to the axles in the mud. There was a doctor there in a blood-stained surgeon's smock, who said to all and sundry:

The Callousness of War.

"If you can walk, please do, as you'll be sparing a place for a more seriously wounded man!"

So my companion and I trudged on. A friendly gunner, who emerged from nowhere, gave us a drink of hot tea out of his mess tin, which made the other officer sick. After this my impressions are a blurred again. There was a very deep dug-out, I remember, where a cheery and bespectacled youth changed the bandage round my head, and after that an interminable journey over atrocious roads on a jolting munition-limber. Of that journey I only recall one little incident. The limber halted outside some kind of dressing station installed by big white and brown marquees by the roadside. Just outside one of the tents there stood a man with a lantern—for dusk had fallen—and he was bawling with stentorian voice:

"Only bleeding wounds here! Only bleeding wounds here!" for all the world like a "barker" outside a picture palace.

Unshaven and Begrimed.

After that someone, somewhere laid me on a bed and gave me hot beef-tea to drink, a seemingly endless drive in a motor char-a-banc, loaded with groaning wounded, followed, and at length, shivering with a rising temperature, I reached a casualty clearing station, where the doctors promptly labelled me a lying-down case. Four sturdy and very youthful German prisoners carried me to the ambulance train; they paused a minute to wipe the perspiration off their foreheads.

"What is that one?" said Hun No. 1.

"He is an Indian," promptly replied Hun No. 2.

"He has not got a turban," said Hun No. 3, doubtingly.

"But he is black!" retorted Hun No. 2.

Then I knew what the sun and the mud had done to my complexion.

TRY THESE ONE-DISH DINNERS.

Fish Chowder

Rabbit, fowl, or any meat may be used instead of the fish, or tomatoes instead of milk. Carrots may be omitted. 1½ pounds fish (fresh, salt, or canned), 9 potatoes, peeled and cut in small pieces, 1 onion, sliced, 2 cups carrots cut in pieces, ½ pound salt pork, 3 cups milk, pepper, 3 tablespoons flour. Cut pork in small pieces and fry with the chopped onion for five minutes. Put pork, onions, carrots, and potatoes in kettle and cover with boiling water. Cook until vegetables are tender. Mix three tablespoons of flour with one-half cup of the cold milk and stir in the liquid in the pot to thicken. Add the rest of the milk and the fish which has been removed from the bone and cut in small pieces. Cook until the fish is tender, about 10 minutes. Serve hot. You can omit salt pork and use a tablespoon of other fat.

Dried Peas with Rice and Tomatoes.

1½ cups rice, 2 cups dried peas, 6 onions, 1 tablespoon salt, ¼ teaspoon pepper, 2 cups tomato (fresh or canned). Soak peas over night in two quarts of water. Cook until tender in water in which they soaked. Add rice, onions, tomato, and seasonings and cook 20 minutes.

Potted Hominy and Beef

Hominy is excellent to use as part of a one-dish-dinner, if you have a fire in your stove so that you can cook it for a long time, or use a fireless cooker. Heat 1½ quarts of water to boiling; add 1 teaspoon of salt and 2 cups of hominy which has been soaked overnight. Cook in a double boiler for four hours or in the fireless cooker overnight. This makes 5 cups. This recipe may be increased and enough cooked in different ways, for several meals. Hominy is excellent combined with dried, canned, or fresh fish, or meat and vegetable left-overs may be used. Here is one combination: 5 cups cooked hominy, 4 potatoes, 2 cups carrots, 1 teaspoon salt, ¼ pound dried beef, 2 cups milk, 2 tablespoons fat, 2 tablespoons flour. Melt the fat, stir in the flour, add the cold milk, and mix well. Cook until it thickens. Cut the potatoes and carrots in dice, mix all the materials in a baking dish, and bake for one hour.

These dishes supply all five kinds of food. Each is enough for the whole dinner for a family of five. Eat them with bread and with fruit or jam for dessert. Then you will have all the five kinds of food your body needs. These five kinds are:—1. Milk, cheese, eggs, fish, meat, beans, peas. 2. Cereal: corn, rice, oats, rye, wheat. 3. Syrup, sugar. 4. Fats: butter, oleomargarine. 5. Vegetables, fruits.

Choose something from each of these five groups every day.

The Clean Plate.

"Please don't eliminate the leftovers altogether. My husband and boys like some of my left-over dishes better than the originals."

Thus reads a letter just received from a reader. From what she says and from the examples of the dishes she makes from those left-overs, it is very easy to see that she is one of those rare cooks who waste nothing that good cooking can make eatable. For her a little extra cereal or a few slices of toast too many are not a waste; they are an opportunity.

But the moral of the slogan "Eliminate the left-overs" is this: Nothing should be left over that cannot be used, and remember that left-over dishes which are most costly after the necessary additions are made to transform them into palatable foods than entirely new dishes would be are not an economy. The cook who can use the extra servings to good advantage need not worry about cooking a little too much, but the less resourceful housewife will do well to count heads and measure carefully.

However, the "clean plate" recommended by the Food Controller is a matter which cannot be argued. "I hate to be so skimpy about my serving that I cannot tell whether my children are satisfied or not," reads a letter from a person who preaches and practices generosity. This is the old Canadian attitude. But look at it in this light: The generosity you show in serving your children and your guests more than they want is depriving other human beings somewhere in the world of food which is actually necessary for their existence.

Carelessness about butter is a common Canadian sin against thrift. In nearly every family some member has the habit of taking huge helpings of butter which he or she does not use. The remedy is simple. Cut slices off the oblong pound of butter a quarter of an inch thick, and cut each slice into four pieces. When the butter is served, let each member of the family take one small piece at a time. It sounds like a small economy, but it is one which careful city housewives have practiced for years, and now that we are asked especially to conserve butter, country women will do well to follow their example.

Do Not Use Coal Oil.

A prominent surgeon has called attention to the fact that every year there are several cases of fatal burns from coal oil being used to hurry up a slow fire. Sometimes also people will lay a new fire, thinking that the old one is out, and pour on a little coal oil, with the result that the oil takes fire explosively, catches fire to the oil pouring from the can, which in turn ignites the clothing of the person, and perhaps the building.

If you are accustomed to use coal oil, ponder over the possibility that death by burning is exceedingly painful, and that if you continue the practice you many be the next victim.

Excellent bread can be made of wheat, barley and rye.

If there was just one WALKER HOUSE in each town where I go,

My troubles then would last like that Proverbial ball of snow.

Of which I have no doubt I will be!

But you have oft' heard tell

I mean the one which people say Was located down in—well!

It doesn't matter 'bout that snow ball,

Which could never last,

What in'freats you and me is

Having comforts to be passed.

And I KNOW PEACE and JOY and HAPPINESS

To me would flow,

If there was just one WALKER HOUSE

In each town where I go.

Farm Crop Queries

Conducted by Professor Henry G. Bell

Henry G. Bell

The object of this department is to place at the service of our farm readers the advice of an acknowledged authority on all subjects pertaining to soils and crops.

Address all questions to Professor Henry G. Bell, in care of The Wilson Publishing Company, Limited, Toronto, and answers will appear in this column in the order in which they are received. As space is limited it is advisable where immediate reply is necessary that a stamped and addressed envelope be enclosed with the question, when the answer will be mailed direct.

Fertilizers and Early Ripening.

The lesson of the past year is clear. Of the 450,000 acres of corn in Ontario, but a comparatively small per cent. was fully ripened when early frost cut short the life of the crop. Seed corn is consequently at a premium.

Granted that sufficient seed corn can be located to care for the 1918 planting, is it surely high time, it is surely good business for Ontario farmers to do all they can to mature the 1918 crop.

Moreover, farmers who are fortunate enough to have silos know that the feeding value of the silage is materially improved if the corn is fairly ripe before it is cut.

How is the situation to be helped? How can Canadian farmers avoid a repetition of the disastrous condition in 1917? The answer is by abundant fertilization of the crops, with fertilizers for grain crops, high in phosphoric acid. This advice is amply supported by experimental evidence.

Director Hall of Rothamsted wrote in 1910: "It (phosphoric acid) is in some way closely bound up with grain formation, being always found in greater proportions in the reproductive parts of the plant than elsewhere. This ripening action is very clearly seen in the Rothamsted experiments on barley; the plots without phosphoric acid being, as a rule, about a week behind those which received this fertilizer . . . As might be expected, this ripening effect of phosphoric acid will be particularly seen in a wet year when the crop is late to harvest."

A diagram in connection with these statements shows how the fertilized crop matures earlier and more uniformly than does the unfertilized.

Ohio Bulletin 182, published in 1907 has a frontispiece showing a bird's eye view of the ripening wheat plots at that station. The foot-note reads: "Wheat on section C of the 5-year rotation as seen from the tower of the main building about a week before harvest in 1905. This picture shows the early maturity of the plot receiving acid phosphate as part of the fertilizers. The average unfertilized yield of this wheat was only 5 bushels per acre, but plots 11, 12, 14 and 16 yielded 24, 25, 22, and 21 bushels respectively."

In the Middle West of the United States it is the corn crop which is most effected by early frost and slow growing season. Probably the necessity of an ample supply of available phosphoric acid for growing corn is best shown by the exhaustive studies made by Houston and Jones of Indiana and published in Purdue Agricultural Experiment Station Bulletin No. 175. An area of corn was planted on May 28th; the variety used, Riley's Favorite. The soil was very carefully prepared. It had in the past ten years, received one liberal dressing of stable manure, and three applications of acid phosphate and muriate of potash. That the land was in a fair state of fertility was shown by the average yield of 76.3 bushels of corn per acre. Frequently the yield of corn is cut short by drouth, so to avoid this contingency the experimenters arranged to irrigate the corn once a week. Samples of the crop were taken periodically from June 16th to November 12th. These were subjected to chemical analysis which clearly showed the amount of nitrogen, phosphoric acid and potash taken out by the growing crop at various stages. These researches showed that the pounds of phosphoric acid taken out by ten thousand plants rose from nothing to 43 pounds by July 24th; almost 14 pounds early in August; reaching a maximum of 41.8 by October 8th; and receding to 40.2 by November 12th. The big practical point, however, is brought out by the figures shown by the analysis of the plant at husking time. This showed that 86 per cent. of the phosphoric acid removed by the plant was found in the corn ears. Bernberg experiments show that when wheat is ripe 76 per cent. of the phosphoric acid removed by the plants is found in the wheat kernels.

But the Indiana experiments show more than the final analysis of the crop. As indicated, these experiments reveal an increasing need for available phosphoric acid from early in August until the corn is ready to husk. This is the all-important point for the farmer, especially in late, cold seasons. If the soil is short of this constituent which is most largely responsible for the ripening of the crop, the result is immature corn and large quantities of inferior seed for the following year. Fertilizer agents and progressive farmers can render a great national service at this time by so impressing the foregoing facts so that corn growers in general will actually pay attention to this means of hastening the maturity of their crops.

Fertilizers Pay Better Than Ever

Bigger crops cannot be raised by increasing acreage; Shortage of labor makes that impossible. Grow bigger crops without increased LAND, LABOR or SEED by using

HARAB-DAVIES FERTILIZER

Don't depend upon barn-yard manure alone. Manure is valuable, but insufficient. It helps maintain fertility—returns part of the plant foods your crops extract. Additional supplies of plant food (Fertilizer) must be added to your soil to grow more on your PRESENT acreage. Experiments have shown that the Nitrogen in only 100 lbs. of 2-8-2 fertilizer produced as much as the Nitrogen in a TON of manure.

A bushel of corn or wheat will buy more fertilizer now than before the war. Fertilizers have advanced in price less than other commodities. They pay better than ever. Write for nearest agent's address or ask for agency yourself.

COOKING FOR RURAL SCHOOLS

By Lola D. Wangner

"I have found," said a school principal, "that in country schools which have the hot-lunch system the pupils do 75 per cent. better work in the afternoon than when they have only a cold lunch."

To the inexperienced young teacher, in her isolated one-room school, the task of introducing this hot-lunch system seems almost too great to undertake. To her I can say that while she may find it difficult, she will also find it far from being impossible.

The first step is to try to interest the parents, and the best way to do this is to call a community meeting at the school house. This, of itself, is a big step toward helping her school, for the average farmer is glad to take an active interest in school affairs if he is asked to. In order to prepare for such a meeting the teacher must study up this work and be prepared to talk about it. She must write to her provincial agricultural college, asking not only for helpful bulletins on the subject of hot lunches but for any and all school helps and suggestions that will aid her.

Enlisting Co-operation of Parents

She must be thoroughly prepared to explain to the people in her district the benefits this system will bring, and to tell of her plans for carrying it out. First, supplies must be secured. The teacher should try to interest the farmers and find out just how they will co-operate. One may donate a basket of potatoes, another, one of carrots, several may agree to take turns supplying milk, still others may give canned vegetables, onions, fruit, and so forth, to help the good cause along.

In nearly every case, the second year finds the pupils eager to grow their own vegetables and, in this way, school gardens may be begun.

Following the installation of the school gardens, comes the next logical step of canning the products of these gardens for the school lunches of the coming year. And, I am sure, that school gardens will be merely starters for much actual work in improving the school grounds. Boys and girls are generally eager to work if they are properly directed and interested. They will soon decide that shade trees are needed in the school yard, that the yard needs cleaning up, and the outbuildings need to be painted and kept in repair.

In fact, the introduction of the hot-lunch system may lead up to as high a point of attainment as the teacher wishes to reach. She will find it an easy matter to make her school the centre of the community by bringing the home interest to the school. Her pupils will not only be able to do better work, but there will be a new interest with each noon meal.

The Necessary Equipment

Just how can a teacher in a poor, disinterested community establish this system? First of all, a stove, fitted for cooking and baking, should be secured. Where the school stove is not suitable, then an oil or alcohol stove with a portable oven should be provided. Each child should bring from home a bowl or cup and teaspoon and fork. The boys of the school may build a cupboard to hold the cooking utensils and the girls may make the dish-cloths and towels.

The following equipment is suggested for this work: Double boiler, kettle, sauce-pan, strainer or sieve, egg-beater, quart measure, measuring cup, can-opener, tablespoon, teaspoon, paring knife, vegetable brush, butcher knife, two dish-pans, potato masher, six fruit jars, six jelly glasses, water bucket, dipper, baking pan, tea kettle, dish-cloths, paper napkins. Where the box is donated free, the cost of this equipment, including the oil stove, should not exceed twenty-five or thirty dollars. The teacher could get up a community entertainment to pay for this and arouse interest in her scheme.

The teaching of domestic science could be combined with the hot-lunch system, and, after a time, the girls might invite their parents or the trustees to a dinner they had prepared—another way of arousing and holding interest in this work.

How the System Works.

How can the teacher do this work without robbing her other classes of valuable time? By making this cooking supplementary work to the other classes. She need only serve one hot dish each day. This may be soup, cocoa, baked potatoes or apples, or something of the sort; whatever is decided upon should be worked into the other lessons. For instance, were she to serve creamed corn, then it could be made the subject of the daily nature talk.

Corn, wheat, rice, eggs, sago, and so forth, may be used in the same way as supplementary work in geography, physiology and hygiene. Sanitation follows as a natural sequence, care of cooking utensils, methods of dish-washing, cleanliness of hands in cooking and eating, and why these are necessary.

Two of the main factors in maintaining sanitary conditions are pure, fresh air and sunlight. Most rural schools are constructed with no regard for ventilation. Here, again, the teacher can help and teach her pupils to help. The boys can make skeleton frames to fit the windows. Over these sashes may be tacked muslin bags or double pieces of cheese-cloth. With a window at one side of the room lowered at the top and one raised from the bottom on the other side, and the cloth screens put in, there will be a supply of fresh air without a draft.

But to go back to the school-lunch problem.

"How shall I actually go about cooking a hot dish for noon?" asks the teacher. The best answer I can give to this is the following account of how one teacher in a small rural school carries out this system:

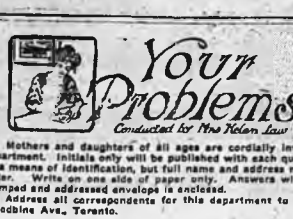
Four girls are appointed each day for the preparation of the following day's hot dish, which is decided upon by the teacher. Four other girls are appointed to serve the meal, collect and wash the dishes. By taking two large girls and two smaller ones in each group, all the girls in the school are thus given a share.

The day I saw her, she served baked potatoes. After the morning exercises there followed a short talk on potatoes as this happened to be the subject chosen for the weekly composition.

What One Teacher Accomplished

The pupils were required to give definitions of some words used in this talk, and these same words were given out to the advanced classes for their spelling lesson. On the board were written ten short paragraphs stating the food value of potatoes, why needed in the diet, and so on.

The utensils put away, the girls took their seats and the day's regular work was begun. At the appointed time, without a work from the teacher, the fire was lighted and the potatoes put in to bake. When dinner time came, the pupils were dismissed for five minutes in the open air. During this time, the room was aired and four girls spread paper napkins on each desk, setting the pupils' lunch boxes on the desks with spoons and bowls holding the potatoes.



This particular teacher's school was in an isolated, non-interested district and her task had been a most uphill one. Her first task had been to invite all the mothers to her boarding house for a discussion of school matters. She tactfully introduced the subject of good school lunches and showed many leaflets and pamphlets she had secured.

Then she followed her talk with a delicious lunch, serving many varieties of dainty sandwiches, and they began to be interested. After that, it was an easy matter to tell them of food values, and why they cannot vary the contents of the lunchbox.

That school has long since ceased to be merely a wooden building where children are unwillingly driven to study the "three R's." It has become the centre of its community, the leader of its social side and an active agent for good. All this came about because one woman saw the great possibilities in her school work.

Rollers for Chair.

For an invalid or afflicted child when one cannot afford a wheel chair take the rollers from a pair of skates and fasten to the rockers of a chair which is comfortable and of size to be pushed through all doors. You will find this an excellent substitute.

Mothers and daughters of all ages are cordially invited to write to this department. Initials only will be published with each question and its answer as a means of identification, but full name and address must be given in each letter. Write on one side of paper only. Answers will be mailed direct if stamped and addressed envelope is enclosed.

Address all correspondents for this department to Mrs. Helen Law, 238 Woodbine Ave., Toronto.

Just Sixteen:—You and your questions are most welcome, Miss Sixteen. You are to be congratulated on your ability to write a most charming letter. Regarding the spring frock, the one-piece style is decidedly advisable, as it will be very popular this season and it is especially suitable at your adorable age. Your decision to do your bit by raising chickens is commendable, and the work should be quite within your capabilities. You are making a wise start by studying the subject at the outset. If you will write to the Experimental Farm, Ottawa, or to the Ontario Agricultural College, Guelph, you will be sent, free, reliable information on poultry culture. You have our best wishes for success. Will you not report progress occasionally, and in the autumn send us an account of your experiences. Probably there are a number of our readers who will follow Just Sixteen's good example. "Ypres" is pronounced in one syllable, like expr. "Hohenzollern" Sol. Please see, with accent on the third syllable. "Invalided," in-va-lid-ed with accent on the first syllable.

Britannia:—Yes, the new standard loaf will soon be on the market and then there will be no more picking or choosing and no wrappings or expensive et caeteras.

It is provided that rolls may be manufactured and sold only in units of specified weights. The rules prohibit the wrapping of bread or the placing on it of a paper or other band for the period of the war. By providing for a standard loaf, unwrapped and of the simplest character consistent with wholesomeness, the Food Controller has ensured for the people of Canada bread at as low a price as it can possibly be made and distributed. The consumer will benefit by the regulations, while the bakers will be placed on a basis of equality and protected against unfair competition as well as being freed from many undesirable methods which have crept into the trade.

Mother of Five:—You are particularly fortunate to have five growing boys who are all keen to do something this year. There isn't a boy or girl in Canada now who can't do a little to help in food production. Seeing that you live on a farm why not have them rear a pig, a calf or a batch of chickens. Again they can have a garden plot and grow potatoes and all kinds of vegetables. Seventy-one thousand boys and girls of school age last year increased the agricultural output of Ontario to the value of $125,000. Other provinces did equally well.

Miss R.A.A.:—If you want really good substitutes for wheat why don't you use rolled oats and oatmeal in mixed breads. The first advantage is that they are easily obtained. Secondly, they will absorb far more water than wheat flour and retain it longer; thirdly, they are as cheap as any other ingredient which is available; and lastly, the oatmeal loaf is said to have a greater nutritive value than even a straight wheat flour and far greater than a corn-meal or barley-flour mixture.

A Soldier's Sister:—As a matter of fact, it is very unwise to send any food to your brother. It is really a source of waste to send food-stuffs to soldiers overseas. The rations issued by the Militia Department are liberal and varied. The aggregate quantity of food sent privately to the soldiers is very large and much of it is spoiled in transit. The situation overseas is so critical that every avenue of food waste must be closed.

Mrs. F. B.:—I have given your name and address to some prospective customers for your guess feathers. They will write you shortly.

Poultry

The production of eggs in winter from pullets, and to some extent from hens, can be greatly stimulated by good methods of feeding, housing and handling. Very few eggs are secured on the average general farm during the fall and winter when eggs bring the highest prices. Poultrymen, however, by better management secure a fair production during these seasons.

In order to get the greatest egg production in fall and winter it is essential to have well matured pullets which were hatched in March or April.

Feed the grain in a deep litter on the floor and make the hens exercise for all of their grain. The mash may be fed either wet or dry, and should be so regulated that the fowls will get about equal parts of mash and of the starch grains. It is necessary to give the fowls plenty to eat to get good results, but the birds should always be eager for each feed. In cold weather feed about one-third of the scratch grains in the morning and two-thirds at night, in which way the hens are forced to exercise more than if given all the grain they desired at the morning feed. Scratch grains, mash or ground grains, animal protein, green food, grit and shell should be supplied in the winter.

Clean the dropping boards at least once a week and spray the roosts once a month during the winter with kerosene or some commercial preparation for killing mites. Have a good supply of sand or dry dirt on hand to use on the dropping boards during the winter.

If any of the birds develop colds put as much potassium permanganate as will remain on the surface of a dime into a gallon of water and keep this material in their drinking water for several days or until the symptoms of the colds have disappeared. Remove any sick birds from the flock as soon as noted and treat them in coops by themselves, or kill and bury them if they are not worth treating.

Gunn's Snur Gain Fertilizer

The Dairy

The food value of alsike clover for cows does not differ materially from that of red clover. As a matter of fact, there is not enough difference in the food value of the two plants to make any difference in compounding a ration; one would take the place of the other. Alsike makes just as good hay when it is cured under just as favorable conditions. Cattle like it just as well. But in their growing habits, red clover and alsike vary considerably and a farmer would take this into consideration, whether he grew alsike or red clover. For instance, alsike will grow in soil that is too moist and too sour for red clover to thrive in. Alsike clover grown alone is much more inclined to lodge than red clover because it has a weak or reclining stem. It is a pretty good practice to mix some alsike clover in with the red clover in seeding down, for on much of our soil a portion of the field will be more adapted to the growth of alsike clover than of red clover, consequently, one is reasonably sure of getting a larger yield of hay if he mixes them than he would to grow either one separately. They do not mature just at the same time, yet the difference isn't enough to prevent cutting both plants at the same time without very much lessening in the value of either as a food. We most always mix a little alsike clover seed in with the red clover seed for the reason stated above.

Growing Beans With Small Cost.

Plowed the ground early and worked it several times both ways so as to make it level. I planted with two-row corn drill, twenty-eight inches apart, and dropped a bean every ten inches in the row. I worked them with a two-row cultivator and hoed them once. Harvested them, eighteen acres, in one day, with two bean pullers and a side-delivery rake. Had two men follow the rake to pick up any scattered beans. We let them dry a few days and then threshed them from the field. Had 329 bushels of beans that picked two pounds.

One must have his land in the best of shape to raise beans. My land was tiled, another essential thing to save the bean crop.—T.A.H.

Sheep Notes

It is now time for the live stock farmer to mark sheep raising one of his regular lines of production.

One of the first considerations is the shelter for sheep is ventilation without draughts.

Bean fodder is an excellent rough-age feed to be used in combination with other forage, particularly for sheep. It may also be successfully fed to cows in small quantities. When used for sheep in combination with other roughage feeds, bean straw will have approximately as high feeding value as good hay, although it will not be as closely eaten, on account of the coarse stems. The feeding value of the forage is almost always enhanced by the grain it contains, as even where a good job of threshing is done, some beans will nearly always remain in the straw.

How to Save Coal.

Burn wood instead of coal whenever you can. There are dead trees, dead limbs and old rails that can be burned now to the betterment of the farm and your country.

Weather-strips, double windows, pipe-covering, heating drums in stove-pipes, and extra radiators, pay. It is cheaper to install a larger radiator in the always chilly room or in the room to be kept specially warm than to force the fire. Never let the house get too warm—68 degrees is about right.

Chemical fuel savers are expensive.

Open fireplaces are inefficient. Use them sparingly.

See that stove or furnace smoke passages and chimney are kept clean. If soft coal is used, they should be cleaned every few days.

Study the directions for running your furnace. If you do not have directions, send to the maker of the furnace for them.

Keep ashes cleaned from under the grate. The fire burns more uniformly and with less clinker with a clean ash-pit.

It is best to keep a full fire-pot, level with the bottom of the firing door. If the draft is poor or the coal fine, thinner or lower fires must be kept. In mild weather the fire can be carried thinner by allowing a few inches of ashes on the grate. In cold weather keep the grate free of ash.

Attend the furnace at regular periods. Anticipate the demand for heat. Rapid pushing or retarding of the fire is uneconomical.

If soft coal is used, break the lumps to fist size and do not cover the whole surface with fresh fuel. Leave a bright spot to ignite gases.

If the fire gets very low, open the ash-pit damper and add a little coal, not too fine, without disturbing the grate or ashes. When the fresh coal is well ignited, shake the grate and add more.

A fresh fire or a large fire requires air over the fuel bed as well as through it. The damper in the door is for this purpose.

To check a fire, close the ash-pit door and open the check-draft in the smoke-pipe. Never check by leaving the firing door open.

There will be little good coal or coke in the ash from a carefully managed fire, but if there is much, recover it by sifting the ash.

Canadians keep their houses too dry. A pan of water on the stove or radiator, giving off a little moisture, will make for health and comfort at a considerably lower temperature than is agreeable in a dry room.

Unused portions of the house should be closed off.

Small charges of coal frequently applied are more economical than infrequent firing, but the fire-bed should be disturbed as little as possible by shaking and poking. Convenience usually determines periods of firing. Shaking and cleaning the grate twice a day is usually enough. Stop shaking as soon as it begins to be bright under the grate.

How to Prevent Epidemic of Colds.

A wheezing, sneezing, nose-blowing, sore-throated individual should be isolated. Colds are catching. Watch how they spread through a home, or an office, or schoolroom, or any place where people congregate.

Offering cures for colds is a popular philanthropy. We are all ready to pass on our prescription and preach its merits. But the very best time to cure a cold is before you get it. Hygiene is more efficacious than drugs. Careful eating, healthful sleeping—windows open rain or shine and a hot water bottle at the feet, if needed for warmth.

Wet feet conduces to colds. If you are anxious to get rid of a cough, or better still to outgrow the habit of catching cold, wear warm shoes, and keep the feet dry.

The campaign initiated by the Food Controller to increase consumption of frozen fish as a substitute for meat required overseas is meeting with much success.

Bedtime Stories

A Rain-drop Song.

Sing a song of rain drops,
Sliding down the pane.
Sing a song of winter,
Cloudy days and rain.

Sing a song of study time,
Things to read and write,
Sing a song of happy time,
Faces clean and bright.

Sing a song of teacher,
Smiling as she stands,
Sing a song of stories,
All of distant lands.

Sing a song of recess,
When we run and play,
Sing a song of gladness,
Make a happy day.

UNDERWOOD

The Agricultural Society held their annual box social in the Tp. Hall on Friday evening, Feb 22nd. The good roads and fine night brought out a large attendance, the proceeds amounting to over $150. Reeve Jas. Johnston was in the chair. The programme was a notably good one throughout. Misses Nellie McKay and Muriel Inkster sang a duet that pleased the audience. Recitations by Misses Lena McKay and Lena Wittig, also solos by Miss Kate McKenzie and Miss Mary Giles were much appreciated. Mr Arch McLean made a few remarks, and Mr J J Hunter of Kincardine spoke for a few minutes on the Fall Fairs and Exhibitions Association, and also on the need of greater production. Mr. Walter McKay sang a couple of solos. Orchestral music was furnished by Messrs. W Avis, W McKay, W Orford, Mr and Mrs Thos Brown. also male quartette selections by Messrs L Roppel, J B Richardson, W Thede and W A Cole. Auctioneer R C Pearce of Paisley sold off the boxes. After this dancing was indulged in for a couple of hours.

The January thaws that came in February brought more than a sufficiency of surface water, making the roads impassable at times, also getting into cellars and stables.

The high wind on the night of Monday week took off a few barn doors and caused much alarm.

The Agricultural Society has decided to hold a field competition this year if twenty entries can be secured. Oats has been chosen as the most general grain. Saugeen has been holding competitions now for some years, and it is felt that it would be to our interest to have one in Bruce. Seven prizes are offered, from $20 for the highest down to $4 for the lowest. It will be worth while taking pains with five acres of grain or an acre of roots. The first prize winners will have the chance of showing samples of their produce at the Provincial Winter Fair and the Canadian National Exhibition.

Mr Arthur Abbs is home from Neustadt for the remainder of the winter. Arthur has been in charge of the creamery down there.

Messrs Simon and Louis Roppel are preparing to move to the West this week.

Mr Albert Salmon was up from Clifford on Saturday.

Mr John Harstone, of Severn Bridge, arrived here on Tuesday to help his father, Mr Wm Harstone, in their store here for a few days.

PINKERTON

Mrs (Rev) W Richardson and son, of Arthur, are visiting at the home of her parents, Rev and Mrs Gale.

Mr Richard Garland is visiting friends in Toronto.

Pte Russell Birrell, of Toronto, spent a few days at his home here.

The sacrament of the Lord's Supper will be dispensed in the Presbyterian church on Sunday next. Preparatory services will be conducted on Friday afternoon.

The ladies of the Red Cross at their regular meeting on Thursday last packed and shipped the following: Soldiers' comforts—159 pair socks, 76 flannel top shirts; Red Cross supplies—18 suits pyjamas, 13 pillows, 7 pillow covers, 2 quilts, 1 package old linen, 1 scrap book.

ELORA ROAD NORTH

Mr H Rudolph shipped a carload of stock to Toronto last Saturday.

Mr Angus McDougall has been out in Bruce assisting his uncle, Mr John Thornburn.

Messrs Elves and McKinnon are threshing clover in this neighborhood.

Mr John McDougall has bought a team from Mr Jacques of Paisley.

Mr Wm. Winch spent a few days in Toronto.

It is reported that the McArthur ranch on Petticoat Lane has been sold to Mr Dougal McArthur of Port Elgin.

Mr Duncan McNeill has bought a house in town and is having it handed home.

TENTH CON. BRUCE

Up to time of writing March is a record for good weather. May it continue.

Mr Jas A Irwin lost a valuable young horse last week.

Mr and Mrs Wm Mountney, of Bethune, Sask, were visitors at Mr R J Caldwell's last week.

We are pleased to hear that Mr Allen Bell is able to be up and around again.

Mr G R Brown has disposed of his driver to Mr Russell, of Pinkerton.

Mr Hector McDonald, of Walkerton, was a visitor at Mr C McDonald's over Sunday.

EBENEZER

Mrs Geo Knight, of Mar, visited her brother, C A Thomas, for a week.

We are glad to report that Robt Kirkland is recovering, after having a couple of strokes recently.

Mrs Wm Grant is under the doctor's care, and is being attended by Nurse Johnston.

Mr and Mrs Robt Quigley visited Chesley and Sullivan friends for a few days.

The social at the rink last week was a fine success, about $45 being made. Half of this amount goes to the hockey team to help the boys with their expenses. Our boys have made the fine record this winter of not losing a game on their own ice and having given all these games free of charge, so they certainly deserve recognition for their hockey ability.

Paisley puck chasers were beaten at the social for the fourth time this winter. It was a very close, interesting game. At the end of the second period Paisley had a good lead, but in the last period the home team lived up to their reputation of being there with the punch, and came through with one goal to the good—total score 8 to 7.

The Hockey League finished up on Monday evening with one of the fastest games that was ever staged on this ice. After the 160th had defeated the Wanderers and were out on top, the Stars had the same opportunity if they could defeat the Vics, but they went down to defeat in a desperate overtime struggle by the score of 5 to 4. This ended a very exciting race in the League, the final standing being as follows:

	Won	Lost
160th	5	1
Stars	4	2
Vics	2	4
Wanderers	1	5

The names of champion players are as follows: Goal, Tracey Thomas; r defence, Eph Grant; l defence, Dave Young; centre, Steve Wallace; r wing, Geo Thomas; l wing, Deight Potts.

CASTORIA

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of *Chas. H. Fletcher*

GLAMIS

Mr McClung is visiting his son Rev. J. C. McClung.

Misses Lizzie and May Ferris left last week for a trip to the west.

Mr Clyde McKeeman spent a few days in London last week.

Mr Jack McLeod of the second is spending some time with friends in Niagara.

We are sorry to report the illness of Mr Wm. Gilchrist's second oldest boy. We hope to hear of his speedy recovery.

The box social held on Tuesday evening of last week was very well attended. A short programme was rendered, consisting of solos, recitations, violin music, also selections on the grafonola. After partaking of lunch, those who wished remained for the dance.

At our Red Cross meeting on Feb 1st we decided to have a knitting contest. Captains were chosen each side choosing six, who are all supposed to find knitters. The results were, the winning side 132 pr. of socks the others 99 pr. making 231 pr. Both sides were somewhat handicapped in not having sufficient yarn on hand.

On Feb 28 our Red Cross Society shipped 256 pairs of sox, 60 towels, 36 personal property bags, 1 doz. pyjama suits.

(Intended for last week)

Rev Mr McClung who has been laid aside with sickness for some time was able to take the services in the home church on Sunday.

The Misses McKinnon of the B line Kincardine called on friends in the village on Monday.

Mrs Will Shane of the tenth spent a few days with Mrs Nesbitt last week.

Mr Robert Jackson of Kincardine is visiting on the 2nd. He called on friends in the village on Monday.

About 30 of the young people of the Baptist church spent a social evening on Thursday at the home of the bride and groom, Mr and Mrs Arthur Groves.

Mr Jackson of Holland Centre returned on Saturday and will spend some time here with his daughter Mrs Nesbitt.

Mr Dan McArthur from Alberta who spent some time here with his mother left on Monday for the return trip. He will go by Chicago and visit his daughter.

A young son came to gladden the hearts of Mr and Mrs Amos Webb on Friday last.

GRESHAM

We are pleased to welcome Mr and Mrs Sturgeon back to this locality. Mr Sturgeon lately purchased Mr McKinnon's farm on the 6th con.

Charles Drummond of the 6th has purchased a Chevrolet car.

Those who left for the west from this vicinity are Mrs Bowie and daughters, Mabel Irwin and Isabel Young, Mr and Mrs Simon Roppel, Louis Roppel and Hugh Young.

Mr and Mrs Forsythe and son of Meyronne, Sask, visited at Mrs J. Young's and Mr Wm Young's last week.

Webb Kanke is down from the west visiting his parents. Mr. Kanke has done well in the west.

(Intended for last week)

Miss Victoria Rose of Paisley spent Sunday at the home of Mr Wm Rose here.

Mr Dan Sinclair has purchased one of Mr J Metcalfe's farms lately. We are sorry to report Mr Metcalf and family are leaving our community.

The many friends of Mr Tom Foster are pleased to see him home again. Tom looks fine after his interesting trip overseas.

Quite a number of Greshamites attended the box social in Underwood, all report a good time.

We are pleased to see Mr John Pace out and around again.

Contractor Jas. A McKinnon ploughed the Government road along here making a first class job, last week.

We are pleased to report that J. G McKay is doing as nicely as can be expected.

Children Cry
FOR FLETCHER'S
CASTORIA

SIXTH CON. BRUCE

Pte T. R. Foster, of the 160th who has been home for a short time, has gone to London, Ontario.

Mr. and Mrs. Milbourne, who was visiting at Mr. John Reptke's, has returned to the West.

Miss Jennie Russel is visiting at the home of her sister, Mrs Wm. Baptist, near Teeswater.

The Red Cross workers of S. S. No. 10 had a successful quilting bee last week.

Miss Alice Lamont is at present at Mr Geo. Snowdon's.

The infant daughter of Mr. and Mrs Frank Hyde was ill with pneumonia, but is recovering nicely.

Much damage was done by the wind storm on Monday night of last week. Mr Alex Ross's barn is badly damaged.

We welcome Mr. and Mrs. Sturgeon to our line.

Children Cry
FOR FLETCHER'S
CASTORIA

TURNER'S

Miss Daisy McIntosh, of Southampton, spent a few days with her friend, Miss Annie Cairns.

Miss R Pace, of 8th con Bruce, spent a few days with her sister, Mrs Robt Pollock.

Mrs R Fleming left last week for Toronto, where she will spend some time with her son, Jas B Fleming.

Archie Pollock has laid in a good supply of tile for his under drain, which he intends putting in this summer.

Geo Gibbons is moving to the farm he recently bought from A J Lamont.

MEN AND WOMEN TO EARN MORE MONEY

The most powerful single influence to greater production, and consequently to greater earning power, is the energy of the worker.

To work his or her best, the worker must be in possession of perfect health. So many who start the day's work with full vigor, tire as the day's work goes on and are forced to make frequent stops to relieve an aching back.

This backache is not due to the work, but to defective kidney action, and will disappear if treatment with Gin Pills is resorted to.

We have a number of testimonials on file from men who have had to give up work on account of backache, rheumatism, and the various ills that follow poor Kidney action. Gin Pills enabled these people to resume steady work again, with the vigor of youth and all the happiness of unfettered activity.

We will gladly send a free trial of Gin Pills to all who feel the need of this tested remedy, or we urge you to buy from your dealer on the strict understanding that your money will be returned by us if Gin Pills fail to benefit your particular case, accepting your word on this matter. Gin Pills are 50c. a box or 6 boxes for $2.50. Write for sample to National Drug & Chemical Co. of Canada, Limited, Toronto, or to the U.S. address, Na-Dru-Co Inc., 202 Main St., Buffalo, N.Y. 122

AUCTION SALE
— OF —
Farm Stock and Implements

The undersigned has received instructions from Mr. Geo. T. Davison, Lot 31, Con. 3rd, Greenock, to sell by public auction on the premises on

Tuesday, March 12

At 12 o'clock noon the following:

REGISTERED CLYDESDALE MARES—Lady Raven (imp) (3353) 7 yrs old, supposed to be in foal to Cumberland Glory; Molly Raven, foaled May 17, 1911, sire Lauriston Pride (11393) (imp); Maggie Milburn (3355), 7 yrs old. HORSES—1 horse rising 3 yrs, 1 filly rising 2 yrs by Matchless supposed to be in foal to Cumberland Glory, 2 geldings rising 2 yrs old by Royal Sam, 1 driving mare rising 6 yrs old. CATTLE—1 new 7 yrs old with calf at foot, 1 cow 7 yrs old due March 4, 1 cow 6 yrs old due April 15, 1 cow 6 yrs old due March 1, 1 cow 5 yrs old due April 15, 1 cow 4 yrs old due March 1, 1 cow 3 yrs old milking, 1 cow 3 yrs old milking. Three are all well bred Durham grades. 1 Holstein cow milking, 1 steer rising 2 yrs, 2 steers rising 2 yrs, 2 heifers rising 2 yrs, 1 calves. Over half of the above will be fresh or in milk by the 1st of May. Balance will be fresh in the fall. Also 11 pigs 3 months old. 1 brood sow due to farrow in April. POULTRY—50 Barred Rocks. IMPLEMENTS—1 Massey-Harris mower 6ft cut new, 1 12 hoe Noxon drill, 1 hay rake, 1 disc harrow, 1 set iron harrows, 1 3-horse spring tooth cultivator, Massey Harris, new, 1 Deering manure spreader new, 1 new duckfoot hay-rows, No 1 Leader plow, No 1 Wilkinson plow, hay rack, wagon box, set bobs, set sleighs, gravel box, land roller, road cart, single buggy, rubber tire buggy new, cutter new, Chatham fanning mill and bagger, about 2000 lbs roots, shovels, chains and other articles. HARNESS—Set heavy harness, set single harness, plow harness, set single harness, set single harness new. HAY AND GRAIN—About 200 bush oats, a quantity of hay. HOUSEHOLD EFFECTS—Melotte cream separator, washing machine, churn, sideboard, couch, stove, kitchen table.

Terms—All sums of $5 and under cash; on sums over that amount 12 months' credit will be given on furnishing approved joint notes, bearing 7 per cent. interest. Owing to the fact that the undersigned has sold his farm and is giving up farming.

R. C. PEARCE, Auct.

AUCTION SALE
— OF —
Farm Stock and Implements

The undersigned has received instructions from Mr. Robert Sturrock, Lot 31, Con. 3, Elderslie Tp., to offer for sale by public auction on his premises, on

Wednesday, March 13

At 12 o'Clock p.m. the following:

HORSES—1 heavy mare rising 6 yrs old in foal, 1 general purpose mare rising 4 yrs, 1 general purpose mare rising 3 yrs, 1 heavy colt rising 1 year, 1 road horse rising 6 yrs old. CATTLE—1 milch cow, freshened Nov 20th, due to calve Oct 15th, 1 milch cow, freshened Nov 25th, due to calve Oct 15th, 1 cow 5 yrs old due to calve April 15, 1 cow rising 4 yrs due to calve March 15, 1 cow due in April, 1 cow freshened May 15th, due to calve May 15th, 1 cow 4 yrs old due to calve in May, 4 heifers rising 2 yrs, 1 steer rising 2 years, 1 steer rising 1 year, 1 calf, 1 bull rising 2 years, 2 steers rising 1 yr old, 2 steers rising 1 yr old, 3 steer calves 3 months old. SWINE—1 brood sow 11 months old, 8 pigs 3 months old. IMPLEMENTS—1 Deering mower 5-ft cut, 1 Frost & Wood drill 12 hoes, 1 Massey rotating tooth cultivator nearly new, 1 steel land roller, 9-ft, nearly new, 1 Frost & Wood disc harrow, 12-inch cut, new, 1 set iron harrows, 2 walking plows, 1 Massey-Harris hay rake, 1 walking cultivator and hoe, 1 Bain-Smith rubber-tired buggy nearly new, 1 cutter, 1 set sleigh sleighs, 1 hay rack, 1 combined turnip slicer and pulper, 1 fanning mill, 1 set scales 1200 lbs, 1 set counter scales, 1 Melotte cream separator, 400 lbs, nearly new, 1 Favorite churn, forks, spades, shovels, and other articles too numerous to mention. HARNESS—Set team harness, set plow harness, 2 set single harness. HAY AND GRAIN—About 10 tons of hay in the barn and about 8 tons in stack, about 250 bush oats, 150 lbs alfalfa seed, about 20 lbs red clover, 1500 lbs coal chop. A large coal box, self feeder.

Terms—All sums of $10 and under, cash; on sums over that amount 10 months' credit will be given on furnishing approved joint notes bearing interest at 6 per cent. Seed, hay and grain to be cash. No reserve, as the proprietor has sold the farm and is giving up farming.

R. C. PEARCE, Auct.

Replace Your Buggy With a Ford

MORE than 100,000 Fords are owned by people in Canada in preference to the old horse-drawn buggy and other makes of cars.

Your neighbors, and farmers in every section of the Dominion are abandoning their old buggies—selling their driving horses and buying Fords.

Ford cars are utility cars. They are built to endure the strain of constant daily use over rough roads.

These are the tests every farmer gives his car. The Ford meets them in a satisfactory manner. It is the farmer's car, so why not replace *your* horse and buggy with a Ford?

Ford

Goods for the Men and Boys

at special value. See our Ready-to-wear Suits, Shoes, Rubbers, Hats, Caps, Shirts, Braces, Neckties and Gloves, all of which are new and up-to-date goods for our spring trade, and if you purpose taking a trip we can also fit you out with a Trunk, Suitcase or Club Bag.

Groceries

Our shelves are now well filled with fresh Groceries of all kinds. We have very special value in Tea. See our Uncolored Japan at 1 lb for $1 to. SUGAR—We can supply you with the Sugar you require from time to time, but owing to the present congested state of railroads and the importance of giving preference to all supplies for soldiers' overseas shipments, sugar to the trade is somewhat limited. We will, however, sell you Redpath's Sugar, 11 lbs. for $1, Cash, and as soon as transportation gets back to normal conditions after the severe winter, there will be lots of sugar, and it is almost sure to be as cheap as ever, cheaper than at present.

Bring us your Butter, Eggs, Potatoes, and all other Farm Produce, for which we always pay Highest Market Prices

Spring Millinery Openings

We invite the Ladies of Paisley and vicinity to visit our Millinery Show Room

Friday and Saturday, March 22 and 23

When MISS WILSON will have on display a beautiful selection of Spring Millinery for your inspection.

Wounded Soldiers Returned

Pte's Norman McLeod and Ross Woods, two veterans from France, who have been maimed by wounds so that they are incapacitated for further service, arrived home on Thursday last. Word having been received that they were coming, Reeve Steele called a meeting of the Preparedness League, and that organization arranged to meet the returned heroes at the station, which was done, quite a number of citizens turning out to join in the reception. Pte McLeod had his right arm shot off by shrapnel, also sustained wounds in the neck and side. There is sufficient stump left at the shoulder to attach an artificial limb, but he must undergo an operation before that can be done. Pte Woods suffered severe wounds in the left left leg, and his ankle is stiff. Both men feel the effects of their terrible experience upon their nervous system, but are in good heart, and glad to get back in Canada alive. It is proposed to have some form of public reception in their honor soon, but arrangements are not yet made.

The Late John Milne

After an illness of a few weeks, Mr John Milne, of Cambridge St., passed away on Thursday last, at the age of 81 years. The deceased was born at St Fergus, Aberdeenshire, Scotland. After coming to Canada he first lived for a while at Whitby, and ten years in Fullerton Tp before coming to Bruce Tp in 1884. He was a good farmer and stock raiser, quiet going but thorough, an honorable, kindly man, respected by all who knew him. Some years ago he retired from active work, and has since lived in Paisley. He was married to Ellen Moir, who survives him. They had no family, and the only near friend in this country is Mr Alex Wood, of Bruce, who lived with them as their adopted son. The funeral of deceased took place on Saturday afternoon to Stark Vale cemetery, the services being conducted by Rev Mr Little. The deceased was a Presbyterian in religion and a Liberal in politics.

A Record Auction Sale

At the sale held by Mr Geo Davison, both Greenock, on Tuesday, the bids accepted by auctioneer Pearce in three hours amounted to $5,600. This is probably the largest total of any farm sale ever held in the district.

Horse Market Livanine

The west still demands horses from Ontario. On Tuesday a carload was shipped from here by Mr. Geo. Craig, and two carloads by Irwin Bros., of Walkerton. We hear that some of the farmers who disposed of all their horses to the buyers are having difficulty in obtaining teams for their spring work. With the attractive prices for wheat the western farmers are apparently determined to produce as much as they can this year, and require extra horse power to carry on the work.

Patriotic League Report

The report of the Elora Road north Patriotic League for the year ending Feb., 1918, is as follows: Balance on hand from last year, $43.16; amount raised in year, including donations and collections, $221.29; grants from Saugeen Tp. council, $22.50; grants from Elderslie Tp. council, $30.65; grant from Bruce County council, $79.04; total receipts —$396.64; total expenditure—$317.38; cash on hand Feb. 28th, $79.26. Work shipped—302 pairs socks, 24 flannel shirts, 109 bars soap, 72 towels, 7 pillows, 12 pillow cases, 9 scarfs and numerous smaller articles. Margaret McArthur, Sec'y-treas.

International Harvester Co.

—Just a few words regarding our Ladies' Department. We have a large assortment of the very newest patterns in Ladies' Suitings and Coatings which we will make up at reasonable prices from any style you choose. We have the new styles and fashions for spring, which are up-to-date, or we will sell you the goods and you can get it made. Look our samples over before placing your order. I. S. Cruickshank.

How to Get More Eggs

GIVE your hens comfortable shelter with plenty of light. Keep dry, clean and well ventilated, but avoid draughts of cold air. Feed regularly a variety of good clean food. Table scraps, thickened with bran, boiled together, are also very good in winter, to which add a tablespoonful of Dr Hess' Poultry Panacea as directed. Give in a mash of corn meal, wheat bran and shorts, which should constitute the morning feed. In winter give warm. Small grain should be thrown among chaff, which will compel fowl to exercise.

Price of Panacea, 35c and 85c.

P. B. MORE, Druggist

PAISLEY

Lin Lee, Patriot

How He Provided For His Wife's Safety When Called on to Fight.

By George Munson.

Nobody ever suspected that there were two Chinamen in Lin Lee's laundry until we met Lin Loo. For the matter of that, nobody cared, or would have cared, if there had been half a dozen. Chinamen come and go and nobody takes any stock of them except the immigration officials, mainly because all Chinamen look alike, at first glance, to the untrained Caucasian eye. And the first glance is fatally in most cases, to be the last, also.

In that part of Virginia where Lin Lee had his temporary residence Chinamen are not common. The slight prejudice against them in the north and the considerable antagonism of the west do not exist. If they were not pig-tailed heathen they might pass among us whites as equals—and I come of the Ramsay family. To say that is quite enough in our part of the country.

Everybody liked Lin Lee. He had cut off his pigtail and he attended the Episcopal church. When he brought home the laundry he was generally asked to come into the parlor and have a glass of wine. Yes, it sounds odd, I know, but Lee was a very intelligent man, a member of the Chinese Reform association, and had studied law in Canton, he told us, before the Manchus drove him from the country on account of his participation in a seditious movement. Like all Chinamen, he had a natural genius for the washtub.

So Lin Lee became a resident of our village and, as I said, everybody thought he occupied his shanty alone. We thought so until the evening when, having brought home the laundry in its usual highly starched condition, and having received the red paper with its mysterious hieroglyphics which he always left as security, he turned round and whistled and another Chinaman came out of the darkness.

"My cousin, Lin Loo," he volunteered. "He washee well—as well as me. He take your laundry to-night."

"Where are you going, Lin?" asked my father.

Lin grinned "Me going to China," he said. "Me fight in grand army of the republic."

This sounded a little like blasphemy to my father, who was a Grand Army man, and fought under Grant, though it cost him his estates to do so and he was boycotted by the neighbors until an indefinite time in the seventies. However, all that is forgotten now, thank God. We understood that Lin

It Was Lin Lee.

Lee had felt the breath of patriotism stirring in the dry, sapless bones of his native land and wished to enroll himself under the Dragon-flag to fight against the tyrant, and, as patriotic Americans, we could not but approve his choice.

Lin Lee disappeared just as mysteriously as Lin Loo had come, but that made no difference. Lin Loo was just as capable a laundryman as Lin Lee. The ladies of our family, in fact, maintained that Lin Loo had a special genius for interpreting the laundry needs of their own garments and, as a result, Lin Loo was to be seen ironing until far into the night in his little store on Main street. It is strange, by the way, isn't it, that one always sees Chinamen ironing and never washing.

Lin Loo was also an Episcopalian, we found, and when he made his first visit to our church everyone sat up and gasped. He was attired in quite the extreme of fashion, in a silk hat and frockcoat and patent leather shoes. He carried a silver-head cane, too, and was very devotional in the responses. The rector took a great fancy to him and invited him to his home to discuss theology. Mrs. Stubbs, his wife, was equally attached to him.

Yes, it was odd what a general favorite Lin Loo became. Of course ladies are apt to take a fancy to Chinamen, especially when they are converted. People say that they only pretend to believe, for the sake of advantages. I don't know much about that, but anyhow, the ladies all liked him and, what is stranger, the men too. Lin Loo was astonishingly well posted in western ways. But he wouldn't drink and wouldn't swear. None of us thought the less of him on that account.

"Any news of your cousin, Loo?" we would ask as we stopped in to watch him bending over his iron and pressing with his scrawny arms. And Loo always looked up and smiled and shook his head.

Whether or not any news of the missing cousin filtered through to him, he always denied knowledge of his relative. Yet somehow he never seemed to doubt that Lee would return. And when a year had rolled by and Lin had become only a memory, he still maintained the same assurance. Imperturbable, suave, courteous, jolly, Lin Loo was a social asset in our town.

And then the missing cousin turned up just as unexpectedly as he had gone. One evening Lin Lee stepped into our parlor, his basket on his arm, as though he had only left us that afternoon, and received the red paper from my mother. Then he announced:

"Me going to leave to-morrow. No more wash. My cousin, Sam Hong, has bought my shop."

"And your other cousin—Lin Loo?" we asked.

"He go away," replied our visitor. "No see any more."

That was all. Sam Hong was a very "ornary" kind of Chinaman, with a thick pigtail, a surly expression, and an ugly cast in his eye. He was a rank heathen and was suspected of smoking opium in his little shack behind the store on Sunday afternoons. Our interest in the Celestial race rapidly evanesced.

It must have been nearly a year after our friends' departure that business called me to Richmond. I was strolling down one of the side streets when I caught sight of Lin Lee behind the glass window of a laundry, ironing as hard as ever. I walked in.

He greeted me with the same cheerful smile as ever. We shook hands and discussed old times.

"Why did you leave us so suddenly, Lin Lee?" I asked. "We all miss you in our town. What was the matter? Didn't we treat you well?"

"Sure—fine," answered Lin Lee with a broad grin. "I come to Richmond to open bigger place, more business. I get married."

Then I ventured upon a very bold experiment. I asked if he would present me to Mrs. Lin Lee. I knew it was not Chinese etiquette and I was not surprised when he told me that she was out.

But she wasn't out, because at that moment the door opened and a Chinese woman, with a little black-haired, squint-eyed baby in her arms, peered out. I knew her too. It was Mrs. Lin Lee—once Mr. Lin Loo. She nodded and smiled and shut the door in my face and I said good-bye quickly and went out.

Now I had no brief for or against Chinamen, but I will say I was offended at this horrible deception at the time. But afterward I began thinking; could he have been assured of his wife's safety, living alone in our town, the only Celestial within twenty miles? I think he could; I know he could. But I can imagine what dangers he may have feared for her—the young husband called back eight thousand miles to fight his country's battles, with all he loved dwelling alone among white-faced barbarians.

MAKE THIS EXPERIMENT NOW.

On a Sunny Day While the Snow Is Deep.

When there is snow on the ground it is easy by means of a simple experiment to demonstrate the extent to which materials of different colors absorb the rays of the sun.

Take several small squares of cloth of various tints. These might be black, red, light blue, white and yellow. When the sun is shining brightly place these bits of stuff on a level patch of snow where the rays can strike them.

Leave them in this position for a few hours, and then see what has happened.

Thus the black cloth will have gone down the farthest of all, so deeply, indeed, that it will be out of reach of the rays of the low winter sun. The red and yellow cloths will have sunk down also, but not nearly to the same extent. The light blue will have only gone a little way below the surface, while the white will be still on the top, quite unaffected by the sun's rays, having absorbed virtually no heat.

Conscripting Sharks.

There have been "sharks" in the boot trade ever since it was a trade, of course, but only since the war has it occurred to the ingenious to conscript the shark for making of footwear.

The scarcity of leather has led to numerous experiments with the skins of sharks and other large fish. These skins have been tanned quite successfully, and before very long we shall be covering our feet with this new material. It is said to be soft and pliable and durable, and, considering that Nature fitted the shark to live in the sea his skin should be watertight.

The supply of shark-skins is practically unlimited at present. From Alaska alone 11,000 pounds of skins were exported in one month.

The Duke of Portland's extensive British estates comprise 100,000 acres in Caithness, 17,000 in Ayrshire, 12,000 in Northumberland, 10,000 in Nottinghamshire, and 5,000 in the Midlands.

Gunns Shur-Gain Fertilizer

From Industrial Agent to Flight Commander

Interesting despatches of incidents in the lives of flying men in England are given in letters to friends written by Acting Flight Commander Graham Waters Curtis, formerly Industrial Agent of the Canadian Pacific Railway in Montreal, who is now a flying instructor in England. The school in which he teaches is a vast expanse of country close to a beautiful seaside

Acting Flight Commander G. W. Curtis and his machine just after a "crash" at a training camp in England.

resort. He writes: "The view from the air is superb, and we often fly out over the sea, and dive down near the British warships and wave to the sailors. When diving we only travel at the rate of about 175 miles an hour! I am kept very busy instructing and am turning out a lot of expert pilots. The school I am connected with is one in which flyers finish their course of training. A lot of chaps from Borden come to us to get final lessons, and then they are sent to France. We do all kinds of fancy performances—loop the loop, roll, make spinning nose dives, side slips, and vertical turns."

He describes how "little excitements" happen when one aeronaut gets into the "wash, or slip-stream of air" made by a preceding navigator. The letters indicate that Acting Flight Commander Curtis is a lucky master of the high school in which he soars. He says: "We have a lot of smashes, but very few deaths, considering everything. None of my pupils has been killed yet."

Acting Flight Commander Curtis has lately been recommended by his commanding officer for a first lieutenancy, and expects to be sent to France at any time. He joined the Royal Flying Corps on November 15th, 1916.

About the House

Correct Diet as Health Insurance.

Isn't it queer that when so much that is vital in life depends upon food and correct feeding, so few of us understand a thing about balanced ration, or pay any attention to feeding the human family sanely. We are told that food will play a big part in winning the war, yet we go about conserving with only a hazy idea of what we can best use as foods if we wish to conserve our strength, and development, as well as conserve wheat for the allies.

Yet the whole thing is so simple that "even the way-faring man, though a fool, need not err therein." We eat to promote growth and to give us strength, or, as the experts say, to give us heat or energy. There are three classes of food and everything we eat may be placed in one of these three. They are the proteins, or the foods which promote growth, and the carbohydrates and fats, which give us heat and energy. The proteins consist of lean meat, eggs, milk, and the legumes. At least these are the important proteids, though many cereals contains proteins, and the proteins contain others of the food elements. For instance, milk contains fat in the shape of cream, and wheat contains a proteid—the gluten which makes wheat bread elastic. The carbohydrates are the starches and sugars, and the fats we all know.

It will be seen at once that children must have plenty or proteids if they are to keep up a normal growth, while adults who have attained their full development may get along with just the amount of proteids necessary to replace wornout cells, that is, to build the body up daily as it is burned out with work.

Here is where our danger will come in during these days when we are asked to save food. We will be tempted to economize on the milk and eggs given our children, a thing we have no right to do. The children must be properly nourished or their health will be impaired for life. Those of mature growth may get along on skimped rations with only temporary inconvenience, provided the food shortage does not last too long. But children must be fed.

Up until seven months the baby should be fed nothing but milk. Mother's milk preferably. Failing that, consult the best doctor you can secure as to the right way to modify cow's milk. Don't give your baby a prepared baby food because some one else gave it to her child and it "got along." And don't give condensed milk except as a last resort and on a physician's order. It is too sweet for a perfect food.

At seven months the salivary glands are able to do their part in digesting starch. Begin with a wheat breakfast food, or rice. Either is more apt to be digested by the average child than is oat meal. Feed only a teaspoonful the first day, and note the effect. If the cereal you choose is not digested, causes distress, choose another. Remember each child is a law unto itself and you must decide what yours can best digest. If there is a tendency to constipation oat meal is good as a corrective. If the tendency is the other way, rice is a good food.

After a few days' trial, if the starchy food is properly digested, try to introduce egg into the dietary. Half a coddled egg, or soft boiled, is enough to begin with. Give this in the morning, and if it is properly digested, add a little more at each feeding until the baby can eat the whole egg. Crackers and hard toast, not toast soaked in hot water or milk, may be given. Watch the child to see that it does not nibble off pieces large enough to choke on. Orange juice, a tablespoonful to begin with, and scraped apple should be given each day. Home-made sugar cookies may also be given occasionally in moderation.

Remember, these foods should not all be introduced at once. Never give more than one new thing on any one day, and wait for at least twenty-four hours to see its effect, forty-eight hours is better. Otherwise you can not tell which food upset the child.

Remember, that your child's future depends to a large extent on how you feed it, for health plays a large part in our ultimate success or failure. An eight-year-old boy in our block developed tuberculosis of the hip bone. He had practically nothing to eat until he was two years old except condensed milk in a bottle. His mother would not cook him cereals, it took too much time to sit down and feed him. Fresh eggs were too expensive. He used to throw the bottle away and lie on the floor and cry with hunger, but the mother declared he could take the milk or go hungry. She had too much to do to bother with "a kid."

When tuberculosis developed the mother blamed a fall at school. Other mothers, whose boys had worse falls with no ill effects, blamed wrong feeding. And they were right.

What Waste Costs.

The waste of 500,000 pounds of paper a week, Canadian authorities estimated, entailed the cutting of at least 2,000 trees a week. Every ton of old paper recovered means a saving of eight trees of mature growth, says the Christian Science Monitor. The saving of woollen rags for the manufacture of shoddy saves land for crops which otherwise would be required for the raising of sheep; men, money and material—capital and labor—are conserved every time a bit of material is re-employed which formerly was destroyed.

Delicious winter shortcake is made with canned strawberries.

Uses of Brown Sugar.

Brown sugar is cheaper than white sugar. It has many uses. Use it for sweetening tea, coffee and porridge. Make a syrup of it with water and see how delicious it makes those griddle cakes taste. Sprinkle it over baked squash. Scoop out the apple cores and stuff the space with brown sugar and a bit of butter.

When you put a porridge saucepan to soak always fill it with water.

AutoStrop SAFETY RAZOR

It's a money-saver— this book we send you free

It's no exaggeration to call this book—

"What the Farmer can do with Concrete"—

a money-saver. It makes money by saving money—for every farmer who reads it and who acts on the advice and instructions it contains. How does it save money? Simply by telling how to build farm improvement of Concrete.

The farmer nowadays realizes that he is under a terrible handicap in his efforts to make money, if he has to be constantly sinking profits in repairs. Only by using Concrete can he have buildings that do not call for repairs and painting. Only with Concrete for his building material can he have his farm fireproof, waterproof, watertight, repair proof, vermin proof and sanitary.

In our 100-page book, there are directions which enable the farmer to construct all sorts of improvements of Concrete, in odd times—with the help of his man. Send for this remarkably useful, money-saving book. Mark on the coupon the subjects which are of immediate interest to you.

By building Roads of Concrete we can reduce the cost of living, and at the same time increase the farmer's profits on everything he sells or buys.

The welfare of the farm demands Permanent Highways of Concrete. Concrete is the best for the hauling of garden truck, fruits and dairy products into town. On Concrete roads this hauling be done economically. It provides the only surface that resists the wear and tear of modern traffic. Concrete, in fact, is necessary to successful road building as it is for successful farm construction. Concrete roads, like Concrete buildings, pay for themselves in the saving of repairs.

Simply mail us this coupon with a cross (X) opposite the information you want.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. A stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

Growing Beans and Parsnips.

Nothing is to be gained by planting the bush beans outdoors too early, as they are very tender and one light frost may either kill or retard them more than a week or more's later planting. Of course, if you are equipped to cover or otherwise protect them and are sure to attend to it, you can get an earlier crop by taking some risk. But, in any case, it will not be wise to plant until the ground is warm and the weather somewhat settled, as beans planted in cold or soggy soil are likely to rot in the ground.

The Various Varieties

Beans naturally divide themselves in the following classes: The dwarf green and yellowpodded, the dwarf shell beans, which are matured, and beans shelled out for winter use; the tall, or pole, green and yellow podded, and the tall shell beans for winter. Few persons grow any of the shell beans in small home gardens, and we will not further consider them here.

For beans the soil should be rich and mellow. To get them tender at picking time they should have quick and continuous growth, and this is best assured when they are planted in a warm, rich, porous soil, well-drained and given plenty of water. Well-rotted manure, dug into the trench, is best; and the soil should be made fine with the shovel when digging and finished with the rake.

Beans are planted in two general ways: In hills and in furrows or drills. Cleaner cultivation can be given by the hill system, but more can be grown in the same space of garden by the drill plan.

By the hill system you can hoe all around them, but when planted in drills, if you have many weeds, it will require hand-weeding along the rows where the hoe cannot reach.

As some beans, for different reasons, do not germinate, it will pay to plant them rather thickly, and thin out in the drills to four inches apart. Make the drills as far apart as may be convenient. If to be worked entirely with the hoe, eighteen inches apart will do; if to be worked with the wheel cultivator, make them two feet apart between the drills.

When using the hill system of planting, drop four to six beans to a hill, making the hills a foot apart. When fully up, thin out to three or four to a hill.

Beans require frequent cultivation, always drawing the soil up around the plants. If the wheel cultivator is used it will be well to go over them with the hoe to get the soil well up to the plants. Work them when the crust forms after rains, and at all times when necessary to keep down the weeds.

Parsnip a Valuable Food

As a solid dinner vegetable the parsnip is welcomed on the tables of the rich and poor alike. Boiled with meat it makes a whole meal, and it is just as much relished when cooked in any of the many ways in which it can be served.

It is the sugar content which makes the parsnip so valuable as a food. It is heavy with sugar, and it is to get into it so much of this valuable quality that we give it the very best soil and cultivation.

A great deal of the value of the parsnip also lies in its good keeping qualities. It may be taken up in the fall and stored in pits, or cool cellars in sand, or it can be allowed to remain in the open ground over winter, which will improve its flavor and make a good vegetable for use in the early spring when such are scarce.

As they are an all-season vegetable, they can be planted eighteen inches apart, and the space between interspersed with radishes, lettuce and other smaller vegetables.

Best results will be obtained by digging into the soil as much well-rotted manure as it will take, using it in the trench in preference to spreading it on top. As is the case with all large-growing root crops, the soil should be made porous and mellow, so that the roots can grow and expand easily.

Parsnip seed is of rather easy germination, on which account it should not be covered more than a half inch with fine soil. A gentle wetting down of the drills will pack the soil and the seeds together sufficiently that compacting with the foot will not be necessary.

Requires Much Water

When the young plants are two inches high they should be thinned out to three inches apart.

Early small-growing parsnips which are pulled out for bunching can be left stand at three inches apart, but if you plant the long winter varieties, they should be thinned out to six inches apart, as their foliage is very heavy and will crowd even at that distance. The largest varieties had better be thinned out to eight inches.

Parsnips, like all root crops containing large quantities of sugar, require a great amount of water, and it should be given them regularly; but be sure that the ground they are growing in is well drained so that it does not get boggy.

The Dairy

There can be no successful dairying which does not rest upon an appreciation of the fact that a cow is first of all a mother. A cow's ability to bring forth strong and vigorous offspring and to provide abundantly for the nourishment of such is the corner stone of the dairy business.

There are those who call the cow a machine, who figure painstakingly the amount of foodstuffs she should have to produce her utmost, and who go about their business upon the basis that, as in the case of other machines, production is simply a matter of how much raw material can be turned in a given time into finished product.

It is, of course, unjust to the cow to call her a machine. Machines do not possess nerves, whereas a cow has an intricate system of them. And the relation between this system and the milk pail is so intimate that any condition which affects the cow's nervous system reacts at once upon the milk-producing system. An undue disturbance of normal, tranquil conditions diverts the blood supply from the milk glands and the cow either "holds up her milk" or gives a lessened quantity. It is not without reason that Swiss peasants sing or yodel softly to their cows at milking time.

If calves are weaned they should be fed whole milk until they are one month old, when they should be changed to skim milk. They should be fed skim milk until they are six months old. While they are on milk they should be given some grain and alfalfa hay.

A good mixture for grain feed is four parts of corn chop, one part of oil meal, and two parts of wheat bran. After taking the calf off the milk, increase the grain gradually to two pounds a day in addition to silage and alfalfa hay.

The heifers should be bred so as to calve when from twenty-four to thirty months of age, depending upon the breed and growth of the animal. If bred so as to calve earlier than this, their growth is apt to be injured.

It is estimated by The Bulletin that 500 tractors will be at work in the Edmonton district next spring.

Donald Smith of Red Deer received for some fine beef cows what is reported to be the highest price ever paid for this class of beef in Western Canada $9.45 per hundred.

Bacon contains about 7 per cent. bone, dressed beef 20, mutton 20 and veal 25. That is one reason why bacon is so much desired for shipment to Europe under present conditions of shipping.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not it will be answered personally, if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnoses. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Blood Pressure.

Blood pressure is an important subject, insurance companies lay stress upon it and doctors who keep abreast of the progress of the times find it necessary to be skillful in determining it.

It means the degree of force which the blood current in the arteries exerts against their wall under the influence of the contractile force of the heart muscle.

It is measured by the height of a column of mercury in a capillary tube.

It should be remembered that the heart is a pump and the arteries a series of elastic tubes proceeding from a great trunk vessel attached to the heart, and dividing and sub-dividing until every portion of the body has been traversed by them.

Any artery can be used to determine the blood pressure, if the system is in good working order, but one of moderate size is more convenient than one which is very large or very small.

It is also desirable to choose an artery near the surface, which can easily be got at.

The arteries of the body are subject to disease like any other tissue or organ and such disease is often an important symptom of disease elsewhere.

Changes in the structure of the arteries may take place at any time, but there are certain changes which ordinarily occur in them after middle life and in old age which are characteristic, so that we are accustomed to say that a person is as old as his arteries.

Hardening or arterio-sclerosis is a change which occurs naturally in the arteries during old age.

This means that the connective tissue which holds together the cells composing the arterial wall, is increased, making them more or less rigid and inelastic instead of resilient as they are in early life.

Sometimes during old age the arteries absorb salts of lime from the blood, and may become brittle like pipe-stems, and they are apt to snap if subjected to unusual strain or pressure.

They may also be softened by a process which is known as atheroma and this also makes them very susceptible to rupture or breaking.

If rupture should occur in arteries like those of the brain we have the condition known as apoplexy which is almost always serious and very frequently fatal.

All this shows the necessity of keeping track of the arteries for when they become unusually hard or unusually soft the condition becomes one which is dangerous.

It is therefore easy to see how desirable it is to determine the blood-pressure from time to time and find out the condition of the arterial wall.

One form of instrument measures this pressure, as I have already stated, by the height to which a column of mercury is raised in a capillary tube and another by the registry of an indicator upon a circular dial plate as the result of pressure upon a spring, but these springs vary in their resisting power and the column of mercury is therefore more accurate and reliable.

A certain number on the scale of the instrument indicates the blood pressure as the ventricle of the heart contracts and sends out the column of blood into the arteries.

This is the maximum and is obtained when the pressure of the dilated rubber bag, which is a part of the instrument, over the artery at the elbow which is chosen for the measurement, obliterates the flow of the blood current within it.

The minimum is indicated on the register when the pressure of the rubber bag is released and the current again flows within it as indicated by the return of the pulse at the wrist.

The differential between the maximum and the minimum is known as the pulse pressure.

QUESTIONS AND ANSWERS.

O. A. L.:—Kindly tell me whether the use of sodium phosphates, calcium chloride, and compound syrup of the phosphates, will lead to kidney disease—particularly to stone in the kidney.

Answer—I do not think that the disease you refer to can result from the use of the medicines you mention; but do you think it desirable to take such a quantity of medicines? Of course I do not know whether you are taking it under the advice of a physician, or not; but if you were under my care, I should not think it advisable to dose you with so many medicines.

MOTHER-WISDOM

Some of the Reasons Why Our Children Ought to Play

By Helen Johnson Keyes

Have you ever noticed how hard at work children seem to be when they are playing? They do not act in the way men and women do who are being amused at a concert or a social.

The play of children and the recreation of grown-ups are absolutely different the one from the other. They are not entered into from the same motives or followed in the same spirit. A grown-up seeks a good time for the sake of recovering from the fatigue of work and of forgetting worries; a child is not conscious of any motives, for his play is instinctive but the purpose of nature in making him play is to educate him.

This difference is so important and fundamental that every mother ought to realize it and have it constantly in mind. A child educates himself through his play. A man named Groos, who has studied this matter very deeply, believes that one reason why the period of childhood is so much longer in human beings than it is in animals—who attain almost at once about as much intelligence as they ever have—is in order that they shall have a long educational course of play to prepare them for the very great difficulties of adult human life.

We parents must realize, then, that if we do not give our youngsters opportunities to play, we are making cripples of them, sending them out into manhood and womanhood lame, blind and deaf as it were, unable to see life and people as they truly are or to understand the demands which the world makes upon us.

What are some of the lessons, valuable in after life, which play teaches to children?

(1) Justice. When tots begin to play together each one seeks to grab for himself the most attractive toys. Gradually, however, the necessity of sharing is impressed upon the little brains. By and by the age of games comes and then this lesson is repeated. Finally, these great sports, baseball, football, basketball, are entered into which teach, with a power which no sermon can ever attain, the lesson of fair play and co-operative action. What an example there is in the incident of the tennis player who had an opportunity to win the national championship by a fluke his opponent made but who, instead, intentionally made the same fluke himself on the next ball so as to win—if win he could—by his own skill and not on his opponent's misfortune. Would you not trust that man's fair play in any business deal? No very young boy, I think, would be equal to such a sacrifice but through play—and only thus—he will acquire that desire to give every man his due and if winning fairly and squarely in all the relations of life or not at all.

(2) The Power to Decide Wisely and Act Quickly. Did you ever see play that was slow, hesitating, undecided? Not often, I think, for play is born of thoughts that are winged and which transform themselves instantly into acts. From the infantile game of tuss in the corner right through high-school sports a good judgment put into swift execution is what wins. Is it not so in life, also?

(3) The Power to Count Consequences. Probably too often for the moral growth of our children, do we mothers protect them from the results of their deeds. Often it is even necessary to their survival or health that we should. But in play they must meet squarely the consequences of what they do. The lesson is sometimes painful, sometimes joyful but it is always plain and undisguised: "You did that, therefore you get this." Must not the realization of this truth educate young people away from those happy-go-lucky, careless deeds, violations of natural and moral laws, which usually bring with them a trail of ill health, failure and misery?

(4) Courage. Very young children whimper over the bumps they get in play, quarrel over their bad luck in games and brag of their successes. By the time the fourth or fifth grade is reached, however, no more of that cowardly or boastful manner is tolerated. The youngsters have learned, through playing, to take the bumps and blows in silence and to abide by the laws of the game and the decisions of the umpire.

They began in the days of their little childhood as screechers but play has made them honorable sportsmen. Did you ever see success come to a grown-up screecher? I never have. The spirit which wins in life is the spirit of sportsmanship—courage to get hurt, if necessary, for a good cause, to lose cheerfully—and to win without bragging. The child who does not play may learn this lesson too late to take his place honorably when he plays in the great game of life.

The country offers every opportunity for play and sport but farming is a difficult and anxious business and too often those who are engaged in it, laboring ceaselessly for those immediate results on which their living depends, forget the educational value of free play and team sports to children, giving them longer and harder labor than their ages justify. The result is that these Jacks and Jills, although they may be very capable machines, are a little slow to understand the larger and more complicated demands which life makes upon us all, these moral and social demands, I mean, which are becoming more and more exacting as community life advances to greater and greater perfection on our farms. Play will teach teamwork—the great principle of our new rural life.

Horse Sense

The feed a colt gets the first eighteen months, and especially the first winter, determines to a great extent the size of the colt at maturity. The size of a horse determines its value very largely. Good breeding gives wonderful possibilities, but it takes feeding if these possibilities are to be fully realized. The best-bred colt will be no better than a scrub if it is fed upon a starvation ration.

A draft colt makes one half of its development by the time it is one year old, hence the importance of a good start. The colt should be taught to eat grain before it is weaned, and after being weaned should be allowed a liberal ration of alfalfa or clover hay with other available roughage, such as corn fodder, kafir butts, cane hay, and straw. The colt should be fed sufficient grain to keep it in good growing and thrifty condition.

If the colt is fed properly, one should never be able to see its ribs. A ration of from six to eight pounds a day should be fed for each 1,000 pounds of live weight. Oats is an excellent feed, but at the present price is so high it is not practical. A good substitute is corn 70 per cent., bran 20 per cent., and oil meal 5 per cent. by weight. Colts should have access to a pasture or a large lot so as to have plenty of exercise.

A collar should be fitted to the horse, and not the horse to the collar. The collar that is too large should not be used on a horse in the hope that he will grow large enough so it will eventually fit. A collar that fits well in the spring may not fit at all in the fall.

When one is fitting a horse with a collar, the animal should be standing in a natural position on level ground, with his head held at the height maintained while at work. The collar, when buckled, should fit snugly to the side of the neck, and its face should follow closely and be in even contact with the surface of the shoulders from the top of the withers to the region of his throat. At the throat there should be enough room for a man's hand to be inserted inside the collar.

The style of horse collars are created mostly by the use of different kinds of materials in their construction. Such materials as heavy duck, ticking, and leather are used either alone or in various combinations. All-metal collars may also be bought, but are not so much used.

The stuffing used in horse collars is coarse material, such as rye straw, curled hair, and cotton fibre.

Poultry

Keep the birds with rather large, plump combs and wattles.

Hens with pale vents, pale beaks and pale legs have been good layers.

Keep the late molters.

Keep the pullets that mature quickly and start laying first. Those that start when less than 200 days old, or nearest that age, are the best layers if they have had the right care.

Market those that have been slow to feather or seem to lack vitality.

The skin of the best layers should be rather loose and flabby on the abdomen between the vent and the breastbone.

The pelvic bones must be thin, straight, flexible and wide apart.

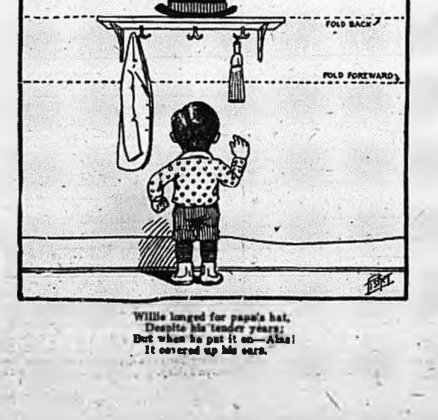
Market the hens that are lagging behind and that have a heavy, fat and thick abdomen that hangs below the point of the breast-bone.

Keep the busilers and heavy eaters that go to bed late and with full crops.

Birds that have long toe-nails, and show no signs of being workers, are usually unprofitable.

A Road in Flanders.

There is a road in Flanders
That runs a quiet way.
And few there were that found it;
And yet, at dusk of day,
There were some feet that sought it,
And loved its dust and loam,
The feel of it beneath them:
Men glad of going home.



A little road and quiet,
Not built for great affairs—
The sort of road for children,
All sweet with evening airs.
So many now have found it
That knew so few before,
But never the feet of home glad men
Or children any more.

—David Morton.

Cunns Shur Gain Fertilizer

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Willie longed for papa's hat,
Despite his tender years;
But when he put it on—Alas!
It covered up his ears.

Hogs

More pigs are ruined at weaning time than at any other stage of their existence. They should have access to corn and other grain when they are with their mother, so that they will know how to eat and will not miss the milk.

Skim milk or buttermilk is desirable feed for pigs at weaning time. The milk should be fed in the same condition at all times—either sweet or sour—otherwise the digestive system will be impaired.

Usually the pigs are large and thrifty enough to wean at the age of six to eight weeks. They should have access to green forage, such as alfalfa, rape, clover, or sorghum, at all times. The feeding trough should always be kept clean.

Care should be taken that the pigs are not overfed. Overfeeding causes feverish conditions and will stunt the growth of the pigs.

Machinery for Bean-Raising.

Beans may be expected to do well on any well-drained soil, but they seem to prefer a sandy or gravelly loam of fair fertility. Too rich a soil will favor the growth of too much vine and the beans will not ripen uniformly. The seed is usually planted with a grain drill, but when the crop is to be grown in hills it is best to use a corn planter equipped with a bean plate.

A shovel cultivator is needed for the three or four cultivations the crop requires. For harvesting there are several kinds of machinery, of which a special bean harvester is best, though a mower equipped with a bunching attachment may also be used. The only satisfactory method of threshing bean crops of considerable size is a bean thresher, which may also be used for peas. They are made in various sizes some of which may be operated with two men and a small gas engine. Such a thresher will thresh from about eight to twelve bushels of beans an hour, depending on the amount of vines.

"The blue of Heaven is larger than the cloud."—Elizabeth Barrett Browning.

Making a Hard Job Easy.

There are many ways of using your tractor, but none which gives more pleasing results than hitching it to the manure-spreader. This is a hard job for the best of farm teams, for doing the work right means not only hauling the load but operating the mechanical part of the machine as well. The "spread" is much more even when a tractor is used, as there is then sufficient power to operate the machine at the proper speed to insure best results. An even coat of fine manure on the fi[illegible] means a wonderful increased p[illegible]uctive power per acre.

It is advisable to build a shed in which to store the manure until enough has been collected to pay for "hitching up" the tractor. This outfit can do more work in a day than three teams, do it better and at less cost. Just take those other two days off and enjoy life by the fire reading some good books and papers. Thus the tractor makes farm life easier and more attractive, besides saving help at a time when helpers are scarce and getting scarcer. The farmer of today who has a tractor has taken the most important step toward solving the labor problem.—Earle W. Gage.

Making Maple Sugar.

The appeal of the Food Controller to produce large quantities of maple sugar and syrup this spring should receive a ready response from those who have groves of maple trees. While maple sugar can be made as it was in the early days of settlement, with very simple apparatus, the work is greatly reduced and better products made when a modern equipment is utilized. For the instruction of those not entirely familiar with advanced methods, the Publications Branch of the Department of Agriculture at Ottawa has issued Bulletin No. 2-B entitled "The Maple Sugar Industry in Canada." By text and illustration it makes very clear the operation of a maple sugar plant. The time to tap, the utensils to use, the refining and handling of the product are all dealt with. This bulletin is available for distribution to those who apply for it.

Like produces like, and to get good crops without planting good seed is next to impossible.

In these days, when pure-bred males are plentiful and reasonable in price, there is practically no excuse for using anything but a pure-bred boar, even though the sows be merely grades.

ONTARIO FERTILIZERS, LIMITED
WEST TORONTO • CANADA

The Paisley Advocate

PAISLEY, MARCH 13th, 1918

—The Ottawa Government has passed an order giving us bone-dry prohibition after April 1st, to remain in force until one year after the war ends.

—If the Huns can hold on to their territorial war prizes all the Kaiser's seven sons may be provided with kingdoms and crowns. Here's a question: Which one would be king of Canada should they get us? Judging by what the Johnny Canucks have been doing to them at the front, we would say that it might take the whole dinged family to operate a Hun monarchy in this country.

—Let us learn to tip our hats as politely to the young lady who sews for a living or earns it by any honest toil as to the one who teaches French or chews gum in seven different languages. Let us give a warm clasp to the hand of the tiller of the soil, the fireman or brakeman as we do to the lawyer or doctor. Let us recognize honesty and industry wherever found, and the time will soon come when there will be an army of bright, intelligent, honest young men and women at the bottom of the ladder, ready to labor at any honorable calling. Let us remember that the most beautiful lives have blossomed in the darkest places, as pure, white lilies full of fragrance in the slimy, stagnant waters. Wealth, birth and official station may and do secure to their possessors an extreme, superficial courtesy; but they never did nor never can command the reverence of heart. The most beautiful flowers are hidden in some shady nook; so the most beautiful lives are often found in an humble home at the foot of the ladder.

—The weather looks less wintry for days at a time, and spring may be here in a hurry, bringing with it to everyone the responsibility of doing their bit in the production campaign. The Germans have in the last few weeks taken by conquest larger areas of fertile lands than is comprised in their empire, and thus provided greatly needed additional sources of food supplies for the future, although perhaps not for immediate needs. Russia is ont of the actual fighting making the Allies' task a heavier one, demanding the last available man power for war purposes and making it more imperative that food be produced in greater quantities in Canada and the United States. While our soldier boys are facing all the dangers and discomforts at the fighting front, there should not be a man, woman, or child taking life easy at home. A person of leisure in Canada should be counted a slacker of the worst sort, for there is work of some kind for everyone to do.

—It is proposed that the Government lend returned soldiers as much as $2500 capital with which to start farming in new districts. If those who desire to go farming are to be assisted to this extent, why should not those who have no inclination to farm be rewarded to the same extent. A loan of $2500 would enable a man to set himself up in any small business or acquire an education that would equip him for professional life. Men who have fought for the defence of their country should not be compelled to follow a certain occupation for the balance of their days unless they choose to do so. They should be free to, go into any line of work or business that is commendable, and given the same degree of assistance as those who go on the land. In connection with the placing of soldiers on farms, the Port Elgin Times makes a good suggestion, that it would be better for the government to look over some of the lands now lying idle in Ontario. Why send the soldiers "way back" without railroads and other conveniences?

Gala Night at the Rink

The one and only masquerade carnival of the Paisley skating rink was that put on last Friday night under the auspices of the Continuation School Literary Society for patriotic purposes. The event was a notable success in every way —suspicious weather, excellent ice, about a hundred skaters in costume, and the galleries filled with spectators. There was keen competition in every prize event, with the winners as follows: Ladies' or girls' fancy costume, Miss Della Rudolph, as "Poppy;" gents' or boys' fancy, Jolly Shoemaker, as "Napoleon;" ladies' or gents' comic, John Brown and Ross McKenzie as Mutt and Jeff; boys' comic (under 16 years), Willie Miller, as clown; national or emblematic of country, Lella Barns, as Ireland; best character from "As you like it," Fred Shoemaker, as Touchstone; musical keg race, Willie McLennan; couple race, Meryl Bell and Alex Shoemaker; novelty race, George Grant and Abbie Stanley. The grand march was a pretty sight, the bright costumes of the skaters making a kaleadescopic mingling as they glided gracefully through various evolutions from one end of the rink to the other. The evening's programme was opened with a hockey match between Rhenears and Paisley, in which the latter did the scoring, with their opponents putting up a vigorous but ineffective fight for a share of the net vanishing honors. Proceeds amounted to over $107.

SOLDIERS OVERWHELMINGLY FOR McNAB

The counting of the soldiers' vote, which has been concluded, shows that the boys in khaki balloted overwhelmingly for Mr. A. E. McNab, the Unionist candidate in South Bruce. The khaki vote from the Canadian military camps of North America and the European battlefronts gave McNab a majority of 198, while the soldier vote from the 160th (Bruce) Battalion and other units in Great Britain, which was received by wire here last Friday, gave McNab 419 and Truax 8, or a majority of 411 for McNab. Deducting the total majority of 609 which Alex. got from the soldiers from Mr. Truax's previous margin of 781, leaves the latter elected by only 172. Had the Union Government not thrown out 8,000 unattached soldiers' votes, it is possible that Alex. would have overcome the above small lead of Mr. Truax and have swung South Bruce to the Union column. However, as the Unionists have now 73 majority in the House, the largest ever accorded a Government in Canada, the loss of Alex.'s vote in the Commons can hardly be fatal to the Allied cause.—Herald and Times.

Munro—McIntyre

The marriage took place at the home of the bride's mother in Regina on Wednesday, February 6th, of Miss Annie I McIntyre, and Mr Edwin A Munro. Rev H D Leitch officiated. The bride entered the parlor on the arm of her brother, Mr John A McIntyre, to the strains of Lohengrin's bridal march played by Miss Jessie Struthers. The bride's gown was of silk crepe de chene and she carried a bouquet of bridal roses and lily of the valley. During the signing of the register Miss Retta McIntyre, sister of the bride, sang "Because." The groom's gift to the bride was a Victory Bond. A dainty buffet luncheon was served, after which the bride and groom left on the Grand Trunk Pacific for Winnipeg. On their return they will take up their residence at 1661 Athol St, Regina. The bride is a daughter of the late Donald McIntyre and Mrs McIntyre, formerly of Lockerby, and has many friends in this vicinity who will wish her a long and happy married life.

Port Elgin Loses a Best Citizen

Geo R Falconer, whose lamented death took place on Thursday morning last, was a man of singular worth to the lakeside town, where he was born and spent the forty-four years of his life. He was a loyal and energetic citizen, devoted to the promotion of all local projects and interested in the welfare of every fellow resident; an intelligent, progressive business man who became best known through his enterprising and successful establishment of the Port Elgin Fruit Growers' large fruit and vegetable growing plantation, by which he did much to demonstrate the natural advantages of the lake shore section. His efforts promised to bring Port Elgin forward as a fruit centre. While financial success was essential to his plans, the making of money was not his only interest, at all, but what he could do in developing the productive qualities of the genial soil upon which he lived. He was a conspicuous example of the man who is helping to make this a greater Canada, and whose work lives after him. Personally he had the friendship of his fellow-citizens in a universal degree, and he will be very much missed in the community. He was married in Paisley about twelve years ago to Sarah Johnston, eldest daughter of the late Rev J Johnston, then pastor of Knox church. The grief-stricken widow and two children will have the sincere sympathy of a wide circle of friends here. The funeral took place on Saturday afternoon.

Paisley in 1870

Mrs H Grant, of Goldie St East, has left with us a copy of The Advocate, dated July 22nd, 1870. While the events it contains may be termed ancient, the items are of special historic if not personal interest to our present day readers, and even the contents of the advertising columns are worth noting. The business directory on the first page contains the announcements of Jas Saunders, commissioner, who was postmaster at the time; Robt Gilmour, civil engineer; Geo W Mulloch, attorney at law; Dr Douglass, Dr Baird; G R R Hill, dentist, came to Young's hotel once a month; Robt MacNamara, tailor; Wm Scott, boot and shoemaker; Wm B Mills, bailiff; T Ree, butcher; T B Head, photographer; Wm Hornell, baker; Alex Colborne, harness maker; S Shannon, tinsmith; Laidlaw & Robinson had just got their foundry in working order, Duncan Fisher operated the flour, saw and woolen mills, J A Murdoch also had a woolen mill in Paisley, and Jas Stark had the grisling mills at Dunblane. The leading merchants were G & W Smith, Robt Dick, Archie McDougall, and Robt McKay. Geo C Urquhart and R C Hildreth were the two druggists. Robt Cruickshank was teaming goods between here and Cargill. The railway was then built only to Elora. In the local news columns there is an account of a Sunday School convention held here, in which the names of Revs. McLean, Duff, McNeill, Tolmie and Hunter appear, also Messrs Kay, Smith, Kennedy, McDougall, Mills and Bath among the local gentlemen who took part, and J C Gibson as choir leader. The only person mentioned who is living to-day. The 12th of July had been celebrated at Teeswater where Rev S Cooper delivered an address. Messrs Scott & Strong, photographers of Paisley were there for the day and their gallery was well patronized. Cricket was the main sport engaged in by the young men in those days, and the score appears of a match between the north and south sides of the village. The names of the players were: south side—Ben Vance, A Silbaly, W Scott, W Goldie, S McMorran, T Mesderran, John M Reid, T Briers, John Hamilton, Jas Hamilton; south side—A McDonald, D Shaw, A McMorran, C Dowling, F McDougall, H Rolston, R. McGavin, H McDonald, G Chambers, G Sherwood, J Urquhart. The south won by a score of 93 to 61. John Hamilton is the only one of this list still a resident of Paisley. A reaping match was advertised to be held on the premises of Henry Collins, north of the village. A drowning accident had occurred which resulted in the death of Alex Barber, 7 years old, son of Jas Barber. He had gone bathing in the Teeswater river.

DANGER LURKS IN EVERY ONE OF US

We Are As Full of Deadly Poisons As A Germ Laboratory.

AUTO-INTOXICATION OR SELF-POISONING

"FRUIT-A-TIVES" Absolutely Prevents This Dangerous Condition.

The chief cause of poor health is our neglect of the bowels. Waste matter, instead of passing from the lower intestine regularly every day, is allowed to remain there, generating poisons which are absorbed by the blood.

In other words, a person who is habitually constipated, is poisoning himself. We know now that *Auto-intoxication*, due to non-action of the bowels, *is directly responsible* for serious Kidney and Bladder Troubles; that it upsets the Stomach, causes Indigestion, Loss of Appetite and Sleeplessness; that chronic Rheumatism, Gout, Pain In The Back, are relieved as soon as the bowels become regular; and that Pimples, Rashes, Eczema and other Skin Affections disappear when "Fruit-a-tives" are taken to correct Constipation.

"Fruit-a-tives" will protect you against Auto-Intoxication because this wonderful fruit medicine acts directly on all the eliminating organs.

50c. a box, 6 for $2.50, trial size 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

To Subscribers. Not Paid Up

Newspapers have been hard hit in the paper market. While the price of paper has steadily advanced since the beginning of the war—a jump of forty per cent. was made a year ago and now, in the face of an existing contract we have been notified that another advance will be made, making it retroactive from February 1st. The increase to weekly papers who use flat paper instead of roll paper is about double the price that dailies have to pay. Apart from that, almost everything else that enters into the production of a paper has increased enormously in price and we, therefore, take the liberty of urging that all arrearages be paid forthwith, as a good paper cannot be produced without expense, and the money is needed by us now more than at any previous time in our business. To each one still owing the amount may seem small, but in the aggregate it means a large sum to us. Accounts take time and postage, and we ask subscribers to save us that trouble by prompt response to this notice. We have no doubt that in many cases the failure to remit has merely been an oversight.

VILLAGE COUNCIL

Council met at 8 p m Thursday, March 7th, all members present. Minutes of former meeting read and confirmed.

Communications read: From Salvation Army, London, Ont, requesting a grant of cash towards the erection of a rescue home; from Hydro-Electric Railway Association, Guelph, inviting council to attend meeting at Toronto to consider municipal interests; from Hydro-Electric Railway Association, requesting council to pass a resolution favoring the appointment of J W Lyon, their president, to a seat in the Senate; from Mrs A J McIntyre, Regina, re electric lights, in answer, stating that steps were being taken towards having her plant put in good shape, but as the expense in that connection would be heavy, before undertaking the work the municipality should agree for street lighting for a term of years, and that she would consider terms for the sale with or without the farm; from Murdoch Leitch, resigning his office as supervisor, &c; from Hara Briggs, re constables' list; from Fred Kennedler, Toronto division, stating that as a substitute for beef and bacon a dealer at Paisley can secure fresh frozen western lakes fish from dealers at Toronto at prices fixed by the board, and that frozen cod and haddock from the Atlantic may also be had at reasonable prices: from the Ontario Government's Fisheries Sales Branch, requesting council to name a dealer at Paisley for the distribution of government fish and to guarantee fish accounts; applications of Thos Sparrow and of Murdoch Leitch for position of supervisor.

Mr Else Stevenson addressed the council opposing the issuing of licenses for the sale of cigarettes.

Forrester—Logie—That the clerk be instructed to draft a by-law for licensing and regulating the sale of cigarettes in the village of Paisley and fixing the license fee at $50, by-law to take effect on 1st May next.—Carried.

Pearce—Logie—That the clerk be instructed to communicate with the McIntyre estate regarding the electric light system and say that the municipality would be willing to negotiate for street lighting provided that satisfactory lights are guaranteed.—Carried.

Skinner—Pearce—That the clerk be instructed to ask for further tenders for the position of town supervisor until 31st March.—Carried.

Logie—Skinner—That Paul Oltober be named as fish dealer for the sale of government fish for the village of Paisley, and that the clerk be instructed to draft a letter to the Fisheries Branch guaranteeing his account, and that the seal of this corporation be affixed to said letter.—Carried.

Accounts passed: Muni Leitch, $48; Weighmaster, $9 30; J H Maurer, $35; Electric Light Co, $24 70; Thos Sparrow, $2 50; Wm Sparrow, $3; C Hepburn, 50c; G G Elliott, 50c; Fire Brigade, $18 75.

W. H. DAVISON

—A movement has been started in Guelph by the Vacant Lot Committee of the Horticultural Society to persuade the lawn bowlers and golf players to give up their favorite summer pastime, and lend all their energies toward greater production. The secretary of the committee has written a strong letter to the local press, in which he says that if the bowlers and golf players do not comply with this request they should be placed in the same class with the slackers, and that if they did not have to cultivate gardens of their own they should assist the farmers. There is considerable indignation among the bowlers and others mentioned and at the present time there is not much likelihood of the request being complied with.

—Midway is now incorporated as a village, by special Act of the Legislature. The first municipal election will be held on May 8th.

—It is reported that the Ontario Government intend to kill off a few hundred of the beaver in Algonquin Park next month and the carcases are to be used for food purposes. If it is said that beaver meat tastes very much like young pork,

WOMEN ARE NEEDED

TO HELP IN WAR

Women can be usefully employed in nursing the wounded, in making up the soldiers' kits, and a thousand other ways. Many Canadian women are weak, pale or anemic from woman's ills. For young girls just entering womanhood; for women at the critical time; nursing mothers and every woman who is "run-down," tired or over-worked—Doctor Pierce's Favorite Prescription is a special, safe and certain help. It can now be had in tablet form, procurable at any good drug store, or send Dr. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y., 10 cents for trial package. Branch office, Bridgeburg, Ont.

St. Catharines, Ont.—"I have taken Dr. Pierce's Favorite Prescription during expectancy when I felt especially in need of a tonic and it benefited me greatly. I always take pleasure in recommending 'Prescription' to young mothers, because I know it will never fail to help them."—Mrs. J. H. Pawcett, 8 Beach St.

Stratford, Ont.—"I do think Dr. Pierce's Favorite Prescription one of the best medicines I have ever known for the ailments of women. I had for quite a long time been all run-down, weak and nervous. I doctored, but nothing seemed to give any relief until I began taking Favorite Prescription.' This medicine gave me such wonderful relief that I am glad to recommend it to others."—Mrs. A. Gowvin, 60 Brant St.

HIGH PRICES BEFORE

If ever you are disposed to worry over or complain of the high prices of the things you have to buy, just look over the prices quoted below and be reconciled. A writer in the New York Times had an article in which he gives the following information: Prices rose steadily from 1861 to 1863. The level reached in the third year of the war was the high-water mark. The increase for the period varied from 60 to 75 per cent, and in some instances was 100. One of the chief sources of complaint was the price of sugar, which rose to 12 or 15 cents a pound. One of the curiosities of the list was the price of butter, which for a long time hung around 80 cents a pound. Cotton sold at one time for $1 a yard. Other interesting facts are given by this writer:

"Saloons felt the pinch in 1863. A meeting of saloon-owners was held in New York to consider the problem, and in the face of great public opposition the price of a drink of liquor was raised from 5 to 10 cents. The best hotels raised their rates to $2.50 and later to $3 a day, and charged extra for heat and light. The rate included a room and three meals a day. The barbers demanded 10 cents for shaving and 20 cents for a hair cut. Ice was considered a great luxury and was supplied at 50 cents a week for a supply of ten pounds a day.

"The average cost of foods, it is seen, was well below the prices of to-day. The explanation of the violent protests throughout the country will be found, however, in the comparatively low wages paid in the trades and professions. Banners borne in a parade in New York demanded a wage of $1.12 a day. The average rate for common labor rose as high as $1.25 for a day's work. Even the skilled workmen fared little better. The wages of blacksmiths rose from $1.75 to $2 a day, while the bricklayers in 1863 received $2 a day instead of $1.25 at the beginning of the war. A skilled painter received $1.75 a day, joiners and ship-builders $5, quarrymen $1.12. Coachmen were paid $30 a month, and waiters from $12 to $18 a month.

"The prices of food and clothing reached far greater heights in the South. In a diary kept by Mrs Jefferson Davis it is recorded that in 1862, in Richmond, mutton sold for 37 cents a pound, potatoes $6 a bushel, tea for $5 a pound, flour at $300 a barrel, and turkey brought $60. A pair of boots cost $25. Many of these prices were due to speculation in food. At one time beef sold for $6 a pound and flour for $1000 a barrel.

"These extraordinary prices, however, were fictitious. It made all the difference in the world whether the bills were paid in gold or in Confederate money."

Letters from the Soldiers

Pte. Wallace Lauds on Leave

Following are some excerpts from a letter written by the above named former Paisley boy, who has been in France for some time. The letter was written from Dalkeith, where Wallace was staying with a cousin, an M.D. Among other entertainment he enjoyed there was the play "Puss in Boots," and a girls' lacrosse match, in which one of the captains was a cousin of his. The match was fine, he says, the girls playing a great deal better than he expected. They have ladies to teach the girls all the games at school. He says: "I was up to Scotland, but the weather was rotten, and I hardly left the house. I went up at night but came back in the daytime by Carlysle, and the scenery was beautiful coming through the hills. The girls are doing a great deal of work in the fields and stations, of course. Food seems very scarce. It looked strange to see people lined up to get their rations—it reminded one of a movie show in Canada. They should have started rationing the people sooner. It would then have come on gradually instead of giving them such a shock all at once. I nearly forgot to tell you of the nice ferry ride I had from Birkenhead to Liverpool on the Mersey River, then on to New Brighton. I saw the Olympic and the Vaderland, which is supposed to be the largest ship in the world. It appears the Americans are using it now. There are a lot of Americans here now, and you see quite a number in France. They have an aerodrome not far from here where a great many men are learning to fly, so we see quite a few planes, although not so many as we see in France. There are accidents quite often. The other day a man fell over 6,000 feet into the Mersey River. It seems awful when they are not fighting. It doesn't seem so bad when they are taking their chance against a Fritz anyway. Quite often it is the Fritz who comes down. Did I tell you I received The Advocate all O.K.? Thank you very much for it. I only wish my walk today had been back where the Advocates come from. Does that sound homesick? I often wish I were back for a little while. So conscription is getting after the boys. I believe it will do some of them good to see a little life, and probably a few deaths. I believe some people are beginning to know what life really is. And now I must close for this time. I go back to France to-morrow, and am hoping to be able to stay in London and see Chou Chin Chow, which they say is very good. Hoping this lengthy epistle has not bored you."

House in Halifax roofed with Brantford Asphalt Slates

A handsome roof that defies the weather

An added touch of beauty to any house is a roof of Brantford Asphalt Slates, which are in soft, harmonious shades of reddish brown and dark green. The colors are permanent and unfadeable, being the natural shades of the slate just as it is taken out of the quarries.

It will also prove a very economical roof, because Brantford Asphalt Slates do not split, get loose, absorb water or rot. They are strongly fire-resistant and are classified as non-combustible by the fire insurance companies, and allowed to be used in cities where the most rigid fire-prevention By-laws are in force.

Brantford Asphalt Slates are very moderate in cost. The regular size of the slates and their pliability make them easily and quickly laid, thus saving time and cost of labor. Being made of high grade felt saturated and coated with asphalt, and with a surface of crushed slate, they make a roof that defies the elements and is a permanent part of the building, just like the walls and the foundation.

Brantford Asphalt Slates

are being used more extensively every year for city, country and summer homes, churches, golf clubs, stores, garages, and wherever an artistic effect is desired on a pitch roof.

If you are going to do any building this year or have an old roof that needs replacing, it will be to your advantage to investigate Brantford Asphalt Slates.

WHERE ORCHARDS PAY

Most Profitable Near Cities Where Market Is Convenient.

LABOR IS THE BIG PROBLEM

No Province or State in North America Has So Large an Area Suitable for Apple Growing as Has Ontario.

(Contributed by Ontario Department of Agriculture, Toronto.)

THIS QUESTION will be discussed under four heads: Climate, Soil, Labor and Transportation.

The Factor of Climate.

So far as climate is concerned apples can be grown commercially in any part of old Ontario, south of a line drawn from Parry Sound to Ottawa; in fact, there are commercial orchards producing fruit at a profit considerably further north than this. Many people think of commercial apple orchards as being necessarily confined to the milder parts of the province, and to the lake districts, but the fact is worth emphasizing that we have varieties of apples suitable for commercial culture in every county of old Ontario. The winter hardiness of the many varieties grown throughout Ontario is now very well established, and it is possible to select varieties which will be hardy for any district.

The most serious climatic difficulty in the Province of Ontario is the occurrence of late frost in spring, and early frost in fall. Other difficulties of a climatic nature can be largely overcome by the selection of suitable varieties, or by careful discrimination with regard to soil, elevation, aspect, etc. It may be pointed out, however, that frosts are more common and more severe over large areas of flat country, than where the topography is rolling and hilly. Large areas of some of the southern counties of Ontario are, therefore, more or less unsuited to commercial apple orcharding because of their flat character. A more rolling country is much to be preferred, as the climatic risks can be made safer from frost by the better air drainage afforded.

The choice of varieties for various districts will be made the subject of later notice.

Suitable Soil In Every County.

So far as soils are concerned, it may be stated that there is an abundance of land in every county suitable for apple growing. Well drained land is essential for successful orcharding, and there is plenty of soil of this type to be had in almost every district.

Summing up Soil and Climate, it may be said that no province or state in North America has so large an area so favorable in soil and climate for apple growing as has the Province of Ontario. If this statement is true it becomes obvious that the present distribution of apple orchards in Ontario is dependent on other factors.

Most Profitable Near Cities.

Transportation is the most important factor having to do with the distribution of commercial apple orchards in Ontario. In other words, the commercial apple orchards are located within reach of transportation facilities, and the better facilities have been with relation to large cities and to the developing markets of the prairies, the more rapid has been the development of commercial orcharding. A location near a large city may be desirable, but if better soil and climate are to be found at a distance, the more distant location is likely to be preferred, provided transportation facilities are good.

Some districts in Ontario possess excellent conditions of soil and climate, but are lacking in transportation facilities, and until facilities are available little development can take place in commercial orcharding.

Labor Situation Very Acute.

At the present time the labor situation is acute, and is rendered more so from the standpoint of the apple grower by virtue of the emphasis which, very correctly, is being placed upon the production of exportable food stuffs. The labor shortage will result in the majority of small orchards being more or less neglected. But the large commercial grower of apples has been in difficulty for years over the matter of labor supply. For commercial orchard operations on a sizable basis, it is necessary to be within reach of a temporary supply of labor for apple picking. Otherwise it becomes necessary to build dwellings for men and their families so that a supply of labor may be always available.

The difficulties of the labor situation at picking time can be lessened considerably by the planting of varieties which ripen in succession, and by taking care to get the right proportion of each. A large area of one variety ripening at one time is extremely difficult to handle. — Prof. J. W. Crow, Ontario Agricultural College, Guelph.

The Forehanded Beekeeper.

In March the careful beekeeper will find a great deal to do in the way of preparing next season's supplies. All used appliances should be put in the best of shape and necessary new ones secured and prepared before the busy spring season arrives. New supplies necessary should be ordered at once. The beekeeper's supers are in barns, his bees are his harvesters, and given barn-room they will harvest his crop with less risk of weather injury than farmers expect in almost any other crop. Without sufficient barn-room a percentage of the crop will be lost. Containers sufficient for the large crop that may be expected next season should also be ordered at this time. This applies particularly to present war-time conditions when supplies of material are uncertain.

Women War Workers

Women who are unaccustomed to hard work, such as work in a munition factory, are subject to aches and pains if the Kidneys are not working properly.

Thousands of women would have had to give up their patriotic work had it not been for

Graduated War Tax on Incomes

Those Enjoying Highest Incomes Will Pay Largest Amount

If the income war tax law, about to be applied, did nothing more than cause a national stock-taking, it would serve a most useful purpose.

The taking of an inventory of one's resources invariably induces a desire to save and a realize to save when translated, as it very frequently is, into a determination to save, means getting on with the war, as well as happiness all around. This process, first an inventory of one's resources, then a desire to save, applied to every unmarried person, or widow and widower without dependent children, receiving an income of $1,500 and over, and to all other persons receiving an income of $3,000 and over, will unquestionably result in a large proportion of cases, in a determination to save. And that means more general prosperity and renewed national strength.

But a national stock-taking is only incidental, of course, to the chief purpose of the income war tax, which is to provide revenue for the prosecution of the war in as equitable a manner as possible. The tax is to be graduated, according to one's ability to pay. Those who are in receipt of only a living wage or salary will not be called upon to pay; those enjoying the highest incomes will be called upon to pay the greatest amounts and the great body of income receivers between will be called upon to pay in their due proportion.

Moreover the purpose of the act is to distribute the burden equitably among all classes. By way of illustration, the farmer will be required to add to the value of his actual income, the value of the home-grown products which his own family consumes. This places the farmer on a plane with the salaried man, the value of whose services is wholly represented in the income received and against which he must charge all his living expenses.

Canada has established a war record that is the envy of the world. It is certain that the Canadian people will run true to form in answer to this latest call of their war government.

LESS FOOD—BETTER HEALTH

It is gratifying to learn that a reduction in the amount of food consumed is conducive to better health. This has been demonstrated in Paris, where food restriction has been accompanied by a lower death rate and an improvement in the general health of the people. To pamper the stomach and pile on fat will be an impairment to health, and the curtailment of food as a condition of the war needs is not an unmixed evil if greater vigor becomes a natural outgrowth. In reviewing the condition in Paris there are other things credited for the betterment of the general health, among them being decreased facilities for locomotion, fewer cabs, private automobiles, omnibuses and street cars, which necessitates more walking. The reduction in street lighting and the early closing of restaurants and cafes have resulted in a greater measure of home life, less going out at night, fewer alcoholic excesses, and other conditions that make for impaired health. Earlier rising and spending more time in the sunlight brought about by daylight saving schemes have also been a benefit. To eat less, take more exercise, live more in the sunlight and avoid excesses would result in better health and increased longevity.

—Chas. Hawkes, of near Belleville, was fined $500 for making seditious statements.

—Colin S Cameron, M P P for North Grey, has introduced a bill in the Legislature providing that cities, towns and villages have the right to pass a by-law requiring that all firewood and cordwood be sold by the cord, containing 128 cubic feet, the wood to be measured by the market inspector and the measurement marked plainly on it.

DENTAL

DR. A. H. ALLEN
DENTIST, (formerly) of Toronto.
Graduate of the Royal College of Dental Surgeons of Ontario. Honor Graduate of Toronto University Dental Department. Master of Dental Surgery. Graduate of the Dr. Magrew Post Graduate School of Prosthetic Dentistry, New York. Office over Moore's Drug Store, opposite the Post Office.

MEDICAL

DR. H. E. GAGE, Physician, Surgeon and Accoucheur. Specialist in Diseases of the Eye, Ear, Nose and Throat. Late house surgeon Kingston General Hospital. Office hours—9 to 9 a.m., 1 to 4 p.m. Successor to Dr. O'Neill.

DR. P. J. F. HOUSTON, Honor Graduate of Toronto University Member of the Royal College of Physicians and Surgeons of Edinburgh and Glasgow. Post graduate Coombs Lying-in Hospital. Dr Mitchell's assistant Edinburgh Eye Infirmary. Specialty—Diseases of the Eye, Ear, Nose and Throat. Successor to Dr. Morrison.

VETERINARY

BOYD BROS., Veterinary Surgeons, Paisley. Graduates of Ontario Veterinary College. Day office at Andrews' blacksmith shop, Residence—two doors north of Bell factory. Phone numbers—Bell 61, Bruce 118.

AUCTIONEERS

R. G. PEARCE, Licensed Auctioneer. Sales in town, in the country or anywhere in the surrounding district. Orders left at the Advocate Office will receive prompt attention. Terms of Sale.

The AUTOMOBILE

Automobile Don'ts.

Never drive where your wheels will follow on rails of a street-car track.

Never hit any crossing at any high clip.

Keep on the very best part of the road, and if rough drive slow.

Train your wheels—that is, see that your front wheels are one-fourth inch wider in rear of the centre part of the wheel than the front centre. Of course, a half-inch will not make any great difference. To tram, change steering rod (mostly on left side) by taking out your cotter pin and giving it a turn around either one way or the other, depending on what your front wheels face. By keeping your front wheels trammed it avoids the tires from wearing on the side. Many auto factories do not pay enough attention to the above matter, the car leaving the factory not properly trammed. The best remedy for finding out if your front or rear wheels need tightening, grab the top of the wheel with your right hand, the bottom with your left, and jerk accordingly. Never let your wheels get loose; it ruins the bearings and the tires, and will sometimes play hob with brake band.

Don't be afraid to fill your tires. Keep them full.

As for gasoline economy, you can't get mileage out of your car going 30 to 45 miles an hour. Keep around the 15-mile limit and it will save you dollars yearly.

If you don't use your car during the winter, jack it up and fill your tires, keeping it dry.

Kerosene in Radiator.

"Would you advise the use of kerosene instead of water in the radiator of an automobile for winter," writes a reader; "and if not, why not?"

Kerosene will cause the rubber hose connections to rot and leak. Furthermore, it does not have the cooling properties of water, and the engine is likely to overheat, causing the radiator to steam and boil. Some users who have tried kerosene for cooling also claim that it causes rust and clogged tubes. On the whole, it is an unsatisfactory substitute for an alcohol-and-water mixture, disagreeable to handle, and probably injurious if used for any length of time.

Oil-Can Top Lets Air Out.

Some days ago a tourist with a big "six" stopped where I was working. His tire was down. After he took the tube out of the casing I expected to see him take the core of the valve out to get the air out of the tube before patching it. But he didn't do that.

He found the hole and stuck the top of a little oil can in the nail hole, and as he pushed it in further the air went down in a hurry. He kept this in his repair kit for no other purpose. Any tube that is funnel-shaped and about an eighth of an inch at the small end would do as well, but the top of a small oiler is just right.

HOW HEROES WIN THE VICTORIA CROSS

STORIES FROM THE OFFICIAL REPORTS.

Showing How British Soldiers Excel the Germans in Daring and Initiative.

Lieutenant-Colonel John Sherwood-Kelley, commanding a battalion of fusiliers, moved out at the head of his men one afternoon to cross the Yser Canal. Moving according to the time schedule, they arrived at the banks to find the "shock" troops who were due to have cleared a passage for the fusiliers held up by a terrific German rifle fire which prevented them from taking positions covering the bridge. From the high ground opposite the Huns were pouring in a galling machine gun and rifle fire. All the Englishmen were under cover, replying as best they might. Time was precious, for the Hun on the ridges must be displaced before the major advance yet to come could take place.

Bullets Fall Like Snow.

Lieutenant-Colonel Sherwood-Kelley suddenly sprang to his feet, yelling to his men to follow him, and dashed toward the bridge. The bullets from every machine gun and rifle across the canal centered upon the bridge. The lead swept across like snow in gusts. The colonel bent his head to it and plunged in. Splinters flew this way and that. Balls panted hot, quick gasps past his face, through his clothes, but he raced on, turning and yelling to his men. The fusiliers, with a cheer, discarded the protection of the covering party and came on. Their feet broke out in sudden thunder on the bridge. Some of them splashed tragically in the canal on either side as the bullet gusts blew them down. The colonel, untouched by some miracle, raced ahead, breasting the wind of lead.

One-fifth of the first company fell in crossing the bridge or in the first moments on the German side of the canal. Thereafter the remaining companies of the battalion came across with lighter losses, for the colonel, distributing the first company in shell holes, distracted the Hun fire.

Captured Five Machine Guns.

Unless his men got better shelter they were doomed, for there was no hope in attacking the German position from the frontal position. Coolly he reconnoitred the ground, walking upright through the fire, studying the entanglements and trenches. At the left flank, where his men lay nearest the enemy, a thick belt of wire prevented any attack. Racing to this quarter, he called for volunteers to man a machine gun and follow him. Without waiting for them he seized a pair of wire nippers and attacked the obstacle. Calmly he cut the strands, while the bullets "chinged" against the steel all about him. Through the hole he cut the four volunteers followed, lugging their gun and ammunition.

The colonel, seeing two of the four go down, worked like a madman, and the wire parted in the last fence. With his automatic he cleared a knoll of the two Huns who defended it and a moment later planted the machine gun upon it. An instant later it enfiladed the German trench and halted the fire.

This enabled his men all along the line to attack without further serious loss and take their objectives.

But even then the colonel's lust for danger was not satisfied. A little later he led an attack against some shell pits from which the Huns were killing his men in their new positions and single handed he killed "a large number" of the enemy, capturing five machine guns and forty-six prisoners.

Led a Gallant Charge.

Captain Robert Gee of the Royal Fusiliers was in a sector of trench that was captured by a strong German attack. He was in brigade headquarters where a great quantity of ammunition was stored, and was consequently desperate when he found himself a prisoner, forced to view the confiscation of the precious munitions. Watching his chance, he seized a spiked stick (for executing opponents at close range) from one of his captors and swung it fatally upon the Germaff's head.

Leaping out of the trench, he dashed for liberty, and by some miracle escaped the bullets of his late captors. Springing into the second line trench among his command, he ordered a charge and, still armed with the spiked stick, led his men back upon the Huns, driving them out and killing or capturing the most of them. Later in the day he led an attack upon the village from which the Huns had made their initial assault. At the end of one street crouched a machine gun squad, commanding the approach. Captain Gee, seizing a revolver in each hand and followed by one man armed with a clubbed rifle, charged down the street, replying to the gun with their meagre weapons. Dodging from side to side of the street, the two men made for their enemy. Captain Gee was a crack revolver shot and accounted for five of the gunners before he reached the gun. The remaining five men fled and as they ran Captain Gee killed three of them. His man swerved the machine gun about and held off the enemy until the command had consolidated their position. Captain Gee was found to be wounded, but refused to leave the post until satisfied that the defense was organized.

SURE OF THEIR MEAL.

When the Railway Timetable Allowed a Five-Minute Stop.

There is a rural electric-car line in New England upon which is a siding where, about the middle of the morning, one car is expected to wait for another to pass. It does so; but it does not always proceed immediately when the line is clear. The motorman's grandmother lives just across the road and always has ready for him a delectable and sustaining piece of pie, which he devours to the last crumb. If an impatient passenger, as occasionally happens, begins to growl, and then shouts, and then yells, and finally clangs the bell for his return, he may hasten his luncheon, but will not abandon it; and his countenance, when he swings aboard, will certainly wear an aggrieved expression and probably a smear of squash or a dab of apple.

Such easy-going ways hardly, it seems, extend to the brisker and more businesslike realm of railway travel; but Mr. Julian Street has recently related a parallel experience, which he enjoyed on the journey between Meridian and Jackson.

When we asked the brakeman about dinner, says Mr. Street, he told us that there was a lunch room in the station at Jackson; and when we remonstrated that, according to the time-table, the stop there was of only five minutes' duration, he replied:

"Well, the conductor gets his supper there, anyhow. You watch him and you won't miss the train."

Accordingly, we alighted at Jackson and hastened to the lunch room, where we ordered roast-beef sandwiches and coffee. Unfortunately, however, there was only one waiter behind the lunch counter, and, although he made all possible haste, several precious minutes passed before we were served. Meanwhile we watched the conductor—who had the droll, good-natured look of some figure from a drawing by Maxfield Parrish. The first thing the conductor took was a cup of coffee, rose and moved toward the door. As he passed us my companion gazed up at him with sad, appealing eyes and urged him to "have a heart."

The conductor regarded our humble repast with signs of doubt.

"What are you folks having there?" he asked.

"A banquet!"

"Just sandwiches and coffee. And we're starving."

The conductor turned and addressed a man in overalls who was passing the lunch-room door.

"Got much express to-night?"

"Right smart heap of it, cap," the other replied.

"Well," said the conductor, turning to us, "go on with your gluttony, young fellows. I'll send and tell you when we're ready."

When he had left the room a man from our car leaned toward us.

"It's all right," he said in a confidential tone. "We've got the engineer here, and I've fixed the waiter to serve him slow."

MAKING WAR WASTE USEFUL.

How the British Have Solved This Difficult Problem.

To dispose of the enormous quantities of food-wastes of great military encampments has always been the most difficult problem. But the British in this war have solved it very cleverly.

All of the fat, says Mrs. Humphrey Ward, is boiled out for the manufacture of glycerine—a harmless, sweet, colorless liquid, which, when mixed with nitric acid, makes an explosive of enormous power. Many millions of shells have been loaded with nitroglycerin derived from this source.

All the bones are calcined for use as fertilizer, and the by-products are shipped to France to help feed the pigs.

Mrs. Ward says that all the cotton waste of the military hospitals (bandages, old surgical dressings, etc.), is disinfected and converted into gun-cotton (likewise for war use) by treating it with nitric and sulphuric acids.

Thus that which feeds and that which heals becomes in the end that which kills.

HOW "TODGER" WON THE V.C.

A NAVVY WHO ROSE TO THE OCCASION.

Greater Initiative and Finer Courage Has Not Been Displayed in the Trenches.

Some men in this war have won the V.C. in sky fights and others have won it on the water, but none has won it on land through greater initiative and courage than did Private Thomas Alfred Jones, of Chester, England, known now to all his countrymen as "Todger" Jones. You speak of "Todger" Jones in London and everybody knows who he is. Before the war there were precious few persons in Chester who even gave him a thought, aside from his family and a small circle of friends. "Todger" Jones was a navvy, who hoped to be something better. A navvy is a sort of road builder or a bricklayer, a man who wears a strap under each knee to keep his trousers of corduroy from dragging in the mud, a strap in which he places his pipe.

Mr. Jones despised his job and willingly enlisted at the first call of the country, thinking of the lob a day and the fine series of fights he'd be having over in France.

Zero Hour Comes.

Zero hour had come and the men were standing to, ready to go in waves over the parapet with their bombs, loaded rifles and fixed bayonets, when the dirty dawn came along. So over went "Todger" with bullets and shells splattering, whistling and whining above and on the spongy earth. The lights were cutting the darkness like fireworks in a peace carnival—but there on that battlefield they showed up the carnage.

The great bulk of the former navvy was sticking to the letter of his instructions, and then he began to play with his bombs—thinking of the cricket games at home as he bowled them on to a machine gun, which, point where it would, could not knock out the Cheshire private. He finally felt a punch on the shoulder and shook, but did not stumble. The machine gun men heard the yelling pri vate, and as he hurled another hand grenade what was left of them fled.

That having been accomplished, "Todger" looked around and finally his quick eye espied a dugout. He was alone in his particular spot, and had had no end of "fun," but he was ready for more. Incidentally, his action had not escaped the eyes of an officer and several colleagues.

"We wants yer all to come art of there, wot?" he shouted down the mouth of the dugout.

Noise for a Company.

There was no word, no sound. Suspicious, "Todger," however, was not lacking in cunning, and he next informed the silence that "they" above were about to shower bombs in the dugout to make sure that no Germans were lurking around.

"Kamerad!" came from the abyss-like depths of the earth home of war.

"Wot I thawt," mumbled "Todger" to himself.

"One of yer at a time an' if more than one shows I'll 'ave my men take yer back a bit and yer'll stop a bullet."

They seemed to understand, and then "Todger" made enough noise for a whole company. He changed his voice, as if somebody was talking to him, roared for another private, and a third, and when the first meek looking foe appeared "Todger" saw that he was disarmed, warned him to stand quiet or "the men in the shell holes" near by would slay him. Another came up and was likewise warned.

"Not so fast there, or bomb—understand?" warned "Todger."

"Todger" rubbed his forehead when he saw twenty Huns stand up in line and still more coming. His rifle was pointed at the mouth of the dugout, and simultaneously at the coteries of Germans. To "Todger" it was like an avaricious dream when he saw fifty of the Germans as his prisoners. Then he thought he had bitten off possibly more than he could chew. He shouted down the dugout for the men to cease coming up, and to strike the fear of God into any more who might be homed in it he tossed a grenade a short distance away and fired off a shot. To his joy, four other Tommies came his way, and with initiative he ordered them to stay on guard over the rest of his prizes while he led half a hundred of them a short distance back.

One Hundred and Two.

The fifty prisoners were taken single handed to a place where "Todger" was certain they could do no harm, and the bustling, sweating Chester man reappeared to gather in the rest. The real voices, the chatter of his comrades, was no better detriment to the Huns than "Todger's" ventriloquist camouflage. The enemy was thoroughly intimidated, and soon "Todger" and his soldier pals gathered in another batch of men. In all there were ONE HUNDRED AND TWO Germans, and these "Todger" jealously insisted on leading back to the lines ALONE.

"Mine!" said "Todger," with just pride, when he was asked by an officer whose prisoners they were, and also perhaps to explain the lack of other soldiers in the escort. "Todger's" comrades, who had guarded the mouth of the dugout while he took the first batch of men to safety, were so proud of "Todger" that they wanted him to have all the glory.

"How many of 'em are there?" asked the officer, attempting nonchalance.

"Abart a 'undred," replied "Todger."

"Good egg," said the officer.

And "Todger" was one of four who received the Victoria Cross some time afterward from the King.

It is probably the only instance on record where witnesses of the investiture dared to laugh. It seemed mirth making to look upon a man who had captured single handed one hundred and two Germans.

And Chester is now proud of her navvy soldier. The very roads he helped to mend and the bricks he laid are precious to that city.

All That's Worth Seeing.

"You and I have seen all in the world that's worth seeing."—Sir Arthur Pearson to a blind officer at St. Dunstan's.

There is no sun in the sky,
The stars return no more;
No blue clouds on high,
No white waves wash the shore.
Spring comes not again,
Radiant and green;
Yet is life not in vain—
We have seen.

There is no flame in the fire,
The rose lights are out;
To beauty of heart's desire
Blackness gives rout.
Glory of golden hair,
Gone all your sheen;
Yet is your presence fair—
We have seen.

There is no light of the day.
No eye in blush,
Fading in pearl and grey,
Then in the hush,
Rising an empress moon,
Splendid of mien;
Still through the years a boon—
We have seen.

—Louis J. McQuilland.

BATTLEFIELD'S FLOWERS.

Mass of Bloom Has Sprung Up On Somme.

Instead of dragon's teeth springing up on the Somme—as legend says they did on ancient battlefields—there is now flourishing on that blood-stained site a great mass of vegetation and floral beauty.

Names of some of the more familiar plants that have been observed in their seasons on two brief visits recently are given in the Kew Bulletin. They are:—Poppy, cornflower, scarlet pimpernel, dogs mercury, nightshade, charlock, white and yellow, goosefoot, camomile, thistle, forget-me-not, speedwell, looking-glass flower, hempnettle, sow-thistle.

The ground, over which the Battle of the Somme was fought in the late summer and autumn of 1916, was during the winter and spring of 1917 a dreary waste of mud and water, and even in the height of summer was covered with innumerable ponds. The clothing of this large tract of country with plant life is remarkable when it is remembered that, for the most part, it has been out of cultivation since the autumn of 1914.

It is considered impossible that quantities of seed, sufficient to cover these thousands of acres, could have been carried by wind or birds, and the scientific explanation is that the plants must have grown from seed lying dormant in the ground.

These Shall Prevail.

War laid siegle to his lips, blew one blast—and then
The seas answered him with ships, the earth with men.

Straight, Death caught his sickle up, called his reapers grim,
Famine with his empty cup came after him.

Down the stairs of Paradise hastened angels three,
Pity, and Self-Sacrifice and Charity.

Where the curved, black sickles sweep, where pale Famine clings,
Where gaunt women watch and weep, come these of wings.

When the red wrath perisheth, when the dulled swords fall,
These three who have walked with Death—these shall prevail.

Hell bade all its millions rise; Paradise sends three;
Pity, and Self-Sacrifice and Charity.
—Theodosia Garrison.

THE FIGHTER'S FAITH.

Spiritual Atmosphere Surrounds French and English Soldiers.

Harry Lauder tells in the January American Magazine of his experiences in France, and he says:

"I spent many days in the trenches, the rest camps, the hospitals and in the surrounding towns, and the most definite impression I carried away was one concerning the spiritual atmosphere which surrounds the French and English soldiers in France. I talked with some of the men for hours at a time about their experiences in battle, about their thoughts of home, about their feeling toward the enemy, but the one thing I came away with, above all other impressions, was the conviction that all of these men, no matter what manner of lives they had lived before, now possess a calm, clear conviction that if they fall in the thick of the fight, they will pass into the life beyond.

"That's why we take such chances,' one man told me simply. 'Do you think for a moment that if we thought that life held nothing for us than the earthly body we possess we would fight with such a confidence and eagerness? We would not be able to, because we would be doing everything in our power to preserve this life of ours. But seeing men die as I have seen them, I know better than to disbelieve in a future life.'"

HUNS FEAR BRITISH GAS.

That's Why They Are Agitating for Discontinuance of It.

Gen. Maurice, chief director of military operations at the British War Office, said recently:

"The Germans have recently been exerting great pressure on the Geneva Red Cross to put out a protest against the use of poison gas. Our chemists did so well that to-day we have attained distinct superiority over the Germans both in the deadliness of our gas on the offensive and in its effectualness in our defensive measures. It was not until we won this superiority that they started a propaganda for the discontinuance of gas.

"If we agree to abstain from the use of gas, have we any guarantee, can we have any guarantee, upon which the commanders who are responsible for the lives of their men could rely that Germany will not again try to spring a surprise on us as she did in 1915?"

Line of Fire.

There was a chicken to be killed at the Browns last day. Brown, who was nervous, did not like to wring its neck, nor could he sever its head with an axe.

"I have it," he finally decided. "I'll shoot it."

So, armed with a gun, he took the chicken into the yard. Little Willie, anxious to be in at the death, followed.

Some time passed, and as neither of the missing couple had returned, little Willie's mother began to get anxious.

"Willie," she called out, "hasn't your father killed that chicken yet?"

"No, ma," called back Willie, "it won't get in the way!"

Before chopping suet flour it thoroughly.

Before baking apples stuff them with raisins.

The Doings of the Duffs.

ALMOST HELPLESS FROM RHEUMATISM

Only Able to Move About on Crutches—Dr. Williams' Pink Pills Restored Activity.

Inflammatory rheumatism, acute rheumatism and rheumatic fever are different names for practically the same thing. It comes on with hardly any warning. The pain is excruciating, and there is a tendency of the disease to attack the heart, when it may have fatal results.

Any one who has suffered from an attack of inflammatory rheumatism knows that the usual treatment is highly unsatisfactory. External applications of hot cloths and liniments and internal doses of salicylates to relieve the pain are not enough, for they do not drive the poison from the blood, and the sufferer is liable to renewed attacks whenever exposed to cold or dampness.

To cure rheumatism so that it will stay cured the rheumatic poison in the blood must be driven out, and the blood made rich and red. When the blood is pure there can be no rheumatism. Dr. Williams' Pink Pills build up the blood, make it rich, red and pure and in this way cure the most obstinate cases of rheumatism. Mr. George Harbottle, R.R. No. 1, Pevensham, Ont., is one whose cure through the use of Dr. Williams' Pink Pills is most striking. His mother gives the particulars of his attack and cure as follows:—Some years ago while my son was working as a blacksmith in a Michigan lumber camp he was attacked with rheumatic fever. He was at once taken to a hospital at Marsanelt, and was there under medical treatment for four months with but little or no relief. He then decided to go to Mount Clemmens, where he took the baths for three weeks, but did not find any benefit from them. By this time he felt that his case was hopeless and decided to return home. When he reached home he could only move around by the use of a crutch and a cane. One knee was so stiff that he could not bend it, and most of his joints were swollen out of shape. He could neither dress nor undress himself and had to be helped like a child. I urged him to try Dr. Williams' Pink Pills and finally he consented to do so. He had only been taking the pills a few weeks when he could limp about without the crutch, and his appetite greatly improved. This gave him new courage and as he continued the use of the pills he showed constant improvement, and was able to walk about outside. He continued to use the pills for some four months, by which time every symptom of the trouble had disappeared, and he went to his work in Michigan a cured man. His case was well known to the neighbors around here and his cure was looked upon as marvelous, for everyone thought that at the best he was doomed to be a rheumatic cripple.

It is because they have made such wonderful cures as Mr. Harbottle's that Dr. Williams' Pink Pills have a world wide reputation, and are the only medicine used in thousands and thousands of homes. You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Crows and Foxes.

Although crows build their nests in trees where no fox can climb, and although they can escape from any fox by flying, they, for some reason, seem to have a mortal antipathy to foxes, and every time they see one they lose no opportunity to harrass it.

According to an experienced hunter and naturalist of Bangor, Maine, the best time to observe the malice of the crow against the fox is on a cold day in early winter, when the hounds can follow a trail without touching their noses to the ground. If there are any crows about, they can be relied upon to show where the fox is running.

On such occasions, says the hunter, I have seen crows watch for running foxes for hours. As soon as a fox emerged from the thick woods every bird would hover over the running beast and peck at it with every evidence of bitter hatred. Several fox hunters that I know make a practice of following the crows when foxes are roaming the back lots.

Minard's Liniment Cures Colds, Etc.

At Last.

He had been going from church to church trying to find a congenial congregation, and finally on Christmas Eve he stepped into a little church just as the congregation rose with the minister:

"We have left undone those things which we ought to have done, and we have done those things which we ought not to have done."

The man dropped into the nearest pew with a sigh of relief.

"Thank goodness," he said, "I've found my crowd at last."

In feeding cattle this winter use a maximum of roughage and a minimum of concentrates. In a time like this high finish may not be most profitable.

Practical Designs

Made for work or play are these little overalls for the little boy. McCall Pattern No. 7824, Boy's Overalls, in 6 sizes, 4 to 14 years. Price, 15 cents.

The cover-all apron is a joy to the housewife. McCall Pattern No. 6920, Ladies' and Misses' One-Piece Apron. In 3 sizes, small, medium and large. Price, 10 cents.

These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which we have during February and March is extremely hard on children. Conditions make it necessary for the mother to keep them in the house. They are often confined to overheated, badly ventilated rooms and catch colds which rack their whole system. To guard against this a box of Baby's Own Tablets should be kept in the house and an occasional dose given the baby to keep his stomach and bowels working regularly. This will not fail to break up colds and keep the health of the baby in good condition till the brighter days come along. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Get Out Your Sap Buckets.

Farmers and others who have maple sugar outfits, even if they have not been in use for years, should put them to work this year. There is a sugar shortage, and Canadian maple trees should be made to produce to the maximum. So even if you haven't the most up-to-date equipment, tap all the trees you can and make the most of the facilities you have on hand. There'll be a good market for all the maple sugar and syrup produced.

MURINE Granulated Eyelids, Sore Eyes, Eyes Inflamed by Exposure to Dust, Sun and Wind quickly relieved by Murine. Try it in Your Eyes and in Baby's Eyes. YOUR EYES Need No Smarting, Just Eye Comfort. Murine Eye Remedy At Your Druggist's, or by Mail. Write for Free Book of the Eye—Free. Murine Eye Remedy Co., Chicago.

Every shovelful of coal you waste lowers the efficiency of the man on the firing line, lowers the temperature of the cantonments, reduces the speed of the submarine destroyers, diminishes the force of the projectile and slackens the speed of the munition plant.

Whether it is a home or merely a house depends upon the folks who live there.

Are Popular West of the Great Lakes

Mrs. W. J. Vale Talks of Dodd's Kidney Pills.

She Also Tells How Her Dyspepsia Was Cured By Using Dodd's Dyspepsia Tablets.

Pandora, Alta., Feb. 25th—(Special)—"We are never without a box of Dodd's Kidney Pills in the house." That's what Mrs. W. J. Vale, a well-known and highly respected resident of this place has to say of the great Canadian kidney remedy. "My husband suffers from lumbago, and they always help him," is the reason that she gives.

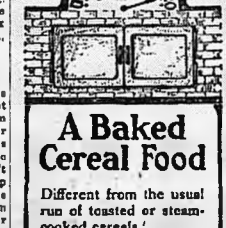
"I must also tell you," Mrs. Vale continued, "what Dodd's Dyspepsia Tablets did for me. They cured me of a very bad attack of dyspepsia. I have also derived great benefit from the use of Dodd's Kidney Pills."

It is evidence like this that proves that the Dodd's remedies have gained a permanent place in the family medicine chests of the West. Dodd's Kidney Pills are particularly popular. The success with which they have been used to treat all kinds of kidney ills from backache to rheumatism and Bright's disease have earned for them the gratitude of thousands of people on this side of the Great Lakes.

"LINES"—TO A BEAR.

How the Drawing of Two Simple Lines Altered the Picture.

A feat once performed by Bret Harte, to the warm applause of a brother writer, might, after all, be considered as the legitimate and proper work of a poet; certainly it gives evidence of a very ready and very felicitous imagination. Harte was the first editor of the Overland Monthly, and the story of the origin of that magazine's famous cover is thus told in Mr. H. C. Merwin's Life of Bret Harte:



The cover of the Overland was adorned with the historic grizzly bear that, standing on the ties of the newly laid railway track, with half-turned body and lowered head, seems prepared to dispute the right of way with the locomotive that might shortly be expected to come screaming down the track. There was originally no railway track in the picture; merely the bear. How the deficiency was supplied Mark Twain explains in a letter to Thomas Bailey Aldrich:

Do you know the prettiest fancy and the neatest that ever shot through Harte's brain? It was this:

When they were trying to decide upon a vignette for the cover of the Overland a grizzly was chosen, and the page was printed with him on it. As a bear he was a success—he was a good bear. But then, it was objected, he was an objectless bear—a bear that meant nothing in particular—simply stood there snarling over his shoulder at nothing—and was painfully and manifestly a boorish and ill-natured intruder upon the page. All hands said thus—no one was quite satisfied. They hated badly to give him up, and yet they didn't like to have him there when there was no real point to him.

Presently Harte took a pencil and drew two simple lines under his feet, and behold! he was a magnificent success. The ancient symbol of Californian savagery snarling at the approaching type of high and progressive civilization, the first overland locomotive! I think that was nothing less than inspiration itself.

Newton had just discovered why the apple fell. "But," cried the anxious office-seeker, "why doesn't the plum fall?"

A Baked Cereal Food

Different from the usual run of toasted or steam-cooked cereals,

Grape-Nuts

is baked in giant ovens—baked for nearly twenty hours under accurate conditions of heat, so that the whole wheat and malted barley flours may develop their full, rich sweetness.

You don't need sugar on Grape-Nuts.

A LITTLE FRENCH HEART.

"Madame la Presidente:—

Permit a little French heart to come and present to you his wishes the most sincere. My parents join with me in sending their best compliments for the New Year, and in thanking you for your great kindness. I thank you all, dear good ladies, for the nice things you have put in with the clothing addressed to my dear Papa. Every evening in my prayers I ask God to spread his blessing over you. Receive again Madame la Presidente and all the ladies, the best wishes of your little protege.—Charles Opdebeck."

This little letter has just been received in Toronto, by the President of the "Friends of France," who knows what interest it will have for many people in every part of Canada, who have so generously sent help to the hospitals and refugees. Charles and his mother were repatriated from the North of France not long ago, and find themselves with little or nothing to live on. During their captivity the mother was struck by a shell, and lost a leg. The father is an ambulance-driver for a hospital in Calais, and this is what he says: "Dear and Good Ladies—I thank you so much for the parcel that has just come. It contained 4 pairs of socks, a flannel shirt, chocolate, sugar, soap, cocoa and soup. If you knew how happy we are to have these things, for now it is so hard to live that my poor wife can never get anything nice. She is so happy to be near me at Calais, but unfortunately the "cochons de Boche" come often to bombard us. On Monday they threw a dozen bombs, there was only material damage happily, but since my wife was struck, she has such a terrible fear. We hope that the Boches will soon have finished their crimes, and we can be happy again in our dear country. God watches over us and will protect us. Receive, good ladies, my affection and thanks the most sincere.

Le Soldat Arthur Opdebeck.

The "Friends of France" board of this family through one of the hospitals that they help near Calais, which is visited daily by scores of refugees. The nurse in her last letter says: "Without Canadian and American help we could not exist. Many hospitals have had to shut down. The cost of living is so high and the government can give us so little. Many of our wounded are very ill, and need nourishing food. One egg costs 18 cents and butter and meat are $1.00 a pound. Just now enormous numbers of refugees are arriving from the North of France, in a state of exhaustion of which you can truly form no idea. It is specially at the beginning that these families need help, when they are so weakened and demoralized. It is a question of material help to revive their morale, because after a time they pick up wonderfully, and in a few months gather together a little home less sad. All the second-hand clothing you send, which is so good, finds owners immediately."

The "Friends of France" is an incorporated society under the War Charities Act. Its headquarters are 216 Poplar Plains Rd., Toronto, and the President, Mrs. Wells, will gladly receive and acknowledge gifts in money or kind, such as clothing, food and hospital supplies.

Minard's Liniment Cures Diphtheria.

Cause for Suspicion.

When the train, with a tremendous crash, came to a full stop between stations, a worried-looking man stepped a brakeman who was running down the track and demanded to know the worst.

"What is it? An accident?"

"Some one pulled the communication cord," was the reply. "The engineer put on the brakes too quickly, and one of the cars left the rails. It will take us four hours to clear the line."

"Four hours!" exclaimed the passenger. "But I'm to be married today!"

The brakeman turned on him with instant suspicion. "Look here," he demanded, "you aren't the man who pulled that cord, are you?"

Baby of Mine.

Just a wee thing with a dainty air,
And a shining mop of golden hair,
With eyes so soft and wistful, too,—
That they bruise and hurt the heart of you.
Warm little hands that seek and cling
And make you love this baby thing.
Dear little head against your breast
Cuddling there like a bird in its nest,
Fragrant lips as cool and sweet
As a budding rose in the summer heat—
But I open my eyes—and smile—and sigh—
Baby of mine—the dream's gone by!

—Elinor Maxwell.

The Ship of State.

In spite of rock and tempest's roar,
In spite of false lights on the shore,
Sail on, nor fear to breast the sea!
Our hearts, our hopes, are all with thee,
Our hearts, our hopes, our prayers, our tears,
Our faith triumphant o'er our fears,
Are all with thee,—are all with thee!

Minard's Liniment Cures Distemper.

The Asquith Family.

Mr. Asquith's family have been rendering great and distinguished services in the war. His third son, Brigadier General Arthur Asquith, is reported to have been seriously wounded in France, having received a compound fracture of the ankle while reconnoitring a German position. He has been wounded on two previous occasions, and has a splendid military record. At an early stage of the war he joined the Royal Naval Division, and as a sub-lieutenant in the Anson Brigade participated in the defence of Antwerp. He won his D.S.O., to which he was recently awarded a bar. His high military aptitude is betokened by his rapid promotion. One of his brothers, Cyril, has also been recently wounded. Raymond, the ex-Premier's eldest son, fell in action more than a year ago. He had a very promising career at the Bar and in politics.

GIRLS! WHITEN SKIN WITH LEMON JUICE

Make a beauty lotion for a few cents to remove tan, freckles, sallowness.

Your grocer has the lemons and any drug store or toilet counter will supply you with three ounces of orchard white for a few cents. Squeeze the juice of two fresh lemons into a bottle, then put in the orchard white and shake well. This makes a quarter pint of the very best lemon skin whitener and complexion beautifier known. Massage this fragrant, creamy lotion daily into the face, neck, arms and hands and just see how freckles, tan, sallowness, reddess and roughness disappear and how smooth, soft and clear the skin becomes. Yes! It is harmless, and the beautiful results will surprise you.

Store the Ice.

By storing all the natural ice that it is possible to harvest, ice companies, farmers, creamery owners and others will help materially in saving ammonia this year. Even at the present time there is an absolute shortage of ammonia in the United States of 60,000,000 pounds per annum for war and commercial purposes.

MONEY ORDERS

Pay your out of town accounts by Dominion Express Money Orders. Five dollars costs three cents.

A Word For The Peanut.

The peanut is a substantial food, a wholesome, palatable food, declare the people who know. Six ounces of shelled peanuts equal 2 1-3 ounces of beefsteak, 5 ounces of codfish, 1 ounce rice, 4.2 ounces rye bread, 35 ounces of spinach, 5 ounces of apple, or 6 ounces of bacon.

Mansonville, June 27, '13.

Minard's Liniment Co., Limited.

Yarmouth, N. S.

Gentlemen,—It affords me great pleasure and must be gratifying to you to know that after using 36 bottles of your Liniment on case of paralysis which my father was afflicted with, I was able to restore him to normal condition. Hoping other sufferers may be benefited by the use of your Liniment, I am,

Sincerely yours,
GEO. H. HOLMES.

Sap Running Begins Soon.

The first run of Canadian maple sap begins down in Essex County, Ontario, generally about March 20. Gradually the warm weather works north east and the season ends up in Quebec when the leaves break the buds.

Minard's Liniment Cures Garget in Cows

On the farm the automobile is distinctly a business necessity, for a farmer, unlike the city man, can not jump on a trolley when he wants to see a customer or buy a tube of shaving cream. He doesn't buy a car merely for the sake of seeing the wheels go 'round—he really needs it in his everyday farming life.

WOMEN! IT IS MAGIC! LIFT OUT ANY CORN

Apply a few drops then lift corns or calluses off with fingers—no pain.

Just think! You can lift off any corn or callus without pain or soreness.

A Cincinnati man discovered this ether compound and named it freezone. Any druggist will sell a tiny bottle of freezone, like here shown, for very little cost. You apply a few drops directly upon a tender corn or callus. Instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can lift it right off.

Freezone is wonderful. It dries instantly. It doesn't eat away the corn or callus, but shrivels it up without even irritating the surrounding skin.

Hard, soft or corns between the toes, as well as painful calluses, lift right off. There is no pain before or afterwards. If your druggist hasn't freezone, tell him to order a small bottle for you from his wholesale drug house.

The Soap to cleanse and purify, the Ointment to soothe and heal.

For free sample address post-card: "Cuticura, Dept. K, Boston." Sold throughout the world.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well.

"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. I gladly took her advice and from my troubles so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.

Sometimes there are serious conditions where a hospital operation is the only alternative, but on the other hand so many women have been cured by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, after doctors have said that an operation was necessary—every woman who wants to avoid an operation should give it a fair trial before submitting to such a trying ordeal.

If complications exist, write to Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years' experience is at your service.

SECOND CON ELDERSLIE

Friday, March 15—Patriotic Dance, Town Hall, Paisley.

Carnival in Paisley Rink next Monday night.

The large flocks of crows that are hovering around the last couple of weeks are a welcome indication of spring.

Assessor Walks made his annual visit down this con last week.

John H McCulloch has been elected trustee in S S No 12 to fill the vacancy caused by the resignation of Geo Hope who intends to leave here about April 1st.

A couple of sleigh loads of young people from this con drove over to the home of Mr and Mrs T Nicoll, Gillies Hill, on Wednesday evening last and enjoyed an old time dance.

Born—On March 1st, to Mr and Mrs Wm McNeil, formerly of this con, a son.

Mr and Mrs J McCulloch and children of Queen Hill, visited friends here recently.

Edwin Priess, who has been engaged with W J Allan for the past year has quit the farm and started factory work.

Sam Patterson has been a victim of la grippe for the past week.

During the wind storm on Monday evening last the roof of W J Allen's garage was lifted off and taken over into a neighbor's field.

One evening recently a large number of friends and neighbors gathered at the home of Mrs S Gribble to bid them adieu before they leave for their new home in Chesley and also to present them with a small token to show the esteem in which they are held by those who have been neighbors for a number of years. To Mrs and Miss Hannah Gribble were given a handsome couch and to Mr D Gribble a beautiful leather arm chair. The evening was spent pleasantly by all present, some dancing and others playing games. A nice lunch was served by the ladies. Their many friends here wish for them a long and pleasant life in their new home.

Children Cry
FOR FLETCHER'S
CASTORIA

CARLILL

Carnival in Paisley Rink next Monday night.

Mr R Reed who has been spending the winter at his parents' home on the Elora Road, left for his home in Laverna, Man, on Monday.

Mr Allan Clark, who has been visiting his sister Mrs Balsdon, since being discharged from the army, returned to his home in Pickering last Thursday.

The Box Social given by the Red Cross League here last Friday night was a huge success. A good program of choruses, duetts, solos, and readings was given after which the sale of boxes took place. The proceeds of the evening amounted to $104. The ladies are to be congratulated on the success of this their latest attempt at raising funds.

Mrs Balsdon received word on Monday that her brother Joe, who is with the Royal Flying Corps in England, had been hurt. We trust he may soon recover.

Miss M Mahoney is home from Hamilton on a short vacation.

There is some talk of lowering the price of snow here, as the supply now is far in excess of the demand.

Mesdames Hergott and Shuett of Mildmay visited at Mr Jos Shuett's last week.

CASTORIA

In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

WILLOW CREEK

Patriotic Dance, Town Hal, Paisley, Friday, March 15. Rayner's orchestra.

Coal is so scarce that it is coming in by parcel post.

The Evangelical church people had a successful wood bee on Monday in Mr Frank Wrightson's bush.

Mrs Rowley of Paisley is visiting at Mr Wm Berndt's for a few weeks.

Wheat has only a small top this year, and does not promise a big crop.

The government's offer of seed spring wheat at $2.85, at distributing points does not look like a good a good buy for the farmer. It means the buyer has to pay the freight.

The farmers here are in favor of raising the dog tax to protect their flocks.

One of our farmers was down to Kincardine with a hog for which he received $100. Good price, Dad.

The recent wind storms caused a great deal of damage to buildings.

GLAMIS

Carnival in Paisley Rink next Monday night.

Patriotic Dance, Town Hall, Paisley, Friday, March 15. Rayner's orchestra.

The funeral of the late Donald McKinnon, of Ripley, was held on Tuesday. Interment in Purdy's cemetery.

Mr Chas McKinnon was in Ripley attending the funeral of his brother, the late Donald McKinnon

Pte Ross Woods, who is home from Overseas, called on friends in our vicinity last week.

Miss Mina Cunningham left on Friday for a two months' stay in Hamilton.

Rev Mr Reith attended the Presbytery in Paisley last week.

Mr Jackson, who has been spending some time with his daughter, Mrs Nesbitt, left this week for his home at Holland Centre.

The Ladies' Guild of St. Paul's Church held their monthly meeting in the Congregational church, 10th Kincardine, on Wednesday of last week. They were entertained to lunch by Mrs W H McKinnon.

Mr Hugh McKinnon and son Mac, who spent most of the winter with friends on the 10th, returned on Friday to their home in Minto, Man.

We are sorry to report the illness of Mrs Neil McLure, but hope to see her around again in a few days.

Mr Chas McKinnon, who occupied the Baptist manse for the last few years, purchased a house in Ripley and will be moving soon.

Mr D C McKinnon is leaving soon for his new home near Ripley. Before going, the members of the board committee of the Presbyterian church, of which he is a member, met at the manse and presented him with a book of poems.

Mrs Nesbitt held a sale on Saturday, disposing of her horses, cow and calf, wagons and numerous other things.

The ladies of the Red Cross Society took advantage of the crowd attending the sale on Saturday and served sandwiches, pie and tea in the hall, realizing the nice little sum of $12.30.

PINKERTON

Carnival in Paisley Rink next Monday night

Mr Albert Pinkerton is confined to his bed with an attack of pneumonia. All hope for a speedy recovery. His place at the store is taken by Mr Amsey Gregg.

Mr John McKee suffered from a slight stroke last week and is still in a weak condition.

The Young People's Social which was held at the Manse on Wednesday evening was attended by a large number of young people in the vicinity. Everyone enjoyed themselves in the different games and in the musical part of the evening.

Mr Richard Garland returned from Toronto last week.

A number from here attended the carnival in Paisley on Friday evening.

Mr and Mrs Geo Sawyer and children and Mrs Colin More and children, who have spent the winter at Mr Jos Rounsey's, returned to the west on Thursday.

Three new members were received in the Presbyterian church here on Friday.

UNDERWOOD

Carnival in Paisley Rink next Monday night.

Miss Florence McKean is visiting friends in Kincardine.

Roppel Bros loaded their cars on Tuesday and starting for the west immediately. We wish them success in their undertaking.

Mrs H Drummond recently spent a few days under the parental roof in Port Elgin.

Mr Alex McMillan of Winnipeg was around this week buying horses for the west.

Word has been received here that the fifth division has been broken up. The 190th Batt has been divided into three sections the first one of which is being sent to France right away with the first Pioneer Batt. We understand that only a few of the Underwood boys are in it.

Mr Robert Murdoch visited his brother at Armow last week.

John Berndt's little boy is recovering after a severe illness.

FOR FLETCHER'S
CASTORIA

Red Cross Shipments

—The following shipment of soldier's comforts was made by the Elora Road South Red Cross Society during January and February: 36 field shirts, 123 pairs socks, 4 pairs gloves, 31 towels, 33 pair pillow covers, 24 sheets, 37 pyjama suits. 12 feather pillows, 3 quilts. Miss Mary Kerr, treasurer; Mrs. Harold Cormack, secretary.

GILLIES HILL

Friday, March 15—Patriotic Dance, Town Hall, Paisley.

We are pleased to report that Mr Rolf Caldwell, who has been obliged to keep the house for the greater part of the winter, is able to sit in his chair. His neighbors hope Bob will soon be able to go among them once more.

Mr and Mrs John White visited at the home of the former's father on the town line Bell & Eld on Saturday.

Sam Ruthven and Frank Legge are the champion fox hunters of the township. Although help is scarce these modern Nimrods managed to bag ten of these troublesome roost raiders.

Mrs Adam Case and daughter, Miss Carrie, of Oliphant, paid a visit to the home of the former's mother, Mrs Thos Haney.

The month of March generally witnesses some changes in most communities, and this district has recently been having an epidemic. Mr John McAllister has leased Mr Robt Caldwell's 200 acre farm; Mr and Mrs Thos Nicoll have moved from the old Munn farm to the McIntyre farm vacated by John Walpole; Mr Gideon Grose, of Chesley, has moved to his farm recently rented by the Nicolls. Mr Grose has been a factory hand all his life, and farming will be a new occupation. Mr John Bowie has now sold his farm to John Walpole, who intends moving as soon as Mr Bowie moves out. We are sorry to lose Mr Bowie, as he is one of the industrious class whose thrift is one of the great assets of our country. In this time of stress to those who have come to the neighborhood we extend a hearty welcome, and to those who leave we wish continued prosperity wherever their lot may be cast. We understand Mr Bowie intends going west.

Mr Wm Henry has purchased 40 acres from his brother Sam on the 10th Bruce.

CANTIRE

We have had some bad storms this winter, but have always managed to keep along the middle of the King's highway, but Saturday night's storm made deviations necessary, and for long stretches the road is in the ditch.

Mr Angus Taylor's wood cutting outfit has been working for farmers in this vicinity recently. Angus has wood cutting down to a science, and is always found to keep right on with his knitting.

Miss Annie McDonald left last Thursday for Ann Arbor, Mich. to visit her sister-in-law, Mrs Dr Bell, who is dangerously ill with meningitis.

Mr Howard Johnston, who spent the winter here, has left for his home at Earl Grey, Sask.

Misses Celina and Maggie Goer, of Port Elgin, spent a week visiting their aunt, Mrs Henry Winch.

Mr John Walpole and family have been for the past week stopping with his father, Mr Geo Walpole. John, who lived on the McIntyre farm at Gillies Hill, after his auction sale moved to Chesley, intending to work in the factory. Since then he has bought Mr John Bowie's farm at Gillies Hill and will move his effects there as soon as Mr Bowie can move out.

Mr and Mrs Mac McCaddet, of Yorkton, Sask, are visiting friends here.

Shippers and Farmers' Club Clash

Hogs sold Monday at $18.75. It is true that the market price for the day was $18.50 but another farmers' club has made its appearance as shippers. It belongs to the South of Wiarton, and the regular shippers were determined that the buying would be keen, so up went the price. It is likely, therefore, that Wiarton will be a good spot to all hogs now for some time. The market price will not cut much figure. It is understood, however that many of the farmers have signed and will stand pat. Those who have not will probably sell to the highest bidders.—Wiarton Canadian Echo.

—At the coming session of the Dominion Parliament the Union Government will propose an amendment to the Military Service Act bringing within its operation young men who have reached the age of 20 since the Act was passed. The present measure specifically exempts those who should reach 20 years after it became law. It is expected by this amendment that 45,000 additional troops will be secured.

GENERAL supervisor for the village of Paisley (union) may be made known in enquiry, by the town clerk. Applications received up to Thursday, 21st March, at 5 p.m. J CLIFFORD, Clerk

A Truck for the Farmer

FARM equipment which will effect a time and labor-saving, and therefore a money-saving, must be carefully considered by every good farmer now-a-days.

The farm wagon, which for years was the most useful of all farm equipment, is now being replaced on the best farms by a sturdy, dependable motor truck. The truck will haul any farm product—fruit, grain, vegetables, stock, fertilizer, or wood—around the farm, or to the town or city many miles distant, in half the time, and at a much lower cost.

The Ford One-Ton truck is a rapid, economical and very serviceable means of transport. One of these on your farm will save you weeks of time in a single season and will enable you to pass through a crisis of labor shortage with less difficulty.

The Ford truck is supplied as a chassis only. This permits you to select any of the many body styles especially designed for the Ford truck and already on the market. Thus you can mount the one which suits your individual requirements.

Price $750 f.o.b. Ford, Ont.

THE CITY BAKERY

Change of Business

HAVING sold out my entire stock to MR. D. H. COOPER, who was my first baker, and who had the fame of being one if not the best baker Paisley has ever seen, I take this opportunity of expressing my appreciation to the public for the generous trade they extended to me, and would ask that the same generosity be shown my successor. Mr. Cooper is known to you all and does not need any words of recommendation from me. Again thanking one and all.

F. S. MacLachlan

—Mrs. (Rev.) Little is visiting friends in Toronto.

Business Change at Eden Grove

Mr. Mac Scott, who was recently appointed postmaster at Eden Grove, has bought the general store of his predecessor in that office, Mr. Alex McKeeman, and has opened up in the old stand. Mr. McKeeman, after several years' experience in this store, is going west to engage in business on a larger scale.

Red Cross Shipment

Contents of bales of Red Cross supplies in February shipment by the Red Cross Workers of S S No 14 Bruce: 34 flannel shirts, 19 sheets, 3 hot water covers, 7 flannelette shirts, 21 prs of socks. Sent to Nursing Sister Jessie Ross on March 7: 5 bales of socks, 36 flannel shirts. Pres., Bertha Moulton; Treas., Mrs Neil McDonald; Sec'y, Reta McDonald.

Three Medals for Paisley Students

As a result of the Victory Loan essay competition the following medals were awarded to those standing first in Paisley Continuation School: 1st prize—silver medal—Alan Shoemaker; 2nd prize—silver medal—John Brown; 3rd prize—bronze medal—Lorne Cargill. The essays were sent to Toronto by the principal, and submitted in the provincial contest. The boys are to be congratulated upon the honors they have won for themselves and the school. These medals were given by central committee in charge of the Victory Loan, three being offered to each collegiate institute, high school and continuation school in the province.

—Mr. and Mrs. D. Parliament are away on a visit to friends at Galt and other places for a few weeks.

—At Mr. Robt. Burns' sale in Elderslie last week a wagon and several other implements were sold for more than he paid for them a few years ago.

—Word has been received of the death of Harry Smith, of Beckenham, Sask., in his sixty-seventh year. Mr. Smith was a resident of Paisley some forty-five years ago, and was a brother of the late Mrs. Robt. Petrie.

—Mr. H. Reed received word on Monday that his son, Pte. Norman Reed, had arrived at St. John's, N.B., from overseas. Pte. Reed had been in hospital for several months suffering from trench fever and rheumatism, and is not fit for further active service.

Contributions Acknowledged

The Women's Patriotic League has received contributions of $40 from Ahlem Lodge, I.O.O.F., $25 from the Continuation School Literary Society, this being from carnival proceeds, and $3 from Shoemaker brothers, which is part of their carnival prize money.

Barney Stanley with the Pacific Champions

Vancouver hockey team pulled out with the Pacific championship when a former Paisley boy, Barney Stanley, sent the winning shot into the nets in the closing game with Seattle. The team is playing in Toronto this week for the Stanley Cup. Mr. I. Stanley went down to see the games.

A Woman's Problem

Stripped Herself of Her Little Artifices to Save a Young Girl.

By Frank Filson.

"Come here, girl; don't look at me as if I were a dragon!"

Elsie went forward and looked at Miss Ingleby with an expression of so much mingled hatred and admiration that the elder woman flashed her white teeth and her eyes twinkled exactly as they did in the posters with which almost every boarding in the country had been decorated at one time or another.

She went forward defiantly, but a moment later somehow she found that she was crying upon Miss Ingleby's shoulder, while the singer caressed her and patted her hair gently.

"So I have stolen her beau away from her and she wants him back!" whispered Miss Ingleby. "Isn't that so, dearie?"

Elsie raised her head. "I shouldn't mind if—if you meant to marry Tom," she sobbed. "But I know you are only amusing yourself with him, because Tom is much younger than you."

"How old are you, child?" inquired Miss Ingleby.

"Twenty," said Elsie defiantly.

"And Tom?"

"Tom is twenty-five. And you must be nearly thirty," said Elsie. "So I know you don't mean to marry Tom. And we were to be married at Christmas, and now—how he won't speak to me."

The match between Elsie Lennon and Tom Banks was approved by all Kentville, for Tom was a rising young business man of the town and Elsie's father, old Major Lennon, who kept the summer hotel, had been one of the first settlers. And they had been sweethearts for years.

Since the singer had come to spend a couple of weeks' vacation, however, he had had no eyes for poor little Elsie. He seemed fascinated by the older woman's bright eyes and witty talk, her mature ways and air of the world.

"Never you mind; you shall have your Tom again," whispered Miss Ingleby encouragingly.

But it seemed a harder problem than Miss Ingleby had expected. She had not meant to lead Tom on. But a woman of the world often forgets that the light interchange of repartee and badinage may be the cut and thrust of mortal earnest to an inexperienced young man.

It was Tom who furnished her with her opportunity that evening when they sat together on the piazza.

"Miss Ingleby," he said, "I want to tell you something. You are going away on Thursday—but I don't want you to go out of my life. You have made me love you—"

"On Thursday Morning I Will Give You My Answer."

"Love you!" she exclaimed. "Why, you are nothing but a boy!"

"I am twenty-five," he answered sullenly. "I know I may be a year or two older than I am. But what love exists age does not count. I—"

"Mr. Banks, listen to me," said the singer. "Do you think it the part of an honorable man to make love to one woman when you are engaged to another?"

"No, I don't," he cried. "But how can one help whom one loves? I am fond of Miss Lennon, but since I have known you that other love of mine has seemed tame and weak. I was only a boy when I became engaged—now you have made me a man."

"Will nothing I can say disillusion you?" asked Miss Ingleby despairingly.

"Nothing," he answered. "When I look at you you seem the incarnation of all beauty to me. I want you; I don't care for honor or duty; I want you."

Miss Ingleby rose up slowly. Her face was pale, her lips trembling.

"On Thursday morning I will give you my answer," she answered.

That was Tuesday evening. Tom Banks lived in a fever of happiness during the following day. He could scarcely attend to the details of his business. His whole being burned with a consuming passion for the beautiful singer. What though a few years in age separated them—two, or three, or five at most? He had known of cases of greater disparity in which happy marriage had resulted. He did not think of Elsie at all.

And she had been a silent witness of that last interview. From her little room in the wing of the house she had seen Tom seize Miss Ingleby's hand and cover it with kisses; she could not tear herself away, even though the sight scorched her heart as though a burning hand were laid there.

She dreaded the evening meal. There were but three other guests at that season; her father and herself sat at a table facing Miss Ingleby, and Tom, who had boarded at the hotel ever since their engagement. Surely Tom would spare her his presence that night. But his infatuation proved too strong for him. He entered and bowed coldly to her, nodded to the old major, who, absorbed in his soup, saw nothing of the little tragedy, and waited for Miss Ingleby to appear. And Elsie could not tear herself away, though she knew that each glance between them was like an arrow in her heart.

The door opened and a woman came in. A gray-haired woman, with wrinkles round her eyes and mouth, and pallid cheeks. She was dressed in a plain black suit of antiquated cut; she was just a motherly-looking body of forty-odd years. The major looked up and stared hard.

"Who is that, Elsie?" he whispered, as she seated herself at Tom's table.

"Miss Ingleby!" stammered the girl in amazement.

The rest of the meal was passed in absolute silence. Elsie's eyes took in every detail of the incident. She saw the expression of amazement that crept into Tom's eyes, saw him attempt to speak, choke, and at last rise and hurry from the room. And Miss Ingleby, brave Miss Ingleby who had stripped herself naked of her little artifices to save another woman, sat there unconcerned, the cynosure of all eyes, making a courageous show of eating until the last course was served. Then she went to her room.

There Elsie found her afterward. She understood that the elder woman had made atonement for her offense. There could be none greater than that. The dazzling beauty, the pride of the footlights, turned into a plain old woman to save an innocent girl's heart.

"Why did you do it?" whispered Elsie.

"Because," answered Miss Ingleby slowly, "I was young once, and sweet and innocent—like you."

She kissed her good-bye and none of them saw her again. But on the Piazza Elsie found Tom, walking like a madman. When he saw her he came humbly up to her.

"Elsie," he said, "you know what sort of a fool I have been. I suppose we can never be the same to each other again, but if you will give me a chance—"

"Perhaps we can be more, Tom," she whispered. And she knew that from that moment hers would be the stronger soul; that the innocence of youth had yielded to the knowledge of maturity; that the sheltering love she bore Tom was immeasurably stronger than the girlish adoration which was gone for ever.

Gunns Shur-Gain Fertilizer

A CITY OF HISTORY.

Jerusalem Holds Interest of the Entire Christian World.

Palestine gave me a psychological experience that I shall never forget, writes Hester Jenkins. I had not been very desirous to travel there because I knew that most of the sacred places such as Adam's Tomb, David's Tower, the Upper Chamber, even Calvary itself, were merely places tagged by fifteenth century pilgrims with no regard to truth; I knew that Christianh had quarrelled scandalously over the city, and that many superstitions had usurped the name of religion, and I expected dirt and disillusion. But gradually I came to recognize in the land the setting for the wonderful life of Jesus and the background for the Hebrew Scriptures. As we steamed past Sidon and Tyre, one beautiful summer Sunday, I felt a distinct atmosphere quite different from that of Syria. It became intensified in Jerusalem, where I was never unconscious of it. And when I entered the Church of the Sepulchre, although I knew that Christ did not lie there, I was struck by it as by a wind. This emotional atmosphere hung over the whole country, from Jaffa to Nazareth, and only when our train left the Sea of Galilee did it suddenly drop away.

I explained it to myself as the atmosphere of tears and prayers and aspirations that had gushed forth in this land of holy memories. It seemed to me, especially as I stood before the spurious tomb of Christ, that I was bathed in the emotion of past pilgrims. It is this that makes little, poor, insignificant Palestine the greatest country of the world. Men have so deeply loved here. No city in the world has known such abandonment of sorrow and of ecstacy and of prayer as has Jerusalem.

About the House

HOUSEHOLD WORDS TO THE WISE.

What would you do if you found a rent in a conspicuous part of your raincoat?

Lay the coat on a flat surface so that the torn parts fit perfectly together and lay adhesive plaster over the torn place on the wrong side of the goods. Press together with the fingers and let dry. A tiny hole in coat, cloak or trousers may be mended in the same way with plaster of a similar color. Kid gloves and umbrellas are better repaired thus than darned.

How may you prevent the moisture from a potted plant marking the varnished table on which it stands?

Place under it a square pane of glass, hidden by a paper or linen doily.

What would you do to render palatable the morning cup of hot water prescribed by your doctor?

Add a little celery seed and a pinch of salt and transform it into a delicate bouillon. Some persons prefer a dash of lemon juice.

How would you take the shine from black garments?

Rub the spots with pieces of raw potato.

What would you do for the child whose tender heels are always blistered by new shoes?

Place over the heel a square of surgeon's plaster. This prevents friction of the skin by the constant rubbing of the shoe and is a sure preventive of blistered heels.

When you need the whites of eggs only in cooking how may you preserve the yolks?

Make a small hole in the shells, let the whites run out. Wet a tiny paper square in the white and seal the hole. The yolks may thus be kept fresh for several days.

How would you make a good mustard plaster?

Mix the mustard with white of egg instead of half flour. This will never blister and the plaster is lighter and more comfortable.

Do you know the "best way" to clean stone steps, stone window sills and kitchen utensils that have become discolored?

Get a nickel's worth of sandpaper, coarse and fine. Use the coarse grade on sills and steps. The fine is excellent for cleaning almost everything round the kitchen.

Is it necessary to discard your window shades that are soiled or wrinkled at the bottom?

No, they may be made over by removing them from the rollers, turning them upside down and, with a loose machine stitch, hemming the other ends. Run the sticks through these, attach the pull-cords, then tack the worn ends to the rollers and set up again.

How can you make ice cream without a freezer?

Use the fireless cooker. Prepare in the usual way and pack in the cooker. Use more salt than usual and pound the ice fine. After one hour, beat thoroughly. Three beatings will make it beautifully smooth.

If your scissors are dull how can you sharpen them quickly and easily?

Cut the neck of a bottle with the scissors as if you were trying to cut the neck off.

What would you do to protect your garden seed while germinating if you were troubled with moles and mice?

Preparatory to plantings, soak the seed for twenty-four hours in one quart of water to which one tablespoon of turpentine has been added.

Have you an economical idea for mopping your hardwood floors?

Saturate the ordinary fibre mop with crude lemon oil. Partly dry and it is ready for use. This oil costs only from ten to fifteen cents a quart and is recognized as one of the best treatments for hardwood.

Have you an easy method of darning large holes in stockings?

Baste, on the wrong side, a patch of netting of the same color as stocking. Turn and darn on the right side.

When baby sits at the table how may you protect the tablecloth without the use of the unsightly tray?

Use a large piece of plate glass with beveled edges. A square of white oil cloth is also neat and useful for this purpose.

How would you freshen a faded carpet?

Take it up, beat well and brush. Spread it face down on the lawn. When it is fastened down again, rub well into it with a clean floor cloth, a mixture of hot water and one pint of vinegar.

School Luncheons.

It takes time to pack school luncheons, but it is time well spent; and after the boys and girls are grown and out in the world, mothers look back on this as one of their pleasantest duties.

If the children are at school all day, they must have substantial food, which should be carefully prepared and packed. Luncheon kits of fibre may be purchased, but a basket is about the best choice, as it does not retain food odors. Keep on hand a supply of paper napkins and waxed paper. Provide an aluminum cup and spoon and, if possible, a thermos bottle to hold hot soup or cocoa.

In satisfying the craving for sweets, provide things which have food value. Raisins, figs, dates and prunes are excellent for this purpose. So is a bit of maple sugar or sweet chocolate. Buy the best prunes, wash through several waters, spread out on a platter to dry, then put away in a tin box and they will be ready for use. Raisins, figs and dates may be bought in packages.

Hot, nourishing soup in the thermos bottle, bread and butter sandwiches, an orange and a cake of sweet chocolate combine to make a wholesome and satisfactory luncheon to carry to school.

Sandwiches should be wrapped in waxed paper, and the crust left on the bread, for it is good for the children's teeth. Whenever possible, put in fresh fruit—apples, oranges and bananas are wholesome and carry well. Cookies (not too rich) or bread and jelly are better for little "tummies" than pie or doughnuts. Vary the luncheons from day to day, for something which comes as a surprise will be doubly welcome.

The strong smell in old fowls can be removed by washing in warm soda water.

The secret of perfect frying is to have the fat hot enough to brown the outer surface instantly.

When the eyes say one thing and the tongue another, the practical man relies on the language of the first.—Emerson.

Watch dahlia and canna roots to see that they do not dry out completely or have so much moisture as to cause them to rot.

Food Control Corner

During the next four or five months food conservation on this continent and among their own people must be almost the sole hope of the Allied nations in Europe and of friendly neutrals." No effort that can be made by the people of North America can add any considerable amount of new food to the available supplies before next fall. Stocks are dangerously depleted, particularly in the case of cereals and meats. The problem is to "stretch" these supplies over the interval until this year's crops are harvested. While preparing for increased production, we must also do our utmost to help our Allies over the next few months when starvation will be threatening them dangerously.

Official information, much of it confidential, received during the past few days emphasizes the scarcity of supplies of cereals and meats and the necessity of avoiding at all costs encroachment upon the supplies for the armies. In Great Britain, in France, in Italy, the people are alive to the situation. They know something of what the next few months will mean. Their spirit was expressed by Lord Charles Beresford the other day when he said: "We are tightening our belts and we are going to win."

A recent cable from London stated that the present meat ration in Great Britain is not more than one-half of the amount to which the people have been accustomed. Accompanied as this is by the restrictions on the consumption of bread it cannot but entail physical loss and privation. Canadians too, must tighten their belts and help the Allies to win. Use should be made on this continent of every available substitute for wheat, beef and pork. Upon our food service depends the very lives of thousands of women and children in the Allied countries.

God's Acres.

From a first-class war-story, "The Red Planet," by W. J. Locke, we have just learned a beautiful thing that we had not known before. It seems that the French Government has assigned to the British, ownership for all time of the soil occupied by British graves in France. Could anything be more appropriate, more touching, more magnificent? In time perhaps France will be studded, too, with the graves of American soldiers. Can anyone doubt that henceforth for all world purposes Britain, France and the United States will be bound together in an indissoluble friendship?

Take it as Soup before Meals

I wish there was a Walker House in every little town

I wish there was a WALKER HOUSE
In every little town;
Then I could travel merrily,
And always sit me down
At night in peace and comfort,
Happier than king with crown,
If there was just one Walker House
In every little town.

I wish there was a WALKER HOUSE
In each place where I go.
The comforts of my dear old home
While on the road I'd know.
The meals—the Cheerful Service, too,
Would leave no cause to frown,
If there was just one Walker House
In every little town.

OGILVIE'S STANDARD

SPRING WHEAT FLOUR

THE OGILVIE FLOUR MILLS CO. LIMITED
GOVERNMENT STANDARD SPRING WHEAT FLOUR
WEIGHT OF CONTENTS 98 LBS WHEN PACKED
MONTREAL, CANADA
BY SPECIAL APPOINTMENT TO HIS MAJESTY THE KING
STANDARD-98

THIS is the WAR FLOUR of the OGILVIE MILLS—a loyal product to conserve Canada's resources and, at the same time, give the public the best possible flour that can be milled according to the Government standard.

This War Flour is excellent in quality and flavor—but it is slightly darker in color than "ROYAL HOUSEHOLD" to which you have been accustomed.

It is just as hard for us to give up milling "ROYAL HOUSEHOLD" as it will be for you to forego your favorite brand; but our "STANDARD" Flour will nevertheless make delicious bread, rolls, biscuits, cake, pies and pastry. If you have any difficulty—just drop us a line; we have a staff of expert chemists and bakers, whose experience is at your service.

Just as soon as the Food Controller will allow us to mill "ROYAL HOUSEHOLD" again, we will tell you of this happy fact.

In the meantime, the new regulations—being in the best interests of the British Empire—demand the whole-hearted support of the Millers and the Public.

Certain stores and dealers have stocks of "ROYAL HOUSEHOLD" still on hand. In order to avoid any confusion or misunderstanding, all "STANDARD" FLOUR will be plainly branded as such.

When all your "ROYAL HOUSEHOLD" is gone, make sure of getting the next best grade by ordering

OGILVIE'S STANDARD

Grocers everywhere have it,—don't forget to stipulate "OGILVIE'S." It will be your surest guarantee of the highest grade obtainable.

The OGILVIE FLOUR MILLS Co., Limited
Montreal — Fort William — Winnipeg — Medicine Hat.

Daily Capacity, 19,000 Barrels

The Largest Millers in the British Empire

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

CULTIVATING THE GARDEN.

Nothing will take the place of cultivation for growing crops. If you cannot give what is needed to your garden, better not expect good results, as you will not get them.

There are three particular things we aim to accomplish when we give cultivation to growing crops, and by "cultivation" is meant both that given by hand and by tools or machinery. The effect is the same; the difference is merely the means used to accomplish it.

First. The keeping down of weeds, which, if not kept in check, will crowd out and smother the growing crops, and deprive them of needed moisture and plant-food. This is a serious reason for cultivation. Your garden cannot support, at one and the same time, crops of vegetables and weeds. Of course, you prefer the vegetables; hence the necessity of keeping out the weeds.

When To Begin Hoeing

Hoeing should begin as soon as the crops are planted, if the rows or drills have been outlined. Or, if the rows have been marked by quick-growing plants, such as the radish or lettuce, as soon as they appear. This is a great advantage in a dry spring season, as the soil moisture can be conserved from the beginning.

Deep hoeing is a mistake, except in a very few rare cases, which need not be considered here.

Hoeing is not as easily done as would seem. Beginners as a rule take too large a "slice" or bite with the blade at one time. This merely chops the soil into large clods, especially when deep hoeing is done. The proper way is to give the hoe a good slant, and, when hoeing for weeds, just skim off the surface. Any perennial weeds, such as the docks, plantains, dandelion, etc., should be dug out, root and all, and destroyed.

However, there are exceptions to the above, in the cases of those plants which are hilled-up. When working with these we draw the soil up around the plants, a little each time, rather than all at once, as this enables one to work the soil close to the plants as well as around them, while at the same time raising the soil around them in time to the desired height.

Much of the discomfort of hoeing is due to dull blades. A hoe should be kept sharp as regularly as an axe—for the same reason—to make it cut well. When filing make the bevel on the outer side of the blade. A clean blade also adds much to its effectiveness and lessens the labor of hoeing. The hoe should be kept polished so that it will come out of the soil free from adhering particles. Any tendency to rust can be prevented, or cured by the application of a piece of soft brick and a little machine oil to the effected places.

Value of Dust-Mulch

The second reason for cultivation, so far as the garden is concerned, is to keep on the soil about and between the plants what is known as a "dust-mulch." A mulch is a covering put on the soil for a particular purpose. We mulch about shrubs and herbaceous plants in the fall to protect them over winter by keeping the frost from the soil. In the same way we prevent evaporation by covering the ground with a mulch of dust during the hot, dry days of midsummer.

It does not require a heavy dust mulch to do the work perfectly. Hoeing for this purpose should not be done deeper than two inches—less, if you are skilled with the hoe, as it does not require a deep mulch to cut off the movement of the moisture from the bottom up.

Keep in mind the fact that the dust mulch, once made, does not last forever—or for the season, for that matter. Every time it rains it is spoiled, and the capillary action of the soil from top to bottom renewed, and for this reason the soil should be worked after all rains to break up the crust which forms on all but very light sandy ones after every rain.

This soil-crust is one of the worst things for a garden, and many otherwise good ones are spoiled for the best results by ignorance of this fact. Keep it broken up all season.

For the larger garden there are the hand-wheel tools, both for planting and cultivating purposes. These will take away a very large percentage of the drudgery of the garden if used where the area is sufficient to warrant it. These combination tools can be had for a number of purposes.

Cultivating After Rain

When using the wheel-hoe, set the teeth so that the cultivating will be shallow—not over two inches deep, and teach yourself to run close to the plants without touching them. This will obviate much back-breaking work in the following up with the hand-weeder always needed after the wheel-hoe has gone over the garden, to finish off the few weeds which cannot be caught by the wheel-hoe.

It should be understood that while cultivation is required after every hard rain, yet you must use judgment not to do this before the soil is dry enough to have it done without making it harsh. A good test is to take a handful of soil and squeeze it tightly. If, when the hand is opened, the mass of soil breaks apart or reacts, it is all right to be worked; but if it stays in a tight mass, like putty, let it alone, until it gets in proper condition.

BRUCE'S SEEDS

BRUCE'S FAMOUS ROOT SEEDS

Bruce's Giant Feeding Beet—In two colors, white and rose; a cross between Sugar Beet and Mangel, splendid croppers and keepers, and unequalled for feeding, easily harvested. ¼ lb. 30c; ½ lb. 55c; 1 lb. $1.00; 5 lbs. $4.75 postpaid.

Bruce's Mammoth White Carrot—A half long variety, heavy cropper, splendid quality, easily harvested, grand keeper. ¼ lb. 60c; ½ lb. $1.10; 1 lb. $2.00 postpaid.

Bruce's Giant Yellow Mangel—An intermediate variety, heavy cropper, good keeper, of splendid feeding quality and easily harvested. ¼ lb. 30c; ½ lb. 55c; 1 lb. $1.00; 5 lbs. $4.75 postpaid.

Bruce's Selected Swede Turnip—A grand purple top variety, splendid for the table and also for feeding cattle. A grand keeper and shipper. ¼ lb. 40c; ½ lb. 75c; 1 lb. $1.40; 5 lbs. $6.85.

FREE—Our valuable 112-page catalogue of Seeds, Plants, Bulbs, Implements and Poultry Supplies. Write for it to-day.

Poultry

The Value of the Trapnest.

Perhaps there is no single factor which has played so important a part in the past few years in stimulating the production of better poultry than the trapnest. By the use of this device hundreds of farms have been able to reduce their expenses by one-half and at the same time have kept up their egg production. This has been made possible by careful selection of the layers and the drones, resulting in the elimination of the latter from the poultryman's flock. Formerly it was necessary to feed 1,000 hens composed of an equal number of heavy laying, profitable birds and worthless, non-laying hens. Now that the trapnest shows exactly what every hen lays in the course of the year, the flock of 1,000 hens may safely be reduced to 500 or 600 without any appreciable decrease in egg production.

The saving in feed alone by this method of selection is a great item and this, together with the saving in labor, makes it an economic duty with the poultryman to trapnest his flock, or, if unable to devote the time to this work, it is important that he raises nothing but trapnested stock. There are a number of well known breeders who have followed the trapnest system of breeding for a number of years. Their equipment has enabled them to offer the back-yard poultryman a strain of fowls that he would be unable to develop in years. Every bird raised from this superior ancestry will inherit the heavy laying qualities which are so essential to-day.

Do your bit Mr. Poultryman! See that your 1918 hens are the trapnested kind.

Horse Sense

What the Farmer Should Know.

Now let us take a backward glance at the mistakes of last year, in order to steer clear of them the present year. How much money did you make the past year? Few farmers could answer that question to the dollar, but a large proportion of them know that they have only made a bare living or run in debt. In such an uncomfortable contingency a carefully kept expense account would aid materially in finding the big leaks.

Perhaps you are running a dairy farm and sell your milk to the milk factories. How much profit are you making out of the enterprize? Do you know whether you are making any money or not? It is a capital idea to keep a bank account with each cow, that you may know how many unprofitable ones there are in the herd.

In these days of small profits and close competition a man can no more farm profitably without keeping books in some form, than a large manufacturer can get along without his salaried accountant. We would say to those that have never tried this method, begin at once, and keep a record of everything in your farm transactions this year. Set down the cost of every new tool, seed, fertilizer, amount paid out for labor, transportation, etc., and do not forget to add in your taxes and all other expenses. Be able to tell to a cent the money received from the sale of stock and other products, and at the end of the year see if you have made anything more than day wages and a bare living for your family.

If you have accomplished nothing else, when Christmas comes you will have acquired valuable pointers for next year's operations. Many farmers at the end of the year count up the cash on hand and say, "I have made so much," and yet they cannot exactly tell whether every dollar has cost them four to obtain it, as if they have made that much profit over and above interest on capital invested. But some will say, "I have not the time or education to keep books." To them I would say, such a man has no more business to engage in farming, expecting to make a profit on capital invested, than he would to fill a college professorship or the office of a bank president. In these days of high and advancing prices the farmer must and should know where he "is at," just as surely as the most strenuous business man or manufacturer, or sooner or later he will find himself a prey to the money shark or the land grabber, and in these days of widely diffused and easily obtained education the average farmer has no right to be a back number in the business world and have dealings with shrewd business men and speculators who seek, and do, in many cases, increase their wealth at the expense of the too often careless farmer.

It is not what we get but what we give,
Not what we pray but as we live;
These are the things that make for peace,
Both now and after time has ceased.

The Dairy

One morning recently, I was over to the next township on some business. I went in to see a friend of mine, who has a large farm. I walked out to the barn where he was just finishing his "chores." I was surprised to see the change that had taken place in his tie-up.

"Good morning," I said to him, "this is certainly a surprise! The last time that I heard from you, I understood that you were going out of the dairy business. Now here you have your tie-up all made over; what does it mean?"

"Well, I've found out a thing or two, since I saw you," he replied. "Yes, I was pretty well discouraged then. You remember I had been having more or less trouble with the creamery. They were 'kicking' about my cream all the time; they said it had 'off' tastes and would not keep. I could not seem to tell what the matter was; I thought perhaps that they were prejudiced. I was ready to sell my cows.

"One morning as I was milking my cows, a neighbor, who is a successful dairyman, came in. We got to talking about things and he advised me not to give up. 'I think you can make things all right,' he said. He called my attention to the condition of my cows. They were all covered behind, on their flanks and tails, with dirt and manure. Even their udders were none too clean. But I did brush those off when I milked. But with the cows that way I was unable to keep the milk clean when I milked, pieces of dirt and dust would get into the pail. You see, I got careless and did not clean them off regularly. Nor did I give them much bedding and they would lie down in the droppings and get all dirty.

"You notice that I now have swing stanchions hung on chains? If you remember, I used to have them tied with chains around their necks attached to a pole. With that arrangement they had too much freedom so that gave them a chance to get dirty. But these stanchions give them enough liberty and at the same time keep them from getting too dirty.

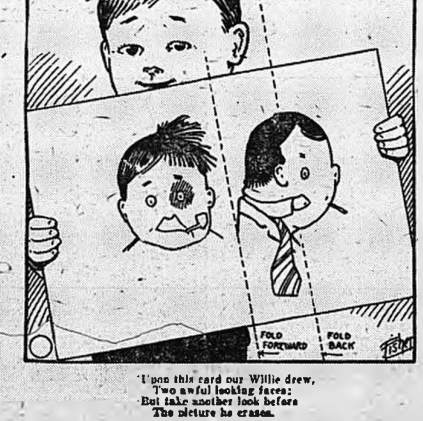
"I began to keep them cleaned off and I was very careful not to allow any dirt to get into the milk. You see, I always supposed that the separator took out all the impurities! I know now after he explained to me, that it might do so with the large particles but by letting the large pieces get in, there was more or less of the dirt that got dissolved and went through the separator into the cream. I know of farmers that have that same idea; they think that the separator can purify the milk. That is not so.

"Well, since I made these changes in the tie-up, and also have been careful to keep everything clean when milking and separating, I have had no more complaints from the creamery."

Gunns Shur-Gain Fertilizer

A Careful Maid.

Her grandfather gave to Elizabeth Ella
A perfectly beautiful silk umbrella.
It was rosy red, with a tassel so gay;
And I thought, "I will wait till the next rainy day
And see our dear little Elizabeth Ella
Walk proudly forth with her new umbrella."



But what do you think? On the very next day,
When it rained "cats and dogs" (as we hear people say),
All drenched and dripping, I met my daughter,
Looking much like a maid just out of the water.
"Where, where," I cried, "O Elizabeth Ella,
Is your perfectly beautiful new umbrella?"

She gazed at me in the greatest surprise
And a look of reproach in her big blue eyes.
"Now do you once think," said she,
"that I'd let
That lovely umbrella of mine get wet?"

The war has cost Germany approximately 22 billion dollars to date.

FUNNY FOLD-UPS

CUT OUT AND FOLD ON DOTTED LINES

Upon this card our Willie drew,
Two awful looking faces;
But take another look before
The picture he erases.

GOOD HEALTH QUESTION BOX

By Andrew F. Currier, M. D.

Dr. Currier will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not it will be answered personally, if stamped, addressed envelope is enclosed. Dr. Currier will not prescribe for individual cases or make diagnoses. Address Dr. Andrew F. Currier, care of Wilson Publishing Co., 73 Adelaide St. West, Toronto.

Boils.

A boil or furuncle is a painful inflammation of the skin forming around a hair follicle.

One or several may develop in the same area at about the same time, or there may be successive crops of them.

While it is the rule that one hair follicle be involved, it is possible for the inflammation to include as many follicles as there are openings in the boil when it gets ripe and discharges.

This kind of eruption seems to have a particular predilection for young adults, though the exclusive privilege belongs to no age or sex.

Boils often come at the end of winter or in the early spring, when so many people feel run-down and seem to think they require medicine for spring cleaning.

Boils are caused by germs which produce suppuration and which may generally be found on the skin of most people, unless they have formed the habit of scrubbing and cleaning it with powerful antiseptics.

They may be perfectly harmless, but if the individual, and particularly his skin, offers slight resistance, and the individual is debilitated and run down, the germs will improve the opportunity to develop and cause boils.

Their development is encouraged when the diet of the individual is a faulty one and when he indulges freely in greasy food, half baked bread, pies, pastries and gravies.

Nervous irritation, overwork, constipation, and local irritation by friction of the skin, also favor their development.

Almost everybody has had them and knows how they act, look, and feel.

The tendency to these unpleasant visitors may be overcome by a careful attention to diet, abundance of sleep, out-door exercise and perhaps a good vegetable or mineral tonic.

The development of a boil should be arrested if possible, and I am sure it is often possible.

Sometimes this can be done by the careful application of pure carbolic acid, or some other mineral acid or caustic.

The injection of suitable vaccines is fashionable at the present time.

Heat applied to the boil will hasten its development, and a free incision will lessen tension, relieve pain, favor drainage and facilitate the removal of the core or slough.

The cleaner the wound is kept with antiseptic applications and dressings, the less the possibility that the infection will extend, and the sooner the patient will get well.

QUESTIONS AND ANSWERS.

L. H.—1. What causes mitral insufficiency?

2. Is it curable?

3. What causes high blood pressure? Could it be due to the heart trouble?

Answer: 1. It is due to a lack of proportion between the mitral valve and its opening; in other words, the valve does not fit tightly into its opening—thus, causing the blood to back up when the heart contracts.

2. It is curable, though it may undergo compensations.

3. Changes in the walls of the arteries, due to increased tissue formation, which comes naturally with advanced years, or as a result of certain diseases. It is possible that the condition of the heart might have a bearing upon this condition of the arteries.

PLANNING THE FARM ORCHARD

By L. H. Cobb.

This is the question that comes to everyone who intends to set an orchard, or even replace dying trees in the orchard they now have. It is not an easy matter to select the varieties for an orchard, and too often it is practically left to the fruit tree agent who takes the order. This is a serious mistake in most cases, for the best sorts are often the cheaper trees, and the agent is directly interested in selling the most expensive. He wants to sell the specialties his house is introducing if he can, and he will extoll them at the expense of the standard varieties that you should buy instead.

Use Recommended Varieties

Very often it will be a good plan to get in touch with the Provincial Experimental Farm and find out which varieties they will recommend, for they will know which sorts will do the best in the district, and can give advice as to the selection of the special kind of soil and location you have. Another good plan is to find out the names of the most popular varieties growing in your neighborhood, and see how you like them by sampling the fruit and examining the trees. Your soil may be such that a variety that is a general favorite will not be thrifty with you; the condition of the trees of this variety in your vicinity will tell the story. It wouldn't be wise to plant a variety that is dying out right along for your neighbors, provided another variety can be had with similar qualities.

For the Season's Supply

The orchard should be carefully planned to meet the needs of the family during as long a season as possible. There is no need for a dearth of fruit at any season if this is done. From the time the Early Richmond cherry starts you off in the spring until the last Northern Spy apple is consumed there should be no let up in the supply of fruit in a condition to use. In spite of the fact that this is not only possible but easily managed, there are seasons when it is almost impossible to buy any kind of fresh fruit locally produced and scarcely a farm will have a regular supply.

Cherries, plums, apples, and peaches have good varieties ripening in order from the time the first is ready until the latest variety ripens, while apples alone can be so planted as to ripen as wanted.

Varieties for the Home Orchard

Fruit for storing and putting up in various ways for future use must receive due consideration, but too often the whole orchard is run to varieties best suited to this purpose. The Morello cherries, Elberta peaches, wild goose plums, and winter apples get most of the orchard. There is plenty of fruit for winter but a shortage during the summer season except when these special sorts are in condition. Many like the Early Richmond cherries better than the Morello, and the Montmorency comes between these and is superior to either for any purpose, to my mind. The Wild Goose is the poorest plum grown when it comes to quality, and it is a mystery to me why it is so generally planted when there are so many really good sorts. The Japanese are the best plums by all odds. The Elberta is a splendid peach, but there are others. There is no need to be without peaches, the big white late clings are gone with the coming of frost.

The pear season is shorter, but there are some of the early fall pears that can be used quite well before the main varieties ripen. Keiffer is planted exclusively and is a good general crop sort and very reliable, yet I would not want to do without a few trees of Tyson, Seckel, Duchess, and others that are newer and as good or better. The Bartlett is the pear par excellence, but the tree is not a good grower.

The Size of the Orchard

The size of the orchard must govern the selection to an extent, as will the purpose for which it is planted. If it is intended to sell some fruit on the local market the home orchard can be relatively increased all along the line and give the best chance for a steady profitable market. If a larger acreage is contemplated with a view to selling on the general market then some standard variety will be selected for the larger portion of the orchard as the packing and grading can be done at the least expense, for it is just as easy to sell the whole crop of one kind as it would be to have it divided up among several. For the ordinary farmer, though, the local market with the smaller supply of the many varieties coming in regularly would give the best chance to get good prices.

FERTILIZER PAYS
Better than ever. Write for Bulletin
ONTARIO FERTILIZERS, LIMITED
WEST TORONTO • CANADA

The Paisley Advocate

PAISLEY, MARCH 20th, 1918

—Quebec Province has some strong advocates of compulsory education, who are giving the public an analysis of the conditions that prevail in that province. It is said that of 160,000 children in Montreal, only 83,293 attended school, and only 22,576 know anything of long division, Canadian history and geography. The children went to work too early, and criminal returns for juveniles showed the majority of delinquents were not attending school.

—Britain is deplorably slow to see the evils of the drinking customs, drawing behind Canada in this respect, but she is making some progress towards reducing the beer famine. On March 1st 215,000 tons of barley were taken from brewers and malsters, and a further 200,000 tons will be saved yearly by restricting the standard of barrelage and using substitutes which are vastly more economical. The brewing materials for 1918 would be equivalent to 512,000 tons of shipping, compared to 1,500,000 early in the war. Lloyd George declared in an address on March 13th that no spirits are being manufactured at all, and anyone who four years ago predicted such a thing would not have been believed. The Premier reiterated that if it came to a question of choosing between bread and beer, the Government would not hesitate a moment.

—Results of operations of the Canadian Pacific Railway Company for the year ending Dec. 31st last were: Gross earnings from railway and lake and coastal steamers, $152,389,344; working expenses, $105,843,816; net earnings from railway and lake and coastal steamers, $46,545,018; deduct fixed charges, $10,229,143; surplus, $36,316,873; deduct contribution to pension fund, $500,000; deduct net earnings of coastal steamers, commercial telegraph and news department, transferred to special income account, $1,968,683; net revenue from earnings of railway and lake steamers available for dividends, $33,848,192. After payment of all dividends declared for the year the surplus from earnings of railway and lake steamers is $12,420,915. Special income for the year, after making allowances for contingent reserves, $10,711,299.

—The Grain Growers' Guide voices western sentiment in favor of government ownership of railways, and wants all the roads nationalized, including the C.P.R. The Guide says: "Anything short of government control and operation with immediate or future nationalization of all the railways, will fall short of a solution of the railway problem. The fact that the C.P.R. is a well-organized and well-operated railway is no argument against nationalization. Any railway would be well operated and well organized if it got all the money it wanted from the public treasury. Canada remains to-day the only important country in the world with private railways. The whole trend of modern civilization is towards the nationalization of these great public utilities, with their tremendous economic and political power. Public opinion in Canada, outside of financial circles, largely favors nationalization of railways. The new government is strong, with powerful backing from the people. It is time for the government to act and settle this momentous question in the proper manner."

—The Ontario Legislature is about to enact legislation which will supercede the present election law. The voters' lists are to be compiled by the returning officers. In a well organized province like Ontario it seems an unnecessary proceeding to have special voters' lists made up for each provincial election. Our municipal lists should fill the bill, and any special revising or adding to could also be left in the hands of the municipal authorities when election time does come around. Giving party men a job at compiling voters' lists just at election time is one of the petty things that go to make up the despicable patronage system, and the sooner the Ontario Legislature can find a way of dispensing with a great deal of the pre-election business of this kind the better for Ontario politics. There is one point in connection with the election law that has never been provided for, viz. allowing a man to vote who has recently moved from one riding to another, sometimes only across the road. Our municipal legislatures should be able to frame up a clause that prevents a man being disfranchised under such unjust circumstances, and it should be done so that he will vote in the constituency in which he would be a resident for the ensuing period.

Driver Liable for Breaking Mail Box

The following appeared among the legal queries and answers in Saturday's Mail and Empire:

J McK, Pikerton—I was driving along the road in the night, and on account of the darkness I drove into the ditch and ran into a mail box post and broke it down and my vehicle was damaged and I was injured. Am I liable for breaking down the post box, or can I claim damages for the injury to my vehicle and myself?

Answer—Of course, it may be said that you should have kept to the middle of the road, but this is one of those accidental occurrences which frequently happen without much blame being attributable to any person. It must be assumed that the rural post box was placed at the side of the road under the authority and direction of the Post Office Department. The Post Office Department is one of the branches of the Dominion Government, and no one can sue a Government without its permission. No doubt you are liable for the cost, whatever it may be, of repairing the post and the box.

—Mr. D. L. Smith, of Dillon, Montana, in renewing his subscription, tells us that they had a very mild winter in that region, in fact hardly any winter at all, and spring is now appearing up there.

LOCAL AND DISTRICT NEWS

Clothing Caught Fire

Mrs. A. Blue had a narrow escape from being burned to death on Thursday last. As she was working about the stove her clothing caught fire. She ran outside, intending to roll herself in the snow, when her husband grabbed a broom and managed to whisk out the flames, but not before she was considerably burned about the upper part of her body.

Coal Oil Stove Exploded

The fire alarm sounded on Tuesday afternoon, following the explosion of a coal oil stove in the apartments of Mrs. Fiddler, above Mrs. Montgomery's store. The lady was lighting the stove when it blew up, fortunately throwing its flame away from her. Mrs Fiddler had the presence of mind to throw a quilt over it at once, and prevented a blaze. The fire bell was rung, but the services of the brigade were not required.

Business Changes Hands

Mr. F. S. MacLachlan has sold out his baking and confectionery business. The purchaser is Mr. D. H. Cooper, who for two or three years was baker in this shop, who is very well known here as a first-class tradesman. He and his family will be welcomed back to Paisley. All will be pleased to learn Mr. MacLachlan is not leaving town, having accepted a position with the Paisley Mercantile Co.

Big Fund for Soldiers' Benefit

Just about a year ago the ladies of Paisley held a bazaar, the proceeds of which netted something over $700. This money was, it is understood, to be used for the benefit of Bruce county soldiers who return from overseas service and require assistance in any way. Now that some of our boys are beginning to arrive back from the scenes of strife it might be well for the ladies to put their fund to work. The money should not be kept idle if there is need for it to be applied to the beneficent purposes for which it was intended.

Masonic Night

The brethren of Aldworth Lodge, A.F. & A.M., will hold an "At Home" on Friday evening of this week, on the occasion of the official visit, of the D.D.G.M., R. W. Bro. Jas. A. McDonald of Tara. All members of the fraternity are expected to be out to the lodge and entertainment.

—Rev. H. McQuarrie, a former pastor of North Bruce and St. Andrew's, Saugeen, died in Toronto last week, and the remains were brought to Port Elgin for interment on Thursday. The deceased was one of the most able and respected ministers of Bruce Presbytery. He was 84 years od, and had been living retired in the city for a number of years.

Carnival Prize Winners

Another gay gathering of masqueraders was seen at the skating rink on Monday evening. The prize-winners were: Ladies and girls' fancy costume, Reta Cormack as May Queen; gents' and boys' fancy, W. Shoemaker as "Prince Charming"; comic, Willie Glover; costume representing some book, Ross McKenzie as "Hiawatha"; hard times costume, Lorne Cargill; best couple skaters, Miss Ethel Dudgeon and Alan Shoemaker; boys' race, Fred Shoemaker; couple race, Meryl Bell and Alan Shoemaker; married men's race, T. Ellis. The broom ball match played between Ebenezer and Paisley old boys was a draw, neither side scoring.

Death of David Hanna

All old residents of Paisley and vicinity will learn with regret of the death of Mr David Hanna, who in the earlier days of the town was one of our most enterprising and progressive citizens. With his father and brother James the deceased came here from Lanark in 1849 and built a saw mill and grist mill which ten years later they sold to the late Duncan Fisher. In 1870 or 1871 David Hanna erected the Hanna House hotel, which he ran for a number of years. Later he went to Toronto, and 34 years ago went west to farm. His death occurred at Wetaskiwin, Alta. He is survived by Mrs Hanna and their only son Louis. Two brothers and three sisters are living—James in Toronto, John and Mrs Ritchie at McGregor, Man., Mrs John Fraser of Paisley, and Mrs Jos Christie in Idaho.

Hog Prices Step Up

Live pork took quite a jump up on Tuesday, without anything to warrant it except the competition between the drovers and the farmers' clubs. There are now three of these clubs organized in this section—at Williscroft, in S. S. No. 13 Bruce and S. S. No. 8 Greenock & Elderslie. For the first time the members thereof delivered hogs at Paisley on f.o.b. terms to the packing firm, also handling others than they themselves had to deliver. Result, higher bids from the drovers, and the price went up to $19.65. Should the farmers stick together on the hog selling scheme, the co-operative system is bound to develop to other branches of the live stock business. It is a case of the producers attempting to remove one of the toll gates on the highway of trade between themselves and the consumer. As this is abundantly evident to those who have been engaged in the trade for years, there will in all probability be something of a fight for who is going to handle the hogs in the future.

Rose Culture Would Help Beautify Paisley

The growing of roses is becoming more popular every year in Ontario. Some of the cities and large towns have numerous gardens in which the queen of flowers takes up a most important part. Hardy ever-blooming varieties are to be obtained at very reasonable prices that will bring delight to anyone who plants and cares for them. These do particularly well on clay soils. Even in the hardest brickyard clay the bushes will thrive and bloom profusely if only a little care is given them each season. There are grounds in Paisley where it is impossible to produce other flowers, in which the rose bushes would become a yearly joy and make the home surroundings most attractive. Buy or beg a few rose bushes this spring and give nature a chance to decorate your premises with the most effective ornamentation that can be produced. The family and the neighborg will appreciate the rose garden.

A LIFETIME OF SUFFERING

Prevented by "Fruit-a-tives" The Wonderful Fruit Medicine

60 Mansonnuve St., Hull, Que.

"In my opinion, no other medicine is so good as 'Fruit-a-tives' for Indigestion and Constipation.

For years, I suffered with these dreadful diseases, trying all kinds of treatments until I was told I was incurable.

One day a friend told me to try 'Fruit-a-tives'. To my surprise, I found this medicine gave immediate relief, and in a short time I was all right again".

DONAT LALONDE

50c. a box, 6 for $2.50, trial size 25c. At all dealers or from Fruit-a-tives Limited, Ottawa.

Pinkerton, sec'y Pinkerton Society, $50; Ina Alexander, sec'y Nova Scotia Society, $50.

Sawyer—Gilchrist—That the clerk draft a by-law to regulate and enforce statute labor for the year 1918.—Carried.

By-law was duly drafted and read a first time.

Gilchrist—Symon—That the clerk draft a by-law for the purpose of changing the road divisions as outlined by the council, same to be passed at next meeting.—Carried.

Symon—Gilchrist—That the clerk draft by-laws to appoint pathmasters and poundkeepers.—Carried.

By-law No. 573 was drafted and read a first time, appointing the following pathmasters: Div. 1 T. Gamble, 2 D. McIntosh, 3 J. Dechan, 4 A. McFarlane, 5 W. Neil, 6 A. Hedley, 7 W. Hedley, 8 S. Moulton, 9 W. Armstrong, 10 J. G. Moore, 11 D. S. Campbell, 12 A. Caskenette, 13 N. O'Hagan, 14 J. Pittman, 15 N. Pettiplace, 16 J. G. Carter, 17 J. Koller, 18 J. Strader, 19 F. Zettel, 20 A. Waechter, 21 Alex Waechter, 22 W. J. McConkey, 23 A. McKinnon, 24 A. Dietrich, 25 J. Symon, 26 W. Abbott, 27 T. O'Hagan, 28 J. Letzgus, 29 W. Kritz, 30 F. Graf, 31 A. Zettler, 32 A. Siegel, 33 W. Cumans, 34 J. Folmer, 35 G. Lippert, 36 H. Kropolin, 37 J. Brick, 38 E. Schmidt, 39 S. Brick, 40 P. Brockelbank, 41 W. D. Cargill, 42 J. Graf, 43 J. Kenny, 44 J. Meagher, 45 P. Hales, 46 A. Campbell, 47 W. Anstett, 48 A. Forman, 49 W. Taylor, 50 R. Hetsler, 51 G. Needham, 52 H. Hetterick, 53 W. T. Stewart, 54 G. Webb, 55 G. Smith, 56 J. Metcalf, 57 H. G. Clark, 58 A. Hain, 59 H. Scott, 60 W. Johnston, 61 W. J. Ross, 62 R. Teeple, 63 H. Lyon, 64 A. Watson, 65 W. Megraw, 66 S. Pollock.

By-law 574 was drafted and read a first time, appointing poundkeepers as follows: Peter Vedd, sr., Jacob Koller, H. Hehn, John Graf, A. E. Knox, W. T. Stewart, Chas. Webb, O. Lamb, R. Acton, S. Pollock, A. Kirkstown, jr., and O. Russell.

By-laws duly read a second and third time and finally passed.

The resignation of Dr. Bricker as M. O. of Health was read and accepted.

Communications from R. Vanstone, barrister, re damages sustained by Jas. Collinson through water backed on his property by roadway. This was ordered to be filed.

Symon—Gilchrist—That this council do now adjourn to meet at Pinkerton on Monday, April 15th, for general business.—Carried.

THOS. H. PURDY, Clerk

INCOME WAR TAX FORMS MUST BE FILED BEFORE MARCH 31st

It was inevitable that an income war tax law should have been placed on the statute books. The growing demands made upon Canada, as one of the free nations of the world, engaged in the life and death battle with the forces of barbarism, and the necessity of distributing the burden as equitably as possible, made the imposition of a tax, based on ability to pay, merely a matter of time. All the great nations engaged in the conflict—Great Britain, France and the United States—have found it necessary to make the income tax one of their principal sources of revenue. The call upon the fortunes of the people of Canada is to take the form of a graduated tax on all incomes of $1,500 and over enjoyed by all unmarried persons or widows and widowers without dependent children, and of $3,000 and over enjoyed by all other persons, as well as by all corporations and joint stock companies. The Department of Finance is now calling for the filing of the necessary forms, filled out as required, before the 31st of March. While penalties for failure to carry out the requirements of the act are provided, it is confidently expected that the people of Canada, jealous of their right to play a major role in the conflict, will respond to this latest call in a spirit of quiet patriotism.

Contributions Acknowledged

The treasurer of the Muskoka Free Hospital for Consumptives desires to gratefully acknowledge the following contributions received from Dalziel by the Field Secretary of the National Sanitarium Association: Collection $1.65, J. C. Gibson $2, Miss E. Miller $2, J. R. Laidlaw $2, Jas. Stark $1, Miss J. C. Galbraith $1, Mrs M. E. Boyle $1, J. H. Steele $1, Rev. G. C. Little $1, W. Stark $1, J. C. Spofford $1, F. S. MacLachlan $1, F. C. Ryan $1, Dr. H. E. Gage $1, Adam Scott $1, W. P. Bennett $1, W. H. Davison $1, Rev. A. J. Crighton $1, J. A. Logie $2, Mrs. F. Scott 50c, P. B. More 50c, D. McKenzie $2, Mrs. J. C. Burchill $3, J. F. Fisher $2, S. F. Ballachey $2, Rev. L. W. Diehl $1, Miss M. L. Rodger $1, Miss M. S. Neilson $1, Colin McArthur $1, Dr. Allen $1, T. H. George $1, Paul Ulsther $1, Robt. Fullerton $1, J. Shoemaker $1, J. J. Jacques $1, J. S. Dewar $1, H. Flak & Son $1, Peter McKinnon $1, J. H. Glover $1, T. Muir 50c, R. E. McGregor 50c.

—Before the end of the session W. McDonald, of North Bruce, will move that a redistribution be made so that the number of members in the Legislature will be cut down from 111 to 82. "There is no reason why the ridings should not be gathered to in the local Legislature as used in the federal elections," states Mr. McDonald. Mr. McDonald's suggestion would make the basis of population about 30,000 for each member that is returned.

—It costs Uncle Sam approximately $5,000 to put a soldier in England, as against $3,700 to place a Canadian soldier in the same place, according to the recent figures given by the War Department. So it is expensive to train and equip a man and send him overseas, unless he is physically fit and stays so.

A great many people buy shoes here

Who are of the c omegain and again kind.

Now, that wouldn't be so if our shoes didn't make it so, would it?

All this talk of ours is only intended to get you to be a tryer of our shoes. That's all.

After that it's up to the shoes to hold you as a steady customer.

They generally do it, but if they shouldn't do it in your case, we want you to tell us about it, because there is a mistake somewhere.

It matters not what your present or future needs in shoes may be, we guarantee you a good service.

Bring us your Butter and Eggs. Cash or Trade.

F. CARTER & SON

THE SPRING DRIVE

Our boys are going "Over the top" and into "No man's land" this spring. No one has any doubt of their ability to get there. There will also be a spring drive on this side of the "ocean, because March is the year's "nine Monday." It is the most fatal month of the year. March and April is a time when resistance usually is at lowest ebb. It is a trying season for the "run-downs" man. But medical science steps in, and says, "it need not be"! We should cultivate a love of health, a sense of responsibility for the care of our bodies. Do not allow the machinery of the body to clog. Put the stomach and liver in proper condition. Take Dr. Pierce's Golden Medical Discovery, to be had at most drug stores in tablet or liquid form; tablets fifty cents a vial, composed of native herbs. This puts the stomach and liver in proper condition. You may be plodding along, no spring, no elasticity, no vim, but as soon as you have put the body into its normal physical condition—oiled the machinery, as it were—you will find new vim, vigor and vitality within you. A little "pep," and we laugh and live. Try it now. Send Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., or branch office, Bridgeburg, Ont., 10c. for trial pkg. The prime necessity of life is health. With spirit and energy you have the power to force yourself into action. The Golden Medical Discovery is the spring tonic which you need.
